Real Estate Record

AND

BUILDERS' GUIDE.

DEVOTED TO REAL ESTATE, BUILDING, ARCHITECTURAL AND INSURANCE INTERESTS.

VOL. I.—NO. 1. PHILADELPHIA, SATURDAY, JANUARY 9, 1886. PRICE 15 CENTS

A BROAD STREET IMPROVEMENT.

There have been many new buildings erected in Philadelphia during the past year, but few, if any, can exceed in beauty and convenience the "MUHR BUILDING," at the southwest corner of Broad and Race streets, which has just been completed.

A portion of the structure will be occupied by H. Muhr's Sons, for the manufacture of watch-cases and fine jewelry. The remaining portions of the building will be devoted to different tenants, in the manufacture of staple articles.

The building is seven stories in height, including an exceptionally high and light basement, with a frontage on Broad street of 100 feet. The Race street frontage is 140 feet, at the western end of which is an imposing driveway entrance to the yard area, which is paved with compressed asphaltum blocks, and in which all the receiving and shipping of goods will take place. The exterior walls of the building, resting upon heavy battered brownstone six feet high, are laid up in pressed and selected stretcher brick, richly decorated with molded brick and terra-cotta work, each front being surmounted by an appropriate pediment, one bearing the name "Muhr Building," the other the date of erection "1885" in raised gilded letters. On each of the corners is a battlemented tower, 114 feet high from the pavement level. In the tower at the corner of Broad and Race streets is a large clock, with dials facing the four points of the compass.

Although a manufacturing building, the architect and engineer, W. H. Geissinger, under whose supervision the entire work has been executed, has made it a decided ornament to the city, and by placing the business entrances, both for drayage and operatives, on the Race street side of the structure he has entirely removed the objections which the most critical person could raise at having a factory on one of the world's finest thoroughfares. The entrance to the office departments of the various floors is from the south end of Broad street front, where the visitor has the choice of ascending to the desired floor by means of an iron stairway, or of being lifted to his destination in the richly carved and upholstered mahogany car of a hydraulic elevator, of the Otis make, in which he may be landed at the top floor in less than half a minute.

Both of the stairways of the building are made strictly fireproof, being in isolated brick shafts, with iron-lined doors, and form an efficient and safe means of exit in case of panic. In addition to these, however, is an outside iron stairway or fire-escape on the wall of the west wing, having a broad landing at each floor. Two power elevators of heavy capacity, one in the Broad street building and one on the outside of the west wing, constitute the means of transporting material to and from the seven floors. The plumbing and sanitary measures of the building are prominent among its many points of excellence. A large fire and burglar-proof vault has been constructed in the office department of each floor. A special belt race has also been provided, in which the belts transmitting the power from a highly finished Corliss engine to the various floors are confined, thus preventing the spread of fire caused by the belt openings in the floors, and at the same time obtaining the advantage of having the head-shafts of each line permanently set in wall boxes, with belts running entirely clear from all obstructions. Interesting in connection with this shaft are the landings, which jut out over each countershaft, for the purpose of lubricating or adjusting the main driving belts. The shaft constitutes a sight worthy of notice, owing to the enormous height of the same, in which the belts and pulleys are driven at a rapid rate.

The area of each floor is about 8500 square feet, well lighted by high windows from two or three sides at the various parts of the building, and, being entirely unobstructed, not a dark corner can be found at any point. The ceilings are 13 feet 4 inches in height, thus naturally insuring good light. The boiler-room is strictly of fire-proof construction, being 26 feet in clear height. The buildings are heated with steam by means of the vacuum-pump system, and brilliantly lighted in every department.

All communications should be addressed,

McNAMEE & BRIGHT, Publishers.

PHILADELPHIA, SATURDAY, JAN. 9, 1886.

THE PHILADELPHIA REAL ESTATE RECORD AND BUILDERS' GUIDE is presented to the business men of Philadelphia with the conviction that there is a field in which it can work to advance the interests of real estate brokers, insurance writers, conveyancers and builders. In striving to attain this object it will, with the utmost care and fidelity, present weekly, for the guidance of its subscribers, the latest and most reliable information upon all matters pertaining to those interests.

Of the many special matters to which attention will be given, we may mention the recorded transfers of real estate in Philadelphia and adjoining counties; the permits issued for the erection of new buildings in Philadelphia and vicinity; accurate reports of the market prices of all building materials; and special reading matter and comprehensive editorials on pertinent topics. All large building operations, in whatever part of the country they occur, will be noted in full. The fullest and most reliable information that can be obtained will at all times be laid before its readers, and the paper will discuss with impartiality all matters pertaining to the welfare of its subscribers.

The publishers of the REAL ESTATE RECORD AND BUILDERS' GUIDE feel convinced that if real estate owners, brokers, conveyancers, insurance writers and builders can have placed in their hands each week, in convenient form, all the transactions occurring in their several vocations, together with the latest market quotations of all building materials, they will find it an invaluable aid in their business. The field which the paper proposes to cultivate is an extensive one, but at all times the best efforts of its conductors will be put forth to make the publication interesting, useful and profitable to its subscribers.

THE list of delinquent taxpayers for 1885, a synopsis of which is published in another column, shows that the year just closed was one of prosperity for real estate owners. Although there has been a decided increase in the number of taxable properties during the past year, there has been a decrease in the number of delinquents, equal to thirty per cent. Some of the wealthiest corporations in the city appear on the list of delinquents, but it is probable that through recent transfers, or other circumstances, they are resisting the right of assessment, on legal grounds.

A BOSTON architect has made some interesting experiments with Portland cement, showing that that material does expand. Three glass bottles were filled with cement and sealed tight. One burst in two days, one in eight days, and the third in ten days.

A PROCESS for toughening timber has been invented, by which it is claimed that whitewood can be made so tough as to require a cold chisel to split it. This result is obtained by steaming the timber and submitting it to end pressure, technically "upsetting" it, thus compressing the cells and fibres into one compact mass. It is the opinion of those who have experimented with the process, that wood can be compressed seventy-five per cent., and that some timber which is now considered unfit for use in such work as carriage building, could be made valuable by this means; and more especially since the rapid consumption of our best ash and hickory will sooner or later render some substitute necessary.

IT is a great mistake for owners of realty to allow their vacant property to be used for advertising purposes, by permitting the placarding of large posters on the fences surrounding their ground. In some cases a rental is received for the privilege granted to advertisers, but in others the posters are stuck up without the knowledge or consent of the owner. The large boards obstruct the lots from view, and keep them from being purchased by investors or for improvement. Buyers are attracted by a nice, clean patch, enclosed with a simple fence, and pass by plots defaced with advertisements. An instance is known where a valuable piece of property sold for a good deal less than its market value, and it was considered that the disfiguring advertisements had depreciated its value.

BUILDING laws mean something in Glasgow, Scotland. A builder recently chose to vary from the plans and specifications filed with the authorities, putting in lighter joists and cross timber than provided for. He was hauled up before the court, fined £21, and ordered to reconstruct the entire building, which was roof-high when the dereliction was discovered.

THE tax upon mortgages in Pennsylvania, owing to the practical workings of the law, is a tax upon a poor man's property, for in nearly every case the mortgagor is obliged to pay the tax. A man who owns a $5000 house, on which there is a mortgage for half its value, not only pays the city tax on the full assessment of his property, but probably also pays the State tax on the $2500 mortgage. The house owner in that case is not only unequally and unjustly taxed, but is to that extent oppressed. The extent to which this injustice exists can be understood when it is known that a large portion of the property in Philadelphia is mortgaged. The evil is one which could be remedied if real estate owners would exact a pledge from legislative candidates that they would vote for a repeal of this law. The State could well spare the revenue which is derived from this tax; but even if the money is needed, there are other resources from which it could better be obtained, thus relieving real estate of a portion of the heavy burden it is now compelled to carry.

Oakland Seminary, with its seven acres of land, belonging to the estate of the late Dr. J. Grier Ralston, has just been sold to Archbishop Ryan, of Philadelphia, to be used by the Catholic Church as a branch of the House of the Good Shepherd, for the better class of females whom the Church find it necessary to shelter in that reformatory institution. The price has not been given to the public. The building was used for thirty years as a ladies' seminary. It is situated on a prominence along the turnpike, in the eastern suburbs of Norristown, and commands a view of the surrounding country for miles around. The site has been spoken of as a desirable one for the St. Patrick's Church, the Schuylkill Valley Railroad encroaching upon the grounds of the present edifice and school, and it is thought now that the church will be sold and a new one erected on the Ralston premises. A petition has been filed in Court for the appointment of a jury to assess damages against the railroad company, to the St. Patrick's Church.

Messrs. Simpson & Wade, who have made a signal success of the new town of Chesilhurst, N. J., have removed their office to No. 7 S. Merrick St., where they will be pleased to see all their old customers and many new ones. They have recently purchased a tract of land at Fort George Island, Florida, and have erected a large hotel and made other improvements.

The new hall at Ridley Park is quite an imposing structure. It is in perfect keeping with its neighboring stately private mansions. A neat cinder sidewalk leads to the building, which, at present, is somewhat isolated. In the opinion of many of Ridley's citizens, however, that portion of the park upon which it is located is likely to be the choicest for building purposes. The hall stands on a lot 150 feet front by 170 feet deep. This will be fenced in by the school board shortly, and Tome and Ward streets and Darby street to Swarthmore avenue, macadamized by the Ridley Park Association. The building is two stories high. The first story, which is the school, is stone; and the second story or hall is brick. The first floor contains three rooms, two school rooms, each 25x33 feet, and a reception room. The hall is divided up into a main audience and two dressing rooms. The former is 33x47 feet, and has a capacity for seating 230 persons. The contract price for the building was $8500. The entire cost, including the land, is about $10,000. Mr. P. A. Welsh is the architect, and Mr. J. R. Shirley the contractor. A tall spire rises above the peaked roofs, which gives to the building the appearance, somewhat, of a church.

REAL ESTATE.

The State of Trade.

The market during the past week has been unusually steady. No important transactions have been reported, nor were there any large sales. However, brokers speak hopefully of the future, and there is a good feeling abroad. It is predicted that there will be a lively spring trade, even if the volume of business should not be so heavy as in other years. There is a better demand for improved properties.

Increased Capital.

The capital of the Philadelphia Mortgage Insurance Company has been increased from $500,000 to $750,000 and all taken. The purpose of the company is to deal in Western mortgages. The stockholders of the company are among the strongest and best known business men of Philadelphia, among them being Stephen A. Caldwell, I. V. Williamson, Henry Lewis, William Wood and Charles Platt.

Our Water Rents and Penalties for Non-Payment.

Water rents are due in advance, and payable February 1st, at the Department's headquarters, northwest corner of Thirteenth and Spring Garden streets. A penalty of five per cent. is added to all bills remaining unpaid on May 1st, and an additional penalty of 10 per cent. on all bills remaining unpaid on July 1st. If bills are not paid by September 1st, the water will be shut off, and will not be turned on again until all arrearages are settled, and the payment of an additional $2 for expenses of shutting off and turning on the water.

Rates for Gas.

The price of gas is $1.60 per thousand feet, and is collectable quarterly from private residences and stores. Theatres and large halls pay their bills weekly, and manufacturers and saloon keepers monthly. A penalty of three per cent. is added to all bills five days after being presented, and if not paid within ten days the flow of gas will be shut off. All bills due for gas consumed in buildings west of Sixth street and north of Vine street are payable at the Spring Garden Office, Thirteenth and Spring Garden streets. All other bills for city properties are payable at the main office, on Seventh street, above Chestnut.

A Telegraph Company's Heavy Mortgage.

A heavy mortgage has been filed for record in the Macon County Recorder's Office. It is filed by the "United Lines Telegraph Company," of which Edward S. Stokes is president, which company will operate telegraph lines through this part of the State, out of New York. The mortgage is for $1.200,000, in favor of the Farmers Loan and Trust Company, of New York City, and is to draw interest, in gold, at the rate of 6 per cent. per annum, until 1905. This is one of the largest mortgage bonds ever filed for record in this county. Business men here look upon the enterprise with interest, as they believe the proposed opposition will give them better facilities and cheaper rates.

1153 Fires in a Year.

There were 1153 fires in Philadelphia during 1885, according to the report of Fire Marshal Wood, or 241 more than in the previous year, and nearly twice the number in 1875.

The fires of 1885 "touched the risks of $9,506,565.66 worth of real and personal estate insurance," the loss on which was about $1,586,972.75. That loss was about $1,500,000 less than the loss in 1885.

The largest fire last year was the one that started at 125 Chestnut street, on February 19, causing a loss of over $212,000. The fire most disastrous to life was the one at 1539 Pine street, on February 21, there being four persons killed and three injured.

Delinquent Real Estate Owners.

The total number of delinquent tax payers for 1885 was 9721, or 4488 less than for 1884. The names of many wealthy real estate owners and corporations appear in the list, but it is probable that they are resisting the payment of the tax, on legal grounds. The number of delinquents in each ward of the city, for the two years mentioned, was as follows:—

Wards.	1884.	1885.	Wards.	1884.	1885.
1	616	534	18	348	353
2	302	282	19	569	495
3	158	152	20	823	794
4	178	158	21	342	306
5	224	188	22	723	623
6	162	180	23	631	747
7	360	303	24	837	758
8	276	255	25	1574	1374
9	176	184	26	790	595
10	289	362	27	818	325
11	148	107	28	881	879
12	168	145	29	543	424
13	240	198	30	388	292
14	278	213	31	378	346
15	594	569			
16	184	128	Totals	12,438	9,721
17	257	148			

Complying with the Fire Escape Law.

Since the Board of Fire Escapes, of Philadelphia, have laid before the City Solicitor the names of the persons, firms and corporations in certain wards, who had not complied with the fire escape law, nearly every delinquent has taken steps to erect proper escapes. There is much uncertainty in the public mind concerning the class of buildings to which the law applies, and for the benefit of all we print the first section of the act:—

SECTION 1. That all the following described buildings within this commonwealth, to wit: Every building used as a seminary, college, academy, hospital, asylum or hotel for the accommodation of the public; every storehouse, factory, manufactory or workship of any kind in which employés or operatives are usually employed at work in the third or any higher story; every tenement house or building in which rooms or floors are usually let to lodges or families; every public hall or place of amusement; every parochial or public school building, when any of such buildings are three or more stories in height, shall be provided with a permanent, safe, external means of escape therefrom, in case of fire, independent of all internal stairways

Fire Escapes Erected.

The Board of Fire Escapes last Thursday informed City Solicitor Warwick that sixty persons had complied with his notification to erect fire escapes. Among them are George Carson, 1917 East York street; Friendship Hall, Sepviva and Norris streets; Ivins, Dietz & Magee, Marshall street and Lehigh avenue; C. A. Blessing, Randolph street and Montgomery avenue; John Dobson, Falls of Schuylkill; Masonic Hall, Manayunk; Kensington Council, O. U. A. M., 208 East Girard ave; St. Christopher Hospital, Lawrence and Huntingdon streets; T. McCracken, Seventeenth and York streets; Baptist Home, Seventeenth and Norris streets; Rosine Home, 3216 Germantown avenue; Robert Dornan, 2431 Amber street; J. Dunlap, Eleventh and Cambria streets; St. Timothy Workingmen's Institute, Manayunk; Morse & Williams, 1103 Frankford road, Powers & Weightman, Ridge avenue and Falls of Schuylkill; John and James Dobson, River road, Manayunk; E. H. Fitler, Tenth and Germantown avenue; Thomas J. Luckey, 2022 Abigail street; Gillender & Sons, Howard street and Columbia avenue; J. Pollock & Sons, Otis street; Masonic Home, 3337 North Broad street; William Schollenberger, Master and Putnam streets.

Real Estate Agents Combine.

The real estate agents of Atlantic City are about forming an association for mutual protection. For several years past their business in that city has been demoralized. Property owners would place their cottages in the hands of two or more agents, and, in many cases, in the hands of every agent in the city. The several agencies published their catalogues, and parties desirous of renting, on obtaining the several lists, would conceive the idea that more property was for rent than was really the case; and again, where two or more agents had the same property for rent, with the rent fixed at, say $500, but permission to accept $450, the regular rent was very rarely obtained, each agent only asking the smaller sum, fearing that the other parties would rent it at that figure, and he would thereby lose his commission. In other cases the owners would rent the property themselves by "throwing off" the agents commission. This made it an inducement for renters to avoid the agents.

The agents have now agreed to accept no property until the owner signs an agreement to pay the agent a commission when the property is rented or sold, and, if it is placed in the hands of two agents, both are to have a commission. The commission for renting will be 5 per cent. on all rents of $1500 or under, and 2½ per cent. on sums over $1500. The commission on sale of property is to be 2 per cent. The agents also agree to show no property not on the books of some member of the association.

The officers of the association are: President, Hon. J. J. Gardiner; Secretary, A. W. Irving; Treasurer, I. G. Adams.

An Active Year for Builders.

During the year just closed building operations have been more numerous, and the trade has been more active than in any previous year in the history of the city. The many different operations for which permits are required exceeded those of 1884 by 1506, and the number of dwellings erected was 1329 more than in the previous year. The following is a comparative statement of the number of operations and of the dwellings enumerated among them for the past five years:—

	1881	1882	1883	1884	1885	Total.
Operations	4250	4355	6045	6394	7900	28,999
Dwellings	2104	2280	3727	4298	5627	18,036

Of the dwellings erected during 1885, 4104 were two stories, 1519 three stories and 4 four stories.

The other operations comprise 158 factories and business houses, 21 chapels and churches, 183 stables, 14 dye houses, 25 boiler and engine houses, 5 skating rinks, 73 shops, 12 ice houses, 7 breweries, 4 laundries, 2 foundries, 6 slaughter houses, 2 coach houses, 2 conservatories, 1 ferry house, 3 church spires, 3 bottling houses, 15 sheds, 2 panoramas, 2 sacristies, 3 halls, 4 market houses, 38 offices, 5 "homes," 1 convent building. 6 drying houses, 2 hotels, 2 club houses, 9 school houses, 383 back buildings, 175 kitchens, 16 one-story buildings, 6 bake ovens, 50 bay windows, 1 reading room, 1 carriage factory, 1 chemical building, 1 studio, 1 milk house, 2 vaults, 1 wagon house, 1 smoke house, 1 public bath house. 1 hot house, 1 lime house, 2 wash houses, 1 dead house, 1 saloon, 1 pump house, 2 photograph galleries. 1 ball alley, 1 grand stand, 5 chimneys, 357 additions, 306 alterations, 139 new fronts, 83 walls, 38 baths, 2 border settings, 13 repairs, 2 floor beams, 1 stairs, 1 porch, and 8 removals.

Laws Relating to Taxes on Real Estate.

Taxes in Philadelphia are due on January 1st of each year, and payable at the office of the Receiver of Taxes in the City Hall. On all bills paid on or before June 30 a discount of one per cent. per annum is allowed. This discount is fixed by ordinance of Councils. No discount is allowed on State tax. After June 30 a penalty of ½ of 1 per cent. is added to all unpaid bills; after August 1st, 1 per cent.; after September 1st, 1½ per cent.; after October 1st, 2 per cent.; after November 1st, 3 per cent.; and after December 1st, 4 per cent. After July of each year a penalty of 5 per cent. is added on all unpaid State taxes. After December 31st unpaid taxes become delinquent, when 5

per cent. more is added, together with 15 cents for advertising each name. On February 1st a penalty of 1 per cent. is added by the Delinquent Department; on March 1st, 2 per cent.; on April 1st, 3 per cent.; on May 1st, 4 per cent.; on June 1st, 5 per cent.; on July 1st 6 per cent.; and on August 1st, 7 per cent., together with interest at the rate of 6 per cent. from December 31 of the year for which the taxes were assessed.

The tax rate for 1886 is $1.85 per $100, which has been the rate since 1883. In 1880 the rate was $2; in 1881, $2.95, and in 1882, $1.90 per $100. The highest rate since the city was consolidated was in 1866 and 1867, when it was $4 per $100, and the lowest in 1868, when the rate was $1.40 per $100. The rate on suburban real estate is $1 23½ per $100, and on farm lands, 92½ cents per $100. The rate of $1.85 is levied upon the following basis: Poor, 6 cents; School, 22 cents; Lighting City, 4 cents; Loan, 71 cents; Highways, 8 cents; Water, 9 cents; Police, 20 cents; Markets and City Property, 3 cents; Fire, 7 cents; Prisons, 2 cents; City Commissioners, 9 cents; Health, 2 cents; Expenses of Municipality, 21 cents—total, $1.85 The total assessed valuation of all kinds of property in Philadelphia during the past seven years is as follows:—

1880	$536,667,834
1881	543,669,129
1882	553,775,229
1883	571,483,255
1884	583,612,683
1885	597,785,428

What Makes an Office Building Popular.

Builders and investors are often puzzled to know what are the qualities which make an office building popular. They see that one building, well located, is never in good demand, while a neighboring structure is always filled with tenants. They look for the reason, and in most cases find that the popular office building fulfills these conditions: It has an attractive entrance; has a quick and accessible elevator; its hallways are light and airy; and the offices are light and convenient.

The attention of persons seeking office accommodations is directed to a given building, either by some of the present occupants, with whom they have social or commercial relations, or from its location and surroundings being suited to their business.

If at the entrance they are repulsed by a contracted doorway, disfigured or concealed with signs, they will scarcely even enter.

If the entrance be fair but the stairs forbidding, they will not ascend. If there should be an elevator, and on entering they are rattled at a slow pace through a dark hole in the building, they will be likely to return to the sunshine without further inspection.

But if, on the other hand, they are attracted into the building by a fine entrance and through a pleasant passage to a convenient elevator, and taking this they find themselves quickly and imperceptibly elevated to broad, light halls above, their favor is won at once, and they have but to find an arrangement of rooms suited to their requirement, well lighted, clean and containing the modern conveniences, to rent at fair prices, to secure their engagement.

While it may perhaps be said that there are some old buildings that show a comparatively large rent roll and small cost of maintenance, it will invariably be found that the loss of rent from bad tenants and vacancies, *in a term of years*, reduces the net income to a low average.

There are many good buildings, the upper floors of which are unproductive. With an elevator these floors would become as valuable as the lower floors, and yet owners throw away the cost of an elevator every year while their tenants either demand lower rents as an offset for the lack of conveniences or desert the building altogether. Nor is it always the large modern buildings that pay the best to the square foot of ground surface, though the very large ones undoubtedly do.

Public Halls Defective in Acoustics.

When architects are requested to draw plans for public halls they should be required to give proof that they understand something of the science of acoustics. In a number of instances recently they have brought into existence legislative chambers, churches and business exchanges utterly unsuited for the purpose of speaking or hearing. In every case we believe that the architect has assured the different committees that the acoustic properties of the rooms would be all right, but after they were constructed it was found that alterations must be made to fit them for the uses for which they were originally designed. There is usually very little difficulty with theatres and opera houses. The cone form of the interior, the galleries, tiers and pillars break the volume of sound, while the stage itself acts as a great sounding-board, throwing the voices forward into the auditorium. The problem there is simplified because the speaking is from one part of the house only. The acoustic properties of many churches are defective, as they are generally modeled after temples which were originally designed for sacrifice and not for speaking. The Roman Catholic cathedrals were intended when first built, in the middle ages, for music and the mass, not for oratory. Hence the artificial sounding-board which they all require. And after all, how few of them are satisfactory to those who go to hear the sermon?

The legislative halls are often defective acoustically, because the speakers occupy different parts of the hall, a fact not taken into consideration by the architects. It has been noticed that in a certain location one speaker of average loudness can be distinctly heard, while a debater with powerful lungs in another part of the room is often inaudible. The problem is still further complicated in an exchange, for there the sounds of the voices come from every direction, and every part of the hall ought to be equally good for the transmission of sound.

The New York Real Estate Exchange has had its troubles also. The architect was sure everything was all right before the opening, nor was any difficulty experienced the first day, when the speeches were made from the stand erected under the dome at the north end of the room. When business commenced, however, and several auctioneers began selling property simultaneously, there was confusion at once, for the waves of sound re-echoed against the marble floor and the flat walls and ceilings. There were no extending galleries or pillars to break the sound or absorb it. By the stringing of wires and other devices this defect has, in a measure, been cured, and will be finally overcome. But building committees and others who have the construction of halls, should insist that the architects give them guarantees, in advance, of their knowledge of acoustics. They usually assume to their employers that they have nothing to learn on this subject, but their excuse, after the mischief is done, is that every new hall is a new problem. This, of course, is all nonsense. With the experience gathered in the construction of churches, legislative halls, and exchanges, there should be no defective structures of this kind.

Our Public Land System.

The public lands of the United States which are still undisposed of and open to settlement lie in nineteen States and eight Territories. In each case, except Ohio, Indiana, Illinois, the Indian Territory and Alaska, land offices are established in charge of an officer known as the Registrar of the Land Office, where records of all surveyed lands are kept, and applications concerning lands in each district are filed and inquiries answered. The public lands are divided into two great classes. The one class have a dollar and a quarter an acre designated as the minimum price, and the other two dollars and a half an acre—the latter being the alternate sections reserved by the United States in land grants to railroads, etc. Titles of these may be acquired by private entry or location under the homestead, preëmption, and timber-culture laws, or, as to some classes, by purchase for cash, in the case of lands which may be purchased at private sale or such as have not been reserved under law. Such tracts are sold on application to the Land Registrar, who issues a certificate of purchase, the receiver giving a receipt for the money paid, subject to the issue of a patent or complete title if the proceedings are found regular by the Commissioner of the General Land Office at Washington.

Entries under land warrants (given mostly for military services under acts of Congress) have fallen off very largely by the absorption of such warrants, there having been no military bounty-land warrants provided for on account of services in the late war. Entries under the preëmption law are restricted to heads of families, or citizens over twenty-one, who may settle upon any quarter-section (160 acres), and have the right of prior claim to purchase, on complying with certain regulations.

The homestead laws give the right to one hundred and sixty acres of a dollar-and-a-quarter lands, or to eighty acres of two-dollar-and-a half lands, to any citizen, or applicant for citizenship over twenty-one who will actually settle upon and cultivate the land. This privilege extends only to the surveyed lands, and the title is perfected by the issue of a patent after five years of actual settlement. The only charges in the case of homestead entries are fees and commissions, varying from a minimum of $7 to a maximum of $34 for the whole tract entered, according to the size, value or place of record.

Another large class of free entries of public lands is that provided for under the Timber-Culture Acts of 1873-78. The purpose of these laws is to promote the growth of forest trees on the public lands. They give the right to any settler who has cultivated for two years as much as five acres in trees to an eighty-acre homestead, or, if ten acres, to a homestead of one hundred and sixty acres, and a free patent for his land is given him at the end of three years instead of five. The limitation of the homestead laws to one hundred and sixty acres for each settler is extended in the case of timber-culture, so as to grant as many quarter sections, of one hundred and sixty acres each, as have been improved by the culture, for ten years, of forty acres of timber thereon; but the quarter sections must not lie immediately contiguous. The fees and commissions in timber-culture entries vary from $13 to $18 for the tract.

From the report of the Commissioner of the General Land Office for 1885 it appears that during the last fiscal year the sales, entries, and selection of public land under various Acts of Congress relating thereto embrace 20,113,663.37 acres, and of Indian lands 881,850.21 acres, making a total of 20,995,513.58 acres, being a decrease, as compared with the year 1884, of 6,535,656.41 acres, and an increase over the year 1883 of 1,565,480.78 acres.

Among the classes, in acres, were the following: Public sales, 3,093 76; private entries, 473,023.84; preëmption entries, 2,311,296.71; timber and stone land entries, 139,301.93; desert-land entries, 928,250.06; mineral-land entries, 35,215.02; coal-land entries, 3,675.19; town-site entries, 60.34; abandoned military reservations, 1,318.89; homestead entries (original), 7,415,885.53; timber-culture entries (original), 4,755,005.57; entries with military bounty-land warrants, 26,833.18; railroad selections, 3,558,914.10; Indian homestead entries, 3,637.77; entries with agricultural college scrip, 961.83; entries with private land-claim scrip (Supreme Court), 7,944.37; entries with Valentine scrip, 400.00.

Disabilities of Real Estate.

That real estate, under the most favorable conditions, labors under many disabilities which should not exist, every one familiar with the subject will admit. Title companies have been organized to perform work which ought not to be necessary.

A commission has been appointed by the Legislature of a neighboring State to devise plans for securing greater simplicity in legal forms, and the reform movement has been recognized in this city, where a number of conveyancers have discussed the matter at a meeting called for that purpose. These are all evidences that men are beginning to

discover the necessity for a change in the administration of real estate interests. The evils of private ownership in land, which Mr. Henry George affects to have discovered, exist, but they are not due to the fact of possession. They are due rather to the incompleteness of possession; to the fact that while men nominally hold land as a personal appurtenance, they hold it by a tenure that withdraws it from the list of readily exchangeable commodities. It absorbs an enormous proportion of the fruits of annual production, while it contributes nothing or next to nothing to the resources of commercial exchange.

But it is not alone the legal rubbish under which it is buried, and uncertainties respecting title, that prevents the full utilization of landed property as an agent for keeping in motion the forces of industry. We need, it is true, and must have, such a simplification in the forms of transfer that titles may be verified without tedious and costly searches and a thorough investigation of their almost ancestral records. It is a shame that, after the practicability of such reform had been demonstrated in several of the young and rising colonies of the British Empire, we have so long failed to imitate the example furnished. But even after we have simplified the forms of transfer, and made titles to real estate as clear as titles to stocks, or any other description of securities, we shall not have removed all the causes that lead to the sequestration of capital invested in realty.

One of the most formidable obstacles in the way of placing real estate on a perfect position of equality with other kinds of property in the channels of exchange, is found in the uncertainty in which values are involved. There is no true basis for estimate. The property, not being handled in blocks, and varying in value according to location or the service for which it is utilized, is subject to the widest differences in valuations. In growing cities prospective estimates, founded often on fanciful and mistaken ideas of the course of future improvements, are permitted to give inflated ideas of values. In any such case strong investors who are able to buy and hold will place one estimate on their possessions, while the builder who wishes only to improve and sell will place another, and often very much lower estimate. The latter will look to the present market value, founding his estimate upon recent sales, while the former, forgetful sometimes even of the incidents of taxation and interest, will see only what he thinks will be the inevitable increment.

This obstruction is possibly beyond the reach of any of the ordinary commercial agencies that fix the values of other marketable property, and so long as it lasts it will be idle to suppose that real estate securities will exchange freely in the market. The merchant who holds a piece of realty which on his own personal judgment he estimates at $100,000, would not consent that an estimate of $75,000 made by a banker or broker should be permitted to limit the exchanging power of his possession. Not until he was threatened with bankruptcy, would he consent to see his property go at what he would consider such a ruinous sacrifice. Real estate exchanges might do a great deal to correct this difficulty. Broadly and generally, over fields covered by their transactions, their estimates would be accepted as an approximation to true values; but without a vast and not heretofore contemplated enlargement of their machinery they could not cover the ground sufficiently for the work of estimating in detail. Every piece of real estate should have a definite and fixed value, not regulated, it is true, by the agency that makes the estimate, but holding the established figures until the laws of trade have compelled a readjustment.

Assessment officers seem like the natural agents for securing this reform. Their functions at present appear to be exercised for the misrepresentation of values; and no one who wishes to buy or sell a piece of property pays much attention to their figures. Their work is sufficiently regarded, however, to show that, under a better regulated system of assessment, their estimates, made from year to year, might represent the true market value of the property assessed. But it does not now so represent it, and the entire community suffers for the irregularity.

It might be objected that it would be an enlargement of the functions of assessors to make them the regulators of prices. But this is not proposed. Prices must always be regulated by the exigencies of the market, influenced, it should be said, also, by an intelligent popular comprehension of economic lands; but assessors should be compelled to watch more closely the conditions of the market, and to make their estimates accordingly.

Suburban Homes on the Pennsylvania Railroad.

The adaptability of the country along the main line of the Pennsylvania Railroad, near this city, for suburban residences, has been appreciated during the past two years by a large number of Philadelphians. Building operations have never before been so numerous in that favored section, and the country is dotted over with hundreds of handsome and costly dwellings. Upon many of these houses, and the spacious grounds which surround them, a small fortune has been expended. Among the Philadelphians who are now erecting dwellings in that section, and which will be occupied during the coming spring and summer, are many of the most prominent business and professional men of the city.

At Overbrook, Joseph B. Townsend, Jr., the attorney-at-law, has erected a handsome house on Union avenue. Merion will receive an acquisition in Charles Hartshorne, Vice-President of the Lehigh Valley Railroad, Mrs. Anna W. Baird, Richard H. Davids and George L. Crawford, the lawyer. At Bala, a prominent physician has erected a dwelling at Bryn Mawr and Highland avenues. T. Broom Belfield, the brass founder, will occupy a new dwelling at Elm. Mr. Isaac H. Clothier, of Strawbridge & Clothier, has erected a magnificent country seat at Wynnewood, where Mr. Pierce Archer, the lawyer, will also occupy a new dwelling. Haverford will secure Mr. Charles Williams, well-known in insurance circles, while Mr. C. P. Perkins, of the Pennsylvania Railroad, will locate at Bryn Mawr. At Rosemont, Mr. Elbert Kochersperger, of the Philadelphia National Bank, Mr. Henry F. West, President of the Philadelphia Warehouse Company, and Mr. William T. Tiers, the tea importer, have erected elegant new homes. Charles McKeone, the soap manufacturer, will locate at Villa Nova, and David R. Garrison, the lumber merchant, will occupy a new house at Radnor, while another lumber merchant, Mr. Theodore Williams, will not be far away—at St. Davids. At Wayne, Dr. Joseph C. Egbert, and one of our leading business men, expect to move into new dwellings. Eagle will rival Merion in the number of its handsome new residences; Joseph R. McElroy, the real estate broker, D. S. Newhall, Assistant Secretary of the Pennsylvania Railroad Company, Henry D. Hughes and James Robertson being among those who will move to the place. T. M. Rogers, the architect, in closing the list, has designed a handsome residence for himself at Devon.

The houses erected by Mr. Hartshorne, Mr. Clothier, Mrs. Baird and Mr. Garrison, will rank among the handsomest country seats to be found near Philadelphia. In each case from $50,000 to $100,000 has been expended in erecting the dwelling and beautifying the grounds.

Highway Bills Approved by Councils.

At the meeting of City Councils on the 7th inst., action was taken on a large number of bills to open, grade and pave certain streets in Philadelphia; to build sewers and to lay water pipe. In Common Council the measures of this character which were passed were as follows:—

To Open Streets.—Gratz street, between Berks and Norris streets, Twenty-eighth Ward; Wyalusing avenue, between Lancaster and Haverford avenues, Twenty-fourth Ward; Pennsylvania avenue, between Twenty-fifth and Thirtieth streets, Fifteenth Ward.

To Grade Streets.—Palethorp street from Huntingdon street to Lehigh Avenue; Comly and Erdrick streets, in the Twenty-third Ward; Tasker street, in the First Ward; Brown street, in the Twenty-fourth Ward; Hansberry, Morris and Bouvier streets, in the Twenty-eighth Ward; Centre street, in the Twenty-second Ward; Queen lane, in the Twenty-eighth Ward; Longshore, Washington, Tyson, Jackson, Glenlock, Ditman, Marsden and Vandyke streets and Torresdale avenue, in the Twenty-third Ward, with House of Correction labor; and Oregon street, between Markoe and Forty-seventh streets.

To Pave Streets.—Parrish street, between Forty-second street and Lancaster avenue; Tasker street, from Otsego to Ash; Poplar, Winchester and Baldwin streets, in the Twenty-first Ward; Duval street, from Germantown avenue to Adams street; Bouvier street, from Montgomery avenue to Berks street, in the Twenty-eighth Ward; Dudley, Palethorp, Seventh and Berks streets, and Church street, between Nash and Chew streets, Twenty-second Ward.

To Revise Grades.—Church street, Frankford; Mount Vernon street, between Division and Fowler streets, Twenty-first Ward.

To Lay Water Pipe.—On Church street, Twenty-second Ward; and on Twenty eighth, Richfield, Eleventh and Warnock streets and Indiana avenue, Twenty-eighth Ward.

To Build Sewers.—On Lombard street, between Broad and Fifteenth streets; and on Lynn street, between Twenty-second and Twenty-third streets.

An Interesting Real Estate Suit.

The Supreme Court of Pennsylvania last week heard argument on the interesting real estate case of Warren vs. Steer, which came before it on a writ of error from Common Pleas Court No. 2, of Philadelphia. The controversy was about a piece of property on Eighteenth street, between the wife of the late William J. Warren, of this city, and the purchaser from Henry Davis and wife, the brother-in-law and sister of Warren. The property was given by Warren to his sister in 1854. He purchased it and had the deed made out to his sister. It was registered in her name at the Survey Department, although Warren still continued to collect rents and manage the property It was alleged by the widow that a trust had resulted in Warren's favor, although the property is in his sister's name, inasmuch as there was not sufficient evidence to rebut the presumption which equity raises when property is purchased with one man's money and title taken by another. The court held the case under advisement.

A City's Liability for Safe Streets.

Justice Paxson has filed an opinion in the Supreme Court, in the case of Monongahela City vs. Fisher. Fisher recovered damages against the city for an accident occurring upon a country road within the city limits, the Court below holding that under the charter of the city, it was bound to keep its streets clear from obstruction and in good condition and repair. In reversing the lower court, Justice Paxson holds that, although this rule may apply to the closely built-up portions of a town or city, it has never been held to be the rule as regards country roads. They are seldom, if ever, kept in repair from side to side, a sufficient portion of the middle only being kept in a smooth condition and safe and convenient for travel.

—A Paper Door.—A durable and weighty-looking door is now made of paper. While it costs about the same as wood, it is much better, because there is no shrinking, swelling, cracking or warping. It is composed of two thick-paper boards stamped and moulded into panels and glued together with glue and potash, and then rolled through heavy rollers. It is first coated with a water-proof coating and then with a fire-proof coating, and is painted and varnished, and hung in the ordinary way.

—It is said that the making of white brick in France, from the immense accumulations of waste sand at glass factories, is likely to prove a valuable industry. The process of production consists in subjecting the sand to an immense hydraulic pressure and then baking in a furnace at a high temperature, so as to produce blocks of various forms and dimensions, of a uniform white color, and of almost pure silex. The product is unaffected by frosts, sun or rain.

NEW YORK REAL ESTATE.

The trouble at the County Clerk's office seems not altogether at an end. It is stated that the officials decline to return a search under twenty days. The completion of several important purchases was adjourned yesterday on this account. As the officials are now paid entirely by salary, and not by fees, they seem inclined to do all they can to prove that the change of system has some disadvantages. John V. Dudley, of No. 171 Broadway, has been posted for membership in the Real Estate Exchange, proposed by John Davidson and Nathanial Niles; also John M. Gibson, of No. 137 Broadway, proposed by John R. Foley and Jere Johnson; also T. Oliver Carter, No. 39 Nassau st., proposed by Hale J. How and James Carr.

An Efficient Fire Department.

The work that the New York Fire Department has accomplished during the past year, justly entitles it to the credit of being second to none in the world. The active force of the department comprises 900 men—1 chief, 2 assistant chiefs, 12 battalion chiefs, 164 company officers, 110 engineers, and 611 firemen and privates. The Fire Department now consists of 54 engine companies, 19 hook and ladder companies, and 2 water towers. The engines, hook and ladder carriages, and other running apparatus and wagons, number about 300. The total number of horses is 262.

During the year there have been 2472 fires, causing a loss of property valued at $3,966,401. The monthly fire record for 1885, and the corresponding dates of 1884, together with the estimated losses, are given below:—

	1884		1885	
	Fires.	Loss.	Fires.	Loss.
January	262	$563,631	247	$587,496
February	237	861,283	193	121,035
March	232	433,251	203	300,067
April	246	374,690	218	553,210
May	203	284,373	188	423,171
June	192	372,942	225	117,712
July	222	199,574	176	126,146
August	132	153,040	143	182,279
September	161	203,470	172	129,822
October	187	258,607	183	344,105
November	198	210,360	195	208,285
December	200	254,180	241	356,551
Totals	2472	$3,966,401	2381	$3,450,379

The following shows the amount of insurance on the property injured or destroyed by fire during the year, compared with that of 1884:—

	1885.	1884.
January	$4,139,646	$3,037,929
February	3,573,900	1,571,250
March	2,430,495	2,519,803
April	2,973,788	8,236,849
May	1,859,525	1,829,923
June	2,936,126	2,936,540
July	2,653,675	1,127,605
August	1,341,000	1,477,040
September	1,619,735	1,279,400
October	2,652,200	2,048,860
November	2,900,658	2,817,100
December	2,619,860	2,030,000
Totals	$33,660,600	$25,006,299

The casualties during the year were numerous. Four brave firemen were killed while in discharge of their duty and 180 were injured, many of them seriously.

A Good Year for Builders.

The year just brought to a close has been a very successful one to builders in New York city. An examination of the records of the Department of Buildings shows that during 1885 plans for 2946 new buildings were filed and acted upon, against 2905 in 1884, or an increase of 41. The estimated cost of these new buildings is $45,537,360. It has been thought that the flat-house speculation has been overdone, but it appears not, for there are 325 flat houses to be built, at an outlay of $5,755,500. The poor are cared for to the extent of 765 tenement houses, estimated at $13,191,700. The balance is made up of places of business and public and private buildings, including 3 theatres.

Plans for the alteration of 2310 old buildings have been filed during the year, representing a cost of about $5,718,000 against $5,000,000 last year. Two thousand six hundred and fifty-six buildings were reported as unsafe, and complaints were received against 2972 others. The following figures show the rapid growth of New York city, as represented annually for the last ten years in the estimated cost shown by the number of plans filed:—

	Est. Cost.		Est. Cost.
1876	$15,903,880	1881	$43,291,300
1877	13,365,114	1882	44,793,186
1878	15,219,680	1883	43,214,346
1879	22,507,322	1884	44,160,423
1880	29,115,385	1885	45,537,360

BUILDERS' NOTES.

THE CITY'S PERMITS.

New store front, 1321 Arch st., Stacy Reeves & Sons, 120 N. Thirteenth st.

New front, N. W. cor. Franklin and Race sts., John G. Ruff, 825 Filbert st.

Two-story brick dwelling, 16 ft. by 31 ft., 826 Burns street, Lewis H. Dunn, 2126 Sharswood street.

Four 2½-story stone houses, 18 ft. by 50 ft., N. E. cor. Ridge ave. and Jefferson st., Wm Blair, 2048 Reed st.

Three-story brick store and dwelling, 18 ft. by 45 ft., West side Twenty-seventh street, south of Columbia avenue, Louisa Davidson, 2629 Oxford Street.

Twenty-five two-story brick dwellings, 14 ft. by 35 ft., South side Fernon street, between Twentieth and twenty-first, Simpson A. McVickar, 913 South Thirteenth street.

One-story brick building, 13 ft. by 15 ft., N. E. side Lancaster ave., between Thirty-ninth and Spring Garden streets, J. K. Little, 642 North Fortieth st.

Four two-story brick houses, two 16 ft. by 44 ft., two 14 ft. by 40 ft., S. side of Master st., between Twenty-seventh and Twenty-eighth sts, C. E. Coulston, 1408 N. Twelfth st.

Operations Outside the City.

—The Episcopal Society, of Wayne, Pa., will erect a new church edifice.

—The County Commissioners of Murray County, Ga., will build a court-house at Spring Place.

—Thos. E. Blackshear and others, of Thomasville, Ga., contemplate building a factory for making picket fencing.

—The congregation of the Wall Street M. E. Church, Auburn, will erect a new edifice. Address the Board of Trustees.

—Mr. Waterman, of Aurora, Ill., will erect a large block of stores and dwellings. Architect, Theo. Wadskier, 218 Lasalle St.

—Wayne, Pa., is to have a system of waterworks. Plans and specifications are now being prepared.

—Water-works are to be constructed at Gallatin, Tenn., at a cost of $35,000. Work will begin March 1st, 1886. Address Wm. Spradin, engineer.

—B. F. McCormick, Mt. Sterling, Ky., will erect at once one large 2-story brick warehouse, with elevators, on the corner Locust and Sycamore Sts.

—Lazarus Silverman, 93 Dearborn St., will at once erect a furniture factory at the cor. of Fillmore St. and Pan Handle tracks. Architect, Oscar Cabb, 57 Major Block.

—The Plimpton Manufacturing Co. (envelope and stationery), Hartford, Conn., will erect a four-story building in the spring. Contracts not yet awarded. O. H. Easton, Hartford, is the architect.

—St. Luke's Episcopal Church, Mont Clair, N. J., will erect a new edifice on the corner of Union Street and Fullerton Ave. The lot, which cost $25,000, has been donated by Capt. Wm. Fellowes.

—Lockwood, Greene & Co., mill engineers, of Providence, R. I., have recently made plans for a wool stock-house, 202 feet long by 103 feet 4 inches wide, two stories and basement, for the Riverside and Oswego mills, and they are now erecting the same at their Providence mills.

—The Sumner Glass Co., Sharpsburg, Pa., are looking for a site on which to erect new works.

—Peter Emshe, sewer engineer, Buffalo, N. Y., has prepared plans for a $150,000 sewer.

—Taylor & Crate, Buffalo. N. Y., have bought a saw mill at Chattanooga, Tenn., and will make additions.

—The Fredonia Watch Co., Fredonia, N. Y., will remove their factories to Peoria, Ill., where they will erect new brick factories. E. D. Howard, president.

—The Oswego Hosiery Co., Oswego, N. Y., will remove to Canastota, N. Y., where they will erect a building to be ready for occupancy in thirty days.

—The congregation of the French Catholic Church, West Troy, N. Y., will erect a schoolhouse on the corner of Stafford and Buffalo Streets. Honore Goyette is one of the interested parties.

—The Riverside and Oswego Mills, at Providence, R. I., are adding to their plant a three-story building, 244 feet long by 69 feet 4 inches wide, and in connection with same a boiler house, engine house and chimney. Plans for the buildings and arrangement of power, shafting, etc., are being made by Lockwood, Greene & Co., mill engineers, Providence.

Morrisson & Woodward, Chattanooga, Tenn., will build an addition to their mill, and add new machinery. Cost..... $5,900

The F. C. Bishop & Co. Company, of Chicago, Ill., has been incorporated. Francis C. Bishop, James N. Buchanan. 184 Dearborn St., Fred. N. Bishop and Wm. M. Golden, incorporators. Capital stock..... 30,000

J. C. McCrary, of Madison, N. C., will sink a shaft and add new buildings, etc. Estimated outlay..... 50,000

The Western Coal and Iron Company, of New York, has been incorporated. George W. Dithridge, C. M. Reynolds, H. M. Conover, F. H. Campbell, E. L. Schumann and John S. Smith, 45 William St., incorporators. Capital stock.....1,000,000

The Rubber Paint Company's Works at Cleveland, Ohio, have been destroyed by fire. Insurance, $11,500; loss..... 25,000

Workshop Notes.

—Cherry may be stained to imitate mahogany by dipping it in a solution of logwood chips, digested for twenty-four hours or more in vinegar; continue the dipping until the proper color is obtained.

—Polished floors should be rubbed two or three times with linseed oil, and then polished every week with turpentine and beeswax. The oftener the oil is rubbed in to begin with, the darker the boards will be.

—A very complete filling for open cracks in floors may be made by thoroughly soaking newspapers in a paste made of one pound of flour, three quarts of water, and a tablespoonful of alum, thoroughly boiled and mixed; make the final mixture about as thick as putty, a kind of paper putty, and it will harden like papier-mache.

—Polish for Pine Wood.—A wash of one part nitric acid in ten parts of water will impart a stain resembling mahogany to pine wood that does not contain much resin. When the wood is thoroughly dry, shellac varnish will impart a fine polish to the surface. A glaze of carmine or lake will produce a rosewood finish. A turpentine extract of alkanet root produces a beautiful stain, which admits of French polishing. Asphaltum, thinned with turpentine, makes an excellent mahogany color on new wood.

—To glue leather to iron, paint the iron with some kind of lead color, say white lead and lampblack; when dry, cover with a cement made as follows: Take the best glue, soak it in cold water till soft, then dissolve it in vinegar with a moderate heat, then add one-third of its bulk of white-pine turpentine, thoroughly mix, and by means of the vinegar, make it of the proper consistency to be spread with a brush, and apply it while hot; draw the leather on quickly, and press it tightly in place. If a pulley, draw the leather around as tightly as possible, lap and clamp.

—The glues generally used have the inconvenience of leaving yellowish traces, which have a disagreeable appearance, especially if the articles to be joined together are transparent. The following process yields a glue, gum, or cement, which is absolutely colorless: Mix in a stoppered bottle sixty parts of chloroform and seventy-five parts of caoutchouc cut into very small fragments. When it is dissolved, and the mixture is quite fluid, add fifteen parts of mastic in tears, and let the whole digest for eight days. The glue thus prepared is used in the way commonly directed for joining glass, porcelain, etc.

REAL ESTATE MARKET.

Real Estate Sold at Auction.

FREEMAN & CO.

Mortgage of $500 on 3-story brick dwelling, 2118 Lombard St.	$ 325

—Ten thousand acres of land have been leased by Pittsburgh capitalists, for natural gas wells, in the neighborhood of Bolivar, about twenty miles west of Johnstown, Pa.

—It is reported that W. K. Vanderbilt intends to purchase the island of Jekeye, off the Georgia coast, near Brunswick. He recently visited the place, and was pleased with it. The island is about nine miles long and two wide, and is one of the most beautiful beaches of the Atlantic coast. Andrew Carnegie, of Pittsburgh, owns the extreme end of Cumberland Island, adjoining Jekeye.

—Land Commissioner Sparks has made a decision affecting the grant of lands within the conflicting limits of the Atlantic and Pacific and branch lines of the Southern Pacific Railroads in California, holding that the latter company has no legal claim to lands embraced within the indemnity belt of the former. The decision affects the odd numbered sections within an area of 800 square miles, or about 250,000 acres.

Ingenious Device for Taking Down a Chimney.

Builders who have experienced trouble in tearing down chimneys, and attempting to save the bricks at the same time, will appreciate the following ingenious arrangement which was designed and put in use at the Middesborough Iron Works: In taking the chimney down the bricks had to be lowered inside, as it was situated in a crowded locality, and it was desirable to lower them with as little damage as possible, as they were to be used again for building purposes, and would have been broken by throwing them down on the inside, and lowering by ordinary mechanical means was too tedious and in the present instance impracticable. The following device was adopted which would allow them to fall by their own gravity, and at the same time be cushioned sufficiently to break their fall and prevent damage. In order to do this an air-tight iron box was placed at the bottom of the chimney; this box was fitted with an air-tight door, mounted on hinges and closing on an india rubber face, against which it was tightened by a wedge.

A wooden spout, the edges caulked with white lead, making it air-tight, was then fixed on to the top of the box and carried up the chimney.

The inside measure of this spout was slightly larger than a brick, so that the air would cushion it sufficiently to break the fall and prevent damage. The air-tight box was opened by an air-tight door which, when full, was opened by a workman, at the bottom and the bricks removed. This device was simple, ingenious, and proved quite effective.

Building Association Reports.

The Relief took in $1390.50. The fourth series, which matured in October, has been paid off. Borrowers were released of mortgages to the extent of $7550, and the non-borrowers received the same amount.

The Passyunk is three years old, and has 1511 shares in one single series. The members have contributed dues aggregating $54,396, and have made a profit of $5978.67. Each share has paid in $36, and gained $3.98, which is equal to 7.33 per cent. per annum. The total assets are $60,108.19. During the past term the receipts were $26,575.46, loans of $20,800 were made, 114 shares were withdrawn, requiring $3645.12, advance payments of $294 were returned, and $247.50 was paid out for expenses. The society has no real estate on hand.

The Ayrora is a single series society, which has passed its fifth year. The receipts were as follows: Dues, $13,017; interest, $3978; premiums and fines, $48.26; loans paid back, $6922.43, and sundries, $1148.39; total, $25,161.12. The disbursements were: Loans, $8400; withdrawals, $15,554.91; advance payments returned, $24.86, and expenses, $247.50. The assets are; Bonds and mortgages, $67,400; cash, $933.85; arrearages, 397.82; total, $68,731.77. The members have paid in $56,520 in dues, and the shares (942) have earned $11,180. The shares are now worth $72.93, on which $60 has been paid. The gain of $12.93 represents 8.58 per cent. per annum.

The German Enterprise has closed its fifth year. In this association the money is loaned at 6 per cent. interest without premium. The borrower pays back his loan in larger or smaller installments with interest. The association has 509 shares borowed on and 1530 free shares. The borrowed shares are in effect cancelled at the time a loan is taken, the payments on the same are payments on account of the loans and only shares not borrowed on participate in the profits. The amount of interest paid is reduced annually to agree with the balance owing. The present loans when first made aggregated $119,800, of which $51,718 has been paid off in the manner described above. The borrowers now owe $68,082, and the other assets run the grand total up to $69,700.98. The free shares have paid in 53,280, on which a profit of $7845.65 has been earned, which is full 6 per cent., and a surplus of $1713.41. The receipts for the term were $52,450.14. The disbursements were: Loans, $33,250; withdrawals, $11,764.07; advance payments withdrawn, $5320; interest on same, $626 89, and expenses, $298.20. The members are paid in advance $8262.44. The arrearages are only $278. The officers say that the association works entirely to the satisfaction of the stockholders.

The Home-makers sold at last meeting $4500, twenty-two and one-half shares, at an average premium of twenty-five cents per share, payable monthly. The third series was opened, and 200 shares subscribed for. This society charges interest at the rate of 5 per cent. per annum and allows a rebate of interest annually to the extent of dues paid in during the year. The old board of officers was elected, with William C. Wheeler, President; E. E. Nice, Vice-President; William Nice, Treasurer, and S. D. Jones, Secretary. The society is now two years old and transacted a cash business the past term of $56,870.25. The expenditures were as follows: Loans, $33,125; withdrawals, 3281.57, and expenses, $446.75. The assets are: Mortgages, $61,000; cash, $1693, and sundries, $817.98; total $64,834.91. Two thousand three hundred and seventy-one and one-half shares have paid in $56,916 and earned $3394.98, which equals $1.43 per share, or 6 per cent. per annum.

—C. Harry Showaker has opened an office at the N. E. cor. of 21st st. and Columbia ave, but still continues to occupy his old quarters at 17th and Oxford.

—Henry R. Coulomb, the builder, of South Eleventh street, will, it is said, commence the erection of a number of houses at Chester in the spring.

JOHN W. MURRAY, Esq., PHILADELPHIA, January 14, 1885.

Prest. Title Guarantee and Trust Company, 55 Liberty Street, New York.

DEAR SIR:—In response to your request for some information in regard to our experience with the Real Estate Title Insurance Company of Philadelphia, I would say that our Company takes their policies in place of the abstract of title, searches and opinion of counsel, formerly required, and pays out its money at once, on presentation of the bond and mortgage and policy of the Title Company, without any other examination or evidence of title.

I consider that the convenience, saving of time, and security afforded by such companies, are of great value to all investors in real estate and mortgages.

Very truly yours,

S. A. CALDWELL, *President.*

PHILADELPHIA, MONDAY, JAN. 18, 1886.

HOUSE ventilation is a subject that often perplexes architects and builders. There are many theories in existence on the subject, any one of which, if put into practice, would afford some measure of relief to the many thousands who work and live in poorly-ventilated apartments. But it is not always that a real estate owner is willing to provide good means of ventilation for his building, particularly if there is an additional expense. Speaking upon this subject before the Toronto Sanitary Association, Mr. David Dick controverted the theory that the carbonic acid of an inhabited room can be drawn off by outlets placed at the floor level, which is the French practice. He pointed out that, in view of the principle of diffusion of gases, it is impossible to expect that carbonic acid, although the heavier gas, will so far separate itself from the other components of the atmosphere as to be susceptible of withdrawal at a low level. According to Mr. Dick, the only factor to be regarded in ventilation is temperature. The air is cold at the floor line and warm at the ceiling; the difference in rooms artificially heated or full of people being seldom less than 20° Fah. Owing to this tendency of heated air to rise, and to be supplanted at the floor line by cold air coming in from crevices in the doors and windows, etc., Mr. Dick considers that a room cannot be properly warmed solely by the radiant heat of a fire. The heat from this source should be helped by some means for preventing the draughts of cold air on the floor.

With this view, Mr. Dick advises that rooms should be provided with many inlets for warmed fresh air at the floor line, the effect of which would be to drive up all impure air toward the hotter stratum near the ceiling. An outlet at the ceiling line would then carry off the whole of the vitiated air. As the warm air begins to rise as soon as it enters the room, the more it is subdivided into separate inlets the better, because it will ascend by the most direct line to the outlet; and therefore a number of small streams will move the general body of air in the room more effectually than one large current, which would be likely to pass through the body of air without affecting anything that did not happen to be directly in its path.

The temperature of the inflowing air should be moderate, and its velocity low. It is desirable, however, that there should be only one outlet for foul air from an apartment, because if there were more than one the draught might be unequal, and then one would pull against another, causing a flow of air down one and up the other, instead of from the proper inlets. Of course, the one outlet need not appear as such in the apartment, as its mouth may be concealed by a perforated cornice or other device.

EXPERIMENTS were made, some time ago, at the Kronenberg workmen's colony, near Essen, Germany, belonging to the celebrated steel works of Krupp, for the purpose of purifying refuse water from the houses sufficiently to allow of its flowing into a river without danger of the water of the latter being rendered unfit for cleansing purposes. The *Chemiker Zeitung* remarks that this is as much as can reasonably be expected from a process of purification, it being evident that the use of river water for drinking is a remote contingency, against which no special precautionary measures are necessary. The system of purification in question is founded upon the simple fact that all the substances held in suspension by refuse water, and such dissolved substances as have a tendency toward decomposition, can be easily precipitated and decomposed by a relatively small addition of lime and green vitriol. The former is first added, and when it has exercised its full decomposing power, the sulphate of iron completes the process of purification. At the Kronenberg colony this work is carried on satisfactorily by means of two basins, into which the chemical agents are introduced by a simple method. There is an ingenious contrivance for regulating the supply of chemicals, so that it may be in proportion to the quantity of water to be treated. This is effected by the action of a water-wheel, the speed of which is regulated by the volume of refuse water coming in, this varying at different times of the day, according to the domestic operations going on. The cost of the process is about one-tenth of a penny per cubic metre (about 35 cubic feet) of liquid treated.

A ROOF, pronounced superior to that of slate, because of its lightness and other advantages, is now made of any fibrous pulp. From this material tiles of any shape desired are formed by pressure under machinery, or by any other method which may suggest itself. Pressed into the designs wished for, the pulp tiles are partially dried, previous to being subjected to a waterproof solution. Thoroughly impregnated with the preparation to resist moisture, they are baked, to harden in them the waterproof mixture. After the baking, the tiles are treated to a mixture imparting an enameled surface; to this is added a coating of sand, whereby the pulp is rendered proof against the action of heat or flame. By the use of different colored sands, a variety of tints may be imparted to the tiles, which, after the application of the enameling mixture and sands, are baked a second time, after which they are ready for use. Beside the inherent lightness of pulp tiles, which obviates the necessity of a heavy frame to support a weighty roof, the pulp tile, being tough and not brittle, like slate, is far less liable to be broken from blows, stones thrown upon them, or human footsteps. Again, slate tiles cannot be laid compactly together on a roof, on account of their brittleness, which prevents their being drawn tightly together by nails. Through the fibrous pulp nails may be driven as close home as in shingles, thereby binding them closely to the bed and together without any possibility of lateral movement, or being blown away in a high wind, as slates loosely fastened on roofs so frequently are. Nails penetrate the pulp tiles more easily than shingles, and lie closer together, being more elastic than wood.

WHEN walls are to remain simply lime-washed or kalsomined, they are much more effective and prettier if left with what the masons term a rough finish. On this the tint of the wall shows bright and clear, with effective shadows, and it has nothing of the cold, hard look of a smooth surface, or hard finish. No doubt the healthiest surface that living and sleeping rooms can have is whitewash, or a tinted lime-wash, often renewed. We cannot conveniently whitewash the walls oftener than once a year, though many, in fact, of our old-fashioned farmer folks adhere to the old custom of regularly cleaning house twice, and, as the special healthful effect of the lime lasts only a few weeks at most, we should not regard this feature to the exclusion of others. If one has a mason to do it, only the pictures and decorations need be taken from the walls, and the carpet or floor covered near them. Rough-finished walls are treated with thin lime-washes, tinted of any desirable color. The masons nowadays have ways of preparing these washes, using dry colors in them. They slake the lime very smooth, and thicken it with smooth flour paste, and add salt, and perhaps other things to it. It does not rub off, nor peel, like kalsomine, nor does it perceptibly alter the rough surface of the wall. When kalsomine is used, the wall, if an old one, must have all the loose lime well-scraped off, and be sized thoroughly with glue-water, before the wash is applied. Kalsomine is made of glue, Paris white, and dry color for tinting. In selecting tints for parlor, sitting-room and bed-room, delicate or warm neutral tints should be preferred; especially avoid grays, which are cold colors.

Another circumstance illustrating the manner in which real estate owners are often harassed by the municipal authorities is shown in the difficulty experienced by Mr. Matchett in obtaining a permit for laying water-pipe to supply his new houses at Twentieth and Norris streets. The land was owned by the German Hospital at the time the water-main was laid, and, accordingly, no frontage assessment was paid, as the institution is exempt. City Councils afterwards passed an ordinance directing satisfaction to be entered against the property, and on the strength of this legislation, Mr. Matchett purchased the land, as he supposed, free of claims. But the Water Department refused to grant him a permit, because its books showed that the property had not paid its frontage assessment, and Court of Common Pleas, No. 3, has refused to issue a mandamus compelling the Department to give him the permit, which means that Mr. Matchett must submit to further delay and expense before he can supply his houses with water. Such treatment as this discourages prospective real estate buyers, and adds one more burden to the already heavy load which realty is compelled to carry.

For several years attempts have been made to produce a fireproof plastering for buildings. As heretofore used, the wooden lathing has rendered the ordinary plastering objectionable. Metallic laths do not seem to furnish such a desirable substitute as to fill all conditions. We have latterly noticed that a plaster is being made of asbestos, silicate of soda and potash, and without lime or hair, that answers very well. The chemical action of the ingredients forms a hard, stone-like substance, having great cohesive and adhesive quality. So great is the latter quality, that the plaster requires no key or hair to hold it firmly in place, even on the smoothest surface in use in building. Where it is put on iron surfaces, the plaster being an alkali, it has little tendency to produce rust. The adhesive quality of the plaster is such that it will stick so firmly to a plain surface as to require the use of a chisel to separate it from the metal. This plastering can be laid in the coldest weather. If this new material is all that its friends claim it to be, it is certainly something very valuable.

The title of the Northern Pacific Railroad Company to a large and valuable tract of land in Oregon is seriously affected by the decision of Commissioner Sparks, of the General Land Office, and if the Company has no better claim to the tract than is described in the Commissioner's decision, it will have hard work to dispossess the hundreds of settlers who have taken possession of the many thousands of acres under the general land laws. The land is valued at $25,000,000.

A device has been brought forward for protecting water pipes against freezing, the arrangement being based upon the fact that water in motion will remain liquid at a lower temperature than water at rest. One end of a copper rod, placed outside of the building, is secured to a bracket, and the other end is attached to one arm of a weighted elbow lever; to the other arm of the lever is secured a rod, which passes into the building and operates a valve in the water-pipe. By means of turnbuckles, the length of the copper rod can be adjusted so that before the temperature reaches the point at which there would be danger of the water in the pipes freezing the valve will be opened to allow a flow of water; beyond this point the valve opening will increase and the flow become more rapid as the cold becomes more intense, and as the temperature rises the valve is closed. This plan sets up a current in the pipes, which replaces the water as it grows cold by the warmer water from the main.

Experiments on an extensive scale have been made in Germany, to ascertain the relative strength of iron and steel girders. The soft steel girders proved to be 22 per cent., and hard steel girders 66 per cent. stronger than the iron girders; and it is remarked that it seemed pretty well established that the strength of steel girders is about the same for the two flanges, if made alike in section.

OBITUARY.

The death of Napoleon A. Jennings, the well-known auctioneer and senior member of the firm of M. Thomas & Sons, was a great surprise to his many friends. Though he had been complaining for a week, he was at his office on Friday, the 8th inst., the day preceding his death. Mr. Jennings was born in this city in 1816, and when a young man entered the house of Thomas & Sons as a clerk. He was subsequently admitted to an interest in the business with the late Thomas S. Ellis, and when the Messrs. Thomas withdrew, Mr. Jennings and Mr. Ellis continued under the old firm name. Mr. Jennings was married twice, his first wife being a daughter of the late Moses Thomas, and his second, who survives him, the daughter of Judge Treat, of the United States Court, of St. Louis. The funeral was held on Tuesday last, from his late residence, No. 4111 Walnut street, and was largely attended.

Mr. J. Hays Carson, Vice-President of the Real Estate Title Insurance and Trust Company, died at his residence, 3340 Walnut street, at a few minutes after eight o'clock, Saturday night. Mr. Carson was stricken with paralysis while driving in the city last Tuesday. Several years ago his constitution was shattered by an attack of typhoid fever, and he never rallied from the paralytic stroke, but gradually sank until his death. Mr. Carson was 53 years old and a native of Philadelphia. He was one of the founders of the Real Estate Title Insurance and Trust Company, and was one of the originators of the Conveyancers' Association. Until about a year ago he held the position of secretary of the Numismatic Association. In politics he was closely affiliated with all reform movements, never himself taking any prominent part in the work of the organizations in which he held membership, but lending his influence and contributing liberally to their funds. He was one of the original members of the old Reform Club, and was latterly a member of the Committee of One Hundred.

His surviving family consists of two daughters. His wife died before him.

How We Were Received.

The Real Estate Record and Builders' Guide met with a warm reception on its appearance in the world. The publishers have received many congratulations from the business men whose interests it serves, and these tokens of good will have been followed by substantial appreciations of the paper's worth, which have greatly augmented its subscription lists. In the field of journalism it has also been kindly received, as the following notices will testify:—

(*The Philadelphia Times.*)

The Philadelphia Real Estate Record and Builders' Guide has just made its appearance. It is devoted to real estate, building, architectural and insurance interests.

(*The Daily News.*)

The Real Estate Record and Builders' Guide is a new weekly paper, edited and managed by F. A. McNamee, of the *Record*, and Henry Bright, formerly of the *Press*. The first number looks well, and the venture will no doubt prove successful.

(*The Philadelphia Record.*)

The first number of The Real Estate Record and Builders' Guide appeared in this city yesterday. The new publication is a handsome one and it promises to fill an important field creditably. F. A. McNamee is the editor and Henry Bright the business manager. Both of them have had considerable newspaper experience, the former on the *Record* and the latter on the *Press*.

(*Taggart's Sunday Times.*)

A handsome and entertaining business journal is The Philadelphia Real Estate Record and Builders' Guide, the first number of which has been laid on our table. The paper is published at No. 727 Walnut street, by McNamee & Bright, the former being editor and the latter business manager. It is well filled with items of interest to builders and investors in real estate.

(*The North American.*)

The Philadelphia Real Estate Record and Builders' Guide is the title of a new journal published in this city by Messrs. McNamee & Bright, the first number of which has just made its appearance. The Record is a twelve-page paper, with three broad columns to the page, and in point of appearance and useful information for the class of business men for whom it is intended, has no superior.

(*The Public Ledger.*)

Vol. I., No. 1, of the Philadelphia Real Estate Record and Builders' Guide was published last Saturday, by Messrs. F. A. McNamee, editor, and Henry Bright, business manager. It is a neatly printed and sensible paper, with a field of its own that it promises to fill in an acceptable way. Its important features are records of sales and conveyances in Philadelphia and neighboring counties, lists of building permits granted in Philadelphia and vicinity, reports of the market prices of builders' materials, and general news and comments related to the interests the paper represents, which are real estate, building, architectural and insurance interests. The Record gives every promise of being a useful specialty paper.

(*The Railway News, January 14.*)

The Real Estate Record and Builders' Guide is the title of a new sixteen page weekly which Messrs. McNamee & Bright have put before the public interested in the purchase and making of homes, or the investment of money. There is no question as to the necessity of an organ among the real estate men and builders, and the success of the new sheet will depend solely on its merit.

Messrs. McNamee & Bright are young men, who seem to be particularly adapted to the work they have undertaken, and with the support which should be given every Philadelphia enterprise they will no doubt boom things. Mr. McNamee was formerly engaged in the real estate business both here and New York. For the last three years he has been in charge of the real estate advertising of the Philadelphia *Record*, which position he now holds.

Mr. Bright began his journalistic career after an experience as an iron manufacturer in Norristown, where he was Business Manager of *The Daily Times*. Subsequently he went on the *Press* and took charge of its Real Estate Department, in which capacity he served until last summer, when he was given charge of a large portion of the paper's general advertisers.

The Record in such hands cannot help being a success.

—The Hartranft House, one of the leading hotels of Norristown, was sold, on Tuesday, to Percival K. Gable, of Skippack, for $27,000. The hotel was formerly the property of S. E. Hartranft, father of ex-Governor John F. Hartranft, but is now under the management of Major D. B. Hartranft, who will vacate about April 1st.

REAL ESTATE.

"Magnolia Cemetery."

An application has been filed in the Common Pleas Courts for the incorporation of the "Magnolia Cemetery Company, of Philadelphia," which is to establish a cemetery at Tacony. The corporators include Thomas S. Disston, John H. Green, Barton Castor, John H. Currier, William W. Milner, John Shallcross and Thomas W. South.

A Chestnut Street Improvement.

Jacob Reed's Sons, clothiers and merchant tailors, 920 and 922 Chestnut street, have leased the entire premises No. 918 Chestnut street, extending to Sansom street on the rear, which they will occupy this spring. The new acquisition will add a width of twenty-five feet to their already handsome frontage of fifty feet on Chestnut street, and will be altered to correspond in architectural effect to the present building.

Master Plumbers' Election.

At the annual meeting of the Master Plumbers' Association, on Thursday evening, at their room, 141 North Seventh street, these officers were elected: President, W. W. Mentzinger; Vice-presidents, William M. Wright, W. H. Johnson, A. M. Hicks, A. G. Bond, S. W. Norris; Recording Secretary, Enoch Remick; Corresponding Secretary, W. S. Clark; Treasurer John E. Evanson; Sergeant-at-Arms, George F. Uber; Board of Directors, W. W. Mentzinger, William Harkness, Jr., J. A. Heffron, Enoch Remick and A. M. Hicks.

Deputy Tax Collectors Appointed.

The Receiver of Taxes has appointed the following deputy collectors of poll taxes: First Ward, William H. Rose; Tenth Ward, John F. Watson; Thirteenth Ward, G. W. W. Schlempf; Nineteenth Ward, William Copping; Twenty-first Ward, D. K. Hartzell; Twenty-third Ward, D. McMonagle; Twenty-eighth Ward, William Weisseisen; Thirty-first Ward, Jacob D. Johnson. Poll taxes will be received by the collectors and at the main office in the City Hall until thirty days before the election, on the third Tuesday of February.

The Highway Supervisors.

The Board of Highway Supervisors was reorganized on the 13th inst., with Chief Commissioner Joseph McDonald as its president, the other members present being Colonel Ludlow, of the Water Department, and Chief of the Electrical Department David R. Walker. An application from President William H. Johnstone, of the Underground Electric Light and Power Company, was considered, in which the corporation asked permission to open the south side of Chestnut street, from the Delaware River to Broad street, to disconnect their wires in front of each lamp-post. The board declined to grant the request, deeming it inexpedient at this time of the year.

A New Hall to be Erected.

The German Society has decided to sell its property on Seventh street, between Chestnut and Market, because the lease to the Gas Trust has run out and the building has become too small for the purposes of the society. It is valued at $80,000. The Board of Directors has appointed a committee to choose a suitable site for a new building, not too far from the centre of the city, and yet near the German districts. A spot on Spring Garden street, somewhere between Sixth and Twelfth streets, is considered most practicable and convenient. A fine, stately building is to be erected, with a high, roomy meeting-hall, library and fireproof vaults for the archives of the Society, which contain many rare books and manuscripts.

The new hall is to be the place where the Germans of all classes are to meet on common ground.

A Question of Real Estate Law.

The Supreme Court of Pennsylvania, in the recent case of *Mellon* v. *Lemmon*, holds that a mortgagee in possession must account for the rents and profits of the mortgaged premises, so that the net proceeds thereof may be applied to payment of the sum for which the property is pledged as security. If the same be fully paid, the mortgagor is entitled to possession. If not, the mortgagee has the right to retain possession until out of the rents and profits the residue is paid, and that the right of the mortgagor to regain the possession of the land after the debt is paid can be enforced by an action of ejectment. In such case, it is the duty of the jury to ascertain whether the mortgagee has realized from the rents and profits sufficient to pay the debt.

The Borough of Sharon Hill.

The Court, on Thursday of last week, confirmed the judgment of the Grand Jury in regard to the application to incorporate the village of Sharon Hill into a borough, and decreed that the borough be incorporated, in conformity with the prayer of the petitioners, and that the boundaries of the said borough be modified so as to exclude lands of Jacob Rice's estate, Samuel H. Mattson, Samuel Conrad, and Charles Lloyd, which are used for farming purposes. The Court has fixed the place for holding the first election in the public school house, and the time on February 10th, 1886, and designated G. A. Hazlette to give due notice of said election and the names thereof. Parkhurst McLaughlin has been appointed judge of election for the new borough, and Elwood H. James and Edward Shepard the inspectors.

Questioning the Authority of City Councils.

The Board of Building Inspectors on Monday last filed a petition in Common Pleas Court No. 1, asking that court to grant an order upon Joseph D. McKee to show cause why he should not be enjoined from erecting a proposed addition to his mill building on the Northeast corner of Howard and Harrison streets, in the shape of a mansard roof. The petition avers that when the board discovered that heavy machinery was to be operated in the extra story, it refused to approve the owner's plans, on the ground that the walls were not strong enough, and that the addition, although called a mansard roof, was in reality an extra wooden story. Mr. McKee then secured the passage of an ordinance of Councils authorizing the erection. The present proceeding will raise the question of the authority of Councils to give such permission.

New Stores on Ridge Avenue.

George S. Boud, formerly of Freehold, N. J., has just completed four handsome stores and dwellings combined, two of which are at 1418 and 1420 Ridge avenue, and two at 1421 and 1423 Fairmount avenue, the lot upon which the buildings are erected being of an elbow shape. The buildings are three stories in height, and in appearance and general finish are alike. They have a front of 18 feet and a depth of 41 feet, are finished with brownstone trimmings, and have patent cement pavements laid in front. The rooms comprise a commodious store in front, with a 12-foot ceiling, with dining room and kitchen in rear on first floor; a parlor, two bed rooms, bath and water closet on the second floor, and three bed rooms on the third floor.

The buildings are furnished with all the modern conveniences of heaters, hot and cold water, gas fixtures, paper, etc.

West Philadelphia Improvement.

Adam Everly, real estate agent, has just consummated the sale of a large tract of ground on Thirty-second street and Haverford avenue, West Philadelphia, belonging to the estate of his father, the late Adam Everly, Sr. It fronts eight hundred feet on Haverford avenue and extends northward to the line of the Pennsylvania Railroad. Charles L. McIlvaine is the purchaser, and the amount paid for the land is $90,000. It is Mr. McIlvaine's intention to build upon it, next spring, a block of uniform dwelling houses, of moderate size and rental, to be well adapted to families of average means. The land is the highest ground in the vicinity, and from it can be plainly seen the Public Buildings, the gilded dome of the Cathedral, on Eighteenth street, and the spires of the various churches. Operations will commence on the ground as early as the weather permits next spring, and the new buildings, when completed, will be a valuable improvement to the neighborhood in which they are to be erected.

Meeting of the City Trusts.

The directors of the City Trusts, at their meeting on Wednesday last, approved the contract granting permission to the Schuylkill River East Side Railroad Company to construct its road through the lands of the Girard Estate in the Twenty-sixth Ward. The Committee on Minor Trusts was instructed to make the same arrangements for properties of other estates under the jurisdiction of the board. The total receipts on real estate outside of the city for 1885 were reported as $445,792.88; expenditures, $77,817.96; net receipts, $367,974.92, and net income, $362,-047.49. This is a decrease of $12,418 20 from the net income of 1884. For the real estate within the city the total receipts were $342,649.38, disbursements, $132,682.18; net income, $209,967.15, or an increase of $8,235.46 over the previous year.

Bills amounting to $60,663 88 were approved and paid. The report from Girard College showed there were 1133 boys in the institution, and a resolution to admit three more was adopted.

A Property Owner's Quandary.

William R. Matchett, who is just finishing a block of handsome houses at Twentieth and Norris streets, applied to Court of Common Pleas, No. 3, last week, for a mandamus requiring the Water Department to grant him a permit for the introduction of water to the row of houses on the east side of Twentieth street, between Norris street and Park avenue. The permit was refused on the ground that the water pipe laid in front of the property nearly twelve years ago had never been paid for. The land then belonged to the German Hospital, and in December 1874, Councils passed an ordinance directing the City Solicitor "to enter satisfaction on the claims of the city against the German Hospital for water pipe laid in front of their property on Twentieth street." Satisfaction was entered of record, and upon the strength of this Mr. Matchett purchased.

It was contended upon his behalf, on Thursday, that after the passage of this ordinance and the satisfaction of the claim, the city was estopped from prosecuting it. Judge Gordon coincided in this view, but Judge Ludlow was of opinion that the plaintiff was not entitled to such a high prerogative writ as a mandamus, unless he could show that the pipe had been actually paid for. The Court accordingly held the case under advisement.

Granite Selected for Pittsburg's New Building.

The contest in regard to the material for the public building at Pittsburg, which has been going on for months, was ended last Thursday by Secretary Manning's decision to award the contract to the lowest responsible bidder for granite. M. A. McGowan, of Washington, who had offered to furnish the stone for $374.972, was the cheapest on the list, and unless the officials of the department are convinced that he is unable to supply stone of good quality in sufficient amounts, the contract will go to him. The lowest bid for constructing the building of sandstone was $218,000, and of limestone $262,259.

The fight, which, in the department was regarded as one of the most bitter they had ever experienced, commenced through the efforts of Indiana quarrymen to compel the acceptance of their stone. They enlisted the Indiana senators and representatives in their interest, while the Pittsburg Chamber of Commerce sent deputies down

to resist their efforts. Several times the Supervising Architect and Assistant Secretary had to sit in semi-judicial capacity and listen to long arguments from both sides.

The excitement was increased by charges of bribery, an allegation being made that one of the Pittsburg men had been bought to support the cause of limestone.

Cost of Philadelphia's Schools.

It cost $1,794,330.63 to manage the public schools of Philadelphia during 1885. This money was distributed as follows: For teachers' salaries $1,177,921.39; rents of school houses, $29,159.57; general repairs and alterations, $132,916.77; furnaces and stoves, $13,217.24; cleaning, $120,820.51; furniture, $21,085.59; incidentals, $8,706.73; clerk hire, $3,599.67; ground rents, $22,570.82; fuel, $6,732.06; books and stationery, $108,673.16; night schools, $32.222.15; Industrial Art School, $3000; sub-primary schools, $7500; general expenses, $52,204.97.

The Boys' Central High School received $36,982.20; the Girls' Normal School, 32, 291.47; and the Manual Training School. $8,991.58. The remainder of the money was divided among the sections, as follows:—

1st	Section	$66,329.90	17th	Section	$29,461.42
2d	do	45,687.20	18th	do	52,562.50
3d	do	38,673.02	19th	do	67,590.95
4th	do	37,090.31	20th	do	64,163.86
5th	do	29,215.59	21st	do	35,873.62

Natural Gas Companies Must Pay Damages.

The Cecil Township Natural Gas Company, chartered under the Corporation Act of 1874, attempted to lay its pipes under a public road opposite farm lands and houses of Hugh Stirling without paying or securing the payment of compensation for injury to his property. He filed a bill in equity attaching the charter of the company and claiming the protection of the Court of Equity until his damages were secured. The Court below, on demurrer, dismissed the bill. This decree has now been removed by a decree of the Supreme Court, in an opinion by Mr. Justice Sterrett, which holds that the company, under its charter, had not the powers of eminent domain for the purpose of laying its pipes to distribute natural gas; that the plaintiff had the right to question its charter in his bill for injunction; and, further, even if the company had the power asserted, whatever may be the ruling as to streets and alleys in cities and boroughs, such companies cannot lay their pipes under the public roads in rural districts without making payment or securing the payment of any damages the abutting land owner may suffer, either directly or consequentially, because of the additional burden imposed upon his land, as the public right of way was required for public passage over the surface and the placing of piping under the roads tends to abridge valuable rights which the owner may enjoy subject to the free and unobstructed use of the road for public travel. Judgment reversed.

When Screws Were Invented.

The screw has come to play such an important part in modern industries that, with the single exception of the nail, there is probably nothing of its class which exceeds it in universality and diversity of application. It is believed that the date of this useful invention is unknown, but certainly, the screw was among the five mechanical powers known to the Greek philosopher Archimedes, and its use as a mechanical power was probably known to the builders of the Pyramids.

However, the application of this principle in its present compact form to minor industrial uses is of comparatively far more recent date. The earlier method of manufacture was to form the heads by pinching the red-hot blauss, and to add the threads by filing. This was, of course, a tedious process, and by its own inherent limitations prevented any extended adaptation to the industries. However, in the year 1569, a Frenchman invented a screw-cutting gauge to be used in a lathe, and this invention opened up the way for its present extensive adoption.

In 1641 a watchmaker of York, England, made an improvement on Brisson's device, and the process so improved was used for many years for the manufacture of the screws used in watchmaking. In 1760 the first patents ever issued on screw-making machinery are said to have been obtained by Job and William Wyatt (Englishmen). They covered three machines, one for making blanks, another for slotting the heads, and the third for cutting threads.

The first American patent was issued Dec. 14, 1798, to David Williamson, of Rhode Island, and among other patents on screws issued at various times to different parties, an important one was granted, in 1813. to Jacob Sloat, of Ramapo, N. Y., for making gimlet-pointed screws. Between the years 1834 and 1840 various factories for the making of screws were established in Ramapo, N. Y., and Providence, R. I., and since that time the industry has been so greatly extended and the methods of production so much simplified and cheapened, that to-day the factories turning out these useful little articles are counted by the hundred, and they have become so common, that no one stops to think how they are made or when they were invented.

A Deed or Mortgage

IN WHICH STIFLING CRIMINAL PROCEEDINGS IS PART OF THE CONSIDERATION, IS VOID.

At the June Sessions, 1877, Alfred Pearce and others were indicted in the Court of Quarter Sessions of Butler county, charged, as officers of the Harmony Savings Bank, with embezzlement, making false entries in the bank books, making false bank statements and mutilating and destroying accounts of the bank, all with intent to defraud the bank and its depositors. A civil suit was also pending in Allegheny county. When the jury was empaneled to try the indictment, an agreement was reached between the parties. So far as Alfred Pearce was concerned, it was carried out by a deed of conveyance of a piece of real estate from Pearce and his wife to Henry Goehring, in trust, to hold the same for the use of the Harmony Savings Bank, and a further trust that if Alfred Pearce or any one for him should within four years pay the sum of $8000 to the bank or its representatives, then to reconvey the property in fee simple, clear of incumbrance, to Sarah J. Pearce or such other person as Alfred Pearce should direct. Pearce was to remain in possession and pay the taxes. Goehring and the bank conveyed the property to Mary S. and Jane Wilson, and at the end of four years an action of ejectment was brought by them against Alfred Pearce and wife, for possession of the property, and judgment recovered in the Court below. The Supreme Court, however, have just reversed this judgment, and, in the opinion, by Mr. Justice Sterrett, hold that the transaction between the Bank Trustee and Alfred Pearce and wife is to be construed as a mortgage of the premises in question; and, as it is the fact that at least a part of the consideration was the stifling of criminal prosecutions against the husband, the deed or mortgage is void, as against the policy of the law; it is immaterial that an additional valid consideration existed. Judgment reversed.

Settling Estates in the Orphans' Court.

The Judges of the Orphans' Court of Philadelphia, at their last session, passed upon the following matters:—

Estate of Catharine Dougherty, late minor, exceptions to adjudication; exceptions in part sustained. Estates of N. Dubois and E. Johnson, petitions for grant of letters of administration; granted. Estate of W. White, sale of real estate; confirmed. Estates of A. F. Snyder, J. Fitzpatrick and R. Jacobs, widows' allowances; granted. Estate of A. Marshall, petition of surety to intervene; granted. Estates of J. K. Wolf and J. R. McCurdy; S. P. Wolf and Real Estate Trust Company appointed trustees. Estate of C. Beck, inquest in partition; granted. Estates of M. Quin, minor, and P. Mulholland, minor, M. L. Smith, guardian, petition for order to pay awards; granted. Estate of R. Rittenhouse, petition for leave to pay purchase money to executor; granted. Estates of C. L. Owen and H. McCalmont, petitions to sell real estate at public sale; granted. Estates of J. Hunsworth and H. S. Carr, petitions for private sale of real estate; granted. Estate of J. B. Spackman, petition to sell real estate to pay debts; granted. Estate of L. A. Young and Pitts, minors, petitions for allowance; granted. Estate of Sarah Fox, petition to pay purchase money to executor; granted. Estates of W. W. Cook and George Sharswood, petitions of administrator and trustees to approve investments; granted. Estates of J. F. Hathcote and S. Jungkurth, D. Sharp and C. C. Widdis et al., executors, petitions for discharge; granted. Estate of M. N. Rue, H. S. Rue, administrator, citation to file account; granted. Estate of A. Cavanagh, M. Eagan, administratrix, citation to remove administratrix; granted. Estate of M. S. Wetherell, Real Estate Trust Company appointed trustee. Estate of Martin, minors; J. Shields appointed guardian. G. W. Shoesmith, minor; R. M. Parsons appointed. J. Stienle, P. C. Fulweiler appointed; J. Herman, German American Trust Company appointed; J. H. Kershaw, S. Davis appointed; M. A. Bergeman, Guarantee Trust Company appointed; G. W. Fitzpatrick, A. J. Forten appointed guardian ad litem.

Disputing the Title to 2,500,000 Acres of Land.

Commissioner Sparks, of the General Land Office at Washington, on Tuesday promulgated an important decision affecting the claims of the Northern Pacific Railroad Company to a grant of land between a point on the Columbia River near Portland, Ore., and Tacoma, on Puget Sound, in Washington Territory. The Commissioner says the road between these points was authorized to be constructed by a joint resolution of Congress, in 1869, without a land grant. The original act of 1864 provided for a main line of road across the Cascade Mountains to Puget Sound, and a branch from a point not more than 300 miles east of the western terminus, passing down the Columbia River to a point at or near Portland, Oregon, but made no provision for a road or grant between Portland and Puget Sound. The railroad company lays claim to a grant for this portion of the road under the joint resolution of Congress of 1870, which provided that the company might construct its main line down the Columbia River and its branch across the Cascades, with the same grants as provided for by the original act of incorporation. Commissioner Sparks holds that, as no grant was made by the original act for the construction of the road from Portland to Tacoma, and none by the act of 1869, no such grant can be presumptively drawn from the joint resolution of 1870. He holds that no such grant was made by any of the acts of Congress, and says that he does not find that any formal decision has ever been made by the Interior Department holding that the joint resolution of 1870 embraced a grant of lands between said points. Although withdrawals appear to have been ordered upon the filing by the company of its maps, the Commissioner says no reasons for such withdrawals have ever been assigned, so far as the records of the Land office disclose. This decision affects the odd numbered sections of land, 80 miles in width, for a distance of 106 miles, aggregating some 2,500,000 acres of the best soil in Oregon, and estimated to be worth $25,000,000. The claim of the railroad company to these lands has long been disputed by settlers, large numbers of whom are in occupation, claiming the right to enter under the public land laws. The case of Donald McRea and J. S. Book vs. the Northern Pacific Railroad Company brought out the decision.

The President of the Northern Pacific Railroad, in reference to this decision, says: "There is no foundation in law or reason for such a decision. Appeal will at once be taken to the Secretary of the Interior and, if necessary, the company will resort to the Courts to maintain its rights."

A Simple Method of Cleaning Waste Pipes.

The annoyance arising from the stoppage of waste pipes is but a small matter compared with the danger which may follow obstructed pipes. The "sewer gas," about which so much has been written and which is so justly dreaded, is not, as many suppose, the exclusive product of the sewer. Indeed, the foulest, most dangerous and deadly gases are not found in the sewers themselves, but in the unventilated waste pipes and those which are in process of being clogged by the foul matters passing through them. Any obstruction in the soil or waste pipes is, therefore, doubly dangerous, because it may produce an inflow of foul gas into the pipe, even though the entrance to the sewer itself has been entirely cut off.

The question is, how to get rid of the accumulations in pipes partly stopped or already closed. Digging up and cleaning out is one costly remedy, often ineffectual by reason of careless workmen. The second is the plumber's force pump, which is usually only a temporary relief. In pipes leading from the house to the cesspool there is a constant accumulation of grease. This enters as a liquid and hardens as the water cools, and is deposited on the bottom and sides of the pipes. As these accumulations increase, the water way is gradually contracted till the pipe is closed.

When the pipe is entirely stopped, or allows the water to flow away by drops only, proceed thus: Empty the pipe down to the trap, or as far as practicable, by "mopping up" with a cloth. If water flows very slowly, begin when the pipe has emptied itself. Fill the pipe up with potash, crowding it in with a stick. Then pour hot water upon it in a small stream, stopping as soon as the pipe appears to be filled. As the potash dissolves and disappears add more water. At night a little heap of potash may be placed over the hole, and water enough poured on so that a supply of strong lye will flow into the pipe during the night. Pipes that have been stopped for months may be cleaned out by this method, though it may call for three or four pounds of potash. The crudest kind, however, appears to act as well as the best. If the pipe is partially obstructed, a lump of crude potash should be placed where water will drip slowly upon it and so reach the pipe. It is also well to fill the upper part of the pipe with the potash as before and allow hot water to trickle upon it. Soda and potash are both used for the purpose of removing greasy obstructions, and the usual method of application is to form a strong lye and pour it into the pipe. It is better to put the potash into the pipe because the water which it contains instead of diluting, helps to form the lye. As water comes in contact with the potash it becomes hot, thus aiding in dissolving the grease. Potash, in combination with grease, forms a "soft" or liquid soap, which easily flows away, while the soda makes a hard soap, which, if not dissolved in water, would in itself obstruct the pipe.

When a pipe is once fairly cleaned out, the potash should be used from time to time, in order to dissolve the greasy deposits as they form, and carry them forward to the cesspool or sewer. The potash is very valuable for this purpose, because, in addition to its grease-solving powers, it is exceedingly destructive to all animal and most vegetable matters. The most dangerous and deadly gases appear to come from urinals and wash basin pipes, these, in many cases, seeming to be more foul than those from water closets. The decay of the soap and animal matter washed from the skin appear to be the sources of the gases. The potash will be effective in keeping these pipes clear, and in this way may lessen the dangers.

—The most elegant dining-room chairs are of antique oak richly carved, upholstered in alligator skin, studded with large square nails of antique finish.

BUSINESS AT THE NEW YORK REAL ESTATE EXCHANGE.

MONDAY, January 11, 1886.

It was said on the floor of the Exchange this morning that the purchase of the southeast corner of Broadway and Thirty-third street, reported in this column last week, is intended for a theatre, which is to be erected as soon as the present lease expires. The buyers are from Chicago. The attendance at the public hours was small. No public sales were advertised for to-day, though to-morrow and Thursday in this week will be heavy days.

At the brokers' meeting there was a call for a three or four-story house, from Fifteenth to Thirty-fourth streets, and Third and Sixth avenues, to rent for $1500 or $2000.

The following were offered:—

The four-story brownstone dwelling, No. 937 Tenth avenue, for $16,000; a corner building on Sixth avenue to lease; the store and basement, No. 143 Duane street, for rent for $2200 per annum, and a sum of money to loan on improved property in Harlem at 5 per cent.

TUESDAY, January 12, 1886.

There was a large attendance at the Exchange to-day. Dealers and owners speak hopefully of the future.

At the brokers' meeting there were calls for the following property: A house containing eighteen or twenty rooms, to lease, at New Brighton, Staten Island; business property to exchange for several houses and lots at Inwood; improved or unimproved property on 125th and Manhattan streets, between Eighth and Twelfth avenues; a private house on West 42d street, to cost about $35,000 or $40,000; to lease, a store suitable for drug business, on Third, Sixth or Eighth avenues, and two to eight lots or old buildings on First, Second or Third avenues, not above 86th street.

The following property was offered: Two full lots, with buildings, on Mulberry street, below Prince street, for $24,000; store in Dey street, between Broadway and Church street, with basement and sub-cellar, rent, $3500; stable on West 10th street, between Fifth and Sixth avenues, for $20,000; a dwelling on West 22d street, between Seventh and Eighth avenues, for $20,000; a three-story brownstone house on East 46th street, between Lexington and Third avenues, for $15,000; the ground floor and basement of No. 68 Wall street, to let, for $6000 per annum.

At the auction sales to-day two lots, 100 by 100 and 50 by 100 feet, on Railroad avenue and Fletcher street, in the Twenty-fourth ward, sold to J. R. Foley, for $2900; the sale of twelve lots on 101st street was adjourned until January 20; the four-story brick houses, Nos. 241 and 243 East 127th street, sold to the plaintiff for $30,200; No. 126 Broome street, sold for $10,500; No. 848 East 47th street, sold to Samuel Eisner, for $17.100; No. 852 First avenue, to William Smith, for $10,100; and Nos. 73, 75 and 77 Baxter street, sold for $29,700, to Louis Silverston.

WEDNESDAY, January 13, 1886.

The sale announced for this morning at the real estate Exchange, of a plot of lots on the circle, Fifty eighth street and Fifty-ninth street and Eighth avenue brought together a large crowd of wealthy investors. Lots one to five on the circle, Eighth avenue and Fifty-eighth street, embracing about three and a half full lots, went to Amos R. Eno for $100,000. The same purchaser bought lots 6, 7 and 8 on Fifty-eighth street for $15,000, $15,300 and $15,700 respectively; Nos. 9 and 10 sold to C. E. Appleby for $44,000; No. 11 to the same purchaser for $16,000, and Nos. 12 and 13 to W. F. Van Pelt for $14,000 and $15,300 respectively.

At the brokers' meeting there were calls for a corner lot on Tenth avenue, between Seventieth and 106th streets; a large top loft, or a whole building, on John street or Maiden lane, for light manufacturing purposes, rent not to exceed $3500 per annum, and a medium-sized office building, in the neighborhood of John and Nassau streets and Broadway.

Among the property offered were the two four-story flats, Nos. 683 and 685 East 142d street, for $16,000 each; No. 139 East Seventh street, for $16,000. Sums of $5000 and $10,000 to loan on Brooklyn property at 4½ per cent.; and a vacant plot, 135 by 103.3 on Fourteenth street, 100 feet east of Third avenue, for $100,000.

THURSDAY, January 14, 1886.

The real estate Exchange was thronged to-day on the occasion of the sale of No. 58 Broadway and Nos. 25, 27 and 29 New street. The bidding, which started at $300,000, rose rapidly to $470,000, at which price it was knocked down to F. Jones, who also bought No. 737 Broadway and Nos. 294 and 296 Mercer street for $150,000. Nos. 452 and 454 West Seventeenth street sold to the plaintiff for $20,300; No. 164 West Twenty-second street, a four-story brick dwelling, sold to H. Wronkow for $17,800; No. 108 East Eighty-third street sold to Emily S. Arnold for $12,000; Nos. 375 and 377 Washington street sold to John Bodine for $70.000.

The sale of 836 shares of the capital stock of the Maxwell Cattle Company, of New Mexico, was adjourned to January 20.

A two-story frame dwelling, No. 243 East Thirty fifth street, sold to Rudolph Stake for $10,900; Nos. 114 and 116 East 120th street sold for $26,000 to James Kennedy; No. 515 Hudson street sold to J. Bergmeyer for $20,600; a full lot on the north side of 105th street, 150 feet west of Fourth avenue, sold to Edward Rafter for $3960; a three-story brownstone house, No. 343 East Fifty fifth street, sold to Gillen & Pratt for $8000.

At the brokers' meeting there were calls for business property on East Broadway, below Chambers street; a store with two or three lofts, to lease, to be used for light manufacturing business, below Canal street, west side preferred, rent less than $1500 per annum; a first floor or small building on Fifth avenue, between Twenty-fifth and Thirty-fifth street, to lease; a twenty-five foot house on Tenth, Sixteenth or Nineteenth streets, close to Fifth avenue, to cost about $40,000.

The second floor of No. 104 Broadway was offered to rent for $2000 a year; an English basement house, No. 38 West Thirty-sixth street, for $25,000; two lots, 25 by 100 feet each, on the south side of Fifty-ninth street, offered for $30,000; $30,000 to lend on first mortgage at 5 per cent.; a four-story dwelling, No. 44 Irving Place, for $35,000; $15,000 to lend on New York or Brooklyn property at 4½ per cent.; a brownstone dwelling on West Twentieth street, between Ninth and Tenth avenues, for $15,000, and Nos. 34 to 36 Clinton Place, for $12,500 each.

FRIDAY, January 15, 1886.

The sales by the Postal Telegraph and Cable Company, at the real estate Exchange to-day, of the shops and real estate, the machinery and plant, at Ansonia, Connecticut, attracted a large attendance. The bidding started at $100,000, increasing, by bids of $5000, to $240,000, at which the entire property was knocked down to Mr. E. B. Convers, of No. 5 Beekman street. It was said that the purchase was in the interest of the United Lines. The Receivers also sold all their interest in the same property in one parcel to the same purchaser, for $20,000. All the personal property and contracts were sold, for $20,000, to the same buyer.

At the brokers' meeting there were calls for vacant lots north of 70th street, on First avenue; vacant lots below 42d street, between Seventh and Ninth avenues; one building to rent from May 1, on a five years' lease; three or five lots between Sixth and Seventh avenues and 118th and 122d streets; an office-building between Murray and Wall streets, near or on Broadway; a house from 14th to 32d sts., between Second and Fourth avenues, to cost about $15,000 or $18,000; good tenements on the east side, below 34th street, to cost from $12,000 to $25,000 each; a three-story private house, between Third and Seventh avenues, to 59th street, to cost from $15,000 to $20,000; a three-story, high-stoop house, between Second and Madison avenues and 14th to 60th streets for $1200 or $2000 per annum.

A four-story brownstone house on Bedford avenue, near Fulton avenue, was offered for $11,500; two lots, with buildings, on South Fifth avenue,

near Grand street, were offered for $25,000; and a three-story frame dwelling on East 83d street, near Park avenue, for $12,500.

No busine-s was transacted at the Exchange Auction Room on Saturday, Jan. 16.

The total value of city real estate sold at the Exchange and Auction Room for the week ending with Saturday, Jan. 16, was $1,215,860, as against $150,728, the figures for the week previous.

BUILDERS' NOTES.

THE CITY'S PERMITS.

Front alteration to house 31 S. Seventeenth street, to William Patterson, 4219 Haverford avenue.

One 2-story brick dwelling, S. E. cor. of Kensington ave. and Ontario st., 19 ft. by 50 ft., to Alfred Gardner, 232 E. York st.

One brick stable east side Seventeenth street, between Cayuga and Bristol streets, 25 ft. by 45 ft., to Joseph Williams, 1634 Cayuga street.

One alteration, front and gable of brick dwelling, N. W. cor. Twentieth and Hampton sts., 15 ft. by 43 ft., to Joseph H. Cline, Sixteenth st. and Girard ave.

One 3 story ice-house, East side Thirty-third street, between Thompson and Master streets, 50 ft. by 115 ft., to Haibach & Arnehter, Twenty-sixth and Thompson streets.

Alfred Gardner, No. 232 East York street, a 2-story dwelling, corner Kensington avenue and Ontario street, 19x50.

Joseph H. Cline, Sixteenth street and Girard avenue, alteration and front gable, corner Twentieth and Hampton streets, 15x43.

A. M. Greene, No. 1315 South Sixth street, a 3-story brick stable, corner Lombard and Chippewa, 60x75.

C. B. Terry, No. 2511 North Sixth street, bay window, 2520 North Sixth street, 9x4.

Tout and McLaughlin, No. 317 Cook street, a 3-story dwelling, No. 1318 Locust street, 20x102.

Insurance Notes.

—The Provident Life and Trust Co., of Philadelphia, wrote $7,108,000 in new business during 1885.

—The Girard Fire Ins. Co. announces a semi-annual dividend of $6 per share, payable on demand.

—Louis C. Madeira & Sons, of this city, have been appointed agents of the Exchange Fire Ins. Co., of New York.

—The Union Insurance Co. is reported to be contemplating an increase of its capital, now $375,000, to $500,000.

—The fire losses for the year 1885 reached about $86,000,000, which is $17,000,000 less than the fire waste of 1884.

—The Union Ins. Co., of Pittsburg, is issuing policies against damage by explosions of natural gas, that great disturber of the city.

The following prices were realized at auction:—

10 shs Provident Life and Trust Co	280
10 shs " " " "	278½
10 shs Girard Life Ins., An'ty & T. Co	80
4 shs Guarantee T. & S. D. Co	168½
15 shs Ger.-A. Tit. I. & T. Co. $5 p'd	28
5 shs " " " "	30
135 shs " " " "	27
59 shs Land Title & T. Co., $25 p'd	75¼
170 shs " " " " "	81¼
$6405 Del. Mut. Ins. Co. scrip, '81, '83, '84 and '85	$102@105

—The Insurance Co. of North America is one of the strongest organizations of its class in the country. At the annual meeting, it was shown that the properties of the Company, which, on January 1, 1881, were $6,382,000 (exclusive of new stock and surplus then paid in), are now $8,977,000. Dividends, with taxes thereon, have been paid amounting to $2,885,000. The fire fund has increased $1,370,000; the net surplus has been reduced $550,000, largely owing to the increased amount required to reinsure the outstanding fire premiums, which are now $670,000 more than on Jan. 1, 1881.

The revenue from fire premiums during this period has been	$10.066,000	
From marine premiums	7,800,000	
From interest money	1,852,000	
From perpetual fund at 5 per ct. int.	122,000	
		$19,840,000
The expenditures have been:		
Fire losses and charges..	$8,892,000	
Marine losses & charges..	7,383,000	
General expenses	651,748	
		16,926,748
Excess of income over expenditures..		$2,913,252

Within the past four months several colossal apartment houses have been erected in Brooklyn, in the immediate vicinity of the aristocratic "Heights," some of which add the attraction of first-class restaurants, and, as these are now ready for occupancy, there is something like a stampede from the fashionable boarding-houses in all that part of the town. One of these apartment houses has 400 rooms, which is about equal to the accommodations ordinarily provided by forty dwellings of the usual brownstone front pattern. There are also several large apartment houses in course of erection in Montague street, not far from the Wall street ferry, and, though these will not be ready for occupation until May next, it is said that they are already nearly all rented, chiefly to people who have business interests in Wall street and the exchanges, just across the river. The big building mania thus bids fair ere long to work a thorough revolution in real estate in that portion of the City of Churches, where owners heretofore could always command their own price, and this in most cases was well up to the New York Fifth avenue standard.

Heavy Losses by Fire.

The great fire in the Kensington mill district of Philadelphia on the 10th inst., which inflicted a loss of $750,000 on the unfortunate manufacturers, will also take nearly a half million of dollars from the insurance companies, as all the properties were well insured. The total amount of the policies amounted to $573,479, but they will not all have to be paid in full. Fortunately, Philadelphia companies were not heavy losers. A detailed statement of the insurances is as follows:—

On William Beatty's mill—Citizens', N. Y., $2000; City of London, $2750; Connecticut, $1000; Continental, $1250; Fire Association, $1250; Manufacturers and Merchants', $1250; Orient, $4500; Royal. $6000; St. Paul, $1000; German-American. $4000; Hibernia, $1250; Lancashire, $1000; Lion, $3500; Liverpool, London and Globe, $3000; National, Hartford, $4500; Queen, $2500; total, $40,750.

On Firth & Foster Bros.' mill—American, Newark, $2000; Boston Underwriters, $2500; City of London, $2500; Clinton, $1000; Connecticut, $4000; Continental, $3000; Equitable, $2000; Firemen's, Newark, $2500; London and Lancashire, $10,000; National, Hartford, $3000; Niagara, $2500; Orient, $2000; Phœnix, Hartford, $2000; Star, $2500; Washington, Boston, $2500; Western, Toronto, $3000; Firemen's Fund, $2000; German-American, $3000; Germania, $4000; Guardian, Eng., $3000; Hartford, $5000; Home, $5000; Howard, $2000; Imperial, $4000; Merchants', Providence, $2500; National, N. Y., $2500; North British and M., $2500; Phœnix, N. Y., $5500; Royal, $10,000; Union, Cal., $2500; total, $100,500.

The James Smith Woolen Machinery Company—City of London, $2000; Commercial, California, $1000; German-American, $2000; Insurance Company of North America, $5000; Lancashire, $500; National, Hartford, $2000; total, $12,500.

R. O. Born was insured in the Royal for $9000.

The Arrott Steam Power Mills Company—Ætna, $5000; Citizens', New York, $2500; Hartford, $2500; Howard, $2500; Lancashire, $5000; Mercantile, $2500; Royal, $14,000; Niagara, $5000; North British, $2500; Pennsylvania, Philadelphia, $2500; Phœnix, Hartford, $5000; Queen, $5000; total, $54,000.

William Arrott—American, $2500; Boatman's, $1500; Boston Underwriters, $4000; Citizens' (N. Y.), $5000; County, $1500; Farmers', $2000; German-American, $500; Glen's Falls, $1500; Phœnix (N. Y.), $3500; Provident (Washington), $1500; Hanover, $4750; Insurance Company of North America, $2500; Imperial, $2500; Lancashire, $4000; Merchants', $1000; Norwich Union, $4000; Orient, $2750; total, $41.500.

Henry Grant—British America, $2500; Lion, $2500; North British, $2500; Scotch Union, $2500; Orient, $1000; Springfield, $2500; total, $13.500.

Thomas Henry & Son—American, $2500; Commercial Union, $2500; German-American, $1500; London and Lancashire, $2500; Western (Toronto), $2000; New Hampshire, $1500; Rochester German, $2500; Royal, $5500; total, $20,500.

Joseph Greer—American Central, $2500; City of London, $2500; City, $843; Connecticut, $3000; Fire Insurance Association, $1475; Germania, $3000; Glen's Falls, $2500; Hartford, $2500; Hibernia, $1356; Home, $2500; Insurance Company of North America, $2500; Imperial, $2500; Lion, $3500; Liverpool, London and Globe, $2500; Manufacturers and Merchants', $1500; Merchants', Newark, $1475; Merchants', Providence, $738; National. New York, $2500; Newark, $1581; Norwich Union, $2106; Provident, Washington, $2500; Queen, $1205; Scottish Union. $3500; St. Paul, $2500; total, $52,779.

Joseph Hodgson—County, $2500; German-American, $2000; London and Lancashire, $6000; Lumbermen's, $1500; Manufacturers and Builders', $1000; Royal, $1200; Sterling, $1000; Virginia, $1000; total, $16,200.

Stead & Miller—American, $2500; British America, $2500; California, $2000; Citizens', N. Y.. $2500; Citizens', Pittsburg, $2500; City of London, $2500; Commercial, $2500; Connecticut, $2500; Exchange. $2500; Fire Association, $1500; Firemen's, Newark, $2500; German-American, $4000; Guardian, $2500; Imperial, $2000; Lancashire, $3000; Lion, $2000; Merchants', Newark, $2500; Montauk, $1500; National, Hartford, $4500; Newark, $2000; New Hampshire, $2000; North British, $2500; Northern, $2000; Norwich Union, $2000; Ohio, $1250; People's, Pittsburg. $1250; People's, New York, $2500; Phœnix, New York, $3000; Phœnix, Hartford, $2000; Phœnix, England. $2500; Queen, $2000; Rochester German. $1250; Scottish Union, $6500; Standard, $2000; Star, $2500; Spring Garden, $2500; Union, California, $2000; Western, Pittsburg, $2000; total, $91,750.

All the above insurances were placed by William Arrott. The following were placed by Creth & Sullivan, insurance agents, 225 Dock street:

Robert Beatty—Royal, England, $8000; London and Lancaster, $6400; American, Philadelphia, $3200; Hartford, Connecticut, $3200; Niagara, New York, $3200; Hanover, New York, $3200; Home, New York, $2400; Liverpool, London and Globe, $2400; Phœnix, England, $2400; Scottish, United and National, $2400; Lion, England, $2400; British America, $2400; Western, Canada, $2400; Fire Association, Philadelphia, $2400; County, Philadelphia, $2400; Ætna, Connecticut, $2400; Phœnix, Connecticut, $2400; Connecticut, $2400; Union, California, $2400; California, $2400; Firemen's Fund, California, $2400; America. New York, $2400; Rochester, German, $2000; Providence, Washington, $2000; Lancashire, England, $1800; Glen's Falls, N. Y., $1800; National, N. Y., $1800; Citizens', N. Y., $1800; Standard, N. Y., $1800; Citizens', Pittsburg, $1800; Pennsylvania Fire, $1800; Firemen's, N. Y., $1800; Northwestern National, $1800; American Central, $1800; St. Paul's, Minn., $1800; Springfield, Mass., $1800; Montauk, N. Y., $1200; Manufacturers', $1200; Teutonia, Albany, $1200; Boatman's, Pittsburg, $1200; Manufacturers and Merchants', Pittsburg, $2000; Commercial, $1500; total, $99,500.

MARKET QUOTATIONS.

LUMBER.—Offerings of stock continue fair and pretty well assorted, with the demand possibly somewhat better from manufacturers, some of whom have found desirable accumulations slightly reduced and feel the necessity for replenishing somewhat promptly. Prices are steady.

—If a room faces the east, warm tints will be preferable to the cold grays, which are lacking in the cheerfulness which should pervade every room, particularly bed-rooms. The paper, however, should always be made to harmonize with the wood-work of the room, and should be chosen with a view to making it serve as a background to the furniture, carpet and upholstery.

—Corrugated iron is being extensively used for building purposes, and the excellent results of the work on the State Fair Buildings is but adding further conviction as to the economy of iron for roofing and ceiling. Messrs. Lindsay & Parvin, the agents of the Cincinnati Corrugating Co., report a lively demand for the product of the firm they represent.

—Never put a large-figured paper on a small room, for it not only shows a want of taste, but will make a room look smaller; papers of perpendicular designs make a room look higher. If you are decorating a ceiling, do not use a style much, if any, darker than the centre or filling. Small designs are more suitable for rooms where a great many pictures are to be hung, though the latter practice is in bad taste.

—The Fidelity Trust and Safe Deposit Company has purchased the two old three-story brick buildings on Franklin Place, above Chestnut, adjoining the Franklin Printing House property, Philadelphia. It is the intention of the Fidelity Company to locate an electric light plant on the newly acquired site. It will not only supply its own building, but furnish light to such of its neighbors as the extra amount of power will warrant. The object of renting out the light will only be to reduce its cost to the company and to pay for the plant.

—It is undoubtedly true that cases of arsenical poisoning have been caused by living or sleeping in rooms covered with wall papers which have been impregnated with poisonous colors in printing the designs; but there are, it is said, several American firms who manufacture wall-papers free from this serious objection. It appears to have been proven by able chemists that it is quite possible to obtain coloring substances containing no arsenic which will give bright-colored papers of no greater cost than those containing arsenic, and of equal brilliancy. Hence, there does not appear to be any reason why poisons should be used in the manufacture of wall papers, and those who do employ them should be legally dealt with. Some manufacturers adopt every possible precaution to avoid arsenical preparations in their goods, employing a chemist to analyze every color before it is used. Under any circumstances, it is a fact that some of our wall papers contain matter that is exceedingly pernicious to health.

Real Estate to be sold at Auction.

M. THOMAS & SONS, auctioneers, will offer for sale on Tuesday, January 19, at 12 o'clock noon, at their auction store, Nos. 137, 139 and 141 South Fourth street, the following properties:—

Large residence, known as the Thomas Mansion, 18 rooms, with city conveniences; also stable and coach house, stalls for 5 horses, and 2-story brick dwelling and 2 2-10 acres ground, fronting on Chestnut st., Matlack st., Gay st., Patton ave., West Chester, Pa., 30 miles from Philadelphia. The mansion is located on elevated ground, in a grove of oak trees, and has spacious verandas on the southern and eastern sides, from which the view extends for miles over the finest part of Chester county.

Executor's sale, est. Simon Gartland—Well established business stand, tavern and dwelling, No. 35 South 17th st., cor. Maloy st., bel. Market st., now rented at $65 per month.

Orphans' Court sale, est., Hanse, Anna E. Elkins—Desirable small farm, with improvements, 10¼ acres, Bartram ave., bet. Oak lane and Horntown road, Darby township, Delaware co., Pa., ¾ of a mile from Glenolden station and 2 miles from Darby.

Very desirable lots, over 6 acres, with large stone house, 27 rooms, stone stable and outhouses, "The Germantown Almshouse Property," 411 ft. on Rittenhouse st., 880 ft. on New st., 856 ft. on Lehman st., 588 ft. on Pulaski ave., Germantown. Plans at the auction store.

2-story brick 4-roomed dwelling, 4037 Warner st., 24th Ward; lot 13 ft. 10½x69.

Sale by order of heirs—2 story brick dwelling, 1344 Pearl st. (cor. of a street), 4 rooms and attic; lot 15x50.

Executor's sale, est. Jas. Henderson—3-story brick tavern and dwelling, 1124 Passyunk ave., opposite 8th st., 9 rooms, bath, range, 2 bulk windows, private entrance, etc.; lot 20 ft. 8½x100.

Operations Outside of the City.

NEW YORK.

City Work.—For an extension to the brownstone building in the City Park, the sum of $35,000 has been appropriated, and $5000 for improvements to Clinton Market. For new school houses, the sum of $895,000 has been appropriated as follows:—

WARD.	LOCATION.	BUILDING.
7th.	Henry st	$100,000
22d.	10th ave. and 80th st	100,000
22d.	10th ave. and 50th st	110,000
8th.	King st	100,000
11th.	Cannon st	85,000
12th.	Lexington ave. and 96th st	120,000
12th.	6th avenue and 134th st	110,000
12th.	St. Nicholas ave. and 156th st	60,000
23d.	Willis ave	80,000
23d.	High Bridge	30,000

Warehouses.—Sealed proposals will be received at noon to-day, at 22 Sands st., for four warehouses to be built in the New York approach of the Brooklyn bridge.

Residences.—Mr. Chas. H. P. Gilbert has drawn plans for two brick, stone and terra-cotta residences, 25x50 each, 3 stories and basement, to be built for Mrs. Sarah A. McKenney, on the corner of 151st st. and St. Nicholas ave.; the same architect has plans on the boards for eighteen houses, 16.8x50 each, of different designs and materials, embracing stone, brick and terra-cotta, to be erected on New ave.; they will be three stories and basement, with mansard and flat roof.

Mr. J. Schiff will have a handsome residence built on 5th avenue, adjoining the one just completed for him; Mr. Anthony Mowbray will be the builder.

It is reported that plans for seventy residences, to cost from $8000 to $10,000 each, and to be built "up town," are on the boards of Messrs. McKim, Mead & White.

Flats.—For Mr. Wm. Blume, of Rondout, N. Y., two 5-story brownstone flats, 27.6x90 each, are to be built on the south side of 116th street, between 2d and 3d avenues, at a cost of $70,000, from plans of Mr. John Brandt, who has also designed five 5-story brick and stone flats, 25x65 each, to be built for Messrs. J. & J. Schreiner, on the north side of 84th street, between avenues A and B, at a cost of $75,000.

For Mr. S. Solomon, a 5-story brick and stone flat, with stores, 25x83, to cost $24,000, is to be built on 35th street, between 7th and 8th avenues, from plans of Messrs. A. B. Ogden & Son.

Mr. Ferdinand Fish will alter Nos. 57 and 59 West 42d street into flats, with first story and basement for stores.

Church.—The Madison Avenue Congregational Church propose to sell their edifice and erect one of a less expensive character.

Hospital.—The Cancer Hospital, just erected on 8th avenue and 106th street, is to have an extension built, from designs of Mr. C. C. Haight, the architect of the main building.

APPLICATIONS FOR PERMITS.

88th street, north side, 124.6 east of 4th avenue, four 5-story brick (first story stone front) tenements, 27x82, tin roofs; cost, each, $18,000; owners and builders, William White, 236 East 119th street, Martha Gelston, 157 East 123d street; architect, J. H. Valentine.

Pitt street, No. 90, 5-story brick tenement, 25x84.6, tin roof; cost, $18,000; Isaac Rinaldo, 148 East 74th street; architect, Fred. Ebeling.

38th street, No 144 West, 1-story brick workshop, 25x98.9, tin roof; cost, $3500; Georgianna G. R. Wendel, Cairo, Egypt; attorney, M. A. Thompson, 250 West 45th street; builder, Christopher Doscher.

150th street, south side, 80 feet east of 10th avenue, ten 2½ and 3½-story frame dwellings, 17x45.6, shingle roofs; cost, each, $2500; John Straiton, 131 East 30th street; architect, J. H. Duncan.

115th street, No. 322 East, 4-story brick tenement, 25x66, tin roof; cost, $13,000; Henry Neus, 404 East 114th street; architect, Adam Munch.

120th street, north side, 140 feet east of 4th avenue, 5-story brick tenement, with stores, 25x60, tin roof; cost, $12,000; Anson G. Shipman, 221 East 123d street; architects, Cleverdon & Putzel.

1st avenue, southeast corner 73d street, 5-story brick tenement, with store, 25x83, with 1-story extension, 4x25, tin roof; cost, $20,000; Ann Mulholland, 324 East 81st street; architect, J. C. Burne; builder not selected.

1st avenue, east side, 25 feet south of 73d street, 5-story brick tenement, with store, 25x64, tin roof; cost, $13,000; owner and architect, same as last.

73d street, south side, 88 feet east of 1st avenue, 5-story brick tenement, 25x41, tin roof; cost, $11,000; owner and architect, same as last.

63d street, south side, 200 feet west of 9th avenue, eight 5-story brick (stone front) tenements, 25x84 and 25x88, tin roofs; cost, each, $20,000; owners and builders, Gillie, Walker & Lawson, 519 West 104th street; architect, M. V. B. Ferdon.

Ninth avenue, northeast corner 105th street, 5-story brick flat, with store, 25.3x75, tin and plastic slate roofing; cost, $18,000; Oscar C. Ferris, 131st and 8th avenue; architect, Andrew Spence.

120th st., south side, 290 ft. west of 7th ave., 1-story frame glazed green-houses, 75x200; cost, $5500; Chas. Ammann, 268 West 131st st; architect, T. E. Thomson.

120th st., south side, 365 feet west of 7th ave., 3-story brick stable and carriage house, 25x90, tin or gravel roof; cost, $5000; owner and architect, same as last.

E. 125th st., No. 79, one 5-story tenement and store, 28 feet front; cost, $25,000; owner, J. P. L. Geraty; architect and builder, Geo. W. Hughes; brick.

East side Lincoln ave., 20 feet north of 134th st., one 4-story factory, 30 ft. front; cost, $4000; owner, Fred. Fuchs; architect, Hugo Siller; brick.

W. 10th st., No. 230-2, one 5-story tenement, 35 ft. front; cost, $12,000; owner, Fred. Egler; architects, J. Boeckel & Son; brick.

Suffolk st., No. 23, one 5-story tenement and store 19 feet front; cost, $18,000; owner, Isaac Goodstein; architect, Chas. Rentz; brick.

6th ave., west side, between 22d and 23d sts., one 5-story store; cost, $300,000; owners, Ehrich Bros.; architects, Alfred Zucker & Co.; brick and iron.

3d ave., near W. 93d st., four 5-story tenements, 25 feet front; cost, $20,000 each; owner, Dennis Lornie; architect, Eugene Parker; brick.

10th ave., southeast cor. 150th st., four 4-story tenements, 25 ft. front; cost, $10,000 each; owner, John Straton; architect, J. H. Duncan; brick.

W. 42d st., northeast cor. 11th ave., one flat and store; cost, $30,000; 25.5 feet front.

BROOKLYN.

Prospect place, south side, 185 feet east Grand avenue, four 3-story brick dwellings, 20x43, tin roofs, wooden cornices; cost, total, $23,000; D. B. Moses, 310 Produce Exchange, New York; builder, T. H. Remsen.

McDougal street, No. 258, south side, 325 feet east Rockaway avenue, one 3-story frame tenement, 28x50, tin roof, brick cornice; cost, $4000; Christopher Kiensie, 256 McDougal street; architect and mason, C. Bauer; contractor not selected.

Sumpter street, No. 108, north side, 297 feet east Ralph avenue, one 3-story frame (brick filled) tenement, 28x50, tin roof; cost, $4000; Annie Diehting, 106 Sumpter street; builder not selected.

Herkimer street, south side, 50 feet east Buffalo avenue, one 3-story frame (brick filled) tenement, 25x55, tin roof; cost, $4000; Sarah Hocking, 1719 Bergen street; architect, A Hill; builder, A. Hocking.

Ellery street, north side, 390 feet from Nostrand avenue, two 3-story frame (brick filled) stores and tenements, 30x55, tin roofs; cost, each, $5200; Charlotte M. Goodwin; architect, J. E. Sagar.

Bushwick avenue, southeast corner Bleecker street, eight two-story and basement brownstone dwellings, 18.9x40, tin roofs, wooden cornices; cost, each, $4500; Jacob Murr, 477 Bedford avenue; architect, J. E Dwyer.

North side of Halsey street, 100 feet east of Marcy avenue, two 2-story and basement buildings 19.6x100; cost, $5000 each; owner, Wm. Reynolds; architect, J. D. Reynolds; brick and brownstone.

West side of Carroll street, 92 feet east of 7th avenue, 20x48; cost, $10,000 each; owner, architect and builder, John Magilligam; brick and brownstone.

Marion street, north side, 300 feet west of Rockaway avenue, two 4-story dwellings, 25x55; cost, $4275; owner, P. Delop; architect, A. Hill.

North side Marion st., 225 ft. west of Rockaway avenue, one 3-story building, 25x56; cost, $4200; owner, H. Eckhoff; carpenter, Joseph F. Heydinger.

North side Jefferson street, northwest corner of Throop avenue, one 4-story store and flats, 21x60; cost, $12,000; owner and builder, J. W. Stewart; architect, J. D. Hall; brick and brownstone.

North side Jefferson street, 21 feet west of Throop avenue, one 3-story dwelling. 19x45, with extension, 10.4x15. two stories, cost, $8000; owner and builder, J. W. Stewart; architect, J. D. Wall; brick and brownstone.

South side of Herkimer st., 48 ft. west of Columbus place, one 3-story dwelling, 23x50; cost, $4700; owner, John Scherer.

North side of Madison st., 160 ft. from Lewis ave., five 3-story and basement buildings, 20x44; cost, $7000; owner, B. Zimkin.

West side of Graham st., 75 ft. north of Myrtle ave., one 4-story building, 25x60; cost, $8000; owner and mason, Cornelius Donsellson; architect, George P. Choppell & Co.

BUFFALO, N. Y.

Buffalo State Asylum for the Insane are building barns, sheds, etc., to cost about $10,000; W. W. Carlin, architect; Jacob Jaeckle, builder.

Caledonian Curling Club, ice rink, to cost $3500; W. W. Carlin, architect; Jacob Jaeckle, builder.

Main st., near Riley st., frame residence; cost, $10,000; owner, A. Weppner; architects, Swan & Falkner; builders, Rumrill & Rupp.

Main st., near Bryant st., 2-story brick residence, Mansard roof; cost, $12,000; owner, W. N. Grimes; architects, M. E. Beebe & Son; builder, Chas. Berrick.

Pearl st., near Court st., 4-story brick stores; cost, $10,000; owners, Loewer & Silber; architect, Geo. J. Metzger; builder, Jacob Reimann.

CHICAGO.

Ogden place, Nos. 24 and 26, three 3-story flats, 66x50; cost, $.4,000; owner, E. F. Gobel; architect, W. Stipplemann & Co.; stone fronts.

Loomis street, No. 729, 3-story dwelling, 21x56, cost, $4000; owner, V. Chuckna; stone trimmings.

S. Park avenue, No. 3017, 3-story dwelling, 26 x40; cost, $7000; owner, H. J. Palmer; architect, W. L. Carroll; mason, D. G. Robinson; pressed brick, stone trimmings.

Wabash avenue, No. 3221, 2-story dwelling, 25x40; cost, $8000; owner, Jacob Schnur; architects, Thomas & Rogers; mason, James Bloomfield; St. Louis pressed brick, stone trimmings.

South Sangamon street, near Madison, 4-story apartment building, 75x76; cost, $20,000; owners, W. H. Thomas & Son; architect, J. H. Carpenter; mason, W. H. T. & Son; pressed brick, brownstone.

Vernon avenue, Nos. 3210–14, three 2-story dwellings, 50x60; cost, $10,000; owner, Mrs. A. Tyler; architect, F. A. Schock; masons, Robinson & Minor; Lemont stone front.

Lane Place, No. 24, 3-story flats, 26x72 cost, $8000; owner, L. B. Schaefer; architect, E. Krauser; mason, G. Eberlein; carpenter, Lockstein; pressed brick, stone and terra-cotta.

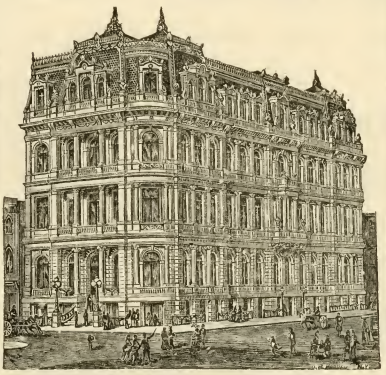
THE REAL ESTATE TITLE, INSURANCE AND TRUST COMPANY,

OF PHILADELPHIA.

CAPITAL, $500,000. FULL PAID.

THE OLDEST INSTITUTION OF THE KIND IN AMERICA.

The Insurance Policy of this Company gives absolute security to the owners of Real Estate and Mortgages, against loss by reason of **FRAUD, ACCIDENT or MISTAKE.**



Insurance premium and conveyancing (including one deed, examination of title and recording) on sums of $2,000 or under, $30.00. For each additional $1,000—$2.50.

This one payment procures an absolute GUARANTEE of the title to the insured and his heirs forever.

THE FIDELITY INSURANCE, TRUST AND SAFE DEPOSIT COMPANY,
327-331 Chestnut Street.

JOHN W. MURRAY, Esq., PHILADELPHIA, January 14, 1885.

Prest. Title Guarantee and Trust Company, 55 Liberty Street, New York.

DEAR SIR:—In response to your request for some information in regard to our experience with the Real Estate Title Insurance Company, of Philadelphia, I would say that our Company takes their policies in place of the abstract of title, searches and opinion of counsel, formerly required, and pays out its money at once, on presentation of the bond and mortgage and policy of the Title Company, without any other examination or evidence of title.

I consider that the convenience, saving of time, and security afforded by such companies, are of great value to all investors in real estate and mortgages.

Very truly yours,

S. A. CALDWELL, *President.*

N. W. CORNER TENTH AND CHESTNUT STS.

FOR SALE.

BUILDING LOTS,
Ripe for Improvement.

Broad and Montgomery Ave., 146.6 x 270.
Broad St., above Diamond, 140 x 165.
13th St., below Cambria, - 100 x 204, 2 fronts.
40th St., near Locust, - 55 x 140, back outlet.
Square of ground, 20th and Moore Streets.

These Lots will be sold to be improved, for a small cash payment, balance secured on the property.

R. J. DOBBINS,
308 North Broad Street.

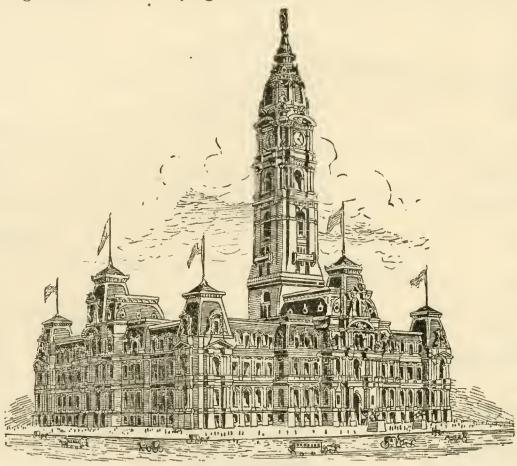
VOL. I.—NO. 3. PHILADELPHIA, MONDAY, JANUARY 25, 1886. PRICE 15 CENTS

A PERMANENT ELEVATOR FOR CITY HALL TOWER.

When the tower of the new City Hall in this city was designed, the thought of having an elevator which could be used to carry passengers to the top of this great structure, never occurred to the Architect, for at that time a passenger elevator was a novelty, almost an experiment. Provisions were made for elevators in different portions of the building, but these were only planned to carry passengers to the upper floors of the main building, and two Hydraulic Elevators were put in before the main structure was finished, and did good service in carrying materials to be used in the construction of the upper floors. As the tower grew higher much difficulty was experienced in carrying bricks and mortar used in the work to the great height reached in its construction. The project was conceived of putting in a temporary elevator, to be used while the tower was being built; this elevator to be removed when the work was completed; but the Architect and several of the Commissioners finally decided that it would be better to put in a permanent apparatus that could be used for hoisting the materials and workmen to the present height of the tower, the apparatus being so arranged that it could be raised at successive stages until the ultimate height was reached. Then a handsome car could be put in place of the platform, and the elevator used for passenger service.



This plan was adopted, and a committee was appointed to investigate the merits of the different forms of elevators made by the leading elevator manufacturers. The Committee gave the matter careful consideration, visited New York, where they examined the elevator in the tower of the N. Y. Produce Exchange, and finally decided to accept the proposal made by Otis Brothers & Co., of this city and New York.

The Otis Company submitted a plan which provided for a Hydraulic Elevator of sufficient capacity to lift a load of 4000 lbs. at a speed which would permit the car to make a trip up and down in two minutes. The car will start from the first floor proper of the tower, which is 135 feet above the street level, and will run to the top floor, immediately under the clock, a distance of about 230 feet.

This will be one of the most important feats ever attempted in the manufacture of elevators, there being only two similar cases in the world, one the Washington Monument, 550 feet, and the other the one referred to in the New York Produce Exchange, which carries passengers to the top of the tower of that building, a distance of 210 feet; both of these elevators were manufactured by the Otis Co.

The work of erecting the tower elevator will be started at once, and it is the intention of the contractors to finish the erection of the elevator to the present height of the tower (130 feet) before the 1st of April next.

PHILADELPHIA, MONDAY, JAN. 25, 1886.

THE first three weeks of the new year have developed favorable conditions. Active preparations are being made for a busy year in house and shop building. The architects, or most of them, are fairly busy on work to begin as soon as the season opens. It is too soon to prognosticate as to results, but it is hazarding very little to say that the present year will be one of exceptional activity in real estate and building operations. Despite the activity in building, and the expansion of the city, and the increasing demand for eligible building sites, real estate has, in the main, appreciated slowly and only to fair and legitimate limits. In former periods of expansion, real estate has advanced spasmodically, and by such action has checked genuine enterprise. So far nothing but a moderate and healthful expansion of values, both in the built-up portion of the city and in the suburbs, has taken place. Holders of property are anxious to sell, but not to sacrifice their property for the sake of selling. The topography of the suburban sections is such that land for building sites and for manufacturing purposes must be reasonable. Considerable land has been offered for sale within easy reach of the city, and some few important transactions have been consummated. Real estate operations, however, preserve their conservative character, and sudden fluctuations are guarded against by the abundance of opportunities for building enterprise, as well as by the caution which characterizes all our movements.

The probability of an upward tendency in prices in building material has been pretty well discounted. The facilities for production are such that supply can be soon equalized to any probable demand. The lumber supply is large, though by no means heavy. Prices have been firm for several weeks, in nearly all kinds. White-pine receipts were exceptionally large during autumn, and prices were, for a while, unduly depressed; but since the 15th of December there has been a gradual return to normal prices. Hemlock is selling at $11.00 to $12.00, and is in moderate supply. Yellow pine has hardened within a month, because of higher freight rates. The hard woods are in moderate but sufficient supply for winter demands.

The brick makers have been inclined to advance quotations, but defer any positive action in that matter. Quotations at present are as follows: Salmon brick, $6.00; hard brick, $8.50 to $9.00; red stretcher, $13.00; Philadelphia pressed, $22.00.

The supply of stone will be largely increased during the coming season, by reason of the opening of several valuable quarries in eastern Pennsylvania, and because of the increased facilities for handling stone at the chief sources of supply in the New England States. Our architects and builders are disposed to encourage the taste developing itself in the use of stone, especially for decorative and ornamental purposes. The use of stone is very rapidly increasing in all building operations, but the demand does not seem to interfere with the rapid increase in the manufacture of brick.

The architects have been giving, during the past few days, rather glowing accounts of what they expect this year. Building, they say, has by no means been overdone, and refer to their work in hand and to their instructions for the prosecution of drawings for very important building operations as evidence of the healthful tendency. The activity in manufacturing during the past few months has led to an enlargement of manufacturing facilities, as well as to a large increase in the number of manufacturing establishments. Some thirty large factories have either been recently completed or are fast nearing completion, and reputable architects are the authority for the statement that as much more work, at least, will be done this year as last. Manufacturers' margins are improving. The volume of business is either increasing, or there are solid evidences of its early improvement. Hence a confidence exists, and a preparation for greater industrial activity in all branches of trade.

The iron trade is exceptionally active. The furnace capacity is sold away ahead. The bar, plate, sheet, skelp, pipe and bridge mills all over the State are full of orders. Prices are firm, and a further advance is looked for. In fact, an advance has already been discounted in many cases, as was shown by the heavy purchases in December. The railroad construction of 1886 will, without doubt, be double that of 1885.

Building operations will not be discouraged this year by any scarcity of money, or lack of confidence, or serious increase in the cost of material, or in the price of labor. On the other hand, building activity will be stimulated by the demand for houses and factories, by the increasing trade requirements, by the fortunate investments of last year and by the general strengthening of confidence which all these causes are bringing about. Influences are at work, pointing in the direction of heavier real estate transactions. The upward tendency in prices will be productive of good rather than harm. Our most prosperous times were during the eras of high prices. Legitimate margins always stimulate investment, draw out capital and increase the demand for labor. So far in our upward course, from the extreme depression of last summer, we have reached only the limit of legitimate prices. There are no probabilities of a speculative era. The conditions are ripe for industrial activity throughout the State and country, and for a steady enlargement of building operations, and for wise and conservative operations in real estate.

FRAUDS in the sale or grants of public lands are not confined to this side of the border, as the experience of the Canadian officials who have charge of the sales of land scrip granted to volunteers who served to suppress the northwest rebellion, shows. Many frauds have recently been revealed. One French Canadian volunteer is alleged to have sold his claim to nine different parties. In most cases the signatures of the commanding officers, certifying that certain volunteers were entitled to the bounty, were deliberately forged.

IT is predicted that in the course of the next five years the steel nail will have completely supplanted the iron nail, as the steel rail has its iron predecessor. Already one-half of the nails manufactured in Wheeling are made of steel, and the machinery and plant necessary for their manufacture are being set up in every nail centre and at nearly every nail foundry. It is said that, under present conditions, steel nails can be made about ten cents per keg cheaper than those made of iron, even where the manufacturer has to purchase his ingots.

IT is estimated that the log-cut in Maine, for the present winter, will amount to 170,000,000 feet.

—The number of postage stamps used in this country in one year foots up to an enormous total. Of 2-cent stamps alone 1,284,000,000 were used during 1885. It is not generally known that the Post-Office Department issues stamps running so high in value as $60 apiece, yet there are of those $60 stamps nearly 12,000 issued during the year. Stamps of large value are issued in the denominations of $12, $24, $36, $48 and $60 each. These stamps are sold to publishers of newspapers and periodicals, who use them in mailing very large quantities of matter.

Our thanks are due to Messrs. James T. Freeman, of James A. Freeman & Co., also to Messrs. Benj. F. Teller & Bro., for courtesies extended.

REAL ESTATE.

Banquet of the Bricklayers' Company.

The annual banquet of the Bricklayers' Company, which was founded in 1790, was given on Thursday, in Mercantile Hall, on Franklin street, below Poplar, over 100 members and guests participating. The society is composed of master bricklayers and employers, and has been authorized by the Legislature to act as umpire in disputes over building measurements and other trade matters. The following were elected officers: President, Henry B. Coulomb; Vice-Presidents, Thomas Singleton and Samuel Hart; Treasurer, Stephen Morris; Secretary, Edward S. Fitch. A fund of $13,000 remains in the treasury.

An Unsafe Bridge.

The Highway Committee of City Councils has recently received several communications from the Reading Railroad officials in regard to the condition of the Bridge on Girard Avenue over the company's tracks. Engineer Roberts, in charge of the municipal bridges, explained that the iron work of the structure had been ruined by the sulphurous gases generated by the locomotives, largely owing to the very bad quality of coal consumed in them. These gases had rotted the cast iron girders to an absolute lack of tenacity. It was declared that the sum of $12,000 would be required to build a permanent iron structure, though repairs costing $1800 would keep the bridge from falling down in the next two or three years. It was referred to the Chief Commissioner for report.

Arch Street to be Widened.

The proposition to open the old Lamb Tavern road, between Broad and Fifteenth streets, has been referred to a sub-committee by the Councils Committee on Surveys. In the course of the argument before the committee it was claimed that the street was vacated in 1870 by order of the Quarter Sessions Court, and that great financial injury would accrue to the present holders of title should the city persist in holding that the thoroughfare be kept on the city plan.

The same committee has agreed upon an ordinance widening Arch street from Eighth street east to the Delaware river, fixing the distance from building line to building line at 72 feet. This is a compromise measure, as the bill originally provided for a uniform width between the two rivers. It has yet to be passed by City Councils.

A Big Land Suit.

Alexander B. Grogan et al. has instituted suit against the California Land Investment Company for an accounting and the appointment of a receiver. The complainant sets forth that the defendant is a foreign corporation having a capital stock of £300,000, represented by 29,000 shares of stock of a par value of $50 per share, 9,000 shares of which have been subscribed. The plaintiff is owner of 500 shares. The corporation is the owner of 20,026 acres marsh land in Alameda County, 3000 acres of which have been reclaimed, at a cost of $20,000. Since 1880 the defendants, who have control of the corporation, and who reside in London, England, have allowed the land to be again overflowed, and refuse to either prosecute work or sell the property at a fair price. Plaintiff asks for the proper relief.

A Home for Orphan Boys.

A farm of 200 acres has been purchased at Eddington, Bucks county, by the three daughters of the late Francis A. Drexel, who intend to establish there an Industrial Home and School for Orphan Boys. There a number of necessary buildings are to be erected, not only for dwelling purposes and ordinary school houses, but for working shop purposes, so that they may be taught mechanical and handicraft trades and occupations, as well as farming and gardening. When buildings sufficient to accommodate one hundred boys have been got ready, that many orphans will be transferred from St. John's Orphan Asylum, and others will be added to these as the work makes progress. The institution is to be placed in charge of the Christian Brothers, an Order of the Roman Catholic Church, and the whole cost of maintaining it and the various trades and other schools is to be defrayed by the Misses Drexel.

Unhealthfulness of Oil Stoves.

It is not generally known that coal oil and gasoline stoves rapidly vitiate the air of a room for breathing purposes, by the development of large quantities of carbon dioxide. How much longer must this continue before manufacturers of such goods will obviate this new danger by inventing some form of hood and pipe for conveying this poisonous gas to the outside atmosphere? Volumes have been written concerning the ventilation of homes and the injury that arises, especially to children and the infirm, from crowding too many people together in closed apartments, and now, with the introduction of oil and gasoline stoves in the household, a new difficulty presents itself which is not easily remedied in the endeavor to provide for health and comfort. These stoves are frequently found with several large burners in full blast in small kitchens hardly large enough to contain air to supply the healthful requirements of one person.

Messages by Pneumatic Tubes.

The proposition to lay pneumatic tubes under nearly all the principal streets of Philadelphia, for the delivery of messages, is now before the Electrical Committee of City Councils, which as yet has taken no action in the matter. George W. Bratton, one of the originators of the scheme, explained to the committee, that the system, some seven or eight miles in extent in all, only requires the laying of two 2¼ inch brass tubes, which are in no way liable to get out of order and require tearing up of the streets frequently. The system has been in operation in London under the Postal laws since 1870, but is in use nowhere in the United States to any extent. It can be put down for $3000 per mile, and messages will cover a mile in thirty seconds. The service would be cheap—$10 per year, or five cents per message—and would in part, do away with both the district messenger service and the telephone.

A Heavy Land Claim.

An important suit, involving the title to some valuable property in Duluth, has been instituted in the St. Paul courts, and was taken up for trial on the 15th inst. It is the case of Frederick Prentice, of Toledo, against the St. Paul and Duluth and Northern Pacific Railroads. The property for which title is asked is an undivided one-half interest in 682 acres of land, including a mile or more of water front, midway between Rice's Point and Minnesota Point, Duluth, which Mr. Prentice claims under the beneficiaries of the Indian treaty in 1854, between the Chippewa Indians and the United States. It takes in the best part of the terminal property of the two defendants in Duluth, and if Mr. Prentice succeeds in establishing his claim it will put him in possession of an undivided one-half interest in the principal water front of Duluth, including the locality of the proposed new slips at that point.

Large Claims Against an Estate.

In December, Judge Penrose, of the Orphans' Court, filed an adjudication of the account of the administrators of the estate of Charles C. Rhodes, Sr., deceased, disallowing a number of large claims which had been presented against the estate. Two of the claimants, Simon P. Kase, who asked for some $511,000, and Holmes B. Kelly, whose claim amounted to $13,500, excepted to the Court's finding. Mr. Kase's claim was based upon transactions said to have taken place between him and the decedent some years ago, in relation to the affairs of the Danville, Hazelton and Wilkes Barre Railroad, and the claim of Mr. Kelly was for the alleged raising of money on Mr. Rhodes' notes, negotiating the sale of railroad bonds for him, and for services claimed to have been rendered in a law suit in which the decedent and the railroad company were both interested. The exceptions were argued at length before the Orphans' Court in banc yesterday, and a decision was reserved.

Landlord and Tenant.

In February, 1885, Anthony Brown rented from George A. Twibill the premises No 4 Strawberry street, intending to use them as a saloon. His lease was for a year, but after he had been in possession about a month he discovered that the place had formerly been an opium joint and disreputable house, which was studiously avoided by all the reputable business men in the vicinity, who might otherwise have dropped in to take an occasional drink. He accordingly moved out and refused to pay any more rent. Having been sued for the rent he put in an affidavit of defense stating these facts.

Judge Biddle said that they did not constitute any defense. It was the business of the tenant to discover the character of the premises before moving in. The landlord was not bound to make any such disclosure. There was no relation of trust or confidence between the parties, and each must look out for himself. The defendant had simply made a bad bargain, and must pay the rent.

The Masonic Home's New Purchase.

The managers of the Masonic Home have completed negotiations for the purchase of the property now occupied by the institution at Broad and Ontario streets, and also of the building and ground adjoining, the dimensions being 200 feet on Broad street by 160 feet on Ontario street. The purchase was effected at a cost of $23,000, of which amount $10,000 will be paid at once, the balance being held upon a mortgage of four per cent., and to be paid within the present year. The managers are confident of their ability to raise the amount required within the time specified, to free the property from indebtedness. It was found absolutely necessary to obtain enlarged quarters, inasmuch as the limit of the capacity of the house now occupied has been almost reached. The property purchased includes a building adjoining that in use by the corporation, and which cannot be utilized for several months, inasmuch as the present occupants have a lease upon the house executed for a year. It is said that the houses and ground thus secured will be ample for the needs of the Home for several years.

Assessed by the Foot-Front Rule.

The Supreme Court has just affirmed the judgment of Court of Common Pleas No. 2, in the case of the City of Philadelphia, for the use of Peters vs. Keith. In this case a lien was filed in behalf of a contractor against the property of the defendant for certain improvements. The liability was assessed by what is known as the "foot-front measure." The Supreme Court has already decided that in rural districts such a method of calculating liability is unconstitutional, because the taxation is unequal among the same class of subjects. The question therefore arose whether the property in question was in a rural district or not. This was left to the jury, who found that it was. The Supreme Court affirms the judgment of the lower Court, and holds that it was for the jury to find whether the property was rural or not, and that the classification of property by the Board of Revision of Taxes has nothing to do with the matter. The property was, therefore, not liable to taxation by the foot-front principle.

A Disputed Boundary Line.

The boundary line between Mifflin and Huntingdon Counties, in Pennsylvania, is in dispute, and it will be necessary to carry the case to Court to effect a settlement. At a recent ejectment trial in Huntingdon, in which Colonel William Dorris was plaintiff and David Zook, a rich Mifflin County farmer, defendant, the Secretary of Internal

Affairs testified that the land was assessed in Mifflin County, but that it belonged to Huntingdon County, in addition to a considerable portion of surrounding territory, worth from $80,000 to $100,000. A few days ago the Secretary visited the disputed boundary line in company with several county officials, and he pointed out to them the proper line. The Huntingdon County Commissioners instructed their assessor to assess all taxables and property in the disputed belt. The parties will also be assessed by the Mifflin County authorities, and when they refuse to pay the taxes to Huntingdon the commissioners will sue them. The plea that they are not residents of Huntingdon County will naturally follow, and the location of the boundary line be settled in that way.

To Preserve Scaffold Ropes.

Aside from the consideration of human life, the preservation of scaffold ropes is a matter of great practical importance when scaffolding remains erected for any considerable time, especially in localities where the atmosphere is destructive of hemp fibre. It has been suggested that in these cases the ropes should be dipped, when dry, into a bath containing 20 grammes of sulphate of copper per litre of water, and kept in soak in this solution for four days, afterward being dried. The ropes will thus have absorbed a certain quantity of sulphate of copper, which will preserve them from the attacks of animal parasites and from rot. The copper salt may be fixed in the fibre by a coating of tar or by soapy water. For tarring the rope it is best to pass it through a bath of boiled tar, hot, drawing it through a thimble to press back the excess of tar, and suspending it afterward on a staging to dry and harden. In the second method, the rope is soaked in a solution of 100 grammes of soap per litre of water. The copper soap thus formed in the fibre of the rope preserves it from rot, even better than the tar, which acts mechanically to imprison the sulphate of copper, which is the real preservative. It is not stated whether the copper treatment is equally serviceable with dressed as with plain hemp ropes.

Montgomery County Improvements.

The fifty-three acres of land purchased by the Sylvania Mutual Land Improvement Association from the heirs of the Jane Roberts estate, near Fox Chase, in Abingdon township, Montgomery county, has undergone a complete transformation under its new ownership. The tract, for which $400 per acre was paid by the company, consisted of rolling farm land and wood land, but under the hands of Contractor Kennedy Crossan and his force of workmen it has now assumed the appearance of a town site, with handsome streets regularly laid out and graded to a nicety.

The work of leveling the higher portions and filling up the lower ones involved the handling of 41,000 cubic yards of material, cost about $14,500, and was finished but recently.

The Fox Chase Land Association, limited, is improving a tract of land adjoining the above.

W. P. Hazard, of West Chester, who purchased 19 acres of the Kent farm, adjoining Jenkintown station, divided his purchase into 57 lots of 60x150 feet, nearly all of which have been disposed of at prices ranging from $400 to $700. Several houses, ranging in cost from $2500 to $6500, have been completed, and the erection of an additional number will be begun as soon as the weather will permit.

Deputy Collectors of Delinquent Taxes.

Property holders who are in arrears for taxes on their real estate should settle their account with the city at once. Tax Receiver Hunter has announced the list of deputy collectors of delinquent taxes for the present year, as follows:

First Ward, Thomas F. Close; Second Ward, William T. Carroll; Third Ward, J. L. C. Tatem; Fourth, Fifth and Seventh Wards, Robert C. Howell and Robert Aspinall; Sixth and Eleventh Wards, James C. Nicholl; Eighth and Ninth Wards, J. P. Sensenderfer; Tenth and Fifteenth Wards, John Ertel and William P. Stilz; Twelfth and Eighteenth Wards, Ephraim Haws; Thirteenth Ward, Isaac H. O'Hara; Fourteenth Ward, James Keator; Sixteenth and Seventeenth Wards, John L. Bowers; Nineteenth and Thirty-first Wards, Andrew Keiser and Thomas West; Twentieth Ward, James H. Avery; Twenty-first Ward, William H. Preston; Twenty-second Ward, David L. Stewart; Twenty-third Ward, Franklin Townsend and James R. Bissex; Twenty fourth and Twenty-seventh Wards, George W. Barton and Charles R. Maguire; Twenty-fifth Ward, Fred. M. Wagner; Twenty sixth Ward, George L. Harvey; Twenty-eighth Ward, Charles A. Widner; Twenty-ninth Ward, James W. Campbell; Thirtieth Ward, Lawrence T. Lynch. The new men are Robert Aspinall and Franklin Townsend, to succeed William Lapthorne and Jesse H. Cottman.

Bidders for Highway Work.

Chief Commissioner of Highways McDonald has received the following bids for doing work upon the highways, the prices given in each case being the highest and lowest bids: First District, street cleaning and collection of ashes, D. & P. McNichol, $39,050; Thomas S. Smith, $25,500. For repairing and cleaning sewers and inlets, the first named not to exceed four feet in their least diameter; First District, M. O'Rourke, $27,000; W. H. H. Achuff, $1100; Second District, M. O'Rourke, $30,000; W. H. H. Achuff, $2800; Third District, M. O'Rourke, $12,900; D. McMahon, $2245; Fourth District, M. O'Rourke, $25,000; W. H. H. Achuff, $2100; Fifth District, M. O'Rourke, $9000; D. & P. McNichol, $877.50; Sixth District, M. O'Rourke, $13,000; W. H. H. Achuff, $980; For maintenance of unpaved streets or country roads and small bridges and drains, First Ward, D. & P. McNichol, $6000; J. L. Young, $799,99; Twenty-sixth Ward, D. & P. McNichol, $4500; J. L. Young, $789; Second to Twentieth Wards, both inclusive, and Twenty-eighth, Twenty-ninth, Thirtieth, and Thirty-first Wards, D. & P. McNichol, $4000; D. McMahon, $1943; Twenty-first ward, J. Anderson, $2599; A. Farquhar, $1775; Twenty-second Ward, Ed. Toner, $4500; A. Farquhar, $2920; Twenty third Ward, John Noonan, $3900; B. McCarthy, $4290; Twenty fifth Ward, J. T. McBride, $2190; B. McCarthy, $1690; Twenty-fourth Ward, D. & P. McNichol, $5000; W. H. H. Achuff, $2300; Twenty-seventh Ward, D. & P. McNichol, $1500; William Magee, $1745.

Progress of File Making.

The changes in manner of production of files have been many and varied. Centuries ago the skins of fishes' bellies were the most primitive files used. As time went on and metals became better known and more generally used, devices for filing had to be substituted in place of the skins of fish, and the metallic files sprang into existence, but in shapes so curious that to-day, except for the teeth, the mechanic would not recognize them. As the mechanical arts progressed, so advanced the manufacture of files. From Switzerland came all kinds of small files, curious in shape and fine in tooth, designed for the making of parts of clocks, watches, jewelry, etc. From Germany and England the files for use on machinery, the files varying in length from three to thirty inches, the largest being made with a tang at each end and worked by two men, one at each end of the file.

The inventive genius of man so devised a mechanical contrivance that by use of chisel and cutting tool the large mass of metal was reduced to proper shape by a much less laborious system than filing by hand, so that at the present day it is a rare thing to see a 20-inch file in use, and the files run in size from 15 inches down to 2 inches in length.

In this country, about 20 years ago, the old process of producing the teeth of files by means of a chisel and hammer in the hands of a man was supplemented by a machine, which, though crude, gave evidence that at some later day the machine would, to a large extent, take the place of hand labor, and the present day sees this accomplished. There are 3500 tons of steel used yearly in the United States in the manufacture of files, and several concerns have a capacity of from 500 to 1000 files a day, making on the machine files with teeth so fine that the magnifying glass has to be used to discover the tooth, and so coarse that 12 teeth cover a square inch of surface.—*J. D. Foot, in American Machinist.*

A Paradise for Millionaires.

Northern millionaires with lordly tastes for vast domains are turning their eyes to the fertile seacoast islands of Georgia, where they can count their acres by the thousand and live in a style of princely magnificence. Mr. Thomas Carnegie (not Mr. Andrew Carnegie, as is erroneously printed) is already intrenched on the southern end of Cumberland, in the ancient home of the Greenes. He has retouched the incomparable avenues and rose gardens of Dungeness at a cost of $50,000, and is said to have spent $150,000 in restoring the mansion and grounds. There, amid his orange groves and live oaks, he has a home worthy of a prince. Jekyll's Island, which Mr. and Mrs. Vanderbilt recently rode 2000 miles to inspect, is one of the smallest on the coast, measuring about seven miles in length and averaging two in width. Its climate is perfect, St. Simon's on the north and Cumberland on the south sheltering it from boisterous winds. It fronts Brunswick, and stands high and clear above the sea. The growth is live oak and palmetto. Oranges thrive on the island, and the grass is luxuriant. Jekyll's was the point selected by the slave ship Wanderer for landing its cargo of slaves. A force of canoes deported them rapidly from Jekyll's to neighboring islands and mainland, and when the Wanderer was captured less than a hundred slaves were found there. Jekyll now belongs to Mr. John Du Bignon, and is used mainly for grazing. If Mr. Vanderbilt buys it, a wonderful transformation may be expected.

Quotations for Insurance and Trust Stocks.

During the past week quotations for trust and fire insurance stocks rated as follows—

	Par.	*Quotation.*
Fidelity Trust	100	296
Girard Trust	24	81
Guarantee Trust	100	168

Don't Paint it White.

To those who contemplate painting a frame house, and incline their ideas towards this conventional, but dirt-exhibiting, color, we would simply say, Don't.

Our first objection to white is that it is too glaring and conspicuous. We scarcely know anything more uncomfortable to the eye than to approach the sunny side of a house on one of our brilliant midsummer days, when it revels in the fashionable purity of its color. It is absolutely painful. Nature, full of kindness to man, has covered most of the surface that meets his eye in the country with a soft green hue at once refreshing and most grateful to the eye. Many of our

country houses appear to be colored on the very opposite principle, and one needs, in broad sunshine, to turn his eyes away from them to relieve them by a glimpse of the soft, refreshing shades that everywhere pervade the trees, the grass and the surface of the earth.

Our second objection to white is that it does not harmonize with the country, and thereby mars the effect of rural landscapes. Nothing tends so much to destroy the breadth of tone as any object of considerable size and of brilliant white. It stands harshly apart from all soft shades of the scene. Hence, landscape-painters always studiously avoid the introduction of white into their buildings, and give them instead some neutral tint—a tint which unites or contrasts equally with the color of the trees and grass, and which seems to blend into other parts of natural landscape instead of being a discordant note in the general harmony.

Natural Gas as an Illuminant.

A discovery which will allow natural gas to be used as an illuminant, has recently been made by Henry Campbell, of Pittsburg. The invention is a simple steel burner, using only forty feet of gas an hour, and producing a light of 200 candle power. It is intended for lighting mills and other large places. The burner consists of a series of perforated disks, through which the air passes and becomes heated. The burner proper has eighteen small openings, which produce a corresponding number of jets, which blend into a beautiful circular light eight inches in diameter. Mr. Campbell thus tells how he came to make the discovery: "A natural gas expert advanced the theory, some time ago, that by superheating the air and gas together natural gas could be converted into an illuminant. It was found, however, that when both gas and air were superheated a deposit of graphite is formed. Then it was suggested that by superheating the gas and turning on cold air the result could be reached. This was tried, but it was found that the large amount of oxygen brought into the combustion produced a blue flame. Then we got to work under the theory that by superheating the air to a high degree the globules of gas could all be broken up, thus relieving the free carbon and bringing it all up to the incandescent point. In this manner, I argued, we could get every particle of illuminating property out of the gas. It took a good deal of hard work to put the theory into practical use, but it has been done at last. We have a burner which can be burned at an expense of four cents for every ten hours, and will produce a light more brilliant than the largest electric lights."

Over a thousand of the burners are already operating successfully in various Pittsburg mills, and Mr. Campbell has orders enough on hand to keep him running steadily for some time to come.

New Land Title and Investment Companies.

The fact that there is a large amount of idle capital in Philadelphia seeking investment is shown by the way subscriptions pour in when the prospectus of a new financial enterprise, ably managed, is announced. The stock of the three land title companies recently organized has already doubled or trebled in value, and two more companies of a similar nature are to be organized. It is stated, however, that one of the companies proposes to cultivate an entirely new field. The initial movement in this new enterprise occurred on Thursday, when a number of prominent capitalists, business men and representative manufacturers met in the First National Bank building to organize a corporation to act as intermediary between capitalists and approved borrowers for long terms, and to carry on other business of the same character. The company does not contemplate trenching on the business of the established banks and trust companies, but will be more after the nature of some of the great investment companies of Europe. Dr. William Pepper presided at the meeting, and Mr. Morton McMichael acted as Secretary. Mr. Wharton Barker, who has had a great deal to do with starting the company, explained, with others, its proposed business. The capital stock of $1,500,000 has been fully subscribed, and there is another million anxious to be admitted, there is a difference of opinion among the subscribers whether this additional capital should be admitted and the stock increased to $2,500,000.

The other corporation which proposes to enter the field is the Northern Saving Fund, Trust and Safe Deposit Company. At a recent meeting of its stockholders, a resolution to increase the capital of the company and extend its charter so as to include the land title business was referred to the president and board of directors. Nearly all the stockholders favor the scheme. The present capital of the Northern Saving Fund is $250,000. This will be increased to $500,000, with the new venture. It has deposits now of $2,000,000, and a cash surplus of about $100,000. The company pays five per cent. dividend, and the stock sells at $35, par being $25.

Condition of the Lumber Trade.

The *Northwestern Lumberman*, of Chicago, reports as follows concerning the condition of trade:—

The books for the year have been balanced, an account of stock has been taken, the dealers know how much they have paid out, and how much they have left. It is seen that the aggregate of business done shows a decrease as compared to results in 1884. There are a few exceptions in which houses have made a comparative increase of their business during the past year. But the great majority have had an opposite experience. Dealers are now asking, Why is it that receipts and distribution in and from this city fell off during the past year as compared to the year previous. Some are bold enough to assert that the lumber trade has passed the summit, and never again will be so large as it was in 1882. Others take a different view, and say that another period of good times will place the white pine trade back where it was before the late depression, in the matter of volume. But all regret the departure of fair profits, and the majority are fearful that they have gone to stay. As a basis for this view, it is pointed out that stumpage and manufacturing has got into strong hands, and that the cargo market fails to yield to the demands of the yard men, as it once did. It is claimed that too much has been paid per thousand for lumber now in stock. The stumpage owners and manufacturers are able to hold their values steady, while the wholesale trade is cut up and constantly menaced by competition from various quarters. Now the yellow pine of the South and the redwood of California threaten to eat into the western trade. It is argued that, under the weight of all these adverse conditions, the wholesale trade of this city must necessarily be restricted, and gradually dwindle. The claim is not made, of course, that there is to be a rapid and near-by extinction of the wholesale trade; but it will fall off, a few millions a year, until where 1,500,000,000 was once handled by the jobbing trade, there will probably be not more than 500,000,000. The feeling in regard to prices at present is undoubtedly firm. Estimates on bills, wherever seen, show that list prices, or very nearly so, are asked for dimension. There is not trade enough, however, to be a serious test of values. Holders of lumber better than common are making inquiry about the feeling in respect to this class of stock. The strong faith in good lumber that during the past year prevailed, induced some dealers to quietly lay in ample supplies. Now these holders are naturally anxious about the future of prices. It is impossible to see why the better grades of lumber should not hold their value with the lower grades. Better times will increase the call for manufacturing, and for all purposes requiring the use of good stock.

In most of the logging districts the late thaw was followed by a snow-storm, but with insufficient cold weather to make a solid bottom. The loggers feel that they are treading on uncertain ground; a cold snap is required to make the best of work possible, and a thaw of short duration would materially retard the work. The temperature for the past two days has been such as to make ice roads possible.

There is considerable movement on to the market of hardwood lumber from the country. The dealers, as a class, seem to have become convinced that the year is destined to be a good one in the extent of the demand for hardwood lumber, and are laying their plans accordingly. Some have heavy contracts out, on which they are receiving consignments. For the season a good deal of lumber is coming in. There are some woods, which mainly reach this market by lake, which do not figure largely in the receipts. Maple is in such abundant supply, and offered to consumers at such low prices, that there is little object in making rail shipments. Birch also is arriving in small quantities, the consumptive demand having been small for some months, with a good supply in yard. Basswood, however, is a prominent item in the receipts by the roads which reach up to Wisconsin and Northern Michigan. Basswood is most emphatically in demand, if any wood can be at this season, and trade in it, while not large, is fair in amount and of great promise.

Highway Improvements Authorized.

The City Councils at their meeting on the 21st inst., disposed of a large amount of business affecting real estate and the highways of the city. The following measures were passed:—

To authorize the grading of Woodbine and Locust avenues, and Boyer and Floyd streets in the Twenty-second Ward, and Longshore, Washington, Tyson, Jackson, Glenlock, Ditman and Marsden streets, Torresdale avenue and Vandike street, in the Twenty-third Ward; Longshore street by the Managers of the House of Correction; Centre street, and Queen lane, from the Norristown Railroad to Scott lane.

To authorize the paving of Tasker street, from Otsego to Ash street, in the First Ward; to revise and change the lines and grades of Church street, from Frankford avenue to Almond street.

To revise and change the lines and grades upon Plan No. 265 and place Forty-second street, between Woodland avenue and Gray's Ferry bridge, thereon; to authorize the paving of Bouvier street, from Montgomery avenue to Berks street.

To lay water pipe on Perot, Meredith, Huntingdon and Ontario streets, and to authorize the Chief of the Electrical Department to issue permits for the erection of electric light poles and wires for public lighting.

To permit the St. Ambrose Protestant Episcopal Church to erect a frame annex on the east side of Twenty-eighth street, north of Girard avenue.

To permit the Methodist Episcopal Church Extension Society to erect a temporary frame chapel at Twenty-second and Reed streets.

To prohibit the erection of frame buildings in the Twenty-eighth Ward. Heretofore their erection has been allowed in the ward north of Allegheny avenue.

The bill to regulate the paving of streets, and to restrict and regulate the breaking of paved streets, was indefinitely postponed.

A large number of bills were also introduced providing for future work; among them were bills:—

To grade Forty-second street, from Woodland avenue to the West Chester Railroad; to grade Third street, from Cambria to Indiana avenue, and Indiana street, from Fourth to American; to grade Clearfield street, from Broad to Thirteenth; to open Glenwood avenue, from Second to Fifth street; to grade and lay water pipe in Fifty-first street, from Westminster avenue to Wyalusing street; to open Fifty-second street, from Girard avenue to Warren street.

To open Glenwood avenue, between the Germantown and Norristown Railroad and Lamb Tavern road, and Twentieth street, from Somerset to Lamb Tavern road; to macadamize Conshohocken avenue, from Belmont avenue to the city line; to construct a bridge over Cobb's creek, on Lansdowne avenue, half of the cost to be paid by Delaware county.

To revise the lines and grades of Columbia avenue, from Twenty-eighth to Thirty-third street.

To complete the sewer in Duval street, Twenty-second Ward; to enter satisfaction on the official bond of John D. Estabrook, late Chief Commissioner of Highways.

To lay water pipe in Salmon street, from Bockius to Ash street; to lay water pipe in Banker's avenue, south from 3920 Warren street; to appropriate $50,000 out of the Gas Trust surplus to extend the Mill creek sewer.

To locate electric lights on Ridge avenue, from Poplar to Columbia avenue; to repave with Belgian blocks Girard avenue, from Twenty-sixth to Thirty-first street.

To widen Walnut street between the Delaware and Schuylkill rivers; and to open Church street from Frankford road to Tacony creek.

The following resolutions were adopted:

That the Schuylkill River East Side Railroad Company be requested to construct a footpath across the temporary bridge over the road at Twenty-ninth street; instructing the Chief Engineer and Surveyor to consider and report upon the practicability and probable cost of replacing the iron bridge over the Reading Railroad at Girard avenue with a permanent stone structure; directing the Chief of the Electrical Department to suspend action relative to cutting telegraph and telephone wires until further action by Councils, and requesting the Public Buildings Commission to make no further contracts for the construction of the tower on the City Hall, save for marble, until the various rooms are fitted up for the use of the city departments.

Millions of Tons of Waste Coal.

As nearly as can be fairly calculated, there are now heaped in the anthracite coal regions of Pennsylvania not less than 150,000,000 tons of mine waste. This waste is called culm. Everywhere in the coal country it meets the eye in black mounds that cover acres and rival in dimensions and height the surrounding hills themselves. The land occupied by these unsightly upheavals in Lackawanna, Luzerne, Carbon, Lehigh and Schuylkill counties would make another county. To carry this waste from the breakers and dump it requires miles of railroad track and thousands of men, boys and mules. A low estimate places the cost of carrying and dumping culm in the region at $20,000 a day, beside the interest on the cost of the dumping grounds, which is many thousands more.

At the present time fifteen per cent. of the product of the mines goes to culm piles. For the first forty years of anthracite business, the percentage of waste averaged more than double that, for crude and imperfect methods and appliances in mining, breaking and screening, were unable to save from the waste heaps of coal that is now the most profitable of all the different kinds on the market. It is only about fifteen years that chestnut coal began to be saved from the culm, and it was then estimated that not less than 7,000,000 tons of that size of coal, worth about $25,000,000, were buried in the accumulations of mine debris. Several years ago improved screening produced a size of coal which was given the name of pea coal. It rapidly became a successful rival of chestnut coal for stoves and grates. Then the mine engineers calculated that the culm piles had swallowed up 5,000,000 or 6,000,000 tons of pea coal, worth $10,000,000 or $12,000,000.

A year or so ago the Delaware and Hudson Canal Company succeeded in separating from culm, at the breakers, a coal still smaller in size than pea coal. This was called buckwheat coal, and it was found that it was just what the Hudson River steamers wanted for their boilers. It could not be screened with sufficient facility to make it profitable, because the coal in coming from the mines to the breakers is so damp that the dust clings to the finer fragments, and they cannot be cleansed by the ordinary process of screening The fact was made clear, though, that there was still a size of coal going to waste which, if it could be separated from the culm, would be worth $1,000,000 a year to mine owners. Inventors had been for years striving to devise some plan by which culm could be handled and disposed of more quickly and economically. Mine owners have spent thousands of dollars in furthering these efforts

After the discovery of buckwheat coal the importance of a practical method of overhauling old culm piles to recover the wealth in coal buried there, gave a new impetus to the inventive genius of the coal regions. Ransom T. Mitchell, of Bradford, appears to have solved the problem. He has secured patents on applying the use of the air blast to coal waste, in connection with conducting pipes, in such a manner that he can carry the culm from the breaker to the dumping ground, and to any desired elevation. The air dries the dust on the minute fragments of coal as the mass passes through the pipes. At the dumping ground, the culm is delivered into screens, where the dust is then easily separated, and every particle of coal, however small, is made merchantable. Besides thus absolutely extracting all the coal from the culm, the air blast removes the waste from the breaker to the pile at one-tenth the cost of mule and car power, a saving of about $6,000,000 a year in the working cost of that branch of coal mining.

Mr. Mitchell's method simply consists in setting up a blower of sufficient power at the breaker, and connecting it with pipes, which not only carry the culm away from the breaker, but at the same time draw out sulphurous mine gases and replace them with pure air. The patents also cover the overhauling and sorting of old culm piles by means of the air blast, by which the millions of dollars' worth of coal buried there may be recovered at one-quarter of the cost at which the same quantity could be mined.

A practical test of this device has been made with entire success, and several companies are making arrangements to use the appliances at their collieries. It is said that Mitchell has refused an offer of $500,000 for his patents.

—Wm. F. North has been elected treasurer, and Wm. R. Philler, secretary, of the Real Estate Trust Co., Vice Louis B. Henry, resigned.

—Edwin E. Dunglison is making a flying trip to Florida.

Interior Decorations.

—Carnations are used to perfume finger-bowls.

—The swallow is the favorite bird in embroidery designs.

—White plush can be used with charming effect as an Afghan for a baby carriage.

—Lunch or tea napkins have appropriate sentiments embroidered across one end.

—A brass bell of some antique design is used on the table by those who indulge in novelties.

—A sugar-basin of melon form, with the melon stem curved for a handle, is exquisite in rose crackle.

—A musical idea is expressed by a clock set at the centre of a golden harp arranged against a plush background.

—Scissors with hand-wrought handles and sheaths of brass now form part of the furniture of a lady's work-basket.

—The larger the Chinese and Japanese vases now a-days, the more suitable for parlor ornaments are they declared to be.

—Over-mantels are made of mahogany, ebonized wood and antique oak, produced in the early English, Chippendale or Sheraton style.

—Antique brass clocks, richly decorated, are much admired, they are mounted on plush and suspended to the wall by heavy brass chains.

—Soup tureens of oxidized silver are more used than those of china; no cleaning is allowable with this finish, merely careful wiping with a chamois skin.

—A tea "cozy" of dark crimson satin, with a spray of tea blossoms on one side and white honeysuckles on the other, in Kensington stitch, is very effective.

—Among the Easter novelties are egg cosies made of delicately-tinted Surah silk, melon shaped lined and wadded and etched with any design to suit the fancy.

—Heart-shaped tables of light wood, with tops decorated with flower groups, are much sought after; these tables open on the top and are lined with tufted satin.

—A magnificent lamp is formed by a Japanese purplish vase four feet in height, with a parasol covering in velvet of harmonious tone, painted over with rich-hued, large pansies.

—Lamp shades in delicate blues and pinks are of India silk painted in water colors; a lovely one is of Mandarin yellow with brown-tinted leaves exquisitely painted and forming a rich contrast.

—Tempting jewel caskets are made of heavy glass beveled and set in some strong metal top, the sides are formed of glass, while on the bottom is a luxurious cushioned tray for the treasures to rest upon.

—Chair and sofa scarfs are of soft China silks, hand-embroidered in floral designs in floss silks; they are fashioned into a careless-looking bow-knot, and fastened to the chair or sofa by the oxidized silver butterfly or beetle pins.

—Wives, mothers and housekeepers will rejoice at the advent of patent heels, made of white kid, which may be readily put on over the stockings, keeping them from rubbing against the shoe, and thus giving a rest to the incessant darning.

—The prettiest new work-basket is in the shape of a gypsy kettle, both kettle and sticks being made of wicker; a bow of cherry red velvet is bound around the centre of the sticks and another is on the outside of the kettle, which has a lining of cherry silk.

—A delicate mantel drapery has a scarf of pongee, lined with very delicate pink silk, and decorated through the centre with a long spray of wild roses wrought in filo-floss; the edge is finished with plush cones of a delicate pink and green alternating; the scarf is caught up at each corner by means of a large bow of pink satin ribbon.

—Numerous and beautiful are the applications of bronze to ornamental uses; various combinations are shown with exquisite tintings in gold, silver and copper, in picture-frames, photograph-frames and vases of magnificent proportion and chaste design. For hall decoration come mediæval-looking armorial groups in Berlin bronze of a nickel tint, with a picturesque arrangement of gauntlet, halberd, lance and shield.

—Repose in color and design should be aimed at in bed-chambers, and for this purpose the low tones of the fashionable wall papers are admirable; a late caprice of fashion is to furnish the walls, draperies and upholstering in French cretonnes or chintz; linings of pale-blue or corn-colored silesia and bows of harmonizing satin ribbons are used with charming effect; carpets come in colors to harmonize with draperies and upholstering.

—For lamp-stands brass occupies a conspicuous place, and comes in these into excellent combination with enamels and decorative porcelain. The curious forms of the fancy wares are as innumerable as those of the Japanese potters; they take strange, distorted shapes of flowers and shells; grotesque insect forms are a favorite decoration, presenting a marvelous effect of resplendent coloring. A very elegant vase is curiously formed of plant leaves of unequal lengths, folded together tightly at their tops.

—A young architect was riding down town in a Fifteenth Street car one day, when through the front window, over the driver's shoulder, his eye caught the outline of what looked like a campanile on some church. He had never happened to notice it before, but what struck him as most singular was that through an opening in the structure could be seen a bit of sky beyond, shaped exactly like a crescent. This Mohammedan sign in a Christian city was puzzling, indeed. When the car reached Chestnut street the architect discovered that the building is that of the Young Men's Christian Association. At a distance the resemblance of the open work in its ornamental tower to a crescent is striking.

BUILDERS' NOTES.

THE CITY'S PERMITS.

One alteration, 326 N. Ninth st., to Charles Prince, Thirty-fifth and Aspen sts.

Front alterations, Northwest corner of Seventeenth and Columbia avenue, to Peter Neeson, 2000 East Cumberland street.

Two two-story brick houses, 14 ft. by 26 ft., on South side of Faran, between Eighteenth and Nineteenth streets, to Daniel Drummond, 1728 Carver street.

James W. Cooper, Seventeenth street and Washington avenue, will rebuild his furniture factory, which was burned December 17th. The buildings formerly occupied a space of 50x100, which, with side wings, gave them a frontage of 150 feet on Washington avenue. It is understood that the new buildings are to cover more ground than did the old.

T. R. Williams is engaged in furnishing drawings for a residence for Mr. T. C. Allen, at Chestnut Hill; cost, $8,000. in the Queen Anne style of architecture. He is building a library building at Salem, New Jersey, at a cost of $10.000.

Cope & Stewartson are preparing drawings and will superintend a new building for Bryn Mawr College, at a cost of $40,000. This is to be a dormitory building, with dining room and general administration department. It will be built of stone, with slate roof. The style of architecture is adaptation of late English Gothic.

A. J. Boyden will build a residence at Bryn Mawr, with stable attached; also a residence at Wallingford, Pa.; also a house and stable at Penallyn, Pa.

Lindley Johnson is preparing drawings for a residence at Germantown, for Miss Hall; stone, with brick trimmings and bays of wood.

The Muhr Building, southwest corner of Broad and Race streets, is 100 feet on Broad and 140 feet on Race, seven stories high. It is a building for W. H. Geissinger. The area of each floor is about 8,500 square feet. The entire building is heated with steam by the vacuum-pump system.

One 2-story brick dwelling, S. E. cor. Kensington ave. and Ontario st., 19 ft. by 50 ft., to Alfred Gardner, 232 E. York st.

One alteration, front and gable of brick dwelling, N. W. cor. Twentieth and Hampton sts., 15 ft. by 43 ft., to Joseph H. Cline, Sixteenth st. and Girard ave.

Front alteration to house No. 31 S. Seventeenth St., to William Patterson, 4219 Haverford ave.

One brick stable, E. s. Seventeenth st., between Cayuga and Bristol sts.; 25 ft. by 45 ft., to Joseph Williams, 1634 Cayuga st.

One 3-story brick house, N. E. cor. Jasper and Huntington sts., 20 ft. by 65 ft., to Henry Laefuer, 2551 Jasper st.

Alterations, N. E. cor. Wyoming and Market sts., to John G. Dickinson, 2308 St. Alban's Place.

Fire Record.

At Buffalo, N. Y., the International Starch Factory and Barrel Heading Works. Loss..... $70,000

At Bay City, Mich., the opera house, Second National Bank, post office, and a number of stores and offices. Loss..... 60,000

At Camden, N. J., the planing mill of S. H. Morrison. Insurance, $20,000; loss 40,000

At Oswego, N. Y., business block owned by Sydney Sheppard. Loss..... 27,000

At Metropolis, Ill., Rampendohlo's flouring mill. Insurance, $21,000; loss..... 26,000

At St. Louis, Mo., Cutter's grocery, Herman's butcher shop, Mutchler's harness shop, Steinkran's shoe store, and Celving's millinery establishment. Loss... 20,000

Also, Joseph Peter's machine shop. Loss 35,000

At Ames, Ia., Dix's millinery store and Thomas Brother's dry goods establishment. Insurance, $10,000; loss..... 12,000

At Tompkinsville, S. I., American docks, where 10.000 bales of cotton were stored. Fully insured. Loss..... 150,000

At Williamsport, Pa., soap works, owned by A. Dittmar, A. Seitz and George Brill. Insurance, $12,000; loss..... $ 25,000

At New York City, Herman Koehler & Co.'s brewery, Twenty-ninth street and First avenue. Loss..... 30,000

At Three Rivers, Canada, stores occupied by L. S. Leisure, J. E. Godin and I. N. Gauthier. Insurance, $15,000; loss... 25,000

At St. Joseph, Mo., Bennett & Moyer's shoe store. Insurance, $25,000; loss.. 30,000

At Livingston, N. Y., Charles E. Bingham's grist mill, machine shop and paper mill. Partially insured. Loss... 25,000

At Chester, Pa., Delaware Oil Works. Loss..... 40,000

Notes for Builders.

—The importations of mahogany have increased from 500,000 feet in 1874 to 10,000,000 in 1884.

—Citizens of Uniontown, Pa., have raised money to begin the erection of a large steel mill; work will begin on the buildings in a few days. A new wire mill is also among the possibilities.

—From tests made by Dr. Fischer, the German chemist, it appears that in ordinary stoves not more than 20 per cent. of the fuel consumed is utilized, whereas with gas-burning stoves 80 per cent. of the possible effect is obtained.

—To frost brass work and give it an ornamental finish boil the article in caustic potash, rinse in clean water and dip in nitric acid till all oxide is removed; then wash quickly, dry in boxwood sawdust, and lacquer while warm.

—A very thin coating of glycerine applied to glass will prevent frost from forming on it in the coldest weather. This is specially interesting to engineers and surveyors, who are much annoyed in frosty or foggy weather by the formation of a film on their instruments.

—Wood intended for paper pulp is shaved by a machine devised for the purpose so thinly that it takes 750 thicknesses to make an inch. The cutting-knives are kept sharpened while in operation by an arrangement of whetstones, which are constantly at work upon them.

—A cement for resisting water at steam heat may be made by mixing commercial glycerine with dry litharge into a tough dough and applying the same to the parts to be covered. The composition is said to answer very satisfactorily for uniting the joints of steam pipes.

—The old idea that slow-grown timber was stronger than that grown quickly is disproved by recent tests, so far, at least, as oak is concerned. Second-growth hickory is usually more valuable for handles of axles and hammers, and the annual rings show it to be of swifter growth than the first stock.

—A mixture of cork, silica, and lime is coming into extensive use in Germany as a building material. It has the advantage of keeping out heat and cold, and is also claimed to be an excellent preventive of damp and defender of sound. It is substantial, light and durable, and seems to be especially adapted for ceiling and wall lining.

—A first-class cement with which to fasten stone to stone, or iron to iron, is made by mixing a paste of pure oxide of lead, litharge and glycerine. This mixture hardens rapidly, is insoluble in acids, and is not affected by heat. It has been used to fasten the different portions of a fly-wheel with success, while, when placed between stones and once hardened, it is easier to break the stone than the joint.—*Manufacturers' Gazette.*

—A new substitute for wood for the manufacture of piano cases is said to be used in Germany. The case is made entirely of paper, compressed so that it can be highly polished. The color is a creamy white, and when finished is said to be very beautiful. The tone of the instrument is reported to be not very loud, but very sweet. The sound emitted, unlike the short, broken tone of the ordinary piano, is soft, full, and slightly continuous, resembling somewhat that of the organ. This modification of tone is attributed to the evenness of texture of the compressed paper.—*Ohio Lumber Journal.*

Operations Outside of the City.

NEW YORK.

Mr. Francis H. Kimball is preparing plans for remodeling Horticultural Hall, on 28th street, near Broadway. The plans show an entire change of the interior arrangements.

For Mr. Morris S. Herman, a 5-story brick, stone and iron store, 50x64, is to be built at a cost of $40,000, on the northwest corner of Grand and Wooster streets, from plans of Mr. Geo. W. Da Cunha.

The St. Vincent De Paul Roman Catholic Church intends to build an industrial school on the south side of 43d street, between 8th and 9th avenues. It will have a frontage of 125 feet. The preliminary sketches are being prepared by William Schickel.

The members of the West 42d street Presbyterian Church intend to build a mission church on West 65th street, near 10th avenue, at a cost of $50,000. No architect yet selected. The Rev. John Paxton is the minister.

Apartment Houses.—For Conrad Stein, four 5-story brick and brownstone tenements and stores, 25x83 each, are to be built on the northwest corner of 10th avenue and 68th street, at a cost of $80,000, from plans of Mr. Julius Kastner. For Alex'r Moore and John Mulgrew, three 5-story brownstone flats, 25x80 each, are to be built on the south side of 48th street, east of 9th avenue, at a cost of $51,000, from plans of Mr. M. L. Ungrich. For Charles and August Ruff, two 5-story brick and stone improved tenements and stores, 25x83 each, are to be built at Nos. 220 to 224 Rivington street, at a cost of $32,000, from plans of Messrs. Bergner & Baylies. Isidore Cohnfield intends to build a 6-story fire-proof apartment house on the northwest corner of 8th avenue and 104th street It will occupy a lot 100x100. Alfred Zucker & Co. are the architects. D. T. Atwood has the plans under way for eight 5-story brick and stone front apartment houses, 25x65 each, to be built on the southeast corner of Avenue A and 55th street, running to the northeast corner of 56th street. The corners will contain stores, and they will all front on the avenue. The cost to the owner, J. Gault, is estimated at $108,000. The same architect has the plans under way for a 6-story brick, iron and stone front apartment house, to be erected on the southeast corner of Cherry street and Rutgers slip. The building will have a frontage of 61.4 feet on the street and 60 feet on the slip. It will contain five stores on the first story, and, while covering an area of 3,680 square feet, will accommodate five families per floor. It will be built by William F. Lett at a cost of about $30,000. Andrew Spence has the plans on the boards for eight 5-story brick and stone front flats and stores, to be built on the west side of 9th avenue, between 90th and 91st streets, covering the block front. The corners will be 25.8½x85, and the inside buildings 25x65 each. They will cost the owner, Oscar C. Ferris, about $120,000. Thom & Wilson have designed eleven houses, to be erected by Alexander McSorley, on the corner of 76th street and 10th avenue. Ten will be three-story and basement brownstone front private dwellings, six of which will be 17, three 18, and one 19 feet front, all fronting on the street. The corner building will be a 5-story brownstone front apartment house and store, 25x77, and will cost about $20,000. The total estimated expenditure on this improvement is estimated at $170,000. The same architects have plans for eight 5-story brownstone front apartment houses, 25x68 each, to be built on the north side of 81st street, commencing 175 feet east of 2d avenue, by Thomas Moore and James McLaughlin, at a cost of $12,000.

APPLICATIONS FOR PERMITS.

83d street, Nos. 313 and 315 East, two 5-story brick tenements, 25x80, tin roofs; cost, each, $18,000; owner and builder, M. H. Schneider, 419 East 81st street; architect, Julius Kastner.

Ludlow street, Nos. 82 and 84, two 5-story brick tenements, 14 and 26x57; cost, total, about $25,000; Abram E. Benson, 260 W. 24th street; architect, R. N. Anderson; built by day's work.

2d avenue, Nos. 870 and 872, two 5-story brick tenements, with stores, 20.1x80, tin roofs; cost,

each, $17,500; Martin Schmeckenbecker, 312 East 56th street; architects, A. B. Ogden & Son.

67th street, north side, 275 feet west of 10th avenue, two five-story brick flats, 25x73, tin roofs, iron cornices; cost, each, $18,000; Colleran & Perrine, 374 7th avenue; architect, G. W. Hughes; mason, Oscar Perrine.

1st avenue, east side, between 41st and 42d streets, one 1-story building, 118.6 front; cost, $37,000; owner, Equitable Gas Light Co.; architect, A. W. Putnam Cramer; brick.

126th street, south side, 100 feet west of 9th avenue, one 3-story stable and storage; cost, $20,000; 34.7 front; owner, Anton Liebler; architect, Adam Weber; brick.

3d avenue, Nos. 205-211, 6 and 7-story stores, 74½ front; cost, $100,000; owner, Eimer & Amend (lessees); architect, De Lemos & Cordes; brick and stone.

Rivington street, Nos. 220, 2, 4, two 5-story tenements and stores, 28.10½ front; cost, $14.000 each; owner, Charles Angus Ruff; architects, Berger & Baylies; brick.

9th avenue, north-east corner 50th street, one 5-story tenement and store, 25.5 front; cost, $14,000; owner, Annie M. Wolfe; architect, Fr. S. Barus; brick.

Grand street, north-west corner of Wooster street, one 5-story store; cost, $50,000; 50 feet front; owner, M. S. Hermann; architect, George W. Da Cunha; iron and brick.

92d street, south side, 201 feet west of Park avenue, one 4 story dwelling, 19 feet front; cost, $15,000; owner, William Collins; architects, D. & J. Jardine; brick and stone.

128th street, north side, 300 feet east of 10th avenue, one 1-story stable and wagon shed, 120 feet front; cost, $8,500; owner, D. G. Yuengling, Jr.; architect, Henry Rapelye; brick.

105th street, 225 feet east of Lexington avenue, four 4-story tenements, 20 feet front; cost, $12,000; owner, M. H. Schneider; architect, Julius Kastner; brick and stone.

47th street, Nos. 319, 321, 323, three 5-story flats and stores, 25 feet front; cost, each, $18,000; owners, Z. & L. K. Ungrich; architect, M. Louis Ungrich; brick and stone.

48th street, south side, 100 feet east of 9th avenue, three 5-story flats, 25 feet front; cost, $18,000 each; owners, Mulgreen & Moore; architect, same as above.

94th street, north side, and 95th street, south side, 80 feet east of 10th avenue, two 4-story and basement flats, 18 feet front; cost, each, $17,000; owners, Hausman & Branford; architect, same as above.

ALTERATIONS.

8th avenue, Nos. 384-386, two 4-story tenements and store, 22 feet front; cost, $700; owner, Jacob Smith.

1st avenue, Nos. 1439-1441, two 3-story tenements and stores, 24 feet front; cost, $2,000; owners, John and Anna Schill.

52d street, No. 52, one 2-story stable, 25 feet front; cost, $2,500; owner, John Curran.

42d street, Nos. 57-59, two flats and stores, 42 feet front; cost, $7,000; owner and architect, Ferd. Fish.

Jackson street, Nos. 23-25, one 3-story stable and wagon-house, 50 feet front; cost, $5,000; owners, Weldbrook & Freidman.

Great Jones street, No. 4, one 5-story building, 28 feet front; cost, $20,000; owner, Nathaniel Whitman.

CHICAGO.

The corrected returns from the Chicago Building Department shows that the cost of new buildings in that city last year was $19,262,060.

Architects Treat and Foltz report the following work on hand:—

Rush street, near Bellevue place, 3 story and basement brick dwelling, 16x44; variegated brownstone front, to cost about $5,500, for Mrs. Hattie J. Stockton.

At Woodlawn, near 48th street, 3-story frame residence, with stone basement, 44x71, for Thaddeus Dean, Esq., to cost about $10,000.

At Woodlawn, near 48th street, 3-story frame residence, with stone basement, 38x58, for M. A. Farr, Esq., to cost $9,000.

211 and 213 East Madison street, additional story of brick, 40x170, for J. Q. Adams, Esq., to cost about $7.250.

West Adams street, dwelling-house, 26x73; Indiana pressed brick with stone and terra-cotta facings, for Norman D. Frazer, Esq., to cost about $9,500.

Adams and Winchester avenues, St. Paul's Reformed Episcopal Church and Sunday-school, to cost about $20,000. Seating capacity of church, 500; Sunday-school, 200. The site that the church will occupy is 72x125 feet.

Delaware Place, pressed brick, stone and terra-cotta residence, for Mrs. Ellen H. Preston, to cost about $12,000.

Architect H. R. Wilson reports:—

19th street and Sawyer avenue, six 2-story and basement brick dwelling-houses, 22x54 each, with Anderson pressed brick fronts, trimmed with buff Bedford stone and terra-cotta, for H. Davis, Esq., to cost $20,000.

Indiana street, near Noble, three 3-story and basement stores and flats; Indiana pressed brick fronts, trimmed with buff Bedford stone and terra-cotta, for George T. Lister, Esq., to cost $18,000.

Architect J. C. Cochrane reports:—

Scott County, Iowa, county court house, 106x152, with tower in centre, to be a stone-faced building, and to be finished throughout with hard woods; will be supplied with all modern improvements and furnished in a thoroughly first-class manner, to cost about $150,000.

2801 Prairie avenue, 3-story residence; Trenton, N. J., pressed brick front. with terra-cotta and brownstone trimmings, for George E. Wood, Esq.; cost, $40,000.

Architect H. M. Hansen reports the following:—

South-east corner Orchard and Centre streets, two 3-story store and flat buildings, 47x70; Indiana pressed brick ftont, with buff Bedford stone, ornamental brick and terra-cotta trimmings, for August Ollmer, Esq.; cost, $14,000.

690 Fullerton avenue, 2 story, cellar and attic brick residence, 25x60; Anderson pressed brick front, trimmed with brownstone and terra-cotta, for John D. Zernitz, Esq., to cost $7,500.

Architect Charles H. McAfee reports:—

14th street near Blue Island avenue, two 3-story flat buildings; brick, with cut-stone trimmings, for T. Herrity, Esq., to cost $8.000.

Also, designs for Episcopal church, Toledo, Iowa; brick; probable cost, $20,000.

Architect Gregory Vigeaut reports having prepared plans for the following:—

15, 17 and 19 Scott street, three 3-story brick dwellings, with blue Bedford stone (from the Hoosier Stone Co.'s quarries) front, to cost $18,000.

During the week permits have been issued for the following work:—

212 Fulton street, 3-story and basement brick factory, 30x100, for Nathan Newfeld, to cost $7,500; P. W. Ruehl, architect; C. Kies & Son, builders.

557 West Erie street, 2-story brick dwelling, 21x60, for Morgan Tobin, Esq., to cost $2,800; John C. Hayes, architect; Charles J. Magee, builder.

146 Lytle street, 2-story brick dwelling, 21x50, for Dennis Ryan, Esq., to cost $2,700; John C. Hayes, architect; Charles J. Magee, builder.

153 West Blackhawk street, 2-story and basement brick flats, 22x66, for A. W. Rudnick, Esq., to cost $3,500; A. W. Rudnick, architect and builder.

222 and 224 Wabash avenue, 2-story and basement brick store and warehouse, 33x155, for R. D. Shephard, Esq., to cost $15,000; William H. Drake, architect; Messersmith & Gobel, builders.

114 Colorado avenue, 2-story brick store and dwelling, 23x32, for C. Barker, Esq.; cost, $2,500.

1026 Washington street, 2-story and basement brick flats, 25x48, for H. B. Matthews. Esq.; cost, $5,000; H. J. Moore, architect; George Hinchcliffe, builder.

BROOKLYN.

Mercein Thomas has plans for a 2-story brick extension, 25x43, with extensive interior alterations to house No. 483 Washington avenue, for George Shieber, at a cost of $10,000.

William Ervine intends to build three 4-story brownstone front flats, 29x70 each, on the corner of 5th avenue and Union street. They will cost about $60,000; John C. Burne, of New York, architect.

George Phillips will build six first-class private houses, 20x45 each, on the north side of Jefferson avenue, near Marcy avenue. They will be three stories and basement high; brick, stone and terra cotta fronts; cost about $60,000; John G. Prague, of New York, architect.

APPLICATIONS FOR PERMITS.

Melrose street, north side, No. 77, 275 feet east of Central avenue, one 3-story frame dwelling, 25x52; cost, $4,000; owner, M. Grimmler; architect, Th. Engelhardt.

Boerum street, No. 259, north side, 622 feet east of Bushwick avenue, one 3 story frame dwelling, 25x45; cost $4,500; owner, Elizabeth Mahla; architect, Th. Engelhardt.

Northeast corner Sterling street and 5th avenue, one 5-story factory, 65.2x60; cost, $23,000; owner, Wm. Lane; architect, W. M. Coots; hard brick, stone and terra cotta.

Bainbridge street, south side, 80 feet east of Patchen avenue, one 3-story frame dwelling, 25x50; cost, $4,500; owner, architect, mason and builder, H. Grasman.

Herkimer street, northeast corner Rochester avenue, one 3-story building, 20.6x60; cost, $7,500; owner, J. T. Sullivan; architect, A. Hill; brick.

Southwest corner Bond and Degraw streets, four 3-story frame buildings, 25x60; cost, each, $5,500; owner, Geo. Nohl; architect, Frank Stanley.

Moore street, No. 107-9-11-13, northwest corner Humboldt street, four 3-story frame buildings; cost, $16,999 for all; owner, John Zarring; architect, Th. Engelhardt.

Chauncey street, north side, 237 feet east of Patchen avenue, two 3-story frame buildings, 18.9x43; cost, $4,000 each; owner, Julia M. Smyth; architect and builder, Joseph Smyth.

Rutledge street, south side, 280 feet west of Harrison avenue, three 3-story flats, 26.8x50; cost, $7,500; owner, John Anes; architect, John Platte.

Gates avenue, north side, 185 feet east of Sumner avenue, two 4-story buildings, 25x60; cost, $8 000; owners, architects and builders, W. M. and E. H Hawkins.

Corner of Flushing and Knickerbocker avenues, two 3-story frame buildings, one 42.4x55, other 25x55; cost, $6,000 and $4,000; owners and builders, John Hesse & Co.; architect, E. Schrempf.

ALTERATIONS.

Marion street, No. 275, one 1½-story building, 20x25; cost, $1,000; to be raised to three stories, with flat tin roof; owner, I. Hoerth; architect, Chas. Hibbard.

Northwest corner Park and Nostrand avenues, one 3-story and basement building, 180x40; cost, $6,000; owners, R. Dunlap & Co.

Northwest corner Grand and 8th streets, one 3-story building, 25x80; cost, $6,000. The alteration is to put in a new store front, with iron girders and iron columns, build one story on top, making the building four stories high when finished.

BOSTON.

Brick and Stone Buildings.

Cabot Place, 4-story apartment house; Samuel Stubbs, owner and builder.

Warnick street, 3-story dwelling; Samuel Stubbs, owner and builder.

Warnick street, 4-story apartment house; Samuel Stubbs, owner and builder.

Tremont street, 5-story apartment house, size 31x46; Joseph Feldman, owner; John McNamara, builder.

Chelsea street, opposite Curtis street, 1-story manufactory building, size 57x115; Beacon Oil Company, owners.

ST. LOUIS.

J. B. Legg has recently completed plans and specifications for a 3-story apartment house, with stores beneath, for Mrs. M. C. Driggs. The improvement, it is estimated, will cost $15,000. It

will front 120 feet by a depth of 35, at the southeast corner of 29th and Market streets. In a few days the contract will be let to build a $10,500 residence at Bartold Valley, on the Manchester road, for Mrs. C. A. Vail. The contract has been signed for the construction of a 2-story, ten-room, $20,000 dwelling on Delmar avenue, east of Vandeventer, for Mrs. Dr. Robert Sanders; and in addition to this plans are being made for a $3,500 cottage for H. F. Dow, who will build in Cabanne Place.

PERMITS.

East side of 4th and St. Charles streets, brick store, to cost $5,000; Collier estate, owners; J. W. Givens, architect and contractor.

East side of Leffingwell and Madison streets, two adjoining brick tenements, to cost $3,500; Thos. Bray, owner, architect and contractor.

Southwest corner of 10th and Lynch streets, three adjoining brick tenements, to cost $6,000; Mr. A. Kuhr, owner; P. Sanourein, contractor.

BALTIMORE.

Representative Cole, of Maryland, will push in Congress a bill appropriating $50,000 to build in Patterson Park, Baltimore, a monument to Francis Scott Key, author of "The Star Spangled Banner."

Messrs. Schaur & Eck are erecting a 3-story building, with store and offices at 80 West Fayette street, east of Charles street, to cost $13,000. The front will be of pressed brick, with red Potomac stone and terra-cotta trimmings; Jackson C. Gott, architect; S. H. & J. F. Adams, builders.

No. 75 Lexington street, 24x80 feet, three stories; pressed brick front, with brownstone and terra-cotta trimmings; M. A. Frederick, owner: Geo. A. Frederick, architect; William H. McDonald, builder; cost, $7,000.

Storage warehouse and factory extension, six and eight stories high, 134x183 feet; to cost $100,000; to be erected by Messrs. G. W. Gail & Ax, southeast corner Charles and Barre streets; architect, Henry Brauns; builder, Charles Markland.

The following are among the permits granted recently:—

Wm. H. Fowler, four 3-story dwellings, west side Broadway, northwest corner Preston street, and two 3-story dwellings, north side of Preston street, east of Broadway.

S. D. Price, six 3-story dwellings, east side Barclay street, between Chase and Biddle streets; seven 3-story dwellings, on south side Biddle street near Barclay street, and five 2-story dwellings, east side of Ensor street, between Hoffman and Preston streets

Hy. Schaumberg & Co., six 2-story brick dwellings, south side Clemens street, between Riverside avenue and Covington street.

SAN FRANCISCO.

For the week ending January 8th, 1886, five permits were granted. Total cost of buildings, $27,455. The individual permits granted are as follows:—

To A. M. Goldsmith, frame building, cost $6,590; J. Marquis, architect.

To C. B. Williams, frame building, cost $4,100; Chas. Geddes, architect.

To W. S. Hobart, addition of second and third stories of building, cost $9,000; Chas. Geddes, architect.

To Mrs. Jane Standford, a frame building, cost $7,240; M. C. Macy, architect.

To Mrs. Jane Stanford, plumbing of house, cost $525.

It is expected that the committee recently appointed by the Chamber of Commerce to report upon the reservation for public use of certain real estate reclaimed by the construction of the seawall will make a report. It is understood that the committee will report in favor of a union railway depot and stations for passengers and freight, and also for the construction of free merchandise warehouses on the plan adopted in Europe.

Mr. Adolph Sutro, of San Francisco, proposes to build an immense aquarium, 120 feet in diameter, near the Cliff House, in that city, to be stocked with every variety of sea anemone and shell fish.

CINCINNATI.

Architect Schureman presented plans and specifications for a Police Court and Central Station on George street. The architect and City Solicitor were directed to advertise for bids on the accepted plans.

The School Board of Avondale is contemplating purchasing a lot near or in the vicinity of Carthage pike and Forest avenue, with a view to erect a school house thereon.

Messrs. A. & G. Feder will next year tear down the property, No. 167 Race street, and erect an 8-story iron-front store, 23x100. The Board of University Trustees will have the damage done by fire to the University two months since, repaired at once, at a cost of about $9,000.

WASHINGTON, D. C.

Senator Sewell presented in the Senate a letter from George Ticknor Curtis, on the proposed new Congressional Library building, in which he suggests the appointment of a commission to select a site, the members of which should not be property owners of the District of Columbia. He advises that one commissioner should visit Europe to study the famous libraries there.

PERMITS ISSUED.

First street, between B and C streets, N. W., 4-story brick saw-mill, 66 feet front; cost, $9,000; Thomas W. Smith, owner and builder.

South Washington, 2-story brick stable, 32x50; cost, $3,000; Great Falls Ice Co., owners.

Repairs and alterations this week amounted to $3,750.

St. Aloysius parish contemplate building a rectory adjoining the church property, corner North Capitol and I streets, N. W., cost, $15,000; architect not yet selected.

MINNEAPOLIS, MINN.

The Gates Bros. have purchased the block corner of Chicago avenue and 17th street, opposite the base ball park and will thereon erect a duplicate of their stone block on 4th avenue, at a cost of $60,000 to $75,000.

Chute Bros. will build a 3-story three-front brick business block on Central avenue and 3d street; estimated cost, $30,000.

H. L. Gordon will spend $30,000 on a 5-story brick block on 5th street between Nicollett and Hennepin.

The following building permits have been issued by Building Inspector Pardee:—

D. R. Young, 2-story 10-room frame dwelling, 3349 3d avenue, north; $3,000.

C. McC. Reeves, brick warehouse, 613 and 615 3d street, south; $8,000.

The building committee in charge of the new public library at Minneapolis, Minn., has invited the following architects to submit drawings: Messrs. George M. Goodwin, Hodgson & Son, Long & Kees, C. S. Sedgwick and W. C. Whitney, of Minneapolis; Mr. Wilcox, of St. Paul; Mr. E. T. Mix, of Milwaukee, and Mr. H. Langford Warren, of Boston. The building is to be situated on the corner of Hennepin avenue and 10th street, on a lot 132 feet front by 150 deep. It is to contain a library of 200,000 volumes, besides rooms for certain societies. The competition will close on February 1, 1886.

BUILDING PERMITS ISSUED.

Spruce place, corner of 17th avenue, 2-story brick dwelling, 40x67; cost, $16,000; Samuel H. Baker, owner.

2522 Garfield avenue, 2-story frame dwelling, 26x60; cost, $4,000; Wm. M. and A. J. Veners, owners.

214 West Lake street, 2-story frame dwelling, 28x44; cost, $2,500; Geo. R. Cummings and John McEachon, owners.

ST. PAUL.

A Bohemian Catholic Church will be built in the Spring at the corner of Banfil and Western avenues.

Building Inspector Johnson is sending the following notice to all property owners having elevators in their buildings: "The building ordinance requires that all hoistway openings shall have automatic trap doors, covered with metal on the under side, on all floors, and with sufficient guards for protection. Give this your attention within thirty days, as a failure to do so will subject you to a fine."

GOODHUE CO.—The Goodhue County authorities are preparing to build an elegant new jail.

The building inspector estimates the number of new buildings erected at 3,451, and the cost at $7,545,492. The architects are busy making estimates and taking plans, and a very active season is not more than a month ahead. The Dayton Avenue Presbyterian Church will put $26,000 into a new church, the plans for which are being drawn. The Minnesota & Northwestern will put up a cold storage warehouse in connection with their creamery, at a cost of $10,000. The Northwestern Elevator Company have a permit for a $25,000 elevator at the Transfer.

BUILDING PERMITS ISSUED.

Fillmore avenue, north side, between Starkey and Custer streets, 2-story brick veneered creamery, 62x114; cost, $5,000; Minnesota and Northwestern Ry., owner.

University avenue, at junction with Territorial road, wood and iron grain elevator, 100x74; cost, $25,000; Northwestern Elevator Co., Minneapolis, owner.

Milwaukee Short Line R. R., south side, between Snelling and Saratoga avenues, 1-story frame passenger station, 26x22; cost, $1,565; Chicago, Milwaukee and St. Paul Railway Co., owner.

DETROIT.

Milton H. Butler, President of the Citizens' Savings Bank, has bought the residence property of the estate of the late Edwin Butterfield, on Washington avenue, 60 feet front, for $10,800, and will, in the near future, build a fine residence upon the same.

Building projects still continue very much undeveloped The Y. M. C. A. have sent out circulars inviting designs in competition for a building on property at corner Woodward avenue and Grand River avenue.

The weather has been very cold and everything so frozen up that very few permits have been taken out for the past two weeks. The following are the most important up to the 16th:—

A. C. Varney, architect, for Fred. Simmons, 2-story dwelling, brick, stone trimmings, gravel roof, size, 35x62, East Montcalm street; cost, $3,500.

Chas. Leahy, owner, 2-story dwelling, brick, stone trimmings, size 26x64, Spruce street; cost, $3,000; Allen Williamson, mason.

The value of buildings erected in Detroit last year was $3,478,319.

BUFFALO.

The contracts have been awarded and work will be begun on the 1st of May next, for the John C. Jewett Manufacturing Company's new building. The iron and cut-stone will be brought out during the winter, so that there will be no delay in the spring. It is estimated to cost $50,000. The contract for the mason, iron and cut-stone work has been awarded to Charles Berrick; and for the carpenter work, plumbing, painting and glazing to John Feist. The building will be 93 feet front by 144 feet in depth, and five stories in height. The plans were prepared by M. E. Beebe & Son, architects, and provide for a neat and substantial building.

Charles G. Irish is having plans drawn for a double store, to be built on Washington street near Eagle. The building will be of brick. 45 feet front, and four or five stories in height. It is estimated to cost $20,000.

PROVIDENCE.

On Hospital street, west side, frame dwelling; cost. $3,500; owner and builder, James Hill.

Clifford street, wood addition; cost, $5,000; owner and builder, J. Hill.

7th street, frame dwelling; cost, $3,500; owner, B. McCalla; builder, J. Butler.

NEW ORLEANS.

A Jewish orphan home, to cost $70,000, is to be erected.

—MARINE GLUE.—"Liquid marine glue" is a compound prepared by digesting one part of finely-cut caoutchouc, during about ten to fourteen days, with ten parts of oil of turpentine, at a very gentle heat, and under frequent agitation. This liquid is used for rendering wood, ropes, tissues, etc., waterproof, by applying one or more coats. What is usually known as "Marine Glue," without the distinction of "liquid" or "solid," is prepared by proceeding as stated above, and then adding to the solution two parts of shellac, or better, of asphalt (for every one part of caoutchouc employed). The mixture is heated in an iron pot until it has become completely homogeneous, and does not give off volatile vapors. During the heating the mass must be carefully stirred, and the temperature should not be allowed to exceed 140° C. (284° F.). It is then poured out into capsules. For use, one of the latter is heated on a water-bath until the contents are melted, when it is transferred to a sand-bath, and cautiously heated to near 140° C. The edges to be cemented together must be warmed, coated with a thin layer of the marine glue, and then firmly stuck together.

—A rather curious fact is mentioned in connection with the building of Archbishop's Tait's cenotaph in Canterbury Cathedral. In the construction of the altar tomb, a quantity of bricks of the sixteenth century were used, which were dug out of that portion of the crypt appropriated to the use of the French Protestants. It was suggested to the Dean by a local archæologist that if ever, in after years, the tomb was to be opened, and sixteenth century bricks were discovered in a nineteenth century tomb, antiquaries might be puzzled to understand this. Dean Payne at once recognized the force of the suggestion, and agreed to write a few words explaining how the old bricks came to be used, and to see that the paper containing the explanation was placed within the tomb. Accordingly. before the tomb was finally closed, a bottle was deposited therein containing a notification to that effect.

IRON.—The firm aspect of the Pig Iron market recorded in our last issue still continues, but the demand has been irregular. A number of the furnaces are well sold up and are indifferent about immediate orders, as they are well sold ahead. Sales of No. 1 Anthracite, at $18@19; No. 2 at $16.50@17.50; and 3000 tons Forge, at $15.75 at furnace and $16@16.50 at tidewater. Considerable Bessemer has been offered at $20; the best offers were at $20. Spiegeleisen is nominally $29. The Muck Bar makers are pretty well sold up, and some two or three of them are trying to get $30 for February delivery. The committee of the Eastern Pig Iron Association, which recently visited Washington to confer with leading members of the Senate and House of Representatives with reference to the duty on Pig Iron made its report on Wednesday. The report stated that the committee informed the Congressmen and Senators that Pig Iron could not stand 1 cent of reduction in duty; that the cost of producing a ton of pig Iron in this country is $7.12 more than the cost of production in England, and the duty is $6.72.

MANUFACTURED IRON.—There is a firm feeling, but the business is not up to general anticipations. The Structural Iron Mills are busy. We quote:—

Merch Bars	$ 1.50@	1.85
Tees	2.40@	2.50
Boat Plate	1.90@	2 –

Borings	12 —@	12.50
Car Wheels	14 —@	15 —
Steel Scrap	18 —@	19 —
Machinery Scrap	12 —@	14 —
Wrought Scrap	17 —@	18 —

STEEL RAILS.—There is a fair demand, but somewhat lower figures have been accepted on certain desirable orders. The outlook continues favorable and the mills have plenty of work on hand, so that steady prices are pretty well assured. Sales during the week at $34.50@35, although two good-sized orders were accepted at $34 at mill.

OLD MATERIAL.—Old rails, both Iron and Steel, are in good demand, but are virtually out of the market. Steel rails are not available at any price for spot delivery, and the only lots of iron that are here are held at $23@25, as against $21.50@22 bid. Scrap iron is very scarce.

THE REAL ESTATE TITLE, INSURANCE AND TRUST COMPANY,

—OF PHILADELPHIA.—

CAPITAL, $500,000. FULL PAID.

THE OLDEST INSTITUTION OF THE KIND IN AMERICA.

The Insurance Policy of this Company gives absolute security to the owners of Real Estate and Mortgages, against loss by reason of **FRAUD, ACCIDENT or MISTAKE.**

Insurance premium and conveyancing (including one deed, examination of title and recording) on sums of $2,000 or under, $30.00. For each additional $1,000—$2.50.

This one payment procures an absolute GUARANTEE of the title to the insured and his heirs forever.

THE FIDELITY INSURANCE, TRUST AND SAFE DEPOSIT COMPANY,

327-331 Chestnut Street.

JOHN W. MURRAY, Esq., PHILADELPHIA, January 14, 1885.

Prest. Title Guarantee and Trust Company, 55 Liberty Street, New York.

DEAR SIR:—In response to your request for some information in regard to our experience with the Real Estate Title Insurance Company, of Philadelphia, I would say that our Company takes their policies in place of the abstract of title, searches and opinion of counsel, formerly required, and pays out its money at once, on presentation of the bond and mortgage and policy of the Title Company, without any other examination or evidence of title.

I consider that the convenience, saving of time, and security afforded by such companies, are of great value to all investors in real estate and mortgages.

Very truly yours,

S. A. CALDWELL, *President.*

N. W. CORNER TENTH AND CHESTNUT STS.

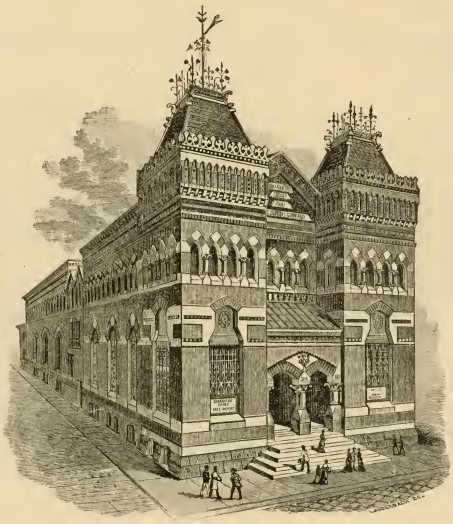
VOL I.—NO. 4. PHILADELPHIA, MONDAY, FEBRUARY 1, 1886. PRICE 15 CENTS

TRUST AND SAFE DEPOSIT COMPANIES.

The organization of a Trust Company is a step forward in commercial progress. It is the natural and logical outcome of business expansion; it is an aid to, and an evidence of, a growth in wealth. The purposes of such organization, the advantages which they secure to a community, the uses to which they can be put, need to be better understood. Trust Companies are designed to aid the good work of life insurance. The spirit of the age forces you to an activity in business matters, but your death, without warning, might lead to the unnecessary sacrifice of your estate. A trustee is a good thing as far as he goes, but trustees die, and sometimes in his eagerness to further the interest of his individual business, he is engrossed to such an extent as to preclude the possibility of attending to other duties. You tax his friendship. Who will go on his bond? Some other friend, but even then there is a large element of doubt. The trustees may die insolvent, and every death depreciates the value of your estate



Now Trust Companies do not die, they do not become insolvent, they do not move away, or in any manner jeopardize your interest. The affairs of the company are managed by thoroughly competent persons and the accounts thoroughly overhauled by the courts, at stated periods, so it is difficult to see under what contingencies, loss could fall on your estate.

A representative institution of this kind is the Guarantee Trust and Safe Deposit Company, a cut of whose handsome building is given on this page.

The style of architecture of the building is Mauresque, and is the finest specimen of the kind in the country. It is located at 316, 318 and 320 Chestnut street, and occupies a front of 57 feet on that street, extending 198 feet on both Hudson street and Carpenters Court. The building has been constructed with the view of strength, both in resisting fire and robbery. It is a combination of indestructible brick, tile, sandstone, and iron put together in such a way that while its primary object is evident, the arrangements display artistic taste also.

The foundations are of stone, from 8 to 12 feet deep and 3 feet thick. The walls above the main floor are 2 feet 3 inches thick, faced with tiles, which up to this time have not suffered the slightest perceptible displacement. The floors are of iron beams with brick arches, and are laid with concrete and encaustic tile.

The roof is of iron protected by slate, which is put on and clinched with copper wire, producing a most substantial result. A great feature of this institution, and in fact the most prominent one, is its fire and burglar-proof vaults, thought to be the largest of any similar ones in this country, and certainly in Philadelphia. There are six of these in one massive structure, which has a foundation of granite blocks laid in cement and below the water-level, the outside walls two feet thick of brick, faced with tiles, making a perfect fire-proof building. Within this are the six compartments or vaults, themselves composed of iron, steel and granite, with the most improved safeguards. Including in addition to the massive iron and steel doors the most approved combination and time locks. The iron boxes used by safe renters are each placed in a steel and iron encasement, forming tiers, through which is a passage way after the usual style of such vaults. Each apartment is protected by an escutcheon which must be opened by the attending clerk before access can be obtained to the valuables, and the box key is changed with every new renter. For the accommodation of ladies who may be safe renters, provision is made: special rooms fitted up for their exclusive use with toilet rooms adjoining. Examination of any securities may be made in the treasury building or vault department, without the trouble and work of removing same to other offices or houses, accommodations being made for this purpose.

In one large room of this treasury building are kept silver in packages, trunks and boxes of household valuables, and such other goods as the owners desire safe storage for. These packages are sealed by the owners, numbered and placed in marked positions, with a record kept by the company, showing just the row in which each one is and when removed; if returned, it must be replaced in the same spot. These markings of the floor space are after the manner used at exhibition buildings, to avoid confusion and maintain more careful oversight. The company has a full paid capital of One Million dollars. Depositors of money are allowed 2½ per cent. interest, deposits subject to check at sight. The officers of the company are:—Mr. Thos. Cochran, *Pres.;* Ed. C. Knight, *Vice Pres.;* John S. Bunn, *Treasurer;* John Jay Gilroy, *Secretary;* R. C. Winship, *Trust Officer.*

HENRY BRIGHT, Business Manager.

PHILADELPHIA, MONDAY, FEB. 1, 1886.

Prices and Building Prospects.

THE last few days have developed considerable business in iron, steel, lumber, etc., in addition to numerous inquiries as to quotations at which raw material of various kinds can be purchased after March 1st or 15th. The disposition of manufacturers and dealers in material and supplies of all kinds is to furnish requirements as they come along, and defer contracting for future deliveries until near the time for delivery. The reason for this is that manufacturers are now pretty well supplied with orders, that there is an uncertainty as to whether prices will remain where they are or advance, and that it is not wise to contract so far ahead in view the possibility of fluctuations.

The brick makers of this vicinity are preparing to increase their output this year, and have inquiries in hand from dealers for large supplies. The prices will not vary much from the quotations of last year, unless it is for some of the special and finest makes, the demand for which is rather light taking the entire production into account. Few of the makers of special bricks are introducing new styles in the market, and are endeavoring to induce architects to adopt them more generally. The architects, as a rule, are disposed to encourage enterprise of a legitimate sort, but the ordinary pressed brick comes up to their reasonable expectations.

The quarrymen of Northampton county are preparing for a heavier business this year than last. Already some orders have been placed at the same price per square as last year, and no advance is likely to be made. In fact, competition is greater than last year in view of the openings that have been made and are to be made during the coming season. The county has increased greatly in wealth, largely from its slate interests, and the leaders of the industry there are beginning to talk more seriously of a compact organization than before. Competition has jeopardized reasonable margins and they are disposed to come together if practicable results are obtainable.

Elsewhere we show the doings of architects. It is a little too soon to report a general revival of building, but from the indications furnished it is evident that the architects will be crowded with work for spring and summer execution. At present the work is mostly for cottages and residences in the city and vicinity. Next month manufacturers will announce new projections. At present it is known, from inquiry among manufacturers, that quite a number of them contemplate additions to existing plants, and should development and orders for the next four or six weeks be what is expected, there will be, no doubt, considerable building done in Kensington and some other industrial sections of the city. The manufacturers are inclined to go slowly in this direction rather than to overdo, as they have done. Many inducements exist to increase the capacity, and a few are so sanguine in their expectations as to say that those who do not increase their machinery capacity, at least, will regret it before six months. There are those, however, who feel that discretion is the better part of valor, and that the conservative course will in the long run prove the wiser.

The lumber dealers throughout the city report the market rather dull. This is due partly to the unfavorable weather. All the yards are well stocked with wood of all kinds, and the ports along the lakes are also stocked up, much of it controlled by parties here. The Western dealers have advanced prices on Philadelphia and Eastern dealers 5 per cent., and this, with the prospective advance in freight rates, is having the effect of hardening prices, although there will be no general advance, according to the rules of the lumber trade, until the advance is forced on them.

The arrivals of yellow pine have been light because of the unfavorable weather along the coast and the indifference of consumers at the present time. Quotations show very little change, but there are inquiries on the market as to prices for March and April. The quotations on white pine are firm and the distribution is of very moderate dimensions. The hemlock people are holding hemlock at $11 to $11.50, and report fair activity, with good prospects for a little further advance in a retail way. The hardwood dealers, covering walnut, mahogany, cherry and such woods, have only moderate supplies, and prices are consequently firm. There is very little doing, at best, and both wholesalers and retailers are waiting for the building season to open.

The iron trade is strong and steady in every department. The transactions of the past week or two have not been very large, but consumers are buying what they need from time to time. Bar iron is selling from 1½ to 2 cents for common to refined; nails from $2.25 to $2.40; merchant steel at all prices, ranging from 3 to 9 cents; sheet iron firm at 3½ to 4 cents at wholesale. There is but little movement outside of actual requirements, as the impression prevails in some quarters that the upward tendency which has characterized the market for a month or so will not hold. At the same time it is impossible to make any predictions, because of the under-currents which are liable to manifest themselves unexpectedly.

Is a Real Estate Exchange Needed?

STOCK, produce and petroleum dealers have their Exchanges, which are indispensable to the prompt transaction of business. Then why should not operators in real estate have an Exchange? The objector can promptly say, houses and lots are not barrels of oil, or barrels of flour, or certificates of stock, that we have never had an Exchange and can get along as we always have in our quiet conservative way, and that there is nothing to be gained by combination of this kind.

The volume of real estate operations is growing steadily every year. Last year's figures compared to those of five or ten years ago exhibit a remarkable increase. Wherever exchanges exist there is greater activity, more business. The advantages are apparent. None of those interests which have become accustomed to the Exchange would or even could return to the individual system.

Would it not be an advantage to bring buyer and seller together at stated hours to see and hear what is to be sold, what to be bought? Would there not be much more business done if properties that could be bought were announced on 'change? Would not such a system develop more offers to buy and more transactions?

At present the buyer of real estate has no ready means of knowing what can be bought; the person desiring to sell real estate does not know where probable buyers are to be found. Of course there is the auction hammer, but there are many who would not sell that way who would be willing and anxious to offer property in an Exchange.

The function of an Exchange is to bring

buyers and sellers together, to put both in possession of all the knowledge available as to what property can be had, tems, etc. If an investor, or real estate operator, or a manufacturer desires a site, or a piece of land, and has the opportunity of making known his wants through an Exchange, a number of eligible sites or tracts are likely to be offered by willing or anxious sellers under the more favorable conditions of competition which, tend to reduce prices to the lower level. Under existing conditions the higher level is insisted upon because the buyer in that case is the seeker.

The Exchange reverses all this. It gives the buyer all the advantages that can be conferred by competition. It gives the seller the advantage of several buyers in the place of one. It enables all to know what there is for sale, and guarantees to all, that prices will be governed by legitimate and intelligent competition rather than by the "what will you take? what will you give?" principle. The Exchange, while it sometimes facilitates the growth of speculative values, generally, in nineteen cases in twenty, ascertains the just market price, and in this way confers a many-sided advantage on all concerned. It would not be going too far to say that a wisely organized and conducted real estate exchange would materially increase not only transactions, but also stimulate building enterprise.

There is in and around this city a great deal of land that could be brought into market through the medium of an Exchange. The holders have perhaps held it from time immemorial, and are waiting for the pressure of actual necessity from the steadily expanding population. But give us an Exchange, and at once much of this tax-ridden property is in the market for purchasers, not, as now, at an arbitrary price, one-third or one-half more than its actual value, as is the case with so much land, but to ascertain what it will bring under the fire of the competition of an organization composed of experts. Much of such land would soon pass out of the hands of its present owners at its real value. If it possesses the elements of appreciation, as very much of it undoubtedly does, the increase would fall into the coffers of real estate operators who possessed the experience and shrewdness to buy wisely, as well as to the small purchaser of smaller properties through them, for actual use. In fact, it would not be stepping one iota from actual truth to say that from the want of such a leveling agency as a real estate exchange much property is now worthless to the owner and the community. If inroads could be made on some of the idle real estate in and about the city for legitimate purposes, it would react on all surrounding property. But it may be remarked, an Exchange, according to the drift of these arguments, might create an enhancement of values. What of it, if the enhancement is legitimate? But another croaker calls out, it might compel some of us to take less for our long-held-on-to estates, by creating opportunities by which others could sell as well as we, and thus indirectly fix values for us on our lands.

Away with such puerilities! We have some three or four hundred real estate agents and operators and some three or four hundred conveyancers, besides, perhaps, two or three hundred others directly or indirectly interested in real estate operations, to say nothing of lawyers, investors and others. Have these one thousand men, more or less, no interest in the buying and selling every year of such a large percentage of the six hundred millions and over of the assessed valuation of this city?

If but ten per cent. changed hands yearly there is an interest of sixty million dollars to be served or to suffer by good or bad organization of the real estate interests or by no organization at all.

What exchange represents such vast interests? What sensible reason can be given why such vast interests should not be organized. The value of the unimproved real estate in and about the city, as shown by the assessments of recent years, is steadily improving. Why, then, should not steps be taken to profit out of and by its advancement? Has not the time come for wise men to act, or is it better to drift along in the careless manner that has characterized our course heretofore? *The Real Estate Record and Guide* does not pretend to speak for any one but itself. Its intellectual vision may be distorted. It may possibly be looking through colored glasses at this question of the profitableness of an exchange in real estate interests; but, if it is not pointing out facts and deducing logical conclusions from them, it will thank any of its friends to take the mote out of its eye. What have such old war horses as Snyder, Sylvester, Geissinger, Wilson and guns of such calibre got to say on the subject?

THE *Manufacturers' Record*, of Baltimore, furnishes another batch of its interesting facts and figures in relation to the industrial development of the South. The information is most encouraging to investors, both Northern and foreign, and also to manufacturers contemplating operating in the South. The cotton mills of Georgia have been suffering from a depression for a year or two past, but have once more begun to pay dividends. The development is in railroad building, mining, manufacturing, the development of lumbering operations, and also the development of agriculture. An immense amount of capital is still seeking investment, and is being rapidly utilized. The facts, as condensed by the *Record*, are these: The amount of capital, including capital stock of incorporated companies organized during the year, and that employed in enlarging and rebuilding structures destroyed by fire, aggregates $66,812,000, divided among fourteen Southern States as follows: Alabama, $7,841,000; Arkansas, $1,220,000; Florida, $2,019,000; Georgia, $2,500,000; Kentucky, $18,303,200; Louisiana, $2,118,500; Maryland, $6,668,800; Mississippi, $761,300; North Carolina, $3,230,000; South Carolina, $856,000; Tennessee, $2,692,000; Texas, $3,232,000; Virginia, $3,314,000; West Virginia, $12,066,000. Total, $66,812,000. Summing up some statistics of the South's progress since 1880 the *Record* shows that since then 10,400 miles have been added to its railroad lines, the cost of the building of which, added to the investments in old roads and their improvement, foots up $571,000,000, the actual cost of the railroads of the South and their equipment, according to statistics, being over $1,250,000,000, against $679,800,000 in 1880. The assessed value of property in the South has increased nearly $1,000,000,000 since 1879.

THE Councils' Law Committee has recently had before it an important question in reference to a proposed amendment to an ordinance of 1870, as concerns municipal contracts, authorizing the City Solicitor to accept corporations as sureties for contractors in place of private persons. After providing that the corporations to be accepted as sureties must be chartered by this Commonwealth and, as at present, approved by the Orphans' Court, it was agreed to report the ordinance favorably to Councils.

Councils will no doubt accept the report, and take action immediately.

MEDICAL INSPECTOR TAYLOR has been examining the Public School and will shortly submit his report to the Sanitary Committee of that body. His report will show a defective ventilation, insufficient heat, defective furnaces, discharge of coal gas, inadequate lights, foul drainage and other similar and inexcusable defects. When the plumbers asked for assistance from Councils, to give force to the law of the State, passed with special reference to Philadelphia, their committee was told there was no money for them for such purposes, and the law will therefore remain a dead letter on the statute book unless Councils can be made to look at the enforcement of sanitary regulations in the proper light. Dr. Taylor may find the Sanitary Committee a little hard to convince that the Public Schools are in need of improvement. The noses of sanitary experts they think are a little too well trained, and, that while there may be a defect of some sort or another calling for attention if the city treasury was full of money, they think, or at least act as if they thought, that the urgency for spending money to make improvements is not very great. Several school-houses are mentioned in the report which need immediate improvement. Some require a general fixing up. In one schoolhouse there is but one stairway leading to upper rooms. Our school-houses, above all things, should be properly constructed, drained and ventilated, and it is very poor economy that will neglect the enforcement of all recognized sanitary regulations, either declared necessary by law or by common sense.

FIRE MARSHAL WOOD thinks the police were too slow in sounding the alarm at the Arch street fire. A private watchman gave notice at the Sixth District at 12.33.

Fire Box Keys.

It is very evident that some different arrangement must be made as to the custodians of fire box keys; the delay of even the few seconds necessary for a policeman to run a square or two in order to spring an alarm entails the loss of too much valuable time.

We question the necessity of keys or fastenings of any kind; it implies that the system is not safe in the hands of those it is intended to protect.

Is the average policeman any more reliable than the average citizen? A few rascals might trifle with the boxes, and spring false alarms occasionally, but they are quite frequent now, in the hands of policemen. A hundred false alarms in cost and trouble would not equal the loss and misery of a single fire.

The Fairmount Park Commissioners do not hesitate to place the Park under the protection of the public; then why should Mayor Smith decline to do precisely the same thing with the fire boxes?

Special officers and private watchmen are no more reliable than policemen, and it seems to us stupid nonsense that citizens who would act, and act promptly, must stamp their feet in vexation when an alarm is necessary because the boxes are locked.

Capt. McDevitt fully appreciates the situation, and we are sure that were the matter referred to him he would discard fastenings on fire boxes at once.

The attention of Philadelphia employés is called to the project of the workingmen to inaugurate an eight-hour day's work on May 1st. The attempt will be made. It is difficult to say how general the movement will be, as the agitation is now in progress. Several national labor conventions have already declared in favor of a day of either eight or nine hours. The bricklayers, stone masons and carpenters think a nine-hour effort will be more easily and successfully accomplished. They think a twenty per cent. reduction in the hours of labor would be unfair to employers and unjust to themselves. They expect to submit to a reduction of wages equivalent to the reduced time, and are unwilling to lose 20 per cent. The aim is to make the strike general, and to have it include all classes of labor in all parts of the country. The laborers themselves, both skilled and unskilled, are not a unit on the desirability of the movement, but are being zealously entreated by leaders and agitators to fall into the movement and make it general and effective. The laborers of the United States are more compactly organized than ever before. They are more conservative, more intelligent, and more easily dealt with. They are advocating arbitration and co-operation, and are pursuing a course which commends them to the intelligence of the country. As to the wisdom of the eight-hour strike, different views are entertained. The President has expressed himself favorably inclined to the eight-hour law in the case of the Government employés, and quite a number of prominent politicians have admitted that the law might as well be tried. This movement is largely due to the force of the public opinion behind it. It will make quite a difference with contractors and builders whether they insist on having as much for eight hours as ten, especially if there should be an urgent demand for building.

The "cradle of liberty" sent one thousand pounds to Parnell.

The B. & O. Company will find the New Jersey Legislature an ungainly thing to handle. The legislator himself will not feel in an uncomfortable position with the P. R. R. on one side and the B. & O. on the other.

It will be, no doubt, a difficult thing for him to make up his ultimate mind.

The discovery of leaks in our water-pipes are altogether too frequent. On last Tuesday night there was a cave-in at Eighth and Filbert streets. A large leak was found in the water pipe. An eight-inch gas-pipe was broken as well as a sewer, and no one knows whether it was caused by an explosion of gas, the bursting of the water-pipe, or the breaking of the sewer. Smart chaps we have got over us.

The Fortification Board wants to spend $21,000,000 in seaboard defences at once. They think it will take in all about $126,000,000 to put ourselves in proper defence. This is a great deal of money to spend for such a purpose, and it is not likely that the American people will ever consent to it, despite the strong arguments that have been repeatedly made in Congress and out of it in favor of such expenditure.

Cheap Money a Power.

The rate of interest is generally declining out West. A few years ago the borrower of money was compelled to pay 10 or 12 per cent. on all loans; now he can borrow all he needs for building operations at 6 or 8 per cent. Foreign capital seems to be abundant. This cheapning tendency in money is doing more than any other single cause to stimulate building activity, cheapen rents and create a demand for iron, steel, lumber, building material, and all that goes into house-building. Financiers and economists understand perfectly the importance of the part which an abundance or scarcity of money plays in the industrial activity and prosperity of a country; merchants and manufacturers also have a keen appreciation of the importance of abundant money, but not so much appreciation of the disasters which follow in the wake of high-priced money. The Western people have been handicapped for years by the difficulty of obtaining money at any price, and when obtained they have been obliged to pay more for its use than they could afford to pay. There is an intimate connection between cheap and plenty money and railroad development, real estate operations and house-building operations. Dear money means stagnation. Cheap money, other circumstances being equal, means activity. Money is sometimes cheap and a drug, simply because there is no demand for it. Money is sometimes dear simply because of an exceptional demand for it, created by the urgent requirements of borrowers. Neither extreme is profitable. The people of the Western States are beginning to realize the advantages of an abundance of circulating medium at a low rate of interest. It is enabling them to project railroad building, manufacturing, and municipal improvements. All this has a direct reference to the Eastern manufacturers, the Northwestern lumbermen and the manufacturing interests generally, who find their market in the mighty West. It is well for the West that the rate of interest has declined to 5 to 6 per cent.

Hard Sense.

One of the chief troubles is the lack of sympathy between masters and men, which arises more generally from the fact that the men have so frequently broken their contracts after they have pledged themselves to receive a specified remuneration. Contractors have frequently taken work at low prices to keep their men from laying idle and wageless; but so soon as work seemed plentiful the men have demanded higher wages, to a great extent urged to do so by the reports of walking delegates that "the 'bosses' were making so much money." In the building trade masons have been reported as having lucrative work, when they actually have not made a fair rate of interest on the money invested in their business.

If men would have the bees instead of the drones take a leading part in their councils, they would find the trouble easier to overcome, and that their employers are disposed to treat them fairly. As a mere matter of business, a better understanding between employers and employés will pay both parties. Millions of dollars could be annually divided between them if this understanding was what it should be. Two very creditable instances of a reciprocal, pleasant feeling have lately occurred in England; in one case the workmen, numbering into the thousands, proposed to their employers that, in order to help them out in work that was not paying, they work a week without receiving any pay for it. In another instance, a ship-building firm began the construction of a vessel for which they had no order; the workmen appreciating that the motive was certainly not an entirely selfish one, and not to be outdone, proposed that on that particular vessel the prices be reduced ten per cent., and further expressed a willingness to work two weeks without pay.

While "the laborer is worthy of his hire," it is equally just that capital should produce an income, and that both should endeavor to bring about the true desideratum—the common weal. A recent strike at Odessa, Russia, of masons and others, numbering 400, at work on the new opera house, resulted in the discomfiture of the men, who asked for wages of about one dollar a day, their day's labor at this season of the year being from 4 A. M. to 8 P. M., with one hour for dinner. Our men, who think that even nine hours' work is too much, might take a hint from this.—*Building.*

To find capacity of a cylindrical vessel in gallons, multiply the area in inches by height in inches, and divide product by 231. To find capacity of a four-sided vessel in gallons, find cubical contents by multiplying the length, breadth and height in inches, and divide product by 231.

A Montgomery county citizen's will, which has just been probated, after bequeathing ten dollars to a son-in-law gives the homestead to the wife as long as she desires to live in it, and then says that if the son wants to buy the homestead he shall be allowed to do so at a reasonable price and at private sale.

REAL ESTATE

Real Estate Notes.

COLEMAN & Co., 903 Walnut Street, have lately sold twelve brick dwellings, in Camden, N. J., for $427,000; a country seat in Burlington, for $3,000; a vacant lot at Sixth and Norris Sts., for $4,300; besides, three or four vacant lots, in Camden, for building purposes.

G. W. HARRIS & Co., 1020 Chestnut Street, have recently sold a fine country seat, in Northern New Jersey, to a lady of New York City, for $11,000.

THE total amount of the wealth of Northampton County, as given by the triennial assessment, just completed, is $51,796,114.16, which is an average of $1,994.22 to each taxable, and an increase of $6,518,936.16 on the assessment of 1882, much of which is due to the development of the Slate Quarries.

MANY years ago William Mitchell, a real estate agent at Milford, Pike County, took in part payment of a debt $61,000 of Mexican 6 per cent. bonds. They were laid away as valueless until a few days ago, when Mr. Mitchell was reliably informed, that they were worth 75 cents on the dollar. Good for Mitchell!

Jarring Authorities.

A New York letter on building matters says:—"A question which has long been a source of irritation between architects and plumbers, has recently found its way into the technical journals, and is likely to create some interest in architectural circles. It has long been a practice with architects in this city and neighborhood, in preparing specifications, to cover up, in a general clause, all the details of a plumbing job, with which they, the architects, are, as a rule unacquainted, but which they endeavor to make binding, all the same, on the plumber. The objectionable clause requires the plumber to supply whatever is omitted in the specifications but which may be considered essential to the perfection of the work, the architect to be the judge before payment. This is virtually making a man a judge of what he knows nothing about, and the plumbers naturally object. They have but little remedy, however, for they are, in a great measure, at the mercy of the architect, who is master of the situation. In Philadelphia a spirit of harmony exists between plumbers, architects and builders and but little occasion occurs for disputing."

Building Notes.

THE Lumbermen's Exchange, 10 stories high, is the tallest business block in Minneapolis; it has a front elevation of 130 feet to the cornice, or 154 feet to the highest point of the tower. The base walls are of Sauk Rapids grey granite, and the superstructure of Bayfield brown sand-stone. In style of architecture the structure resembles most the Romanesque.

MINNESOTA Loan and Trust Company, of Minneapolis, is one of the highest buildings in the Northwest, its height being 150 feet, costing $300,000. The front is of Ohio grey sandstone, in the "English street" style, which is a modified English Gothic. The grey stone is set off with Tennessee marble columns enriched with capitals. The building is so strong, so stately, so beautiful in its design, so harmonious in its proportions, and so elaborate and tasteful in its finish, that it ranks foremost among the palatial business houses which adorn our streets.

THERE are brick tenements for 1,405 families in Pullman, Ill., all the other houses, only about sixty in number, are frame buildings. The average number of persons to each tenement is six, about one more than the whole United States. No tenement is allowed to to be over occupied, and every house is built and arranged with all the sanitary conveniences, such as are found in water, gas and closets. The houses are thoroughly drained by having direct connections with the street sewers, and the better class of houses have laundries in the basement. The houses are generally built in blocks, but a dozen or so of the better-class houses stand alone. Every house is provided with ventilating flues, and all of the best dwellings, together with the public buildings are heated by steam. All the brick structures in the city have good and well ventilated cellars. All these are well drained and sufficiently dry for people to reside or sleep in, even. About ten per cent. of all the houses have bath rooms. The cellars are occasionally used for storing coal and kindlings, but more often these articles are found outside in woodsheds on the alleys. The bottoms of the cellars, or basement floors, are made of the best concrete.—*Sanitary News.*

BUILDINGS continue lively in San Francisco. Permits to the amount of $7,044,000 were issued during 1885, a gain of over 10 per cent. over the year previous.

THE great steel manufacturer Marshall, of Sheffield is about to remove his entire works to America. The firm employ 3,000 men here. Some scores of the most skilled will be taken over and the rest will be hired in America, and the State department has been informed of the fact, which is regarded as a striking proof of foreign confidence in the results of the new administration and the reality of the American business revival.

A BUILDER'S Protective Association was organized last week in the Builders' and Traders' Exchange, Chicago. About one hundred dealers in building materials were in attendance. Mr. C. B. Kimball was made chairman. He addressed himself to the effect that one of the chief benefits of the association would be the keeping of a "black list," containing the names of all purchasers who failed to pay their obligations. It was decided to make the association entirely distinct from the Builders' and Trader's Exchange. The next meeting will be held Jan. 31.

THE Lucas County, Ohio, commissioners have startled the community by rescinding the order to build a million dollar courthouse. Toledo is the county seat. It has been charged that the whole scheme was conceived by a ring for the purpose of spoils. Mr. L. C. Gibbs, the new commissioner, joined with Mr. Ryan and to-day rescinded the order to build, the contract employing D. W. Gibbs & Co. as architects, and all other acts of the board of last year. Gibbs & Co. hold their contract, duly signed by the commissioners, and will sue the county for $25,000. The board had been enjoined, and it became known that Judge Lemmon was about to dissolve the injunction and allow the building to proceed, hence the action of the commissioners.

The formula for mixing the alloy used in bronze butts, door knobs and other articles of hardware is Copper 89 parts, Tin 8 parts, Zinc 3 parts.

WORK on the Cahill High School will be begun about April 1, at the north-east corner of Broad and Vine streets. The building will be 110 by 135 feet, with three stories and a basement, the latter to be eight feet above the level of the pavement. The basement will be arranged for mechanical training, the first and second stories are to be used as classrooms, and the third story as a large lecture hall and drawing-room. Provision will also be made for an assembly hall and library and museum apartments. The building when completed will accommodate 600 pupils, who will be instructed in all branches taught in high schools. The edifice will be heated by steam, and the ventilation facilities will be excellent. The style of architecture will be Gothic, and the fronts of the building will be constructed of white marble. The work will be completed in about two years. Negotiations are in progress to place the institution under the direction of the Christian Brothers.

Building Permits.

Alterations to building 331 North Fourth Street, to A. Benner, 3164 Richmond Street.

Thomas Little & Son, No. 718 South Eleventh Street, rebuilt factory, Washington Avenue, west of Seventeenth Street.

Mrs. Leppe, No. 402 Moore Street, a one-story kitchen, No. 402 Moore Street, 8x10.

Ashton S. Tunnison, No. 5541 Germantown Avenue, two three-story dwellings, on Sedgwick Street, near Germantown Avenue, 30x60.

One-story brick kitchen, 402 Moore Street, 8 ft. by 10 ft. to Mrs. Leppe, 402 Moore Street.

Two three-story stone dwellings, Sedgwick Street, between Germantown Avenue and Chew Street, 30 ft. by 60 ft., to Ashton S. Tomison, 5541 Germantown Avenue.

A one-story brick stable, Thirty-first and Thompson Street, 15 ft. by 40 ft., to Frank Riemer, 2739 Poplar Street.

LEGAL.

The following cases were argued on Thursday and Friday before the Supreme Court: Dickson *vs.* Wallace; City, Trustee's appeal; Harper *vs.* Young; Smaltz *vs.* Ryan, Dealy et al. *vs.* Philadelphia and Reading Railroad Company; Pratt *vs.* Patterson et al.; Lancaster et al.'s appeal; Harris' appeal; Bentley et al. *vs.* Lamb; Scott, Trustee's appeal; Schilling *vs.* Abernethy, and Robinson et ux. *vs.* Bair.

Practical Things to Know.

A German Scientist recommends paraffine as an efficient means of protecting wood against damps, acids and alkalies. The wood is first well dried and then covered with a solution of one part melted paraffine in six parts of petroleum, ether, or bi-sulphide of carbon. The solvents evaporate quickly leaving the paraffine in the pores of the wood. Be careful in using the preparation as all the substances mentioned are very inflammable.

Loosening a Screw.—One of the simplest and readiest ways of loosening a rusted screw is to apply heat to the head of the screw. A small bar or rod of iron flat at the end, if reddened in the fire and applied for two or three minutes to the head of the rusty screw, will, as soon as it heats the screw, render its withdrawal as easy by the screw-driver as if it were only a recently inserted screw.

A new process has been invented by which designs in wood, having all the appearance of genuine carving, and being if anything of a finer finish, are produced by compression, and can be sold at a nominal price. The process consists in paring hardwood shavings as thin as wafers, which are then placed in a chemical solution. When in a properly pliable condition, the mass is introduced into moulds made from steel plates and pressure is applied, which forces the wood pulp in every line of the mould. When it becomes dry, it is removed from the mould, and has exactly the appearance of a wood carving, with the grain of the wood as perfect as though it had never been reduced to a pliant condition. The process is a German invention, and large numbers of different designs are now being manufactured in Berlin. These are in form of heads, figures of men, women, birds and animals, flowers, picture and mirror frames, clock frames, cabinets and cabinet decorations, album covers, etc. Beautiful designs are framed in brass, bronze and plush, and make exquisite placques and parlor ornaments. The designs can be used in every form of decoration for which wood carving is suitable.—*Furniture Worker.*

TRADE SCHOOLS.—In Paris the trade school system has been found so satisfactory that the money has been voted to establish three more schools, two for boys and one for girls. The one started some four years ago has a membership of about 300, more than it can conviently accommodate, the course of instruction is about three years. In the first year the pupil receives a superficial instruction in ten or twelve different forms of mechanicle industry. At the end of the first he has made his choice of the trades, and the succeeding two years are devoted to a practical, instruction in the details of that branch. Each department is in charge of a practical, intelligent mechanic, and by the time the scholar graduates he has acquired useful knowledge of the several trades, which can be profitably used in the practice of the one which he gave his particular attention. A boy to be eligible to membership in these mechanical schools must have a certificate showing that he has received the benefits of a common-school education, such as is prescribed by the laws of France, as but little time is allowed him to attend to such duties after entering the trade school.

Architectural Conventions.

Three Architectural Conventions met last month in the West—one at Kansas City, one at Minneapolis and one at DesMoines. The Ohio architects met at Columbus, Ohio, on 12th ult.; Kansas architects formed a State organization on 25th; architectural conventions were also held in Indiana and Florida. The Chicago *Inland Architect* referring to these evidences of enthusiasm among the architectural fraternity says:

"The prospect is that the present year's work for each of these will be exceedingly important, the course outlined by the late national convention being such as to bear directly upon the work of state associations, including many important measures largely dependent upon them for permanent success. In the states where the legislatures will meet this season, the bill regulating the practice of architecture should be vigorously pushed toward enactment, the best method of procedure to attain this being readily determined and marked out by the assembled architects. The subject of competition should also be discussed. In each state, while the evil is the same, the conditions may differ largely, and while we strongly recommend that the text of the report submitted to the Western Association upon this subject be adhered to, a full discussion should be indulged in regarding the best method to be pursued in regulating and controlling future competitions. The proposed law governing the government architectural office should receive attention, and while the matter is now wholly in the hands of the committee appointed to care for it, the state association as a whole and its individual members can do much toward securing its passage by calling upon the congressmen of their respective districts, and, by explaining its advantages to the public, secure their coöperation. Among the subjects of minor importance that should receive consideration is the proper status and also the education of the draughtsmen, and where it is not possible to secure architectural colleges or schools of design, measures should be taken to start architectural clubs through which the draughtsmen can reach a greater proficiency than is possible in following the routine mark of the office. The time of year for these meetings is well chosen and each should be attended by *every* architect in the respective states, as no architect can afford to lose the benefits he will personally derive, while he owes at least this much support to his profession.

Among the Architects.

THE annual report of the Supervising Architect of the United States for 1885, shows that there are eighty new buildings under construction, ranging in cost from $25,000 to $2,000,000, calling for a total of $8,511,400, the expenditure during the year being $2,438,709. Mr. Bell, in his report, recommends the reorganization of the office upon a plan similar to that the revised Stockslager bill provides.

F. A. WATSON, 518 Walnut Street, is engaged on the drawings of a church, (the Temple Baptist), to be erected at 22d and Tioga streets. The Chapel has been erected. Work on the main building will be started on the coming of fair weather. The style of Architecture will be English renaissance, with stone base, rock face, brick above base, slate roof and tile gables, with a tower 104 feet to top of finyal. Its cost will be $30,000.

THE same architect is preparing the plans for a large warehouse at Swanson and Catharine streets, for Brownfield & Co., to be three stories high, built of Philadelphia stretcher brick, cost $18,000.

ALSO by the same architect, a residence at Mt. Airy, for Mrs. S. L. Haffelfinger, in Queen Anne style of architecture; first story stone, shingles above, slate roof; cost, $5,000. Drawings are being prepared. Also is preparing plans for a frame and shingle dwelling, slate roof at Devon, for Dr. Slonaker. Style of architecture of Queen Anne order. Estimated cost, $4,500.

S. D. BURTON, 430 Walnut street, is preparing drawings for a large warehouse to be erected at 641 Arch street. It will be four stories high, brick and iron fronts. The estimates are not yet in.

DEERY AND KERL, 328 Walnut street, are about putting up a new building for the La-Salle College, corner Broad and Stiles streets. It will be built of brown stone, terra cotta and pressed brick; four stories high, 50x90 in size. Estimated cost, $20,000.

THIS firm have in hand the remodeling of St. Michael's Church, 2d and Jefferson, both interior and exterior. The cost of the work, some of which will be of a very high order of skill, is estimated at $40,000 Also, they are engaged on a general remodeling of the interior of St. Joseph's Church. Cost, $15,000.

THIS firm have arranged to erect a four story building for J. W. Hallahan, at 8th and Filbert streets. The size of the building will be 31x72. The cost is fixed at $18,000.

THIS firm has about completed the exterior of the Mother of Sorrow's School House, work will soon be begun on the interior. The total cost will be $30,000. They are getting the plans ready for a house to be built at Paoli, of stone, frame and shingles, for C. S. Phillips, at a cost of $8,500.

D. S. BEALE has his plans about ready for a residence at Penallyn, for Mrs. A. C. Huber, to be built of stone in the Queen Anne style of architecture. The cost will be $4,000.

EDWARD H. BROWN, 1430 S. Penn Square, has a contract for drawings for three buildings at Williamsport, Pa., and the contract has been awarded to W. H. C. Hoffman. He is preparing drawings for a store on 9th street, to be four stories high, 22x116 feet, with an L extension to Jayne street. Cost, $15,000.

G. W. & W. D. HEWITT, 310 Chestnut street, have plans nearly ready for a new Station for the Cornwall and Lebanon Road, at Lebanon, Pa. It will have a brown stone base, brick and terra cotta. Size, 26x100 feet, with a train shed adjoining, 50x200. All to cost $35,000.

They have also completed the plans for a house for W. T. Harris, at Bala, Pa., to be built of stone, with slate roof; two stories high, at a cost of $18,000.

CULVER & RODGERS, 901 Walnut street, recently removed from 906 Walnut street, have light and airy rooms. They are quite well supplied with orders for work. They are now engaged on drawings for $50,000 worth of cottage work alone. Also on drawing plans for the summer branch of the Lincoln Indian House, at Wayne, Pa. The building will be of frame, three stories high, with porches all around. All the stairs to be built on the outside of the building. The kitchen will be disconnected. Cost of building, $8,000.

THEY are also getting out the plans for a suburban cottage in the modern gothic style of architecture, at Lansdowne, Pa. This is built of brick and frame; ornamented with a turret, for J. S. Austin, Esq., at a cost of $10,000.

BENJAMIN LINFOOT, 719 Walnut street, is preparing drawings for a residence and stable at Marion, P. R. R., for G. L. Crawford. It will be built of brick with stone trimmings, at a cost of $30,000.

I. H. HOBBS & SON, 520 Walnut street, are getting out the plans for a summer residence for Wm. H. Dougherty, at Point Pleasant, Manasaquan River, N. J., to be built of wood, exterior of shingle. The style of architecture is strictly American, with Gamber roof, at a cost of $8,000.

INSURANCE NOTES

Not Sufficient Water.

Colonel Ludlow estimates the value of the perishable property exposed to danger of fire within the limits of the old city at $250,000,000. He says: "Within these limits are 490,000 feet of water pipe. More than 30 per cent. of this pipe is less than six inches in diameter, and 90 per cent. of it has been in the ground from thirty to sixty years. Rust and sediment reduce by one-fourth the capacity of three or four-inch mains after ten or twelve years' service. Even a six or

eight-inch main becomes practically useless after thirty or forty years of continual service. This deterioration is even greater in Philadelphia because we have no subsiding basin. The three or four-inch mains laid thirty or forty years ago are now useless in case of fire; an engine trying to draw water from them is about as effective as a syringe. Larger mains of twenty inches are needed in every fourth street; eight and ten-inch mains should branch from these.

Almond Smith, an insurance authority, says: "Take the district bounded by Walnut, Vine, Front, and Ninth Streets, and I presume it is safe to say that property within those limits is insured for an aggregate sum of not less than $100,000,000. For the protection of these vast interests our means are at present conspicuously defective. We are told that in time these things will all be made right. But, in the meantime, the town may burn down. We need better fire plugs, larger water mains and more of them, and more water."

Lorin Blodget says: "It may safely be said that there are at all times about $100,000,000 in value of active merchandise—not merely stored goods—always at risk in the Eastern half of the old city, and during every working day there are 50,000 lives of working people also at risk of great fires in the Fifth and Sixth Wards alone."

The *Press* commenting editorially on the alarming deficiency in view of recent disasters from fires says: "Statistics show that the average loss per fire in this city during a year is $2,558, while in wind-swept Chicago it is but $1,365, and in New York but $1,457. The reason why a fire in Philadelphia causes, on the average, twice as much loss as elsewhere is simply that the pipes under the old streets, where the most valuable property stands, are not large enough to furnish water with sufficient rapidity to quench the flames promptly. Arch Street is better favored than most of the business streets in the old city. It might be considered fairly protected with a thirty-inch main, even if it is 35 years old, when that is reinforced with an eight-inch main which has reached the good old age of 61. Perhaps the protection thus promised would be more efficient were the other streets in the neighborhood equally well piped. But the one feeder of recent date in all the old city is the twenty-inch main laid under Market Street in 1882. Even this main does not supply directly the fireplugs on the street which are attached to the parallel six-inch mains. Under Chestnut Street there are two ten-inch mains—one sixty-two and the other sixty-four years old—while a single six-inch pipe stretches its futile attenuation under Walnut Street. Upon Sixth, Seventh, and Eighth Streets are mains laid about a half-century ago, and all from four to eight inches in diameter. If there were a whole ocean of water at the other end of these pipes all the steam-engines in the city could not pull the liquid through the narrow holes fast enough to save half the property that is needlessly burned up every year."

These facts call for action. Such dangers cannot continue without harmful results to our business and manufacturing interests. It is not a creditable thing to let these conditions continue. Every consideration urges us as a municipality and as individuals to see to it that this municipal criminality is corrected as soon as possible.

S. A. Smith to Anna Livezey, lot in Doylestown, Jan. 27, 1886..... 3,100.00

MARKET QUOTATIONS.

LUMBER.—The more favorable weather of the past few days has contributed to an improvement to the demand for lumber among retailers and wholesalers, in some instances have ordered additional shipments from lakeports. Dealers are not expecting to do very much for a few weeks to come, and are therefore content with the irregular trade coming along.

LEAD.—Quotations have not been changed. A good demand is in progress, particularly for lead pipe.

PAINTS AND OILS.—Business is picking up. A slight advance has taken place in a few of the imported colors. An improvement is probable in the middle of February, by way of preparation for the spring work. The paint manufacturers are running with less force but have liberal stocks on hand for the jobbing trade.

TIN AND TIN PLATE.—A slight reduction in the selling prices of tin plate is to be reported with a liberal movement both among wholesalers and retailers. Solder is firm and zinc both in cast and open is holding its own in price.

BRICK.—The prices for stretcher and salmon brick show no variation. There is no uniform price for the various yards. Each manufacturer is in the habit of fixing his own price for his special make and facilities are being provided for a heavier demand during the coming year.

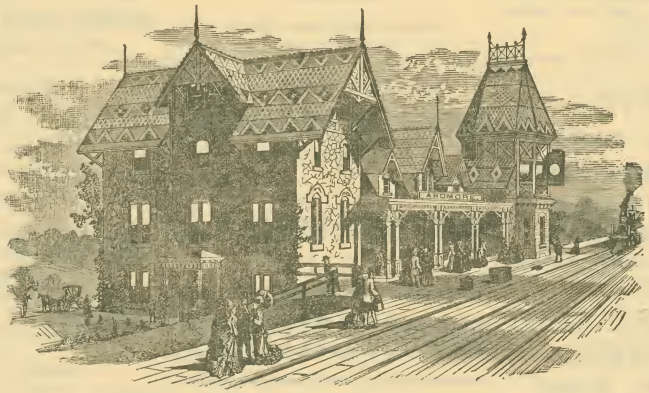
[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL I.—NO. 5. PHILADELPHIA, MONDAY, FEBRUARY 8, 1886. PRICE 15 CENTS

A SUBURBAN SPECIMEN OF ARCHITECTURE.

PERHAPS no other Railroad Company in the United States takes as much interest in the artistic display and completeness of its station houses as the Pennsylvania Railroad Company. Wherever its control extends, the sign of improvement soon becomes visible. This recognition of the beautiful and desire to please its patrons, is not often to be met with, either among corporations or individuals, and the Pennsylvania Railroad Company, as the leader in this direction, deserves credit



and deserves to have its example followed by other railroad corporations. Their beautiful stations are to be found all along the lines of their roads, and particularly within twenty miles of Philadelphia, in every direction. The taste and comfort of the patrons of the road are recognized by the erection of station houses embodying not only utility in every direction, that is possible for comfort and convenience, but also the fullest development of architectural taste, consistent with reasonable economy. The station at Ardmore, recently completed, is a type of its kind. It is large, well constructed, artistically designed, architecturally exact and complete, and in every way creditable to the great corporation which owns it. The cut herewith presented, conveys a very correct impression of its outlines and details. It embodies more than one order of architecture and is suggestive of a richness that is pleasing to the eye. Its interior arrangements are complete; the best wood is used for decoration and the appearance of cheapness or carelessness is nowhere shown. In former years the managers gave less attention to enduring structures than now. This mistaken economy is no longer followed. The station houses of the Pennsylvania Railroad are made to endure for decades, instead of for years, as in its earlier history. The purpose of this company is to beautify the surroundings and its line of road. The improvements near the city are to be followed up by improvements at more remote points, as patronage justifies.

One Year, in advance, - - - - $5.00

All communications should be addressed,

REAL ESTATE PUB. CO.

PHILADELPHIA, MONDAY, FEB. 8, 1886.

A representative of the *Real Estate Record and Builders' Guide* interviewed several builders during the past few days relative to trade and building prospects for the ensuing season. The builders, as a class, are hopeful. Their hope is based not on the mere expectations that this year will be a good one simply because last year was, but because they have tangible evidences before them of building operations. Among the important movements this year will be the alteration of numerous stores and dwellings; the stores will be altered into larger and more commodious establishments and dwellings will be entirely transformed from old-fashioned homes into modern temples of trade. The entire structures will be removed in many cases. The builders stated that negotiations have not gone far enough to furnish details, but that these will be forthcoming in due time. They say that Market street west of Broad, and Arch street below Eighth and down to Front will be considerably improved. The upward tendency in rents and the urgent necessity for more room are the reasons for these alterations. Many old establishments pay an excellent rent at this time, considering the original cost and present assessments, but careful calculation made, prove to the owners that they are realizing the minimum of return on their properties and that the wise course to pursue is to improve these properties, to erect high and commodious buildings with every modern appliance, with the most improved systems for heating and lighting and in every way to make their properties more adapted to the requirements of the present day.

An immense amount of money is being lost in this city from the extreme conservatism of its conservative people. There are business locations around Second, Third, Fourth, Arch, Race, and Walnut streets that are yielding only $3,000 to $5,000 per year rental, that could be made to realize from $6,000 to $10,000 per annum. By the expenditure of moderate sums a much higher income could be realized. It is a matter of surprise that our property owners should allow this loss year after year. Our curious figure man, having a holiday lately, amused himself by figuring up the rental losses on three blocks on Arch Street, of course in an approximating way, and found that by proper and pressing improvements a yearly increased rental of $150,000 could be realized. But it is not the correctness or the incorrectness of these figures that is in question. The point to which attention is directed is, are our property owners in the business sections of this city pursuing a sensible course in not improving their properties? They are satisfied with 30 to 40 per cent. of what they could realize if they made the proper and needed improvements. Why do they not do it? The most pertinent and only correct answer is, "they wont." There are too many relics of Penn's days in the city. We can honor William Penn in a better manner and at less cost than by permitting old buildings to remain. There are scores of buildings from 40 to 80 years old that ought to be removed or at least radically remodelled. Even if the owners do not want the increased revenue, the business and manufacturing interests are clamoring for the increased space and increased facilities. The time for narrow stairways creaking with age, and low ceilings blackened with the lamp smoke of a long century, and little fort-like windows and narrow doorways, has gone. The spirit of improvement is on us, and these old buildings, respectable with their associations, must go. New and elegant structures ought to rise cloud-wards, repleted with every appliance and device that architectural and constructive genius could suggest. We are drawing no pen picture, no fancy sketch. We talk of our provincialism. We are full of it, but not in the direction in which some of our city ink-slingers describe. We need, of course, good, well-paved streets. The cobblestones ought to go to the bottom of the rivers and creeks from whence they came, the city water supply ought to be vastly enlarged and improved, new works and conduits ought to be built. Larger pipe ought to take the place of the clay pipe, stem system, that laughs at us in derision all the time. But these improvements will not come as long as we have not the spirit and energy to be worthy of them. They will not come as long as we have our business centres covered with old houses that were fit for our grandfathers only. The kitchens which the cooks of fifty years ago occupied are to-day occupied by followers of Blackstone. The dining-rooms are filled by insurance men, manufacturers and representatives of our industrial and commercial interests. All very well. We have driven the cooks out, and the old-time owners too, but having taken possession, we should transform these places, these dwellings, if not as a matter of taste, then as a matter of dollars and cents.

This is where we are provincial. This is where we should correct our provincialism. The property owners in the older sections of the city will be left behind in the great race the city is making, unless they beware. Up-town property is improving. The Exchanges, or one or two of them, are talking of moving; And why? There is no enterprise down town. These energetic Exchanges are anxious to get out of the graveyard of Philadelphia.

What is to be done? Do the property owners below Fourth street want their property to depreciate? They seem to want this retrogression. How can they prevent it? how improve their properties and increase their rentals? Simply by transforming their two-storied and three-storied old-fashioned houses into modern and elegant business structures. Will they do it? Like the end man, "We give it up."

If any encouragement were wanted there are abundant evidences of it all around. Look at the returns on investments elsewhere. Look at the *Record* Building, at Tenth and Chestnut; at some of the fine business buildings on Walnut street. For instance Nos. 333 and 331 or No. 419, or many others on other streets that might be mentioned by way of illustration.

The Real Estate Record and Builders' Guide has no sympathy or patience with the complaining property owners away down town who are figuratively tearing their hair over small and diminishing returns, and who stand almost petrified at the westward march of Philadelphia civilization. They have imagined that the business end of Philadelphia was in their keeping, that it belonged to them, that it would not leave them. But, lo! it is going if not gone.

There is no use prolonging this matter. If our old property owners do not wake up they will regret it. Young America will not sit in a six foot six room and look out of a three by five window filled with 8x10 glass. Young America would not tire its legs by climbing narrow, old, rickety stairs. Young America wants elevators and registers, and French plate glass and sixteen foot ceilings

and deep mouldings, double doors, and all that—yes, and will have them too.

There is yet time to reclaim something. At this time inquiries are being made for properties between Tenth and Eighteenth streets for business and manufacturing purposes. Let the property owners downtown take a hint and begin remodelling now. Let them put up six-story buildings where there are three and have every appliance for convenience and comfort.

Of course we are speaking one word for the property owners and two for the building and architectural interests, but no matter who is or is not benefitted, the demands call for a general remodelling of our old buildings.

Where are our Future Builders to Come From?

How many active business men among our great army of builders have given this question even a passing thought? Those schooled under the old apprentice system, which meant thoroughness if nothing more, will soon be numbered with their fathers, and their places must be filled; and by whom?

The trades and labor unions have practically placed an embargo upon our American youth from learning to build as their fathers learnt it, and the old way—it is hardly likely—will never be revived.

That it is necessary for each generation to furnish its quantum of constructors no one can question, and the only feasible way which presents itself, in order that practical, honest, rugged men may creditably fill the places of those now in active life, is the establishing of schools of practical instruction where the art in its every detail can be learned.

It is high time State Legislatures took hold of this question. Schools should be organized, equipped and mastered by capable and efficient teachers. The American youth who desires to learn carpentering, bricklaying, plastering or any of the arts that enters into the work of building houses, or bridges, or anything else for that matter, must have a chance.

A Wise Move.

The Pennsylvania Railroad Company has done a very wise thing in establishing an insurance department for its employees similar to that of the Baltimore and Ohio Company, who have had one in operation for some ten or twelve years. The Membership will be divided into five classes. The classes will be determined by the earnings, and will be divided as follows:–$35, $60, $80, $100 and over $100.

In order that the cost of the proposed benefits may be as small as possible, and each member derive all possible benefits from his payments to the Relief Fund, the number participating must be large and regular. In view of this and of the responsibility assumed by the company, it will be a condition that each person entering the service or promoted in it, after the inauguration of the department, shall become a member of the Relief Fund and participate in its benefits. Persons in the service at that time will, for six months thereafter, be afforded the privilege of participating without regard to age or physical condition.

The operation of the Relief Department will commence February 1, 1886, from which date applications will be received. The payment of contributions and the title to benefits will not commence until February 15, 1886. Applications are to be made to those under whom the applicants are employed, who will afford employés an opportunity of examining the regulations of the Relief Department and will furnish blanks for applicants, and any required clerical assistance in filling them up, and will forward them as may be directed. As the privilege of participation will hereafter depend upon age and physical condition, those now in the service as may be debarred from participation, if they delay applying until after the period during which the privilege is open to them.

The company having established this method of relief for their employés, and undertaken the management and expense thereof, will discontinue the allowance of gratuities after the expiration of the period of six months before mentioned, and all fines paid by employés for dereliction of duty will therefore be added to the Relief Fund.

Our State's Finances.

The report of Jerome B. Niles, Auditor General of Pennsylvania, on the finances of the Commonwealth for the year ending Nov. 30, 1885, has just been received. It shows the receipts at the State Treasury to have been $8,179,714.28; balance in the Treasury November 28, 1884, $2,117,585.11. Total, $10,297,299.39.

Following are the amounts of taxes paid by steam and city passenger car companies:

STEAM CARS.

Steam railroads having termini in Philadelphia, paid taxes on stock as follows: Buffalo, New York and Philadelphia, $19,158.24; Baltimore and Philadelphia, $94.16; Chestnut Hill, $723.90; East Pennsylvania, $5,128-.65; Junction, $5,000; Little Schuylkill Navigation Company and Railroad, $8,707.47; Lehigh Valley, $40,007.10; Lehigh Navigation Company, $34,589.02; North Pennsylvania, $18,226.20; Philadelphia, Wilmington and Baltimore, $7,686.40; Philadelphia and Baltimore Central, $1,871.74; Philadelphia and Trenton, $14,296.50; Philadelphia, Newtown and New York, $360; Philadelphia, Germantown and Norristown, $13,481-.40; Philadelphia and Reading, $42,221.90; Connecting Railroad Company, $3,884.90; Frankford and Holmesburg, $3; Pennsylvania Railroad Company, $325,836.89; Philadelphia and Lehigh Valley, $12; Schuylkill River West Side Railroad Company, $4.50; Schuylkill River East Side Railroad Company, per Baltimore and Ohio Company, $6. On gross receipts—Pennsylvania, $281,979.63; Buffalo, New York and Philadelphia, $9,-227.32; Baltimore and Philadelphia, $72.50; Junction, $1,757.45; Lehigh Valley, $59,-722.14; Philadelphia, Wilmington and Baltimore, $5,194.41; Philadelphia and Reading, $158,909.73; Philadelphia and Baltimore Central, $5,429.21; Philadelphia, Newtown and New York, $574.85

CITY CARS.

City Passenger Railways.—On Stock—West Philadelphia, $7,125; Citizens', $6,500; Union, $12,000; Continental, $6,000; Empire, $1,260; Fifth and Sixth, $16,950; Germantown, $6,750; Hestonville, Mantua and Fairmount, $1,415.59; Gray's Ferry, $2,161.25; People's, $4.800; Philadelphia and Darby, $408; Chestnut and Walnut, $6,500; Ridge Avenue, $5,250, Second and Third, $8,481.60; Thirteenth and Fifteenth, $3,828.62; Lombard and South Streets, $2,148.83. On gross receipts—Citizens', $3,494.88; Fifth and Sixth, $4,366.64; Hestonville, Mantua and Fairmount, $7,019.16; Lombard and South Streets, $739.80; People's, $6,813.86; Gray's Ferry, $1,133.01; Philadelphia Traction Company, $9,901.70; Ridge Avenue, $2,598.57; Second and Third Streets, $4,118.76; Thirteenth and Fifteenth Streets, $2,482.15; Union, $4,956.03.

BANKS.

The payments by the city banks on their stock were as follows: Bank of North America, $6,000; Central National, $4,500; City National, $2,400; Consolidation National, $1,800; Corn Exchange National, $3,000; Columbian, $1,200; Centennial National, $1,680; Commonwealth National, $665.60; Commercial National, $3,888; Eighth National, $1,650; Farmers and Mechanics' National, $12,000; First National, $6,000; Girard National, $6,000; Independence National, $2,120; Kensington National, $1,500; Keystone National, $688; Merchants' Exchange, $340; Mechanics' National, $3,904; Manayunk, $280; Manufacturers' National, $4,114; Merchants' National, $3,312; National Bank of Northern Liberties, $3,000; National Bank of Germantown, $1,200; National Bank of Commerce, $1,060; National Bank of the Republic, $2,600; National Security Bank, $1,200; Penn National, $3,000; Philadelphia National, $9,000; Second National, $1,226.36; Shackamaxon Bank, $723.90; Southwark National, $1,500; Seventh National, $1,080; Spring Garden Bank, $1,112.40; Third National, $1,200; Tradesmen's National, $2,400; Union National $2,870; Western National, $2,400.

INSURANCE COMPANIES.

Insurance companies of the city paid taxes on their stock as follows: American Life, $1,250; Artisan, $300; American Fire, $2,000; Fire Association, $10,000; Franklin Fire, $4,000; German Fire, $369.36; Girard Fire and Marine, $3,600; Insurance Company of North America, $30,000; Insurance Company of the State of Pennsylvania, $1,000; Jefferson Fire, $625; Lumbermen's, $750; Mechanics', $1,250; New Era Life, $25; Pennsylvania Company for Insurance on Lives, &c., $77,000; Pennsylvania Fire, $2,000; Spring Garden, $3,200; Sun Fire, $360; Teutonia Fire, $600; Union Mutual, $2,550.

TRUST COMPANIES.

Trust Companies paid on their stock as follows: Guarantee, $450; Fidelity, $12,000; Girard, $2,250; Northern, $936.91; Philadelphia, $4,000; Provident, $4,343; Penn, $262.50; Real Estate Title, &c., $2,250; Union, $1,190.72.

MISCELLANEOUS.

There were also paid by the Bell Telephone Company, $2,520 on stock, and $2,696.70 on gross receipts; Continental Hotel Company, on stock, $1,764.35; Philadelphia and Reading Coal and Iron Company, on stock, $1,200; William Cramp & Sons' Dry Dock Company, on stock, $625; William Cramp & Sons' Ship and Engine Building Company, on stock, $1,500; Bergner & Engel Brewing Company, on stock, $3,840; William Massey Brewing Company, on stock, $2,280.

Pay your Water Tax.

Water rents for 1886 can now be paid at the Spring Garden street office. 5 per cent. will be added on the 1st day of May on all unpaid rents, and on 1st day of July 10 per cent. The water supply will be stopped from premises where the rent is unpaid on September 1st.

BUILDING prospects are good. Just now however there is but little movement in any direction. Builders are estimating on considerable work and expect to start in full as soon as the building season opens. The season will begin early and will give a chance to every one. Makers of material are full of preparation and talk encouragingly. No very large contracts have been placed as yet because of the feeling in building circles that there is something to be gained by waiting. Possibly there is, but there is about as much risk the other way. The future is full of uncertainties concerning prices and supplies. The supply men, of course, calculate that they have, or will have, an abundance of everything. At the same time they may be taken with surprise. There are causes operating to enlarge demand, which will be referred to elsewhere.

THE protection of property against fire should embrace a system entirely free from complications, and one in perfect harmony with every collateral element on which it depends for its efficiency.

A fire department in itself is of little importance, no matter how brave, or loyal, or well-trained it may be, without the necessary adjuncts of timely warning and a bountiful supply of water.

Unpleasant issues between departments of our City Government have of late been entirely too frequent not to make our fire insurance companies feel a trifle uncomfortable.

It is a mistaken economy for city governments, in order to lessen the burthens of taxation, to neglect needed water improvements, or to provide an alarm system that will meet the emergency if the one in use fails to fill the bill.

Fire insurance organizations are not maintained for fun; they must prove profitable investments or stockholders will become scarce. Heavy losses mean increased rates of insurance, and higher rentals for business property is a natural sequence; for it is needless to expect owners of property to bear increased burthens alone, for it never has been, and it never will be the fact.

The figures $1,325,000, representing the losses by fire in this city for the month of January, are perfectly astounding! This sum in itself, if properly expended, would have remedied many defective water mains, and so improved our system generally that our insurance companies would at least have the assurance that their future prosperity would not be impaired by incompetency on the part of our Municipal Government.

The Industries.

A correspondent in *The Industrial Review* writes from Wilmington, that the protracted period of industrial depression that has so long kept hundreds of workingmen idle and reduced many of them to absolute want, is evidently at an end in this city. A large number of contracts have already been placed, and the various industrial establishments are preparing for an active trade the present year. "The most gratifying piece of information that I have to communicate in regard to this revival," said a prominent ship-builder, "is that it is not one of those spasmodic efforts to simulate industrial activity, but it is a real, substantial revival—extending into many months." The rolling mills are the first to lead off, the Diamond State Rolling Mill, the Edgemoor Iron Works, and the Lobdell Car Wheel Company receiving orders that will require several months to complete them. The Harlan and Hollingsworth Company have contracts for several boats. Beside the construction of several small vessels a contract for building a side-wheel steamer for the Cape Cod Steamboat Company, has been placed with the Pusey & Jones Ship-building and Machine Company. The boat is to be 190 feet long, 32 feet beam, and 10 feet depth of hold. Remington & Co., steam pump manufacturers, have received a heavy contract for steam pumps from the Hall Steam Pump Company, of New York, which will last a long time, and necessitate the employment of many men. This firm is making an addition to its already extensive works. In the carriage business, the outlook for a brisk Spring trade is very promising. Many of these plants have not only put their old employés to work, but have taken on many new men. Taking it altogether, Wilmington begins the new year with exceedingly encouraging prospects in the matter of a general industrial revival, and her manufacturers and workingmen are rejoicing thereat.

Good Signs.

Not long ago a Western brewer having acquired great wealth, in having set to work and divided up his business between himself and his workmen, from superintendent to malt-shoveller. The other day James G. Batterson, President of the New England Granite Company gave orders "When the net profits are determined the entire amount is to be divided into three parts—one for labor, one for capital and one as a guarantee fund, to which fund shall be charged all losses by bad debts or credits given for materials and labor during the year. The dividend to labor shall be the first paid, and no officer, superintendent, overseer, clerk, agent or other employé drawing a salary, nor any contractor or sub-contractor, will participate in this labor dividend. Unless discharged for misconduct, the employé will receive his proportionate dividend, no matter in what part of the world he may be or in whose employ, when dividend time arrives."

Mr. Batterson further says: "My purpose is, if possible, to secure a community of interest which shall be recognized and admitted to be fair and equitable, claiming no more capital than is sufficient to hold it in such employment and giving the balance to labor."

House to House Inspection.

House to house inspection has been adopted in more cities than Philadelphia, where it is found to be an urgent requirement. No doubt municipal legislation will be invoked to more rigidly enforce rules and regulations for the carrying out of needed reforms for the public health in these municipalities.

During the year 1885, the tenement and factory inspectors of Chicago made a total of 77,103 examinations. Of these 54,642 were made in places of habitation, 19,693 in factories, stores and other places of employment. The following shows the character of the work performed:

Defective plumbing repaired	3,372
Traps applied to waste pipes	3,048
Ventilation applied to waste pipes	50
" " living rooms	197
" " work shops	125
" " water closet rooms	110
Defective sewers and drains repaired	2,010
New sewers constructed for houses	1,523
Catch-basins built	230
" cleansed	1,250
" repaired	90
Privy vaults cleaned	10,960
Water closets constructed	110
Rooms lime-washed	1,235
Leaky roofs repaired	335
Uninhabitable basements condemned	19
Filthy yards cleaned	3,630
Miscellaneous	2,384

Most large cities have now a regular inspection service. St. Louis admits she is behind in the matter, although it has a humane society to look after the health and welfare of the lower animals. The authorities, before whom the subject was brought by the Master Plumbers' Association of that city, have probably been waiting to gather facts and figures which would enable them to make an intelligent decision. Better figures than those above could not be given to prove why St. Louis should also have an inspection service.

New York Trade School.

The lecture season of the New York Trade Schools was opened by Mr. Edward Murphy, who accepted again the role of lecturer. The subject of the first lecture was "Soil Pipes." The young men forming the class are supplied with copies of a series of printed questions, the answers to which are written on a large black board and explained by the lecturer. These answers are taken down by the class on slips, and preserved for future reference. The plumbing class, this year, exceeds one hundred, and on the evening in question, was addressed in person by Col. Auchmuty, the enterprising founder. The entire number of pupils attending the various trade classes lacks but a few of 300.

Our own Plumbing School will compare favorably with it, though the class is not so large. The course of instruction is admirably adapted to the requirements of the art and to the capacity of the pupils.

REAL ESTATE.

Building Permits.

One alteration, 10 ft. by 50 ft., 431 East Girard Avenue, to D. Smith, 423 Keyser Street.

One two-story brick stable, Elber and Morris Streets, 18 ft. by 30 ft., to Mrs. George Wickner, 1923 North Twenty-eighth Street.

Front alteration, 111 South Eighth Street, to Carne & Spare, 914 Walnut Street.

One three-story brick house, 17 ft. by 48 ft., Northeast corner of Eighteenth and Montrose Streets, to George Lafferty, 1519 South Twentieth Street.

One-story brick shed, 32 ft. by 35 ft., Tasker and Somerset Streets, to H. Bloerhlinger, 2804 Jasper Street.

One-story brick kitchen, 12 ft. by 12 ft., 2004 North Twelfth Street, to Edwin H. Flood, 2005 North Twelfth Street.

One three-story brick house, 16 ft. by 30 ft., Southeast corner of Godfrey and Otto Streets, to Thomas Kennedy.

One three-story brick house, 18 ft. by 45 ft., South Whitall Street, to Martin Donahue.

New Enterprises.

Robert K. Clark, architect, 315 Arch street, is drawing plans for two new buildings, stores and dwellings, 422 and 429 N. Ninth street, four stories, French roof, pressed brick. Robert Hamilton, owner, Queen Lane, Germantown. Contract not awarded. Also, oil cloth factory, in Camden, Atlantic ave. and Ferns Road; two stories; 126x68; frame; P. J. Murphy, Esq., 261 S. Second street, Philadelphia, owner. Contract not awarded. Also, hotel, Atlantic City, Arkansas and Pacific avenues, five stories, mansard roof and tower; 36x120 ft.; 100 rooms; electric bells; frame; Mrs. J. Osborne, owner, Philadelphia; E. V. Carson, builder, Atlantic City.

Building Notes.

—Efforts are being made in Chicago to raise the balance for the erection of a Catholic University, at Washington, toward which Miss Mary G. Caldwell, of New York, donated $300,000.

—Edison going to build.—Thomas A. Edison will soon begin the erection of a mammoth laboratory at Llewellyn Park, which is intended to be the most complete building of the kind, costing close on half a million dollars.

—New York capitalists have purchased the pipe foundry of A. H. McNeal, Burlington, New Jersey. A stock company is contemplated, and it is proposed to erect a number of dwellings for the workmen.

—The *Philada. Real Estate Record and Builders' Guide*, which has now reached its third issue, is filling with credit a field which it is the first to enter in this city.—*Philadelphia Press*, Feb. 1st.

—A paint applicable to any sort of ironwork exposed to the weather consists of one-half gallon of good varnish, and one-half gallon of boiled linseed oil, with sufficient red lead to bring it to the consistency of common paint. Apply with a brush.

—A simple way to strike lancet Gothic arches is to join the apex and a point of springing; bisect this line and draw a line at right angles to it. The intersection of this line with the springing line is the radius point.

—To make cisterns and tanks water-tight, paint thickly on the inside with a mixture of eight parts of melted glue and four of linseed oil, boiled with litharge. In 48 hours it will be so hard that the tank can be filled with water.

—Before repainting a building apply a coat of crude petroleum with a fine white wash brush and let it dry for two or three weeks, then put on one coat of paint, a second coat is rendered unnecessary and thus much money is saved.

—To Soften Putty.—Take soda or potash—the latter is best—and dissolve it in water, mix the solution with fresh burnt, fresh slacked lime, after the mixture has stood for a few days pour off the clear fluid and bottle for use.

—The *English Mechanic* says that the V-shaped chain rope is likely to become the driving rope of the future. It can be made to fit any shape of groove and works well over pulleys, while it can be put on or shortened in a few minntes, and possesses four times the advantage of the round rope.

—In Kansas City, Mo., an electric street railway have organized and experimented, and promise soon to have an electric railway in operation, which can be constructed at a less expense than the cable and the running expense be greater. The street transportation of Kansas City promises soon to be unequalled by any city in the Union.

—It is said there is nothing like a friend at court. A certain Pittsburg firm had a friend on the board whose duty it was to award the contract for the construction of the new Allegheny Court House. When the bids were opened, this friend telephoned to one of the competitors to make his bid $800 less. Nothing was done until the bid came in revised according to instructions. The lowest legitimate bidder heard of the transaction and threatened injunction and secured the contract.

—Bids were opened in Washington by the supervising architect of the treasury, for furnishing and putting in place iron beams, etc., for the first story of the extension of the Court House and Post Office building at Pittsburg. The names of the bidders and the amount of each bid were as follows: Dearborn Foundry Company, of Chicogo, $3,495; Marshall Foundry and Construction Company, Pittsburg, $2,857.59; Clark, Rappin & Co., Pittsburg, $3,250; L. M. Morris, Pittsburg, $2,699; Keystone Bridge Company, Pittsburg, $2,360; Hough, Ketchom & Co., Louisville, $3,371.99; Phœnix Iron Works, Trenton, N. J., $3,250; Snead & Co., Louisville, $4,200; Pennsylvania Construction Company, Pittsburg, $4,617. The Keystone Bridge Company, of Pittsburg, are the lowest bidders. No award will be given for several days.

A New Map for Philade'phia.

Messrs. Burke and McFetridge are publishing an elaborate map of the city, illustrating forcibly the march of progress, both as far as the city is concerned and also the lithographic art, for the publication is on stone and is produced at a cost $5,000.

The bird's eye view show Philadelphia from Bridesburg on the North to League Island on the south, the Delaware river on the east and Bryn Mawr on the west, giving in detail the location of every street, square, railroad, public and private dwelling.

As a work of reference this map is a thing of great utility, as an ornament to the office of a business man it is a credit to the artist and a satisfaction to the owner. It is endorsed by Samuel L. Smedley, Wm. H. Brown, chief engineer P.R.R.; The Committee on Science and Arts of the Franklin Institute and other experts.

Plumbing and Sanitation.

To the list of mysteries which not even the wisdom of King Solomon could fathom, modern householders have tacitly added the way of the plumber with a leaden pipe. Although the number of workmen with a thorough technical training is daily increasing, there is still much room for improvement in the average intelligence of the men to whom is given practical control of the sanitary arrangements of dwellings and great factories in the large cities. In a paper devoted to the deficiencies of plumbers, Sanitary Engineer Charles F. Wingate, has pointed out many peculiarities of their vocation that distinguish it from other handicrafts, and lend additional weight to his plea for a more rigid standard of technical knowledge in measuring the qualifications of those who are licensed to adjust the relations of supply and waste through permanent ways in every building.

The rapid advance of machinery to a position of control in nearly all trades and departments of handicraft has not affected the plumber. He is beyond the influence of mechanical routine, nor can his work be made a matter of forms and sizes. His work must continue to be done with hands and brain, as in the earlier days of the craft. It thus becomes of importance that he should be a first-class workman. For while slovenly workmanship and inattention to details may mar the handiwork of another tradesman, and injure it in open market, the plumber is safe from any such contingency. If a hat or table, or machine is of inferior quality, the fact cannot be concealed from a careful buyer. But the best of builders and and the most accomplished of architects are at the mercy of the plumber in regard to the quality of his work. This assured immunity from salutary criticism has developed and fostered, as an inevitable consequence, a recklessness in the management and adjustment of details of plumbing that puzzles not only the public, but even the workmen themselves. Mr. Wingate declares that even the best plumbers will forget to complete their work, and by neglecting some minor detail jeopardize the safety of the whole. One constantly finds houses in which the plumbing in general is of the very best character—the material good, the workmanship excellent, and all devices for trapping and ventilating supplied in profusion—yet some one fixture will be left with a trap that siphons, or with an improperly arranged safewaste, or a tank-overflow badly connected. In two houses wash-basins were left next to a bed-room without ventilation, and in an other the tank-overflow connected directly with the sewer, with no trap to prevent the entrance of noxious gases except one that depended upon a broken pump, and, of course, was useless. In another case an old lead soil pipe was replaced by a new and large cast-iron one, except about four feet at the lower end, thus entirely neutralizing the benefits of the new pipe. All these defects and errors were brought about under workmanship that was presumed to be of the highest character. What might be accomplished in the way of bad plumbing by really incompetent men can only be conjectured. In the course of the recent house to-house inspections of the Board of Health thousands of instances of defective plumbing, connived at by builders to whom cheapness was the supreme object, were disclosed.

A more extensive acquaintance of the plumber with the scientific principles and natural laws of hydraulics and hydrostatics, and a closer application of these principles to his daily experiences, would result in a great improvement of the sanitary conditions in large cities. Yet practical workmen often scorn theory, forgetting that for them this theory is only experience formulated into those laws which apply most closely to the problems of sanitation.—*Phila. Record.*

INSURANCE NOTES.

The Arch Street Fire.

The Arch Street fire furnishes a lesson to manufacturers, jobbers, hotel keepers, insurance men and the public generally, not overlooking the municipal authorities. The facts concerning the origin and extent of the fire are familiar to every one. The interest the *Real Estate Record* has in the whole matter is, how can fires like this be reduced in frequency, and the possibilities of such disastrous results checked. The one serious fault demonstrated at that fire is deficient water facilities and supplies. This, in the minds of many, may be putting the case too strong. It is evident that plenty of water and abundant service would have prevented such a great loss. There are many of such buildings as the Morris' building, and there are possibilities and probabilities of hundreds of fires. What, then, ought to be done? The fire authorities and insurance interests are discussing the occurrence with professional interest, but we do not know that anything more than a little discussion will grow out of it. Our excellent fire extinguishing facilities are not fully appreciated, simply because they perform their functions so thoroughly and prevent almost the possibility of the recurrence of disastrous conflagrations. But still fires do occur and will occur, despite the most watchfulness and in defiance of the most efficient system of fire service that can be devised.

This fire only shows that there is room for improvement. The cause of the fire will afford employment for the investigating authorities. A daily paper gives this account:

"Edward Matthews, the janitor of that firm, a young colored man, states that he swept the floor at 8 o'clock in the evening, and that he then saw nothing combustible lying about. Edward Simpson, the watchman for George S. Harris & Sons, across the street, who first gave the alarm, says that he saw the blaze on the third floor, and his story is corroborated by James Welsh, the engineer of the St. Cloud Hotel, who, from one of the windows of that building, saw the flames on the third floor, occupied by Lehman & Bolton. One of the theories advanced for the cause of the fire is that it was spontaneous combustion among the waste rags, such as are used in lithographic establishments, and which are thrown into large iron boxes. Whatever the cause, the flames spread with the most startling rapidity, and the building was doomed before the firemen arrived on the scene. The heat was so intense that a big blaze on the south side of the street was only prevented by the fact that the Harris' building, which stands directly opposite, had an iron front. Its heavy plate-glass windows were cracked and the window-frames were frequently on fire."

It is about time the theoretical and practical sides of this much talked of and but little understood stereotyped excuse for fires caused by negligence, viz., "spontaneous combustion," were understood. That poor devil, "Spontaneous Combustion, Esq.," has stood enough abuse and misrepresentation. If he has caused one-hundredth of the fires and losses that have been charged to him in this city within five years or less, he could be sent to Cherry Hill for a thousand years and a day. But in defense of this much-abused gentleman, we say let the real criminal be discovered. There is, it is true, a great deal of material in lithographic establishments that would encourage combustion with very slight assistance. But this theory is too easily adopted—it does entirely too much service. If it is spontaneous combustion, then let the conditions, and facts, and materials and all the surroundings which result in fires from that prolific cause, be gone into and steps taken to prevent the combination of these ever ready fire factors. There may be a necessary risk to be constantly run from fire from this cause, but it can be greatly reduced by proper effort and a more thorough understanding. There is carelessness somewhere. That carelessness, in behalf of property and manufacturing interests, ought to be exposed; and even more, those guilty of permitting such dangerous conditions for fire creation to exist should be punished or put under bonds, even if it were necessary to make legislation to that end, to keep these establishments free from danger of fire. We put the wife-beater or the bar-room loafer under bonds for much less reprehensible conduct than permitting a half million dollars worth of property to burn down. The adjoining property-owners have some interest in the enforcement of fire-preventing arrangements.

This is a broader and deeper question than it appears to be on the surface. It is all very well to collect the losses through insurance, but it is better to take steps and keep taking them, which will bring about a reduction in insurance rates. There is room for such reductions. Manufacturers elsewhere, especially in the New England states, are taking hold of this matter in dead earnest. There, insurance in numerous cases reaches 2½ per cent. Reputable insurance authorities assert it could and eventually will be reduced to one-half of 1 per cent. Be this as it may, this Arch Street fire emphasises two or three necessities which have been faintly hinted at above.

Above all things, the city needs more water. There have been enough of old-women's-tea-party talks on the subject. We are now at the door which must be opened onto practical results. Whether these results will cost one or many millions in their attainment, a few such fires will pay the cost of a proper water-supply system. Let us have a little business done. We have been whipping ourselves with the whip of provincialism. We think there has been much uncalled-for talk in this direction, too many journalistic sack-cloths donned, but if there is any occasion for these inky castigations, so wildly and repeatedly laid on, let the remedial measure that ought to grow out of them begin at our water-supply system—for Philadelphia's sake.

Fire Records.

COLUMBUS, GA., January 26.—Information has just reached here of a disastrous fire at Opelika, Ala. It broke out about 2 o'clock this morning, and five or six stores were burned. The loss is thought to be about $50,000.

COUNCIL BLUFFS, Iowa, January 26.—W. T. Cole's livery stable was burned this morning. Four firemen were seriously injured. One of them will die. Loss $5,000: insured for $2,500 in the German-American.

COLUMBUS, GA., January 26.—A special to the *Enquirer Sun*, from Opelika, Ala., states that the fire there this morning destroyed the stores and stocks of Smith & Smith, B. Y. Cooper & Sons, R. M. Greene & Sons and C. W. Dick. The total loss is $50,000 and the insurance $30,000. The chief losses are as follows: B. Y. Cooper & Sons, $8,000; insurance $5,000. R. M. Greene & Sons, $10,000; insurance $7,500. Smith & Smith, $12,000; insurance $7,000. Loss on building $10,000; insurance $8,000.

WICHITA, KAN., January 26.—At 2 o'clock this morning a fire occurred in Robinson Bro's dry goods house, one of the largest establishments in the city. The stock, which was valued at $47,000 was completely ruined. The insurance is about $35,000.

At 8 o'clock another fire occured on the opposite side of the same street, destroying three frame buildings, a large portion of the stocks in which was saved.

BORDENTOWN, N. J., January 26.—Charles Browning's pork packing house was burned last night. The loss is $2,000; fully insured in the German-American Company of New York.

EAST ST. LOUIS, Ill., January 26.—The new warehouse of the Louisville and Nashville Railroad, 100 feet south of the bridge approach, was destroyed by fire last night. The building was of corrugated iron, 140 feet long by 80 feet wide. The loss of the building is placed at $8,000, and on the goods at $4,000. The insurance is about $6,000.

BURLINGTON, Vt., January 26.—A fire in Wheeler's Block, one of the largest business structures in this city, this morning, completely gutted the building. The following are the occupants of the block, with the estimated losses and insurance: Safford, Wetherby & Co., dry goods, loss, $20,000; insurance, $25,500. George A. Hall, furniture, loss, $8,000; insurance, $4,000. H. N. Coon, restaurant, loss, $1,500; insured. C. F. Brown, undertaker, loss, $2,000; insurance, $1,000. E. H. Shattuck, restaurant, loss, $2,000; no insurance. The loss on the building is $18,000; insurance, $12,000. Five thousand dollars will cover the other losses.

ALLENTOWN, Pa.., January 25.—The school-slate factory of Henry Fulmer, at Slatington was destroyed by fire yesterday. Loss, $45,000; insurance, $25,000.

CHICAGO, January 25.—The sewing machine factory of F. Patzach & Co., at Grand Crossing, was damaged by fire yesterday to the extent of $25,000; fully insured.

CHESTER, Pa., January 25.—A large public school building and contents in the Middle ward was totally destroyed by fire at an early hour this morning. Loss $10,000; insurance, $5,000.

GALESBURG, Ill., January 25.—A store occupied by Peter Nelson, grocer, and Bruington & Anderson, butchers, was burned yesterday. Nelson's loss is $11,000; insurance, $5,000. Bruington & Anderson's loss is $4,000; insurance, $650.

MARSHFIELD, Wis., January 25.—The Presbyterian Church in this city was destroyed by fire yesterday with nearly all its contents. The loss is $4,000; insurance, $2,600 in the Underwriters', Continental, and Liverpool and London and Globe.

LOCK HAVEN, Pa., January 25.—Fire in dry goods store of A. Sodenheimer to-night damaged the stock extensively. The alarm created a panic in the Opera House, where a travelling troupe was playing, but it was quickly emptied without accident.

ELMIRA, N. Y., January 25.—At 2:45 P. M. flames were discovered in the roof of school building, No. 5 in the sixth ward The fire burned fiercely and a panic ensued among the children, but the teachers got them out safely. The loss is probably between $2,00 and $3,000.

HAZELTON, Pa., January 25.—Another disastrous collapse of the surface occured over the mouth of No. 2 slope of G. H. Meyers & Co., at Treasckow, last night. To-day fire was discovered in the mine, and the workings will probally have to be flooded before the fire can be extinguished. It is feared that a heavy pecuniary loss will result.

FORT DODGE, Ia., January 28.—The dwelling of D. M. Crosby, near this city, was burned yesterday. The loss is $4,000; insured in the Continental of New York for $3,000.

POTSDAM, N. Y., January 28.—Sherman & Johnson's sawmill, plaining mill, box factory and other small buildings, together with the machinery, were burned at an early hour this morning. The origin of the fire is unknown. The loss is $30,000; insurance, $12,000.

MERRILLAN, Wis., January 28.—The Hotel Blair, including the railroad, telegraph and Express offices, was destroyed by fire last evening. The loss is about $10,000; insurance, $1,500.

CLEVELAND, O., January 28.—The schedule in the assignment of J. C. Taylor & Bro., boots and shoes, of this city and Cincinnati, filed here to-day, shows the liabilities to be $33,476; assets, $18,107.

PALESTINE, Tex., January 25.—Last night fire broke out in the two-story residence owned by M. E. Delphine and occupied by Mrs. Ware as a boarding house, and the flames spread rapidly to the adjoining residence of J. G. Potts. The first building is a total loss and the latter is badly damaged. The loss amounts to about $5,000, partly covered by insurance.

ALBANY, January 28.—A special to the *Journal* from Oneonta, says: Six blocks of buildings were burned here this morning. The following are the losses: Conrad Yagel, clothing, $13,000; Ella Ray building, $3,000; First National Bank, $5,000; Patrick McGuire, billiards and saloon, $10,000; Peck & Whitcomb, stationers, $3,500; J. Baker, ales, $1,500; C. A. Smith, segars, $6,000; Mrs. H. E. Farmer, millinery, $100; Mrs. M. E. Cornell, millinery, $2,800; A. R. Allen, shirt manufacturer, $300; C. E. Bunn, market, $500

ALBANY, January 28.—A fire broke out at 6.30 o'clock this evening in the fifth story of the malt house of the Albany Brewing Company. The building is a seven-story brick structure, situated on lower Broadway. The fire had gained considerable headway before effective streams could be brought to bear on the flames, which were principally in the fifth and sixth stories. By hard work the fire was confined to the south side and middle section of the building.

The building contained about 100,000 bushels of barley and considerable valuable machinery, which is a total loss. The building was valued at $65,000 and the grain was worth 90 cents per bushel. The stock is insured for $40,000 and the building for a like amount. The fire is supposed to have been caused by an overheated journal in an elevator. The fire at this hour (midnight) is still burning, although under control. The loss is estimated at $125,000.

NEW ORLEANS, January 22.—The Carrollton cottonseed oil mill burned to-day, was of brick and corrugated iron, but melted away like wax. The loss on it was $55,000, and on the cottonseed oil and other material it contained $35,000, making a total of $90,000, on which there was an insurance of $45,000 in the Queen, of London; British America, of Montreal; St Paul Fire and Marine, of St. Paul, Minn.; Washington, of Boston; Springfield, of Springfield, Mass.; East Tennessee, of Knoxville; Alabama, of Mobile, and local companies. The mill was the property of the heirs of the late Edmund Richardson, the cotton millionaire, who died some days ago.

PITTSBURG, January 28.—A special from Franklin, Pa., says: At about 2 o'clock fire was discovered in what is known as the Opera House block, owned by Hanna & Duffield. It is believed that the fire originated about the stage of the Opera House, which consisted of very inflammable material. Before the fire department could reach the scene, the Opera House building was a mass of flames. The block was erected twenty years ago and was one of the most substantial structures in the city. Its original cost was about $135,000, and was insured for $38,000. The building was occupied as follows: On the first floor were Henry Cohen, clothing; Karns, Mifflin & Co., wholesale notions; Reamer & Co., drugs; a reading room and library; Miss Riley, milliner; the Franklin Oil Exchange, and J. B. & W. S. De Woodey, 10 cent notion stores. On the second floor were the Opera House, the *Spectator* printing office, the rooms of the Franklin Silver Cornet Band, Lawyer Breen's office and Baker's office, containing samples. A number of families also occupied this floor. On the third floor were the apartments of two or three families and a lodge room, elegantly fitted up. The total loss is about $95,000; insurance, about $55,000

At Grand Haven, Michigan, the Detroit, Grand Haven and Milwaukee freight house. Loss, $250,000.

At Trenton, N. J., William Bakes & Sons, dry goods establishment. Loss, $30,000.

At Lebanon, Pa., explosion of gas at Sheridan Furnaces. Loss, $20,000.

At Columbus, O., the West Avenue Rink. Loss, Painting of Battle of Gettysburg, $8,000; building, $1,500.

At Mandan, Dakota, several business houses and M. P. Railroad building. Loss, $16,000; insurance, $9,000.

At Chariton, Iowa, the White Breat Coal and Mining Company. Loss, $50,000; insurance, $30,000.

At New York City, building occupied by L. Loewas & Co., manufacturers of furs. Loss on stock, $15,000; insurance, $18,000; loss on building, $5,000.

At Baltimore, Md., Henry Wittmer's shoe factory. Loss, $3,000.

At Elmira, N. Y., E. H. Doemaul's dry goods and carpet store. Loss on stock, $40,000; building, $8,000.

At Lancaster, Pa., Slaugh & Kaufman's shoe store. Loss, $5,000; fully insured.

At Enu Claire, W. S., post-office and store. No loss stated.

At Chicago, Gauss & Philips, lumber dealers. Loss, $5,000; fully insured.

Montreal, the Canadian Pacific Railway depot. Loss, $10,000; fully insured O. L. Clarke & Co.'s bell factory. Loss, $8,000; insured for $5,000.

At Fitzburg, Mass., the Buckeye Works for manufacturing agricultural tools. Loss, in stock, $12,000; loss on buildings the same.

At Elizabeth, N. J., Elizabethport Savings Institution was burned; also P. Lindenburg & Co.'s box manufactory. Loss, $6,000 on machinery and stock; insurance, $4,000. Loss on building, $5,000; insurance, $3,000.

At Albany, N. Y., H. Simmons' auctioneer house; owned by J. B. Groat. Loss, $25,000; mostly covered by insurance.

At Shenandoah, Pa., engine house, engines and machinery. Loss to Philadelphia and Reading Railroad Company, $50,000.

At St. Paul, Minn., an extensive conflagration swept away several business buildings. Loss, $255,000, divided as follows: Milwaukee Mechanics' $12,500; Fire Association, Philadelphia, $15,000; Washington Fire, $25,000; Masonic and Marine, $25,000; St. Paul Fire and Marine, $25,000; Mechanics', New Jersey, $25,000; Amazon, Cincinnati, $25,000; Hamburg-Bremen, $25,000; North British and Mercantile, $25,000; Franklin, Philadelphia, $25,000; People's, New York, $25,000; Rhode Island Underwriters' Association, $25,000; Mercantile, Boston, $25,000; American, $12,500; Germania, New York, $25,000.

At Petersburg, Va., Casper Wright & Sons, shoe store. Loss on stock, $12,000; insurance to cover. T. F. Kid, lumber. Loss on stock, $8,500.

At Oshkosh, Wis., Buckstaff, Edwards & Co. Loss, $35,000; insured.

At Hagerstown, Md., Christian Lahman, flour mill. Loss, $12,000; no insurance.

At Albia, Iowa, several business houses. Loss, 56,000; insurance, $3,000.

At Northfield, Minn., Trussel's Block. Loss, $8,000; partially insured.

At Hastings, Nebraska, row of frame buildings. Loss, $10,000; insurance, $3,500.

At Bronson, Michigan, railroad depot and quantity of grain and freight. Loss, $10,000.

January fires have been unusually numerous in nearly all sections of the country. In Philadelphia the total losses for the past year foot up $1,775,000. The insurance on all the properties destroyed was $10,125,000. Already, this year the loss has reached $1,325,000. At this rate, the losses for this year will reach $16,000,000. An insurance man, in talking about fire losses, says:

"For the $1,325,000 that has already gone up in smoke, the big Kensington Mill fire on January 10th and the Arch street fire are mainly responsible, as the loss at the former was $650,000 and at the latter a trifle over $600,000, besides which there have been one $50,000 fire, one $10,000, three at $5,000 each, one at $2,000, two at $1,000 each and three where the loss was given at $500. The rest all were below that sum, ranging from $25 up. What sort of business is the heaviest loser by fire year in and year out in Philadelphia? Why the textile mills, and in most years they will represent a fourth of the total loss. In comparison with New York our loss over here was small last year, as that city had to pay the fire fiend no less than $3,800,000, the result of 2,560 fires, while here there were 1,163 fires, so that the average price of each blaze in New York was $1,484, against $1,526 in Philadelphia. However, taking the whole country, the insurance people had a good year in 1885, for the total loss was $95,000,000, against $115,000,000 in 1884, and $106,415,000 in 1883, which was a big jump from the three previous years, 1880 showing only $80,000,000; 1881, $89,500,000, and 1832, $90,000,000."

Real Estate at Auction.

Messrs. J. A. Freeman & Co. will sell at the Exchange, on Wednesday, the following Real Estate:

Ground Rent, $22.50—On 3-story brick Dwelling, 2102 Otis st., and 2-story brick House, 2103 Abigail st.; lot 18x100. Estate of Chas. L. Orum.

4 Ground Rents, $62, $30, $30, $30—On Dwelling, 1723 Burton st.; Cottage and Store, 1538-40 Thompson st., and frame Store and brick Houses, Salmon and Fremont streets. Estate Elizabeth Dyson.

6 Irredeemable Ground Rents, $48, $20, $18, $18, $15 and $9, on House, 1215 Heath street; Store, 820 Carpenter st.; Dwellings, 1245 Otis and 1238 Griffith streets.; House, 1223 Ash street; Buildings, Portland street. Same estate.

Fifth and Buttonwood sts. and York ave.—Valuable Factory and Warerooms; fronts 118·10, 46·6, 115·4. Estate John Allgaier, dec'd.

Mercy st., No. 504—2-story brick House, conveniences; lot, 14x44·6. Estate Mary A. Myers.

Eleventh and Diamond sts., S. E. cor.—3-story brick Saloon and Dwelling; lot, 17x65.

Locust st., No. 3936—Business Stand, Bakery and Dwelling, 15 rooms, lot 20x115.

Mt. Vernon street, No. 1930—4-story brick Dwelling, 12 rooms, conveniences, lot 19·9x93·11.

Old Lancaster and Gulf rd., Haverford Sta., P. R. R.—Valuable Country Site, 31·5 acres, dwelling, barn, etc. Estate John Neeson.

King st., S. Ridgway, Gloucester, N. J.—3-story House; lot 15x100. Estate M. D. Burbage.

Catharine st., No. 406—3-story brick Dwelling; lot 16·10½x69·9, being 21·1 on rear. Estate Jas. L. Burbage.

Friedlander st., No. 115—3-story brick Dwelling, 10 rooms, conveniences; lot 18x 68.

Fairmount ave., No. 1510—3-story brick Store and Dwelling, 9 rooms, conveniences; 16x73.

South st., No. 1922—3 story brick Store and Dwelling, 10 rooms; lot 16x72.

Jefferson st., No. 1936—3-story brick Dwelling, 9 rooms, conveniences; 15x70. Peremptory Sale.

Brandywine st., No. 1911—3-story brick Dwelling; lot 16x70. Peremptory Sale.

MARKET QUOTATIONS.

The builders throughout the city have not as yet begun to place contracts for maternal. The manufacturers of material are prepared to furnish, if necessary, 25 per cent. greater production over last year. The trade conditions are of a favorable character, although the weather precludes any outside operations. A large amount of work is projected. All of our architects are looking forward with the greatest confidence to the busy year. Quite a number are busily engaged on estimating for work and expect to be engaged on drawings by March 1, and many of them sooner. It is therefore too soon to go into details of projected enterprises. Our list of new enterprises this week is sadly deficient, but we have the assurance from the architectural fraternity that our columns shall contain much of interest at an early day. The work will cover house building, shop and mill and factory erection, the erection of fine residences in the suburbs, besides a greater than ordinary amount of repairing and alteration. Several architects have instructions to estimate on important alterations of old residences to be transformed into business houses. Much of this year's work will be of that character. Rents are advancing. Business necessities are making it unprofitable to maintain dwellings so near the business centre. Besides the radical alterations that may be expected, a great many new residences will be erected on north and south Broad, in the 29th Ward and throughout the northwestern section of the city. The supply of brick will be very large and prices will not likely be much different from last summer. Some statisticians estimate that the total production this year throughout the country will be $300,000,000, an increase of some 30 per cent. over the estimate of last year. Our local supply will be ample for every probable requirement.

In reference to nails there is some uncertainty. If the western strike continues as it is announced, high prices may be expected, because of the enforced idleness of some 3,000 machines west of the Allegheny mountains. The nail association meet in the city on Wednesday to consider this very problem, and to take steps to profit by the probable continued suspension of production in the west. Quotations to-day are $2.40 to $2.50, and in view of the great building activity that may be counted on, a further advance in prices is probable, should the western strike continue.

The receipts of lumber during the past six days have been moderate. This is really because of the unfavorable weather. Prices remain steady. So far as lumber buying authorities can form any opinion as to the future, they are of the opinion that lumber will not advance, neither will it decline materially. Any attempt to advance prices, they say would stimulate shipments from various points. There are large stocks of white pine at lake ports, which are being drawn upon as the market calls for. Southern yellow pine dealers are waiting for favorable weather to ship several million feet. In lath, shingles, plaster and cement, no change in prices is to be noted and none probable for the present.

The plate manufacturers have uncovered a good deal of stone and have purchased quarrying appliances in expectation of a heavier demand. No modification in prices need be looked for until about March 1. In builders hardware some sharp competiton may be expected, because of the slight increase in stocks during the past two or three months. Manufacturers everywhere have taken advantage of the little encouragement afforded to increase production.

In wholesale circles there has been but little movement in tin or tin plate. Copper is selling at 11⅛ for lake and 10¾ for Baltimore. Spot lead is worth 4.85 and spelter 4⅛.

ABBREVIATIONS.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B B—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E.J.—Ejectment Suit.
E.S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M L D.—Mechanics' Lien Docket.
Nat. Bk.—National Bank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S.F.—Scire Facias to revive Judgment.

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

CONVEYANCES.

Have Prices Fallen?

STATISTICS SHOWING THE FLUCTUATIONS OF SILVER AND THE STABILITY OF GOLD.

The Director of the Mint has furnished, in advance sheets from his report upon the production of precious metals in the United States for 1885, some statistical tables of very great importance at the present time. The first of these, compiled from the very best authorities, shows the ratio of silver to gold for each year since 1687. In that year the ratio was 14.94; in 1787 it was 14.92, and the greatest fluctuation during the intervening century was between 15.52 in 1702 and 14.14 in 1760. In 1793, the year of the establishment of the United States Mint, the ratio of silver to gold was exactly 15 to 1, and from that time on to 1870 it fluctuated between that extreme figure and 15.93, which was reached in 1843, with the exception of one year, 1808, when the ratio ran to 16.08.

Thus it will be seen that while the fluctuation in the relative value of the two metals was at several times sufficient to prevent their circulation together, it was comparatively slight—the range being practically between 15 and 16 to 1—up to the time of the resumption of silver coinage in 1873. In that year the ratio of silver and gold was 15.92. The next year it was 16.17; the next, 16.59, and so on by gradual and uninterrupted course, through sixteen, seventeen and eighteen, until in the year of 1885 it reached 19.41. That is, one ounce of gold, that would formerly buy about fifteen ounces of silver, will now buy nearly nineteen and a half.

But, it may be said, this depression of silver is but a part of the general fall of prices, brought about by the scarcity of gold and the consequent advance of the standard of value. This point is answered completely by another of the tables before us, which presents the rise and fall of the prices of the principal commodities in the New York market since 1880 compared with the average prices of 1845-50. Of course a computation like this affords more room for error or fallacy than the other, but there is no reason to question the accuracy of the figures and the commodities selected—including, among others, flour and grain, coal, copper, cotton, fish, iron, lead, leather, molassas, pork, salt, sugar, tobacco and wool—are fairly representative. Some of these commodities have fallen in prices and some have risen, in very few of them has there been any such fluctuation in prices as is shown in the case of silver, and the average of the thirty-eight commodities—excluding copper, which has recently undergone a rapid fall on account of increased production—is 1027, reckoning the average prices of the same commodities from 1845 to 1850 as 1000.

This shows that while some commodities have fallen in prices in thirty-five years, the fall has not been general. Thus while wheat, for example, is but 831 against 1000 in 1845 and coal but 700, copper is 1506, mackerel 1950 and wool 1252, and cotton remains at 976, or nearly the same. Special causes, affecting supply and demand, will account for a rise in one case and a fall in another. The average remaining about the same, shows that the standard has not altered. The same comparison applied to silver shows that its value in 1885, as against 1000 in 1845-50, to be but 815. In other words, silver is a commodity whose price has fallen more than the average articles entering into the world's daily consumption. A bale of cotton, which was worth within two and a-half per cent. as much in 1885 as it was in 1850, would be a more stable standard of value than a given weight of silver, which has lost nearly twenty per cent. of its market value in fifteen years. These are facts which the advocates of the silver standard cannot meet.—*The Times.*

Legal Decision.

AN AGREEMENT WITH AN OUTSIDE PARTY IMPOSES NO LIABILITY TO CREDITORS.

Judge Willson recently delivered an opinion deciding an interesting question of partnership law which arose in the suit of the Keystone National Bank, of Reading, against Henry Morris, as a partner of the firm of Joseph A. Randall & Co. J. Barclay Hacker owned a one-half interest in that firm, and in March, 1881, made an agreement with Morris in these words: "The said Hacker hereby sells and transfers to said Morris one-third of said interest, and further agrees that Morris is not to be known as being interested in said firm, but that his interest is to be carried on in the name of Hacker, who hereby agrees and binds himself to collect and hand over to Morris one-third of all profits of the said business carried on as above named, and Morris agrees and binds himself to reimburse Hacker one-third of all losses that may result from said business carried on as above named." Upon the trial the Judge held that this agreement made Morris a partner so far as the creditors of the firm were concerned. In the opinion delivered he reversed this ruling and granted a new trial, holding that a single partner cannot by his own act alone bring another into the firm and endow him with the rights of membership. He quoted a New York decision, holding that "an agreement whereby one acquires the right to a share of what two others shall receive out of the profits of the firm of which they are members, and undertakes to pay to them a like share of the losses of the firm which shall fall upon them, does not impose upon him any liabilities as to the creditors of the firm."

Journalistic.

Under the new management, *The Railway News* displays an energy and ability which is highly commendable and characteristic of such experienced newspaper men as Alex. C. Kenealy and Richard M. Elliott.

The previous experiences of these gentlemen on the principal duties of the city, is apparent in the work and management of *The Railway News*, and with a continuance of its present merit the journal will shortly stand as the paper of the railway world.

At the public sale of stocks last week, by M. Thomas & Sons, the Title Companies Stocks sold as follows:

28 shs Real Est. Title Ins. and Trust Co.	250
53 shs Land Title and Trust Co	67@70¼
67 shs Land Title and Trust Co.....	65¼
25 shs Land Title and Trust Co.....	66¼
35 shs Land Title and Trust Co...	60
30 shs Ger. Amer. Title Ins. and Trust Co.	21½
35 shs Ger. Amer. Title Ins. and Trust Co.	20
10 shs Ger. Amer. Title Ins. and Trust Co.	20¼

This would seem to indicate a healthy condition of affairs in the Title Insurance, and in the case of the Land Title and German-American Companies, the prices realized must be gratifying to the management of these fledgling corporations.

Items of Interest.

—It is rumored that the Baltimore and Ohio Railroad Company has leased the plant of the Baltimore and Ohio Telegraph Company for 50 years.

—Among civilized nations the English language is most widely spread of all. 90,000,000 speak it. 60,000,000 speak German. 50,000,000 talk French, 40,000,000 the Spanish, 28,000,000 the Italian, and about 55,000,000 the Russian.

—The microscopic determination of the different qualities of iron and steel is now regarded as one of the most valuable aids in metallurgical industries. Thus the crystals of iron are double pyramids, in which the proportion of the axes to the bases varies with the quality of the iron; the smallness of the crystals and the height of the pyramids composing each element are in proportion to the quality and density of the metal, which are seen, also, in the fineness of the surface; and as the proportion of the carbon diminishes in the steel, the pyramids have so much the less height. In pig iron and the lower qualities of hard steel, the crystals approach more closely the cubic form. Forged iron has its pyramids flattened and reduced to superposed parallel leaves, whose structure constitutes what is called the nerve of the steel; and the best quality of steel has all its crystals disposed in parallel lines, each crystal filling in the interstices between the angles of those adjoining, these crystals having their axis in the direction of the percussion they undergo during the working. Practically, good steel has the appearance, microscopically, of large groups of beautiful crystals.

GUARANTEED ROOFING PLATES.

From the "Ironmonger" of December 5th.

MESSRS MERCHANT & CO., of Philadelphia, may justly claim to have revolutionized the roofing-plate trade in this country. When, a year ago, they became the representatives for the United States of Gilbertson's Old Method and Camaret plates, they were enabled, with the aid of the manufacturers, to give a positive and definite guarantee of the quality of goods bearing their brand. This could only be done by taking the entire product of the works, the proprietors being under contract to maintain the standard of the production. This, they have not only done, but the quality has been improved.

The guarantee thus given by Merchant & Co., was the first of the kind ever issued, as to quality of material, coating and assorting. In fact, the understanding between them and the makers, placed the Philadelphia house in a position to do what had heretofore been impossible with most importers, who buy of London or Liverpool agents, and who are, therefore, not in direct communication with the manufacturers. Messrs. Merchant & Co., therefore, claim to stand alone among importers as the only direct representatives of works in Wales, whose owners are under contract to keep up the standard of a guarantee and to sell their brand to no other parties, either in England or the United States. Of course this policy of guaranteeing goods has been followed by others, but as they purchase of commission agents in London, the consumer naturally feels a doubt, as to whether the guarantees of such dealers can always be relied on as effective.

The course adopted by Merchant & Co., has resultd in largely increased sales, and many architects and builders have found it to their advantage to use the guaranteed plates. In some cases, however, contractors have, to enhance their profits, substituted inferior brands for those specified. Finally, at the request of numerous architects and rillable roofers, who have suffered through competition with these unreliable parties, Merchant & Co. have succeeded in making arrangements with the manufacturers to stamp each sheet, not only with the name of the braid, but with its thickness or guage. The effect of this, the firm feel satisfied will bring about a better class of roofing work than has heretofore been attainable, and result in great benefit to all owners of property as we llas to responsible roofers, architects, and others engaged in the building trade.

Shall We Have Apartment Houses?

A valued correspondent writes us to ask our opinion as to the wisdom of building apartment houses in Philadelphia. From the tenor of his letter we infer he was entirely opposed to such kind of dwelling houses. Perhaps this is because he is a Philadelphian born and bred. Our opinion may be given in a nut shell. There is no reason under the sun why apartment houses, would not, if built in this city, be a paying investment. Why should they not be built? Let us look at the question. Tens of thousands of our people occupy little dwellings comfortable enough in themselves, fairly well built, supplied, as the advertisement puns, with all modern conveniences. What else, it may be asked, do we want? Heretofore Philadelphia has wanted nothing else. She is proud of her hundred and sixty odd thousand homes and does not propose to go back or forward to the apartment house system imported from Paris, lacking as our people believe all the essentials, or many of the essentials of home comfort. People say apartment houses are too much like hotels, that they afford too little privacy. Very true, the back yard and front yard is wanting, and there is the ever present elevator and the sombre surroundings, suggested by high walls and closed apartments and strange faces. But after all this is only sentiment. The question our correspondent proposed to ask, no doubt is, would apartment houses, if built, yield good returns? It is susceptible of demonstration that they would. The system was introduced into New York because land was scarce and dear and the necessities of the people demanded that they be near their places of business or work. The home idea was never developed in New York as it has been in Philadelphia. There the commercial spirit is paramount. Here we value our home and social surroundings and there is a spirit which urges every man to be the owner of his own home. This has been fostered for nearly thirty years and if we count from the first inception of the building association idea, for a much longer time. New conditions are arising and we must meet them. Land is becoming more valuable here, especially in the business portions of the city. From two to four miles the city is densely built on. New comers must go beyond these limits for their homes or crowd in with others in the built up sections to lessen their comforts as well as their own.

If some enterprising investor and builder would try the experiment of erecting a seven or eight story apartment house, say 60 or 70 feet front by 100 feet deep, more or less, and constructed as good apartment houses are constructed now in New York city, they could find their property immediately occupied at high rates, by a class of people who would be permanent tenants and good paying ones. Tenants for such houses would be largely recruited from the younger class of people, who desire to avoid the cares of house-keeping, or at least its modern annoyances. There are hundreds and thousands of families who are really unable to rent a house and live in the style in which their fathers lived, or to furnish a house in a manner that would be acceptable to their ideas of propriety or their ambition who would gladly welcome the apartment house system as a refuge from our present system of large or small houses from two to four miles from business centres. A young married couple for instance do not care to bury themselves in the wilds of West Philadelphia, or away in the far off region of the Twenty-ninth or Thirty-first Wards, even though they can reach their places of business by a 35 to 45 minutes ride. In the first place, the house their means will permit them to rent is too far from agreeable surroundings, such as theatres, churches and the like. They would be thrown among strange people. The house is entirely too large for their requirements. They must furnish it and this costs a thousand or two thousand dollars. They must employ this eternal source of annoyance and discomfort, the modern servant girl, and must fight the landlord for repairs and undergo an endless course of petty annoyances, which only the householder can understand. Besides, the head of the house is virtually an hour away from his business and loses practically two hours per day, or at least an hour and a half, in going and coming in all kinds of weather in crowded and disagreeable street cars, hanging on to straps and practising politeness by giving his seat to others. All these things our people are familiar with. Nobody has ever thought of remedying them. We have the patience of Job and do not cry out against these evils.

If a man's time is worth anything it would pay him to reside in an apartment house. An hour and a half lost time every day is nine hours a week or 468 hours a year, leaving out Sundays. This is equal in ten hour days to practically 47 days, which at $2.00 per day is $94. To the office man this loss of time is equal to nearly 80 days, leaving out Sundays, and ought to be worth to him or to his employers $200 to $400, if put into work. If he can spare the time, it will be worth that much money at home. This would pay the rent of very fine apartments and enable the tenants to avoid all the discomforts of isolated house-keeping.

Why then is not the experiment tried? As long as we can reach our little six to ten-room houses, two to four miles away, by street cars we will be content. We are building block upon block of such houses, and every additional block adds a minute or more to the time consumed in going and coming. Naturally a limit will soon be reached, when people will say to themselves we must have living room nearer to our occupations. Then will come the demand for apartment houses. Nor is it so far off as we might imagine. The time is right at our doors. Not that there is any project in the minds of our architects, builders, or investors of this character, but the necessity for such a project already exists.

If any of our business men will take time to look to the right or left of them some day to or from bank or lunch, they will be able to pick out scores of so-called properties, which could be and should, and some day will be, torn down, and they are to-day given up perhaps to a baker shop, tailor shop, beer saloon, or factory of some sort or other. Sites of this kind if utilized in a proper way could be made to accommodate fifty to one hundred families, where now a miserable, half-starved family drag out a sort of living in a precarious way. The land is cheap, or could be bought cheap, because it yields but little rental. Fine apartment houses could be erected on such sights with the best of sanitary appliances to complete a finely constructed building, which would be peopled by families large and small, who are now forced by circumstances and lack of enterprise on the part of our builders to drag their tired bodies long distances in miserable street cars to their waiting families. How much better it would be for the merchant, the manufacturer, the bookkeeper, the skilled mechanic, the clerk

to walk from his office between Front and Fifth, and Race and Walnut, around the corner a block or more to his palatial apartment house in a few minutes. But, no; he is the enforced patron of the street car line. After leaving his office he is 30 to 40 minutes or more away from home and it is next to a half day's work to get there. Then after tea, he is too wearied to return to a place of amusement, or visit friends, but must shut himself up among his surrounding social barbarians who are driven out of their natural surroundings, like himself, to eat and sleep. There is little or no society in our suburban districts. People go there from necessity. It is true they would congregate in apartment houses from the same cause, but the cause would be a pleasant rather than a disagreeable one.

But it is no use to elaborate and repeat facts familiar to every one. What we want is an apartment house. Who will build it? There are plenty of statistics that could be furnished to show that an investment of $100,000 in an apartment house would yield more money than a similar sum in six to nine room houses further away. Such apartments would be much more desirable, more central, more cheaply furnished and conferring more advantages than are to be found in our existing system.

Under Currents.

Among the causes at work to stimulate building activity here and elsewhere the following may be enumerated. The volume of many seeking employment is large, larger, perhaps, than ever in the history of the country. The reason for this would be uncovered, but it has no direct connection with the matter in hand. Railroad building and railway stock speculation has for some years past rather retarded building enterprise than helped it, and now that the fever of constructive speculation has subsided building interests are receiving the attention to which they are entitled. Meanwhile the necessities of domestic manufacturing and business have been crowding, and hence the building boom which set in a year or two ago. It is impossible to guess at the probable limits that the building activity will reach before the actuating force behind it will have expended itself. The problem is a vaster and more important one than builders, architects or investors imagine. The whole world want better houses, better surroundings, better accommodations. The improvements in machinery and the cheapening processes are making greater purchases by the masses possible. The mechanic of to-day lives as comfortably as his master of fifty years ago and much later times. There is really no economy in cheap houses. There is profit to capitalists and builders in seeing to it that the masses of the people are well housed. An immense field is open in this direction. Railway building may not be able to absorb the surplus capital of the country, but building and engineering and manufacturing operations can and will. The masses first and foremost provide for their own subsistence. Cheapened products and fair wages, and almost constant employment, are enabling them to do so, to their comfort and satisfaction. This having been done, their next want is better homes. All their surplus earnings over cost of subsistence will be expended in this direction, not taking into account some increased expenditure for vices, which seem to keep pace with advancing legislation in all countries. Now this surplus will increase every year, not slowly but rapidly. This surplus, or the most of it, is the building fund of the future. It will be largely used to erect comfortable houses all over the country.

There is one question which comes right into this question, like one cog-wheel works into another, but it may be some years, however, before the cogs will get into each other, yet there will be no particular harm in dropping a word or two on it. It is when that happy labor day of eight hours comes, laborers will escape from their pent-up surroundings and live at more remote parts from shops, especially if facilities for rapid transit are provided.

The building of the next few years will be small houses largely, and houses for persons earning from $2,000 to $10,000 per annum. There is a desire for a departure from long rows of connected houses to the semi-detached system There will be, in due time, a departure even from this system, especially when we can reach suburban districts more rapidly and conveniently than at present, to a system where each house will, like every good tub, stand on its own bottom, and have sufficient ground around it to give abundance of light and air, and also afford scope for the development of tastes in outside occupations, which our present system of house construction renders impossible.

But the foundation of the future, and what has been built during the past twenty years, is the ability of the people to meet all reasonable demands for a comfortable subsistence. The building activity of the past ten, twenty or thirty years has been confined to the more fortunate few who could accumulate a surplus to reappear in the erection of more comfortable houses than their less fortunate neighbors. The world, or that part of it within the United States, has reached a point where it can have a surplus above cost of subsistence, and can devote it to putting better roofs over its multitudinous head.

It may sound strangely among people who never knew what is was to be hungry for more than sixty minutes, to say that the great under million masses have never had until very recently enough to eat. We are told that some three hundred years ago, before the incoming of the present competitive age, that the masses were better housed and fed. This may have been true, but, for generations, since manual labor has earned its sustenance, labor has never had enough to eat; and if there is any exception to this sweeping statement, even now, the exception applies to the United States and in localities in Great Britain.

But it may be asked, what connection has all this with house building? The connection is this, while people have not enough to eat, they care but little of the roof over their heads; as soon as they are well fed, and have earnings to spare, these earnings go into the "roof," figuratively speaking.

In this country the masses or the people have passed that point when all their hard earnings must go for subsistence; hence there will be, as there must be, a constantly increasing fund for house building operations and with this an increased need of manufactory and shop construction.

"GIVE us a chance," the architects say, "Plenty work on the way, but little in hand."

RESULT of interview.—"We want an Exchange." "We don't want an Exchange." "Don't care anything about it."

"WE lawyers want Real Estate Title examining monopoly discouraged," said a leading lawyer. Then combine!

ANOTHER Title Company has been organized. One more will about fill the bill for this enterprising city, and mollify perhaps the lawyers and conveyancers who are reduced to the necessity of forming forces in order to live from this branch of the Real Estate business. Don't overdo the thing, gentlemen.

THE real estate operations as reported for the past week are interesting for what they indicate. A large number of transportations are reported in our conveyance department. The inquiries made within a week refer largely to property in the suburbs, and some of them are of a speculative character. Good real estate authority thinks that increasing interest is being developed in suburban real estate, and the fact is thrown out by partial negotiations for desirable pieces of land, within the reach of building necessities for the next two or three years. The industries of Philadelphia are prospering, and the necessities for land for building purposes are growing. Land owners are willing and anxious to sell, and real estate operators are willing and anxious to buy, although there is a determination to pay nothing but legitimate figures for property. Anything of a speculative character or the asking of fancy prices would send inquiries and investigators in every direction.

—According to Dr. Henry Leffman, London stands first in point of healthfulness. The death rate in each 1,000 of population, according to statistics, in the large cities is: London 12, Pittsburgh 17, Baltimore 18·2, Philadelphia 20. Paris 20·4, Brooklyn 22·8, Liverpool 23·5, New York 24·2, Berlin 26·3.

—The *North Wales Record* expatiates with vigor upon the desirability of building sites on the North Penn. Road and predicts that Penllyn will some day rival Bryn Mawr in beauty of an architectural and landscape nature.

Do we Want a Real Estate Exchange?

Two weeks ago we published an article on the desirability of a Real Estate Exchange. This week we publish the views of several of our real estate operators.

Mr. M. Nisbet, 806 *Walnut st.*, says:

I have heard of the proposed Real Estate Exchange centre. In my opinion, the idea is a good one. I have been advocating an Exchange to be established in Philadelphia for the last 30 years, and am glad to hear the scheme has been started, although I am not now very actively engaged in real estate operations. My business, such as it is, in real estate is dull at present.

Edward H. Cloud, cor. Sixth and Walnut:

No meeting in furtherance of the purpose to "create a centre" has as yet been held, but will be very soon. I shall let you know when it takes place. The proposed Exchange is to unite the various real estate and building interests in the city of Philadelphia and adjacent counties, to adjust controversies between members, and to furnish full information by collecting statistics in regard to real estate and building matters, and preparing and keeping files of maps and other records relating to real estate and subjects connected therewith. This will include information of all legislative acts of the City and State Governments, reports of the various committees on taxation, street and other improvements, and of awards and assessments affecting the reality in this city and neighborhood. It is proposed to conduct the business of the Exchange upon the principles which govern the Real Estate Exchange in New York, which has been in existence about 13 years. My business is quiet at present. There is a considerable demand for small properties in the city. The Exchange is bound to go ahead you may say.

Mr. Wm. McIntyre, 812 *Walnut st.:*

I remember that a Real Estate Exchange was got up somewhere in 1879, with an office in Sansom street, but it did not pan out very satisfactorily to people. I have heard of the proposed new Exchange, and am decidedly in favor of it. It will be a good thing, and indispensable to transactions in real estate, when once inaugurated. As things now exist in our business, people, when they want to sell a property, put it into the hands of a conveyancer. Perhaps, however, this proposed new Exchange has been got up by the conveyancers themselves as a kind of a breakwater. Real estate operations are pretty steady; can't say there is much doing, however.

Mr. John Cochran, 906 *Walnut st.:*

My business is pretty good, and there is a promise of greater activity in the spring. I don't know what advantage there would be in a Real Estate Exchange. I had not heard of it before, and can't say anything on the subject at present.

Mr. M. F. Richardson 812 *Walnut st.:*

A Real Estate Exchange in our city would be a good thing, but still it would take a great deal of business out of the hands of young lawyers; however, I say I hope to see it carried into operation. Business is just middling. Those new-fashioned cheap shells of houses, with projecting wardrobes, flagged pavements, and all sorts of gingerbread work, coupled with poor plumbing, I find hard to sell; people are heartily sick and tired of them. They want good, substantial dwellings, and are willing to pay a fair price. French flats are wanted in Philadelphia.

Mr. Lancaster, 902 *Walnut Street:*

My business is picking up better every day. Real estate operations are growing in Philadelphia. Real estate is looking very favorable. I heard about the proposed Real Estate Exchange. It will be useful for bringing buyers and sellers together and I fully endorse it. I have seen the circular explaining the scheme.

Mr. Chas. F. Zeigler, 714 *Walnut Street:*

My own impression is that a Real Estate Exchange in Philadelphia, if the idea be properly carried out, will be an excellent thing for us men. I know something about the Real Estate Exchange in New York and I assure you it has met with very great success. The New Yorkers couldn't get along without it; the biggest transactions in real estate in the city of New York are gone into in the exchange. Business is looking up. I have quite a number of demands for real estate, particularly in corner properties which are hard to get. This spring there is going to be a big boom in real estate in Philadelphia. There is a good demand for investments, although I must confess prices are not much improved, but, upon the whole, at fair prices there is a demand for real estate for investments.

Mr. Victor Guillou, 615 *Walnut Street:*

A Real Estate Exchange in Philadelphia would be of great advantage and would very much increase the transactions and put life also into the building trade. Let us have an Exchange by all means. There would be much more business done if properties that could be bought were announced on change. Such a system would develop offers to buy and more transactions would take place. I have not heard before of the proposed room to be established, but I want to see it carried into effect. My business at present is dull; can't say I'm doing much. People if they would consult their interests, would invest more in real estate. They can obtain 7 per cent. for their money by doing so, and where can they place their money more safely than in real estate—it never runs away. Look at the crowned heads of Europe, they know what is for their advantage. Every one of them invests all he is able to invest in real estate. But the trouble is the people of this country are not sufficiently educated yet as to the vast importance that investing in real estate would be to them.

D. Z. Evans, 619 *Walnut Street:*

My business is very dull; nothing new; have heard nothing about a proposed Real Estate Exchange. Will express no opinion on the subject.

James P. Morren, 923 *Walnut Street:*

Business is pretty brisk with me. I know nothing about a proposed Real Estate exchange, and have nothing to say in regard to it.

Henry B. Foulke, 1037 *Walnut Street:*

I don't believe much in this movement which has been started to establish a Real Estate Exchange in Philadelphia. I saw something about it in the *Press* on Sunday. Business is good generally, but there is nothing of importance transpiring.

Mr. Glenn, 920 *Walnut Street:*

I will not express any opinion in regard to the proposed Real Estate Exchange at present. I have nothing much to tell. A real estate man does not like to commit himself. We don't all care about talking about our business, but I may tell you that business is pretty fair. I do a good deal of country business on the line of the P. R. R. Several sales of considerable importance have been made in the neighborhood of Bryn Mawr at fair prices. They were large tracts, all sales ranging between three and four acres up to six acres.

Thomas S. Wilbank, 425 *Walnut Street:*

I know nothing about a proposed Real Estate Exchange. Have nothing to say about it. No business doing.

Hammel & Greir, 435 *Walnut Street:*

Business very good with us. This is the first we have heard of a Real Estate Exchange being talked of. A good thing—it will pay. A capital thing for the man who has real estate to sell; he can see all the buyers that are in the market and lose no time either running about.

Communication.

PHILADELPHIA, Feb. 5, 1886.

GENTS:—I notice your article on "Is a Real Estate Exchange Needed?" I agree with you in nearly all you say. It appears to me that while the real estate business represents a very large capital, and while real estate interests are closely allied with the welfare and prosperity of our city, there is no profession that has been so much neglected in regard to a uniform method of conducting it, nor is there any business in which there is so little sympathy and recognition of each other's rights. If the real estate brokers could be induced to combine and establish an Exchange, to be supported by annual contributions and commissions on the sales made, a number of advantages could be secured which cannot be otherwise obtained.

My idea of an exchange would be to secure a place convenient to the public offices in which a registry of properties for sale or rent, and likewise properties wanted, would be open to public inspection. The broker who first places the same upon the books of the Exchange to be entitled to the commission in case of a sale, and the broker furnishing a purchaser or tenant, or supplying a desired want to divide with the one representing the other side. This would prevent owners from placing their property in charge of several brokers at one time, as is very often the case. The establishment of an exchange would bring about a uniformity of rates of charges, and would secure to the broker his earnings. In connection with the Exchange a record could be kept of tenants who act upon the principle of living without paying rent, which record would be open only to members of the Exchange. The Exchange would also do away with the itinerant dabblers in real estate, who negotiate sales for any amount they can get, and who often resort to means that cause people to look with suspicion upon the reputable members of the profession. I hope you will persist in advocating the establishment of an Exchange.

Respectfully,

CHAS. C. SCHERF.

To the Phila. *Real Estate Record.*

—The American Exhibition, which was to be held May 1, in London, has been postponed. This was done to meet the wishes of the Colonial and Indian Exhibition, which is to open in May at the same time.

—The total value of estates audited and settled in the Orphans' Court last year, exclusive of real estate, was $57,116,214.31. Of these President Judge Hanna audited and settled 572, of the value of $14,217,857.34; Judge Ashman 567, of the value of $24,094,373.27, and Judge Penrose 552, of the value of $18,803,983.70. Total, $57,116,214.31. The number of cases disposed of on the Saturday motion list was as follows: Petitions for appointment of guardians, 439; for citations to executors, administrators, guardians, etc., 297; for widows and minors' claim of $300 exemption, 253; for allowances to minors, 247; for public and private sales and to mortgage, 177; for confirmation of sales, 153; for approval of investments, 107; for orders to file accounts, 93; for discharge of executors, etc., 61; for appointments of trustees, 35; for inquests in partition, 33; for attachments, 9; miscellaneous petitions, rules, etc., 381. Total, 2,387.

REAL ESTATE.

Building Notes.

—The Keystone Real Estate Association starts out under good auspices.

—The Real Estate Exchange of New York wants a new charter. It has burst several buttons of the one it has now.

—During January only 55 permits were taken out, against 65 during same time last year, and embraced 97 operations, among which were 42 two-story dwellings and 8 three-story buildings.

—Philadelphia pays two-thirds of the State tax on personal property. The value of the property is $159,304,729. Our city tax on its share is $408,000. Philadelphians carry half of all the watches carried in the State, at least according to returns. The watch tax amounts to $18,899.

—The Standard Oil Company are about to erect a seven-story brick tenement, 200x165, on Franklin street, between Java and India streets, Brooklyn. The building will accommodate 165 families and will be built principally for employés of the company. The cost will be between $200,000 and $300,000. Messrs. Lamb & Rich, of New York, are the architects.

—The report of the Superintendent of Buildings, of Newark, N. J., for 1885 will shortly be published. The number of buildings for which plans were filed during the year was 1,030, of which 809 were frame, 217 brick, 3 brick and frame, and 1 stone and frame. Out of the total 761 were dwellings and the remainder stores and dwellings, 58 factories and workshops, 1 church and 1 theatre. These figures show the extraordinary development of Newark during the past eight or nine years. The number of buildings have increased year by year, and from 68 buildings for which plans were filed in 1877 they have now reached 1,030, an increase of over 1,400 per cent. in eight years. The increase last year over 1884 was 17 per cent. There is a rumor that a syndicate of capitalists and property owners intend to build rows of cottages on an extensive scale during the forthcoming season in the suburbs of this city.

—Gas is furnished in Berlin at $1.02 per 1,000 feet; in Hamburg, 82 cents; Bonn, 82 cents; Dresden, Breslau and Dusseldorf, 74 cents. But Cologne takes all the others down, the charge per 1,000 feet in that city being only 61 cents. Now, if such things are possible in those great cities, why not in Philadelphia? and, if possible, or approximately so, why sell—much less, why sacrifice—so rich a bonanza? Nearly everybody uses gas, and one of these days we shall, no doubt, have the article furnished us at much lower than present rates. Why not hold on to that which is good, and if there be profit in making gas let that profit inure to the general public benefit? It is the belief of some that at $15,000,000 the buyers of the Works could afford to furnish gas to consumers at $1.40 per 1,000 feet and make an enormous profit. There is hardly a doubt of it; but will it not be better to keep them?—*The Star.*

What about water gas, which has been adopted by over one hundred and fifty cities and towns?

—One of the most prominent of our city builders writes us a justly indignant letter at the way in which the building and manufacturing interests of this city have been harassed by speculative lawyers. If any accident occurs to a workman, these lawyers are ready to bring suits for damages against employer, without any money payments by the plaintiff, the lawyers being willing to run the risk of being recompensed out of the damages, if any, given by the jury. Our correspondent was a defendant in a suit of this kind, which he won, for there was really no case against him, but still he was put to the expense of hiring lawyers, hunting up witnesses, and besides had to lose his time.—New York *Real Estate Record.*

This complaint is not confined to New York. Litigation is declining, and Arbitration Boards and Trusts are absorbing much legal business. There are lawyers and lawyers, and we might most appropriately add, lawyers. The times produce all these classes. The one ought not to be mixed up with the others. Litigation is not often lessened by lawyers' modesty. Business men are anxious to avoid litigation, and it is a good sign that they do so desire. Our legal system has not been improved and simplified and modernized in the way that our mechanics have developed the physical law. The legal Edisons are very few. The times are not calculated to develop the highest order of ability at the bar. The brains, energy and real want of the rising generation are seeking other avenues of activity, other fields for promotion and greatness. And it is well that it is so. It is well to have laws, and to have methods for adjusting disputes, but it is better to avoid disputes. Still the occupation of the lawyer has not gone by any means; but society is working in the direction of dispensing with his services more and more. The discouragement given to lawyers will lessen their number and increase the number of aspirants in other fields of intellectual and commercial activity

—Builders and architects have given much thought to means whereby buildings can be prevented from absorbing water. Painting does not fully answer. Paraffine containing creosote dissolved in turpentine has been found to answer admirably. A scientific exchange publishes a paper read on this point by R. M. Caffall, of New York, before the New York Academy of Natural Sciences. Fire buildings are frequently disfigured by the white efflorescence on brick and sometimes store fronts. Mr. Caffall has studied the the subject for many years. He says that the salts appearing on brick fronts are many and various, hence the varying results of chemical analyses; also that some of them are present in clay in an insoluble state while the clay is raw, but are made soluble by firing. Other salts may be present in the lime or may be produced by acids and alkaloids contained in rain water falling through the atmosphere of a large city. Water is the agent which brings them to the surface of building materials, where, when the water evaporates, the salt is left to crystalize. This efflorescence is said to be still active and troublesome on buildings in England 150 years old. Painting does not afford perfect protection, the alkalies saponifying the oil. Linseed oil perishes in the same way, but the effect is not so readily seen. Mr. Caffall says that the best results have been obtained from the use of a paraffine compound, composed of paraffine containing creosote dissolved in turpentine. The creosote is intended to prevent organic growth upon the surface, which is a common source of stains. To apply the compound the building material, whether of brick or stone, is heated so that at the desired depth, say half an inch, it is at the melting point of the compound (140 degrees), which is then applied hot. The purpose is to preserve the building from absorption of water. The compound is applied over the whole surface, preferably while the building is new and clean. This process has recently been applied to the preservation of the obelisk in New York. It has stood a test of sixteen or eighteen years in England, and is now very generally employed on costly buildings with terra cotta decorations.

—New York city is progressive. It has a compact Real Estate Exchange. A movement is now on foot to organize a Lumberman's Exchange.

The objective points of the proposed lumberman's organization are, briefly, the mutual protection of its members against irregularities in trade, the adoption of a uniform system of inspection, the dissemination of useful information, etc.

—The Real Estate Title and Insurance and Trust Company has so far issued over 115,000 certificates of search and has insured over 10,000 titles. The company has lately issued a neat and comprehensive pamphlet. Besides guaranteeing titles and issuing searches the company insures against decedent's debts, mechanics' liens, pending and disputed claims, old ground rents, etc., and is authorized to act as or become surety for executors, administrators, trustees, assignees and guardians.

—Trade organization is the watchword of the hour. The other day two hunred and fifty Texas lumbermen met and organized. Not a paper is picked up but what tells of organization of some interest. Yet our real estate people are unorganized, and no loss is felt. The wire men, hardware interests, wire makers, plow makers, tool makers, and a score of similar interests are completely organized, but the real estate interests have nothing to draw them into coöperative effort. Other cities profit by such organization and like advantages are to be secured here. When will the start be made?

—It is fortunate for the industries of the country that their foundation cannot be easily shaken by what Congress does or does not do. Of course it is possible for vicious legislation to do much damage, but such legislation is not probable. The two parties are so evenly divided on what might be termed vital questions, and the selfish interests and political prospects of both are such that the business interests can rest in quiet, against the probability of bad laws.

On last Wednesday the House Committee on Coinage showed its hand rather unexpectedly by reporting favorably the resolution offered by Chairman Bland on Monday last asking the Secretary of the Treasury to define the policy of the Administration in regard to silver. While neither the vote in the committee on reporting the resolution nor the subsequent vote in the House on a motion by Mr. Hewitt to strike out the inquiry as to the future policy of the Administration gives a satisfactory test of the strength of the silver men on a proposition to suspend the coinage of silver dollars, they are interesting as showing the attitude of both the Committee and the House as to the silver dollars already coined.

—Is not Philadelphia capital building Western and Southern railroads, led by Philadelphia skill and enterprise? The grand old town will survive the rain of ink, and will reign supreme as the manufacturing metropolis of the country.

—This seems to be an age for scheming. The record of the organization of companies at Harrisburg is very lengthy. There seems to be plenty of money for all of them, and plenty of encouragement, for they are multiplying. No doubt many of these concerns seek existence on the credulity of the public.

—The petition for the readjustment of street numbers designating buildings west of Central Park, between Sixtieth and One Hundred and Ninth streets, New York city, has been extensively signed. The owners of about 2,500 lots and 200 houses favor the change.

BUILDERS' ITEMS.

Interviews this week with leading builders add nothing to the situation, excepting that there is a spirit of confidence among all, as to the amount of work to be done this season. As soon as the weather is favorable, active preparations will be inaugurated for spring work, and much more will be undertaken in March and April than last year.

A preliminary meeting was held a few days ago between workmen in the building trades and their employers, with reference to the reduction of the hours of labor. Nothing definite was arrived at, but a thorough discussion was had on both sides. The workmen asked that the proposed short hour system go into effect on the first Monday in April. The employers showed that there were contracts yet to be finished, taken under the long hour system. After a thorough interchange of opinions a compromise was arrived at to recommend to the Bricklayers' Association that, on and after April 24, of the present year, nine hours shall constitute a day's labor, and $3.50 the wages per day. The Journeyman Bricklayer's Association number 2,000. Other trades will likely follow and be satisfied with a nine hour day. A similar movement is in progress in several other cities, particularly in New York, Boston and Chicago, and a like spirit of harmony has been shown. While the workmen are determined to reduce the hours, they are not disposed to place their employers to any very serious disadvantage. The notices served on employers will no doubt be remembered in the taking of contracts for the coming year.

OUR architects are extremely busy, but their business is this week in such a shape that they are unable to give any details. They promise that in the course of a week or two the *Real Estate Record and Builders' Guide* shall have full details, for which we are thankful. Some of our architectural friends have complimented us unintentionally by referring our reporter, on calling for news, to go to the new paper that has recently come out, the *Real Estate Record and Builders' Guide*. We are thankful for the reference. The character of the work on hand just now is diversified. It includes nearly every kind of buildings, from large manufacturing establishments down to small houses, also educational structures, churches, two or three banks, in addition to fine residences in the suburbs and in some of the surrounding towns along the lines of the various roads. Among the enterprises that may be mentioned are these:

Building Permits.

Two story brick stable, 16 ft. by 20 ft. rear of 1007 Lehigh ave., to Oliver Ottinger, 1005 Lehigh ave.

Two two-story brick houses, 12 ft. by 30 ft., 4443 Tackawanna street, to Samuel R. Eckert, 4812 Cherry street, Frankford.

New bulks and alterations to store, 4600 Main street, Frankford, to same party.

Two-story addition to back building, 1223 Columbia ave., to C. J. Miller, 1223 Columbia ave.

Additions to machine works, Eighteenth and Hamilton streets, 57 ft. by 25 ft. to George V. Cresson, Eighteenth and Hamilton streets.

One fourth-story addition, 22 ft. by 30 ft., 712 Arch street, to B. Ketcham & Son, 1029 Brown street.

One back wall, 716 Arch street, 18 ft. front, to R. D. Murray, 401 South Juniper street.

Two one story brick buildings, 27 ft. by 35 ft., 52 Richmond street, to Thos. A. Lynch, 1619 N. Fifteenth street.

New front to building 318 North Eighth street, to Marriner & Buckingham, 716 Cherry street.

Repairs to building Fourth and Callowhill streets to same party.

One brick stable, 27 ft. by 80 ft., Broad, between Wood and Callowhill streets, to Jacob Banes, 305 North Broad street.

Two-story brick building, rear 1519 and 1521 Chestnut street, and alteration to the first story of the numbers named, 44 ft. by 123 ft., to John O'Donnell, 1151 South Thirteenth street.

One two-story brick house, 14 ft. by 28 ft., East of old Front street and North of Indiana ave., to Philip Fitzpatrick, 2838 Kensington ave.

A store and factory and interior alteration to addition 641 Arch street, 16 ft. by 90 ft., to S. D. Button, 430 Walnut street.

New Buildings.

EDWARD HURST BROWN, 1430 Penn square, has been making sketches for a double cottage, at Osterville, Mass., for Mr. W. F. Parsons; cost, about $5,000.

BEN LINFOOT, 719 Walnut street, is erecting dwelling house, at Merion, on the Pennsylvania Railroad, $100,000. Also, dwelling house of brick and stone for Geo. L. Crawford, at a cost of $20,000.

WILSON BROTHERS & Co., 435 Chestnut st., are adding new wings to the Hospital for the Infirm at Norristown. They are also putting a wing to the State Industrial Reformatory at Huntingdon, and building a new boiler house for the Presbyterian Hospital, and also putting up a large brick warehouse at Eleventh and Washington avenue for the Washington Butchers' Sons.

WILLIAM D. HEWITT, 210 Chestnut street, is building a station for the Cornwall and Lebanon Railroad at Lebanon, Pa., 25 feet wide, 110 feet long, built of brown stone, brick and terra cotta, finished in oak, with an adjoining train shed, 50 feet wide and 200 feet long; cost, $35,000. He is also building a house for William T. Haines at Bola, Pa., stone, two stories and higher; cost, about $18,000.

CULVER & ROGERS, Walnut street, are preparing drawings for a fine dwelling, at Landsdown, at the cost of $10,000. It is of modern Gothic of stone and red brick, with slate roof, for J. S. Austin, Esq.

Branch home for indian girls, at Wayne, on the P. & R. R.; 125x40, frame. It is arranged with the stairways on the outside, and is two stories, and has the appearance of a swiss building. Cost, $6,000.

FURNESS, EVANS & Co., 209 S. 3d street, are about constructing a very extensive hotel for a New York company at Lake Hopteong Morris county, N. J., which will have a frontage of 280 feet, with a depth of 181 feet, and is designed by L. C. Baker, Jr., of this firm. It is to be a frame structure, with ornamental shingle work, and will be fitted up with all the modern improvements. A more graphic description can be given in our next issue.

M. THOMAS & SONS' Chestnut street auction house, to be erected at 1521 Chestnut street, will be a most complete structure of its kind, which will cost $125,000, and will be fitted up with everything necessary to make it a model auction house. It will have the very best elevators. A solid brick fire-proof will be built out from the wall in both basement and first floor. The second floor will be devoted to displays, and will have an ample sky light. The main entrance will be 10 feet wide, on each side of it will be plate glass windows, 14 ft. 7 in. wide. The store will be 44 ft. wide, 168 ft. deep and 15½ ft. high.

THE Unitarian Church at Twenty-second and Chestnut streets, which has just been completed, was built by Messrs. Furness, Evans & Co., Mr. Frank Furness being the architect. It has accommodations for 700 people, and is a very fine structure.

WORK has been begun on the tunnel for the Baltimore & Ohio Railroad, for the Schuylkill East Side Railroad. The car works on 25th street, used by the Spruce and Pine street cars, will be taken up, and the cars will run on 24th street. Quite a number of houses will be demoralized between Callowhill street and Pennsylvania avenue. The work of tearing down has been begun between Spring Garden and Brandywine streets. Over 100 houses will be torn down in order to widen 25th street. The new road will be ready for rails by the first of June. The bridges across the Brandywine and Susquehanna are about completed. Several thousand men are now at work between this city and Baltimore.

L. M. HALLOWELL, 906 Walnut street, has just completed two stores; brick fronts and terra cotta and brown stone trimmings, at 1030 and 1032 Arch street. Builder, Robert W. Strode, at a cost of $20,000 each. They have elevators and are light. A light well supplies both stores.

Also, private dwelling, 3926 Chestnut street, 27x125; constructed of brick, with brown stone and terra cotta trimmings, at the cost of $23,000; and is built by J. C. Kelly.

Also, dwelling for Mr. F. Fenimore, at Bristol; cost, $16,000.

Remodeling a dwelling for Mr. Odgen, Riverton, N. J.

Also, dwelling for Mr. Ross, Conshohocken; half timber house; cost, $8,000.

Has been making plans for several small framed cottages, for the West Indies; they are of peculiar designs and constructions. They are two stories, and have four compartments, cost of which is $1,500 in gold, each. These cottages are not expected to last much over two years.

—When Great Britain's hostile fleet of war ships sails up the Delaware to bombard us back to Bryn Mawr we will be sorry that we did not induce Congress to run up a little defence bill, in 1886, like this:

Casemates armor, 4,350 tons, $1,300,000; structural metal, 650 tons, $130,000; cost of masonry and earth, $832,000; total, $2,262,000. Add to this the cost of armament and mounting of guns and mortars, $828,000; cost of carriages, $274,000; total, $1,102,000; the total for submarine mines, $114,000, and the six torpedo boats, $360,000.

—Business men, manufacturers and others do not know what to make out of the boycotting movement, so generally taken up by organized labor. They are waiting to see what it can accomplish. Last week the Texas Knights of Labor ordered the boycotting of the Mallory Steamship Line. It is easy to be seen how a body of workmen in a small town could annoy a business man dependent on their patronage, but it is not so apparent how a steamship line can be put to trouble by an edict of an executive committee.

The grounds of action are based on the alleged violation by Capt. Sawyer, of the Mallory Steamship Company, of the terms of compromise agreed upon by the citizens' committee and the committee of the Knights of Labor selected in November last to arbitrate the then existing differences growing out of the strike of the laborers on the Mallory wharf, and the employment of colored labor in their place.

The history of the movement shows that this weapon is a power worth observing as to its employment, but sometimes, like other expedients, it may in the end work disastrously to all concerned.

INSURANCE NOTES.

Fire Insurance Brokers.

The annual meeting of the Philadelphia Fire Insurance Brokers' Association was held on Thursday, when the following officers were elected: President, William W. Allen; Vice-President, Charles Williams; Secretary, William H. Corliss; Treasurer, Charles T. Evans; Executive Committee: James H. Coyle, Charles Platt, Jr., Marcus Katz, Reuben Etting, George G. Crowell, James B. Godwin and George E. Wagner. Committee on Membership: Horace Reeves, Frank A. Donelson, Paul H. Barnes, Chas. A. Day, Chas. Tredick, N. B. Crenshaw and John Gibson.

—The Liverpool, London and Globe Insurance Company shows assets at $5,923,010.13. Surplus over liabilities, $2,589,004.11. Losses paid, $37,463,135.57. Since its organization in this country: its income for the year just past was $3,775,584.75, and the expenditures, $3,120,032.98, leaving a profit on the year's business of $655,551.77.

The receipts of the Philadelphia Fire Department Relief Association during 1885 were $6953.05, and the disbursements $4359.05. There are at present 601 members on the roll.

Est.—Estate.	
E.J.—Ejectment Suit.	
E.S.—Equity Suit.	
Exr.—Executor.	

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

MARKET QUOTATIONS.

The expectations for a generally increasing demand for building material of all kinds is having the effect of preventing any shading in prices, or of accepting offers for large contracts for material to be delivered during the active season. In the lumber market there are evidences of an upward tendency. During the past week a good many Northwestern agents have been here trying to sell, but met with little success, as dealers are not disposed to close contracts at this time for very large amounts. Another obstacle to business was created by the asking of slightly higher prices. The attempt is being made in the primary markets to create the impression that there will be general improvement in prices and demand during the coming season, and this improvement is shared here and there among dealers. The market generally, however, is a little suspicious. The general impression is that the supply of lumber of all kinds will be large enough to keep prices about as low as they were last season. The demand this year will be fully as large as last, both for white and yellow pine.

The hardware dealers and manufacturers are increasing their business through orders from builders. During the past week dealers in slate and stone received inquiries as to prices for large supplies, but no contracts were placed. Freight rates were likely to remain as they were. Within a few days the planing mill interests have been encouraged by a number of inquiries for all kinds of planing mill products. The prospects for an early spring trade of a remunerative character are favorably spoken of by our leading mill owners.

At the meeting of the nail manufacturers on Wednesday of last week, quotations were advanced to $2.50, but no action was taken with reference to the future course of the industry, because of the uncertainty as to what the Western nail makers will do. They will hold a conference with their workmen this week at Pittsburg, and if possible will arrange a compromise by which the three thousand idle nail machines of the West can be set to work. If so, this will result in a cutting of prices at an early day, as the nail making capacity is far in excess of demand.

The manufacturers of all kinds of building material are looking forward with more confidence than they ever have for a very busy season. The present range of prices is not likely to be departed from until the demand for the spring and summer will develop itself. If it is as heavy and as general as is now anticipated, the higher range will prevail rather than the lower, that is, the asking prices will be the market prices rather than the prices bid.

The furniture factories are nearly all working full time. The demand for furniture extends from the finest to the cheapest grades, but the medium are naturally in the greatest demand because of the heavy requirements for the moderate sized houses going up by blocks throughout the city, and in large numbers in surrounding towns.

CONVEYANCES.

PHILADELPHIA.

MONDAY, February 8, 1886.

SUBURBAN NEWS.

Land is increasing in value, particularly along the line of the Pennsylvan a Central Railroad, where there is now very little to be had at any price. It is possible that land owners there may exhibit too great exclusiveness, and may drive people away instead of inviting them along the line. Cheap land is a necessity, and while there are no indications that the purchasers of land along the line of that road, within the past few years intend to exclude anyone from buying; there are many who feel that they can ill afford to pay the prices asked; however, there are abundant opportunities for good investment in many directions. Those desiring suburban properties have a wide region from which to make selections, and can be accommodated with but very little trouble Along the North Penn there is less enterprise shown, and the building sites are in less demand. A few purchases have been made along the line of the Reading Road, but that line has not attracted as much of the attention of builders of residences as some other lines. The new Baltimore & Ohio Road will, no doubt, attract a good many buyers, both for building and speculative purposes; in fact already considerable property has been purchased within five or ten miles of the city. It is probable that for the most part houses of moderate pretensions will be erected along this line; and that the Pennsylvania Road and the Chestnut Hill Branch continues to monopolize the demand for sites for the finer class of residences. However, this is to a certain extent a matter of opinion and speculation. The necessities of the people of Philadelphia are growing rapidly. As elsewhere intimated, apartment houses will of necessity force themselves upon builders and investors in due time, but no matter how fine an apartment house may be, they will never be acceptable to a large class of our citizens, who have the time, money and the taste to live three to ten miles remote from their business.

SUBURBAN SALES.

CHESTER COUNTY.

Two-story brick house, No. 33 York street, Camden, lot 40 ft. by 150 ft.. 1,710

More Prophecying.

Every one has heard of Samuel Benner, the Ohio prophet, whose predictions in reference to business and trade, ups and downs have been so true *The Financial Daily Record*, of New York has been interviewing the prophet concerning the future of business in general. What he says is worth reading.

Question.—Have "Benner's Prophecies" foretold the future ups and downs of business correctly since they were first issued?

Benner.—Yes, in so far as general business was concerned. These prophecies were placed before the public, first in 1876. It was then foretold that iron and general business would decline in 1877, then turn upwards in 1878 and continue good times to 1881; then turn down, and continue downward to 1888.

Q.—What is the general business outlook now?

Benner.—My views are formed from the iron cycle which is the key to the industrial situation. The iron cycle for low prices continues to the year 1888. We must look forward to a state of general depression to 1888.

Q.—What element or cause in the business of the country will produce this depression?

Benner.—The silver question, and more particularly the tariff question. The first threatens the disorganization of the currency; the second the industries of the nation.

Q.—If a reduction of the tariff should give us lower prices, why should that depress business?

Benner.—Low prices and hard times seem to be companions, while high prices and good times are the delight of the people. There is prosperity and money-making in good times; on the other hand adversity and money-losing in hard times, which is a cause of general complaint.

Q.—How do you account for the improvement in business this last year, 1885, it being one of the "down" years in the iron cycle?

Benner.—A reaction only from the severe depression of the year 1884. In the former periods of "down" years for iron there have been exceptions, for instance 1847, 1859 and 1869.

Q.—Will the price of iron decline hereafter?

Benner.—Yes, it will be lower this year, and in 1887 and 1888.

Q.—What reason have you for this conclusion?

Benner.—First, the iron cycle denotes it; second, the coming agitation in Congress this winter and next winter over the tariff.

Q.—Why the tariff question more than our legislation?

Benner.—To increase or reduce the duties on foreign products and merchandise affects more business interests and industries in this country than any law passed by Congress.

Q.—Why does the Congress of this winter threaten to reduce the tariff more so than the Congress of last winter and other past sessions?

Benner.—Because there is no fear or probability of a veto by the President.

Q.—In the general decline of oil business to 1888, what interest will touch bottom first, and which last?

Benner.—Stocks and iron first; labor and lands last.

Q.—Then in what relation will the different interests be at the first upward movement?

Benner.—Stocks and iron will first show symptoms of an advancing market, while we may see at the same time the anomaly of labor and land declining.

Q.—When will we have the next panic?

Benner.—In 1891. The panics which are described in my "Prophecies" have been in the years when speculative business comes to a halt, not when prices are low, but when they are high—the culmination of business booms—at the end of a period of general prosperity.

Q.—What is a panic, anyway?

Benner.—I cannot exactly describe what a panic is. However, a panic occurs when prices begin to go down. The minds of business men become disturbed when they see prices for their merchandise and commodities declining; consequently there is a panicky feeling that continued lower prices are to follow.

Q.—The last panic or commercial revulsion, as your book has it, was in 1873. Why did we not have a panic in 1881, seeing that year was a high year for iron?

Benner.—The cycles in panics are about twice as long as the cycles in iron, consequently, between these commercial revulsions we have two ups and downs in iron. After the second period of advances in iron we can expect the panic when iron begins to go down.

Q.—When will we have the next "boom" in iron and in general business?

Benner.—From 1888 to 1891.

Items of Interest.

—The great Stevenson estate of New York is to be sold February 16th, and all real estate people are talking about it and figuring on it. Over three hundred city lots will go, besides several large buildings. It includes extensive and valuable lines of property. The sale will be absolute, by order of the Supreme Court.

—As many as ten thousand firms, employing fifty thousand commercial travelers, are constantly drumming up trade throughout the country. The system has its disadvantages as well as advantages. In the "seasons" the leading retailers for far off sections take a "fly" to Eastern manufacturing and industrial centres to see how things are going.

—An immense amount of foreign capital is seeking and finding employment in the United States. Sentimental rather than practical objections are raised against this, and various suggestions have been made in reference to it, in bills now pending before Congress. We do not object to the immigrant, and should not object to the means by which he may be able to find employment.

—Our Hoyt has been to Williams College last week lecturing on Protection. Professor Thompson, of the University, goes to Yale to lecture. The Yale faculty has done a very wise and prudent thing in opening doors to a presentation of both sides of this question Our colleges do not turn out men whose inventions or thoughts or discoveries electrify the world, but they nevertheless have a valuable work to do. Yale has brought herself into disrepute by advocating industrial feudalism, but takes an opportunity to have the vicious teachings of the irrepressible Sumner counteracted.

—Mr. Morrison is pushing the work on his tariff bill, and hopes to have it ready for exhibition to his political associates on the Committee of Ways and Means this week. The clerk of the committee is occupied in arranging and pasting together in proper order such portions of the work as are completed, and Mr. J. S. Moore, the "Parsee merchant" and customs lawyer, of New York, was present last week to furnish advice and first instalments of the embryo bill. No details in addition to those hitherto outlined in these dispatches have transpired When completed, and before being submitted to the Committee on Ways and Means, the bill will be submitted to Mr. Randall for his inspection and opinion.

THE BLATCHLEY

Is carefully made by men who know how to construct a

PUMP

When desired they are lined with specially heavy Porcelain or Copper, or with Drive Well Cylinders, at small additional cost.

When ready to buy, *insist* on seeing and examining them. Use your own judgment, and don't be persuaded to act contrary to your own interests.

They are sold by some good house near you.

Special terms to builders buying in quantities.

[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL. I.—NO. 7. PHILADELPHIA, MONDAY, FEBRUARY 22, 1886. PRICE 15 CENTS

SUMMER STREET HOUSES FOR SALE.

The above illustration is a neat representation of a block of new houses erected on the south side of Summer Street above Thirty-second Street, West Philadelphia. They are erected on the site of the old Powellton Mansion. These residences besides being in a most eligible neighborhood, represents the highest skill of the builders, plumbers and house decorators' art. Their exterior is attractive; the architect besides directing his attention to the interior, has made the exterior attractive and complete in all that architectural taste requires. Steam heating and cooking arrangements have been introduced and are protected by asbestos lining. All of the plumbing is of the very best kind. The houses are provided with all improved sanitary appliances. Cellar floors of cement.

The houses are strictly fire-proof so far as houses can be made fire-proof. Choice paper covers the walls. Beautifully stained glass is used where light is introduced. The roofs are of slate and tin, not of ordinary, but the best quality. These houses overlook the city. No. 3200 is provided with electric lights, call bells, burglar alarms, with automatic attachments. These houses are architecturally an ornament to the city. They are comfortable and nothing of utility is sacrificed to architecture.

REAL ESTATE PUB. CO.

PHILADELPHIA, MONDAY, FEB. 22, 1886.

THE number of new buildings projected in the early part of the present year, as well as the official record of transfers of real estate for the same period, shows a state of things, which, if estimated, will bring about a real "boom" in real estate. There is a large increase in the number of transfers as compared with 1884 and 1885.

At interviews held with several of the prominent real estate men, by a representative of THE REAL ESTATE RECORD, this week, he felt satisfied enough was advanced to convince anyone that real estate in Philadelphia was never in a more wholesome or prosperous condition than it is to-day. There were more new houses projected during the past three months than ever before in the history of the city; while the number of real estate sales were far ahead of any previous season, both in number and in amount of money involved. The outlook for this spring is very hopeful. Real estate auctioneers and brokers will do a larger business than ever. Architects and builders will project and put up more houses than in any previous spring or summer,—the only danger is in possible labor troubles; but these may be avoided by employers and men promptly arbitrating in case of dispute.

THE Lawyers and conveyancers have taken preparatory steps, looking to the organization of a Real Estate Title Insurance, Trust and Safe Deposit Company. The capital stock suggested is $500,000, to be divided up in 10,000 shares, of $50 each. Messrs. Joseph Savidge, E. P. Smithers, William Gorman, James R. Booth, E. Cooper Shapley, John H. Sloan and Frederick Sylvester were appointed a committee to decide upon a title and to draft a charter, constitution and by-laws. A motion to admit to membership real estate brokers and others outside of the professions whose interests the organization is designed to protect was strenuously opposed. Another meeting will be held this week.

WE note that the general circumstances of the tenement population of New York City seem to be growing worse rather than better. But we hear that the association for improving the condition of the poor of that city, has now entered upon an aggressive campaign, comprehending a reconstruction of one of the worst sections of that city. It is proposed to extend Leonard street through to the Bowery, cutting away what is known as the bend, in Mulberry street, and widening Pell street into a broad and open thoroughfare. This work, which will require legislation, is expected to produce results not unlike the results that followed the opening of Worth street, through the traditional Five Points. It is to be feared that the work of the tenement house reform, in New York, has not yet been perfectly conceived in all its extent and difficulties. There was a time when it was believed that suburban houses were to prove the true solution of the problem raised by overcrowded and filthy apartments; and, on this conviction, rapid transit railways and improved transit facilities of all kinds were urged. But the New Yorkers are beginning to find that the people who seek suburban houses belong to a class who would have kept even the worst class of tenement houses in a state of comparative healthfulness and decency, while its population, who still inhabit the slums, are a sort that would convert even a suburban dwelling into something little better than a pig-sty.

IN view of the prospective demand for the eight-hour standard of the day's labor, the question arises with builders how they shall make contracts for the work of the coming season. Manifestly, they cannot do this on the ten-hour basis, except they are assured workmen will agree to labor that many hours daily. If eight hours is to be the calculation, a decision should be come to promptly as to whether workmen will or will not consent to such readjustments of wages as the lesser number of hours would seem to imply. There is twenty per cent. shortage in the time the labor organizations are endeavoring to establish as the rule, on and after the first of May. Should this difference be added to contract estimates the result would be no less fortunate than to reduce the enthusiasm of parties who contemplate building. Should an equitable readjustment of wages be gracefully agreed upon all around, the bad effect, if any, would be reduced to a minimum, and thereafter wages would undoubtedly arrange themselves in accord with supply and demand. With peace in the family of building trades there should be full employment this year. This prospect should not be injured in the early season by any probable misunderstanding which might as well be fixed before spring opens.

EMPLOYERS in the building trade in New York, and in some instances in Philadelphia, complain that they are much harassed by speculative lawyers, who take advantage of the defects in our laws to champion work people and others who claim to have been injured when employed in private building enterprises. Of course there are cases where contractors are to blame for not taking proper precautions in seeing that the work under contract is not necessarily perilous. There can be no excuse for many accidents which occur, but it is clearly a hardship to hold a builder accountable for what is purely accidental, or for carelessness on the part of the workman himself. To make matters worse, the law permits lawyers to champion cases where there is no cost to the plaintiff. His name is used to bring a suit, and if there are any damages the lawyer pockets most of the money awarded.

COMMON bricks absorb as much as a pint or pound of water. Supposing the external walls of an ordinary cottage to be one brick thick, and to consist of 12,000 bricks, they will be capable of holding 1,500 gallons, or 6½ tons of water when saturated. To evaporate this amount of water would require nearly a ton of coal well applied. The softer and more workable stones are of various degrees of absorbency, and are often more retentive of moisture than common brick. Prof. Ansted states that the facility with which sandstone absorbs water is illustrated by the quantity it contains both in its ordinary state and when saturated. He states that even granite always contains a certain percentage of water, and in the dry state is rarely without a pint and a half in every cubic foot. Sandstone, however, even that deemed fit for building purposes, may contain half a gallon per cubic foot, and loose sand at least two gallons. When water presents itself in any part of such material, it readily diffuses itself by the power of capillary attraction, by which it has been observed, on some walls in Paris, to ascend 32 feet from the foundations. Walls of such absorbent construction are subject to rising wet by capillary attraction as well as by the driving wet of rain or storm. To guard against the driving wet on the coast "weather slates" are used. But these do not stay the interior rising wet. This wet, having to be evaporated, lowers temperature.

SINGULARLY enough, examinations made of the painted windows, so celebrated as works of artistic genius and skill, of the old Cathedrals of England and Continental Europe, show that the superiority consists really in the inferiority of the glass, its richness in the poverty of its constituents, in the very perfection of the uneven thickness, all covered, as they are, by the accumulating dust of ages, and honeycombed by the corroding effect of time.

THE intercepting sewer, according to the views expressed by Dr. Charles Hermon Thomas before the County Medical Society, on Wednesday evening last, will prove a failure. This eminent gentleman claims that it is entirely too small to perform the work intended, and should be abandoned as a sewer, and used as an aqueduct. Dr. Thomas recommends that its construction be extended to Flat Rock Dam, at which point the water of the Schuylkill is sufficiently pure for all purposes. This may be the easiest way to overcome our water difficulties, and Dr. Thomas's suggestions are entitled to consideration and investigation.

THE essential features of a building law may be tersely embodied in the following:

1. Buildings erected in thickly populated places should be composed of reasonably noncombustible materials.

2. A party wall, when separating buildings of more than one story, should be at least 12 inches in thickness and have a footing at a specified depth below the curb, and be absolutely solid, no flues or openings of any kind whatsoever, and no girders, beams or joists of any kind to be built therein.

3. No flues in a building should have an opening in more than one story.

4. No building should be higher than the width of the street on which it abuts.

5. The cost of a party wall 12 inches thick should be borne by both parties in interest at the time of its erection, for a limited height.

6. That the parties in interest may enter into special agreement, as they so elect, provided they do not violate any of the foregoing provisions.

7. The law should provide for the appointment of a State architect and counsellor to the State on architectural matters, and have charge of all State competitions, with such restrictions and assistance as may be thought necessary.

THE problem has puzzled many why two pieces of wood, sawed from the same section of a tree, should possess very varied characteristics when used in different positions. For example, a gate-post will be found to decay much faster if the butt end of the tree is uppermost than would be the case if the top was placed in this position. The reason is that the moisture of the atmosphere will permeate the pores of the wood much more rapidly the way the tree grew than it would in the opposite direction. Microscopical examination proves that the pores invite the ascent of moisture, while they repel its descent. To make my meaning more clear, I will mention the familiar case of a wooden bucket. Many may have noticed that some of the staves appear to be entirely saturated, while others are apparently quite dry. This arises from the same cause, viz., the dry staves are in the position in which the tree grew, while the saturated ones are reversed.

WE HAVE endeavored to ascertain whether a Real Estate Exchange is needed in this city. The REAL ESTATE RECORD does not propose to champion anything that is not wanted, but at the same time if it feels that it is wanted, it shall be its champion, regardless of the lethargy of those who should be interested. Over in New York they seem to depend a great deal upon their Exchange. It has its dozen or more working committees meeting every week, not to while away time, but to crowd through most urgent business. Picking up last week's *Record and Guide* of New York we find evidence of the worth and necessity of an Exchange. In order to show what some of their committees do, we will go to the trouble of quoting one week's business of the legislative committee to show at what they spend their time. The following bills have been introduced in the State Legislature, and the very hour they are introduced, copies are mailed from Albany to the office at New York and they are at once taken up and considered. Here are the captions of several bills:

An act to lay out an exterior street on the East River, from Sixty-fourth to Eighty-sixth street, to be 150 feet wide.

An act to open and extend One Hundred and Fifteenth, One Hundred and Sixteenth, One Hundred and Seventeenth, One Hundred and Eighteenth, One Hundred and Nineteenth, and One Hundred and Twentieth streets, between Tenth avenue and the Boulevard.

An act relating to assessments for improving Riverside Park.

An act for the removal of the reservoir on Forty-second street.

An act authorizing and directing the Board of Health to set apart the grounds at the foot of Ninety-fifth and Ninety-seventh streets and East River for the temporary deposit of stable manure till it can be removed from the city.

An act to amend the Consolidated Act as to the Bureau of Buildings.

An act governing the granting of permission to lay pipes and mains in New York city.

An act to provide for municipal buildings.

An act relating to telegraph, telephone, electric light and other wires and cables to be placed underground.

Copies of most of these bills are on file at the Real Estate Exchange.

Of course these matters have no interest to us, but they are given simply to show the kind of work which the Real Estate Committee performs. Each and every one of these acts are considered and the interest of the Exchange in them, for or against, are ably served at Albany. The same paper contains another report of this committee on the subject of building and mechanics' lien laws. They submit a thorough report which is too long for our space, the sense of which is compressed in the following resolution:

Resolved, That the Legislature be respectfully requested to postpone action on any bill purporting to alter or amend in any way the laws relating to buildings or to the Bureau of Buildings in this city until the general bill now preparing by the Board of Examiners shall have been presented.

These proceedings show what a Real Estate Exchange in New York has to look after. Is there nothing going on at Harrisburg every session in which the builders and real estate interests are interested? Possibly not.

WE PUBLISH in full a letter from the old real estate firm of Jas. H. Stevenson & Son, upon the subject of a Real Estate Exchange in Philadelphia. These gentlemen are wrong in attributing the origination of the idea to the *Press*, the REAL ESTATE RECORD was the first to start the idea and the *Press* followed in as it had a right to do.

PHILADELPHIA, Feb. 18, 1886.

Editor REAL ESTATE RECORD,

Dear Sir:

I have read the numerous comments, in your paper, about a "Real Estate Exchange," a notice of which we caused to be inserted in the *Press* a few days ago. I have been actively engaged in the real estate business for the last twenty years, and have often, during that time, thought of such an organization. When a Real Estate Exchange was chartered by an Act of our Legislature, in 1872, and set up business on Fourth Street, below Chestnut, my firm, then known as Stevenson & Detwiler, became members; but the plan did not succeed. Ever since that time I have been thinking about the matter, and my thoughts have been quickened of late by the success of the New York concern, known as "The Real Estate Exchange and Auction Room," (Limited), which seems to be a success, and bids fair to become a great power in that city.

I am confident that such an institution would be of great service both to the Real Estate Broker and to the public. It would secure united and harmonious action among the brokers, and bring about just and equitable principles in their business transactions, especially in the matter of fees and commissions.

An Exchange would be a great bureau of information, whose maps, charts and various useful statistics relating to real estate would be collected for the information of all who might wish to consult them. It is clear that an organization of this kind could readily procure facilities that would be beyond the reach or ability of individual effort. A number of persons having the same interests can accomplish more when working together than when acting separately, no matter how intelligent or energetic the individuals may be. And the membership of a reputable "Real Estate Exchange" would be a strength to the weak and a restraint on the evil-disposed and dishonest; a security for good behavior on the part of all its members, so that the public might safely deal with them, knowing that any violation of good faith would be visited with expulsion from the Exchange, upon proof of the matter.

The junior member of this firm, James L. Stevenson, was present at the opening ceremonies of the New York Real Estate Exchange, April 14, 1885, and then and there caught the spirit that has brought about the present agitation of the matter in this city. He procured all the printed matter relating to that institution and its workings, and has given it much considera-

tion, and it was he that drew up the prospectus for an Exchange in this city and circulated it for signatures, and gave the matter to the *Press* which has caused all this commotion.

The scheme is favored by the following prominent Real Estate Brokers in this city, and by many others whose names do not appear: L. H. Redner, S. W. Levis, F. Sylvester & Bro., Ephraim Clark & Son, W. F. Snyder, N. E. Janney, Colladay & Hartley, J. T. Jackson, E. J. Paxon, E. H. Cloud, Henry Clay J. G. Francis, J. R. Booth, J. H. Wheeler, Savidge & Smith, C. Mathews, Jr , E. V. Lansdale, D. M. Fox & Sons, and

Your humble servants,
JAS. H. STEVENSON & SON,
5th and Library Streets.

N. B.—A meeting will be called shortly at the Board of Trade rooms, and in the meantime those interested can send their names and address to this office.

Electric Light Organization.

Notwithstanding the vast improvements in recent years of the quality of gas furnished for ordinary consumption in Philadelphia, and its comparatively low price, it has alike proved powerless to check the progress of the electric light. It has lso entirely failed to hinder its popularity which we are happy to note is daily increasing both among manufacturers, mill owners, proprietors of stores, and also among private families. There is a grand opportunity now offered for the introduction of electric illumination among the families of Philadelphia. Some people would have us to believe that the people at large do not understand and cannot value the advantages which are comprised in the formation of several companies in New York to purchase the machinery and plant from the "American Electric Manufacturing Company," of that city, with that end in view. But if we are not greatly mistaken, there never was a question agitated in the columns of this paper better understood by, or of greater interest to, the intelligent citizens of Philadelphia. Crafty men who have not the welfare and prosperity of the city at heart, would, if they could, contrive a postponement of this matter for future years, hoping thereby to insure a further lease of the gas company's power, and also hoping by this means to insure a defeat of the wishes of those who desire to see the immediate use of the electric light among private families in the city.

The rapid progress of electric illumination and the advance made by the New York Company in the direction of a solid commercial business is the subject of an extended article in the current number of the New York *Commercial World*. It gives an account of the new companies organized and is very interesting reading.

What do the people say about the organization of a similar company here, and about the grand opportunity now offered for the improvement of trade, commerce, real estate, and comfort of the city of Philadelphia? Are we well enough supplied with organization as well as source?

—Since work has been begun upon the large warehouse at the southwest corner of Eleventh and Market streets the trustees of the Girard Estate have received propositions from five firms in this city requesting them to erect a similar building upon the other half of the block. These concerns offer to rent the structure from the Trust, and the competition among them is great. The Trustees were compelled to set aside the propositions for the present because they have not the funds on hand. The cost of the new warehouse will be about $300,000.

Master and Servant.

AN INTERESTING QUESTION DECIDED BY THE SUPREME COURT.

The Supreme Court's decision in the case of the Clay Commercial Telephone Company *vs.* Root, from Court of Common Pleas No. 1, disposes of an interesting question in the law of master and servant. Root was engaged by the company in March, 1884, as electrician, at a salary of $100 a month, and sued for compensation for the month of November, 1884. The Telephone Company alleged that Root was discharged for bringing suit against the company on an independent contract whereby its credit was impaired, and contended that he should have sued upon his contract for the remainder of the year instead of for a single month.

The Supreme Court holds that under these facts the plaintiff was entitled to recover; that whether a contract for service is entire or severable depends, as a general rule, not so much on the subject or thing to be performed, but on the consideration to be paid; that if the consideration is single the contract is entire, but that when the consideration is apportioned the contract is severable; that Root, therefore, who had stipulated for his salary by the month was entitled to sue for the monthly arrears, although the entire period of service had not expired. The Supreme Court also holds that the mere fact that a servant brings suit against his master to recover a debt due him arising out of a transaction independent of the relation of master and servant is no cause for the discharge of the employé, and that it is no defence to an action brought by the employé against his employer for his unpaid salary.

Stone-masons' Association.

This organization met on last Saturday evening at their hall, 35 S. 17th Street. The nine hour system which was recently adopted by the bricklayers and stone cutters was discussed. Definite action upon the subject was postponed until their next meeting.

No Compromise with the Nailers.

PITTSBURG, Feb. 20.—At the Western Nail Association meeting to-day about twenty members were present. It was decided to stand firm for the seventeen-cent scale and make no compromise with the striking nailers. A more angry set of men could not be found. They seem to have awakened to the fact that the Nailers' Unions went down at their bidding. The men present were all of one mind in favor of continuing the strike as long as there are any hopes of winning. President Loughlin was expelled for compromising. Both nailers and feeders regard the action of the meeting as a grand bluff. They feel confident of success.

Insurance Policies not Attachable.

In 1883 A. C. Hay obtained a judgment against James H. Bond, and in April, 1884, issued an attachment execution against an insurance policy which Bond had previously taken out and made payable to himself, his executors and administrators for the benefit of his widow, if any. At the time of the issuance of said policy Bond was a widower. He subsequently died in June, 1884. Under these circumstances the Court of Common Pleas, No. 4, in which the case was originally tried, adjudged that the plaintiff in the execution could not recover and directed the jury to render a verdict for the defendant. The Supreme Court in an opinion by Judge Green holds that this was a proper disposition of the case, and that an attachment could not issue under these circumstances.

Protesting Against an Assessment.

PHILADELPHIA CAPITALISTS CANCELING CONTRACTS FOR IMPROVEMENTS AT CAPE MAY.

The Guernsey Beach Improvement Company, which has large landed and transportation interests at Cape May and vicinity, yesterday decided to cancel its contracts for contemplated improvements, and to invest no more capital there. This action was induced by the alleged hostility of citizens of Cape May to non-resident property owners. Among the investments which have been made by the company to carry on its business at that place are $185,000 for the steamer Republic, $60,000 for the railroad from the steamboat landing to Sea Breeze, $40,000 for the railroad from Sea Breeze to Sewell's Point, $'0,000 in a hotel and $75,000 in the property of the East Cape May Land and Improvement Company. When the Sewell's Point Railroad was built several years ago, the line was run through the end of a lot owned by a man who had paid $100 for the property. No damages were claimed until recently. A few weeks ago the owner built two pieces of fence across the tracks on his property, and Commissioners were appointed to assess damages. This Commission consisted of ex-Mayor Williams, Eldridge Johnson, late City Treasurer, and Postmaster Hughes. They awarded damages in $690, which was $150 more than the owner had asked. This action against non-resident property-owners (the Guernsey Beach Company being composed of Captain Cone, Alexander Ralph, Alexander Harvey and James Chandler, all of Philadelphia), caused the company to cancel its contracts, among them being one for the construction of a mile of sea bulk-head, to cost $7,500; seven cottages at a cost of $3,000 each, and a sea drive.—*Philadelphia Record.*

—The State Board of Health has instructed its executive officers to take the necessary steps to stop the pollution of the Scuuylkill above Philadelphia.

—It is rumored that the White Horse Hotel building in Ridley Township, Delaware County, Pa., is to be turned into a Camphor mill.

—A Salem firm of glass manufacturers have secured the contract for the glass for the Girard Trust's new building, at Eleventh and Market streets, Philadelphia, amounting to $10,000.

—Among the bills recently introduced in the Senate were two by Senator Cameron to increase the limit of cost of the public buildings at Williamsport and Reading, Pa., in the first-named place to $225,000 and the latter to $250,000.

—Convict labor has become so unpopular in the west, that notwithstanding the advertisements in half dozen leading papers for a month, the State Prison Board, of Illinois, did not receive a single bid at their meeting on the 19th inst., for the convict labor of Joliet prison.

—C. W. Buckholtz, of Pottstown, has been appointed chief engineer of the New York, Lake Erie and Western Railroad. He will have charge of some 4,000 miles of road; headquarters in New York. Mr. Buckholtz is the engineer who built the Shamokin, Sunbury and Lewisburg R. R.

—The Police Committee and Councils will favorably report the bill of Charles Wolters, to build an iron bridge across Mervine street, above Oxford. Mr. Wolters is a large property owner on that street. The bridge will be of great convenience and save a great deal of unnecessary labor.

REAL ESTATE.

A Lumber Exchange.

A meeting of lumber dealers was held on Saturday last for the pupose of taking the preliminary steps for forming a Lumber Exchange. The wholesale and retail firms of neighboring towns are to be admitted to membership.

All Property to be Liable for $100 of Wages.

If Congressman O'Neil's bill passes, real estate as well as personal property will become liable for seizure and sale under execution for personal services of mechanic, laborer or servant, up to $100, in the District of Columbia or the territories.

New Way to Cut Stone.

A foreign device for cutting stone consists of a cord of three steel wires rather loosely twisted together, running around pulleys like a band saw. The swift succession of blows from the ridges of the cord delivered along a narrow line disintegrates the stone rapidly.

Lauber's Brewery Sold.

Messrs. John F. Betz & Son and Mr. Emil Schonenberg have bought Lauber's Brewery, situated on Broad street above Columbia avenue.

It is to be entirely remodeled for fermenting rooms and ice house, for the use of Betz & Son.

100,000,000 Acres.

It is very probable that the House Committee on Public Lands will recommend the forfeiture of over 100,000,000 acres of the public lands, which are forfeitable because of the failure of the grantees to comply with the terms of the grants. Public opinion will, no doubt, influence the action of the House to pass these bills if presented; it remains for the Senate to concur, and it's a question if it will.

The Kitchen Boiler.

Whoever thinks of cleaning out the kitchen boiler? And yet it is just as essential as the cleaning of a boiler to a steam engine. When one realizes how much sediment will settle in a kitchen boiler in the course of a month, that person will at least appreciate the necessity of a thorough and frequent cleaning. When there is an abundance of hot water open the sediment cocks and the steam pressure will drive out the dirt. If landlords would look after this matter plumbing bills would be very much lighter.

A Pointer.

No man can have things put into his house, and enjoy the use of them, at his architect's expense, simply on the ground that the latter omitted to mention them in his specifications. If the client were obliged to tear down or alter his building in order to insert something which ordinary skill and care on the part of the architect would have provided for, he would have a good claim against the architect for the extra cost of making the alteration in this way, but not for the reasonable value of the addition so made to the beauty or convenience of his house.—*American Architect.*

$50,000 Suit for Vexatious Litigation.

In a little hovel on the prairie suburbs of Chicago lies the corpse of Patrick Flaherty's wife, a victim of lack of food and medical aid, and in the next room the daughter lies dying from the same cause. Flaherty is a laborer too old to work and without a dollar to call his own. Last September, after years of litigation, with a wealthy man, now dead, the Supreme Court of Illinois decided Flaherty's title good to a $10,000 property in Chicago. The heirs of Flaherty's opponent then transferred the property to a resident of New York, and Flaherty now has a suit for it pending in a Federal Court, with a prospect of a decision in two years. The heirs in question have also been sued for $50,000 damages for vexatious litigation.

Real Estate Matters of New York.

We learn that the Real Estate Exchange of New York has seen "the busiest and most crowded week this year" from last week's *Record.* Many of the principal brokers and dealers and a great many capitalists were brought together. Quite a number of real estate brokers and agents who have offices at 2, 4, 6 and 8 Pine Street, are preparing to move into their new quarters on May 1st. The Equitable Life Assurance Society, the owner of these premises will proceed at an early date to tear them down and erect a collossal building where they stand. A great deal of property is changing hands in that city. One factory on Rivington and Attorney Streets, worth $52,000, changed hands twice within a month. A good many offers are made and refused, showing that the views of holders are very firm. Several very important real estate sales are announced for next week. Real estate matters are very encouraging in Brooklyn. A large amount of building is under way in different parts of that suburb. In the surrounding towns, a great deal of building is projected and quite a number of New Yorkers have made up their minds to remove from that city to these more inviting resorts.

The Philadelphia Investment Company.

THE CAPITAL STOCK TO BE $2,000,000, FULLY PAID.

A preliminary organization of "The Philadelphia Investment Company" was effected yesterday afternoon at the First National Bank. About a million and a half of capital was represented, and among those present were H. C. Gibson, James W. Paul (of Drexel & Co.), William Arrott, Wharton Barker and William Brockie. It was finally decided that officers could not be elected at the meeting, but the following nominations were made: President William Brockie; Secretary, E. Walls; Treasurer, Henry M. Hoyt, Jr.; Board of Directors—William Brockie, T. Wistar Brown, George S. Pepper, Henry C. Gibson, Morton McMichael, Wharton Barker and William Potter, and Advisory Committee of Stockholders—George M. Troutman, H. E. Smith, John Wanamaker, Gustavus English, Charles B. Wright, Isaac H. Clothier, William Pepper, M.D., Henry Lewis, Craige Lippincott, J. G. Reading, Joseph E. Gillingham, Hamilton Disston, Clayton French, Francis Rawle and Thomas Dolan.

The question of extending the limit of the capital stock from $1,500,000 to $2,500,000 was considered, and it was decided to put the limit at $2,000,000, all of which has been subscribed and will be paid in at once. The company will make investments of money in such channels as are deemed safe and profitable. It is to be purely an investment company, and not a safe deposit or trust company. At the next meeting the officers nominated will be elected. The company will begin operation in a very short time.

The Mercantile Library Real Estate Assessed at $125,000.

The following letter has been sent to the officers of the Mercantile Library Company by the Board of Revision of Taxes:

BOARD OF REVISION OF TAXES, Philadelphia, Feb. 2, 1886.—To the President and Board of Directors of the Mercantile Library Company—Gentlemen:—The building on Tenth street, below Market, occupied by the library has hitherto been exempted from taxation under the belief that the general public were admitted to the building and permitted to use the books. The constantly repeated public declaration of one of the newspapers of this city that the use of the library is limited to its stockholders and subscribers compels us to notify you that the exemption heretofore granted has been removed and that the real estate of the company will be held for taxation for the year 1886 upon an assessment of $125,000.

Respectfully yours,
WILLIAM LOUGHLIN,
GEORGE W. FAIRMAN,
SIMON GRATZ,
Board of Revision of Taxes.

The Widow's Right.

The right of a widow in her husband's estate takes on new and important features from a recent decision of the full bench of the Massachusetts Supreme Court at Boston. A man died and willed his wife, among other things, $2,000 in money, leaving his farm to an only son by his first wife. His personal property, however, failed to liquidate his debts, and his widow's $2,000 could not be paid unless the farm was sold to do it. The son resisted this, but the Court orders the executor to sell the land and pay the legacy in full to the widow, with interest on it from the date of her husband's death.—*Springfield (Mass.) Republican.*

—Our shipyards are beginning to find more abundant employment. The coastwise tonnage has not been increasing as rapidly as other means of transportation. The necessities for more abundant facilities are steadily growing.

—The Real Estate Exchange, of New York, Committee on Legislation, have come to the determination that the exchange shall be represented at Albany, during the session of the Legislature, by an accredited agent, who shall keep the committee informed as to the progress of legislation, and who shall be competent to present the views of the Exchange before the proper committees and other bodies.

—It is understood that the House Committee on Commerce, will report unanimously in favor of Mr. Reagan's bill to incorporate the Atlantic & Pacific Railway Company. This is the project of Capt. James B. Eads, of St. Louis, for the construction of a ship railway across the Isthmus of Tehuantepec, as a connecting link between the Atlantic and Pacific Oceans. The Mexican government has taken the initiative, by making the company a grant of half a mile strip of land across the isthmus, a distance of 116 miles, together with 2,700,000 acres of public land. It also exempts the company from taxation for ninety-nine years, and guarantees that for fifteen years one-third of the net income to the company shall be $1,250,000, annually. The United States is solicited to guarantee that two-thirds of the net income shall equal $2,500,000, annually, for fifteen years. A great corporation, assuredly.

BUILDERS' ITEMS.

Building Matters.

The building trade interests are in pretty good shape. The second month of the year has made a tolerably fair record for itself. More inquiries have been made this year already than during the last three months of last year. The conditions are favorable to enlarged building operations. The enlargement of stores and mill properties continues, and the building industries of the city and State are generally in a healthful condition. The architects are said to be in a happy frame of mind in regard to urban and suburban prospects and real estate and building operations are booming up, some of them of extraordinary proportions. Frame cottages will receive attention, but, as a rule, builders favor brick and stone; but an increased per centage of builders manifest a preference for neat and substantial frame dwellings wherein varigated hard woods are made to produce excellent interior and exterior architectural effects. Prices for building materials have not changed since our last. Lumber is slightly higher. Stone will be more abundantly used this year, and freight rates probably about the same.

The architects generally are fairly at work for spring and summer building. Those who have been interviewed by our representative express the opinion that house-building will constitute more than half of the work that will be done this year. Building material will not be higher than last year. The slate and stone interests are prepared to meet any possible demands that may be made upon them.

The lumber dealers talk hopefully of an active demand for all kinds of lumber, especially for inside finishing. Sanitary appliances of the most approved design and construction are placed before builders and are being adopted. The building interests are recognizing the fact that the cheap methods of construction which obtained a few years ago are the most expensive, and that the best and most durable, regardless of cost, will, in the long run, be the cheapest. We are gradually departing from gaudiness and adopting a system of building and a style of architecture which is in accord with the true principles of architecture. The demands which flow from this departure are building up scores of little industries which in time will become actually necessary in building economy.

Building Notes.

At Dock's Ave., near Seventy-fifth Street, a dwelling is being erected for George Arno, the owner.

Alfred Gardner has contracted for a two-story dwelling on Kensington near Ontario Avenue.

Joseph Cline has a contract for a three-story addition at Twentieth corner of Hampton Streets.

Lawrence B. Valk is the architect of the Tenth United Presbyterian Church, which is to cost $21,000.

The managers of the almshouse at Germantown intend to build a new structure on Stenton Ave.

W. E. Beeten, 519 Commerce Street, is getting a fair share of trade, but has nothing of importance to note

Two dwellings are to be built at Paran Street between Eighteenth and Nineteenth Streets for Daniel Drummond.

Within a few months it is probable that the managers of the Philadelphia Home for Incurables will build a cancer ward.

Jacob Myers, 1315 Sansom Street, says it is too soon to expect much business yet. He has some orders to fill and looks for a good spring trade.

The Girard Trust have not yet made a contract with any of our builders for the intended improvements and additions to be made on Will's Eye Hospital.

Henry Taylor, 1922 Filbert street, is without any contracts at present, but reports prospects as being good for brisk business in the building trade before long.

Mariner & Buckingham, 716 Cherry street, are looking forward to a brisk spring trade as soon as the season opens; at present they are without any contracts on hand.

A house for aged Baptists will soon be built at Germantown on the George Nugent estate, Adams Street. $300,000 will be spent in the project.

Kister & Orem, 129 Sansom Street, have a good many bids in for contracts, and speak very sanguinely in regard to business prospects in general.

William R. Dougherty, 1419 Sansom Street, has no contracts on hand at present, now that the weather is getting better he expects to be busy before long.

A three-story addition, consisting of new class-rooms, bed-rooms, addition to dining-room, etc, is to be built adjoining the Chestnut Hill school and to cost about $7,000.

William C. McPherson & Son, 325 Cherry street, have no large contracts on hand. They report that the prospects are good for great activity in the building trade in the spring.

Walter Cope is the architect of the new stone dormitory building to be erected at Bryn Mawr for the B. M. College. The cost will be about $40,000. Work will be commenced at once.

The furniture factory of James W. Cooper, on Washington Avenue above Seventeenth Street, is being rebuilt on a large scale. The new building will be two-story except the ware-rooms, which are three story. It is almost complete.

Mr. Lindley Johnson, 431 Walnut Street, has prepared plans for two cottages at Germantown, containing eight rooms and bath-room. They are to be built of the local stone. The roofs are of Michigan shingles. The work will be begun as soon as the weather will permit.

Work will begin on the Cahill High School, corner of Broad and Race Streets, April 1st. The building will be 110x135 ft., three story and basement and the latter will be above the level of the pavement. The edifice will accommodate 600 pupils and the style of architecture will be Gothic. E. F. Durag is the architect.

Allen B. Rorke, 1423 Walnut street, has the contract for the large building to be erected for the Girard Estate, corner of Seventeenth and Market streets. One hundred and fifty men are at present employed on the stone work of the basements, excavating earth, and in making wooden girders for the first floor. Messrs. Hood, Bonbright & Co. will occupy the building when completed. The work is being pushed on with the greatest activity on the part of Mr. Rorke.

J. B. Doyle, 907 Filbert Street, has the contract for the new market house at Ninth Street and Girard Ave. He has also several other contracts of smaller size to fill. He has a bid in for a job of an extensive character at the corner of Seventh and Arch Streets, the building to be occupied as a store below and a factory above. The bids are to be opened on Monday, February 15th. Mr. Doyle says: "prospects are good for an excellent spring trade. Many orders are coming in already, although it is so very early in the season."

Collins & Aulenrieth, architects, 140 Walnut street, are making plans for a building, corner of Seventh and Arch streets, for Henry C. Lea. The building will extend 70 feet on Arch and 132 feet on Seventh street; six stories high, with basement; the front ornamented with terra cotta. The lower story will be rented for stores, and the upper for manufacturing purposes. The contract for building has not yet been given out.

George F. Payne & Co., 1211 Sansom Street, are building an elegant and large dwelling-house at Chestnut Hill for Louis C. Gratz, secretary of the Germania Fire Insurance Company, 413 Walnut Street, to cost $40,000. They are also making extensive improvements at the 50th Baptist Church, Seventh street and Susquehanna avenue. The church has been in an unfinished condition for several years, but now the sum of $10,000 is to be spent upon its improvement. The entire interior will be plastered and finished anew throughout, and an elegant pulpit and pews put in. The entire finishings will be of cherry and pine. The work is being done under the personal supervision of Pursell & Fry, architects, 119 South Fourth street.

Building Permits.

Two-story addition to store and house, 16 ft. by 10 ft., Seventeenth, between Federal and Wharton streets, to McFetridge & McConnell, 1608 Spruce street.

One-story brick building, 48 ft. by 216 ft., Thirty-first street and Susquehanna avenue, to J. Rush & Son, 1229 North Eighteenth street.

Two-story back brick kitchen, 16 ft. by 12 ft., 1400 Master street, to Adam C. Ackerman 1400 Master street.

Addition to a frame house, 6 ft. by 27 ft., Edward and Margaretta streets, to Samuel Minick, 4801 Edward street.

Addition to first story, 253 North Ninth street, to L. Douglass, 1632 Bailey street.

Three two-story brick dwelling houses, 14 ft. by 28 ft., Hutchinson, between Somerset and Cambria streets, to Jacob Marsch, 2515 Franklin street.

Two brick stores and dwelling houses, 15 ft. by 30 ft., Ninth, between Willow and Noble streets, to Robert Hamilton, Germantown.

Ten brick dwellings, 15 ft. by 34 ft., Lawrence, between Leithgow and Somerset street, to L. M. Eckhard, 1207 Fairmount ave.

Fourteen two-story brick dwellings, two 14 ft. by 45 ft., twelve 15 ft. by 45 ft., Mountain, between Nineteenth and Twentieth streets, to John Leonard, 1402 South Twentieth street, and John Devlin, 2317 Lombard street.

One brick carhouse, 92 ft. by 130 ft., Lehigh ave., between Hancock and Mutter streets, to Samuel Hart, 923 Noble street.

Two two-story brick dwellings, 13 ft. by 42 ft., Sixth, between Cambria and Somerset streets, to C. A. Snyder, 1710 Master street.

One-story brick building, 14 ft. by 38 ft., S. E. cor. of Seventeenth and Fairmount ave., to Kisher & Owen, 129 South Seventh street.

Four brick buildings, 15 ft by 52 ft., Twenty-fifth and Montgomery ave., to Fred. A. Hanby, 1611 N. Twenty-sixth street.

Two-story brick mill, 60 ft. by 50 ft., Trenton ave, North of Tioga, to Pennsylvania Lumber Company, Broad and Mount Vernon streets.

Three two story houses, 12 ft. by 42 ft, Fairhill, between Cambria and Indiana streets, to John Schieben, Fairhill and Cambria streets.

INSURANCE NOTES.

500 Fire Box Keys.

We learn that his honor the Mayor has taken advantage of the suggestions editorially thrown out by the REAL ESTATE RECORD, and has issued 500 more fire box keys. This is only half enough, Mr. Mayor, for it is just as easy to find a thousand reliable custodians as it was to find 500. We will guarantee to place 500 extra keys into the hands of reputable citizens, and we will stand responsible for their good behavior. Each real estate conveyancer and broker in the city should have one, and a more trustworthy body of citizens cannot be found anywhere.

Do we Want More Fire Patrols?

Of course we do. No sane man would argue to the contrary. The patrol system affords a certain positive, protection to property that cannot be obtained in any other way. One man of the McDevitt stripe, with his practical anti-red tape way of doing things, is worth a thousand theorists, and it seems passing strange that the fire insurance companies have not seen the necessity of extending the sphere of Capt. McDevitt s usefulness. Just think of it, one patrol company for this great city, with its millions of insured property, while at any moment we are liable to have several disastrous fires raging at different points! We should have at least four patrol companies, located at different sections of the city, Capt. McDevitt acting as the chief of the department, with competent and reliable assistants, and traveling facilities equal to every emergency; and the city should be willing to bear its share of the expense. The REAL ESTATE RECORD has more faith in a single ounce of prevention than it has in a thousand tons of the most heroic cure. It believes in doing things the short way. A practical system, in the hands of practical men, is what it advocates. Then let us have the patrol system enlarged, and extended, and at once. If it is so good a thing—and no one can question it—in its present diminutive form, why not make it a department worthy the name it bears and the work it is doing?

Fire Records.

At No. 105 Division street, New York, the blacksmith shop of Frederick Horne, and Posne's grocery, No. 195½. Damage, $1,500.

At Montgomery, Ala. Feb., 5, the building of the Star Bottling Co. The ground floor was occupied by carpenter shops. Insurance on building, $3,500; loss, $13,000.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

CONVEYANCES.

PHILADELPHIA.

Mortgage, $500; has 5 years to run from Dec. 1884, on 154 acres land Wilkin County, Minnesota. Same Estate.

Items of Interest.

—New York is to have a grand new theatre.

—The Clay Telephone will shortly resume its halloo business.

—There is more activity in real estate offices and brokers in New York city than for months past.

—Philadelphia has 129 square miles of territory to cover with six hook and ladder trucks and thirty-two fire engines.

—The annual membership of the Real Estate Exchange, of New York, now numbers fifty, and the cry is "still they come."

—The Massilon Bridge Company, Massilon, O., has the contract to erect two iron bridges at Grand Rapids, Mich. Cost, $41,000

—Last year, 226,382 males and 168,964 females landed at the various ports. The greater number were between the ages of 15 and 40.

—From dispatches from Trenton, it would appear that the Pennsylvania Railroad Company owns the New Jersey legislature body and soul.

—The Allegheny Public Library, of Allegheny City, Pa., will erect a large building. Are ready to receive proposals from architects. Steam heat will be used.

—A consolidation of the Cart Owners' Unions of the northern and southern sections of the city has been effected at a meeting held in Bricklayers' Hall.

—A good deal of deference is paid to the New York Real Estate Exchange, by the legislators at Albany, and it stands high in the estimation of the members.

—A telegram from Panama, says the French Commission are making a preliminary inspection of the work on the canal, and preparing for the reception of the Count de Lesseps.

—Another meeting was held in the Grand Central Hotel, New York, last Tuesday, when further action was taken towards the establishment of the Lumbermen's Exchange in that city.

—Chief Wilson, of the Coin Division, of the Sub-Treasury, New York, says that out of the $200,000,000 that have been changing hands during the last four years there is a surplus of five cents.

—An advance is reported in some insurance stocks; Delaware Mutual this week went up $5.50 per share; Fire Association, $11.50; North America, 50c; Lumbermen's, $3.50 and Reliance, $7.50.

—The Equitable Life Assurance Society has just published its Twenty-sixth Financial report. It issued new assurances amounting to $96,011,378, and shows a gain of the surplus fund of over $3,000,000.

—The wages of lady type-writers are $8 to $15 per week, but when the employer is black-mailed to the extent of a year's salary the luxury is an expensive one. This is the experience of one of our leading merchants. —*List.*

—Very practical work in the direction of land transfers is being accomplished in New York by private enterprise. The introduction in that city and Brooklyn of title insurance is meeting with the same success that has attended it in Philadelphia.

—Charles H. Humphreys a real estate agent, connected for some years with the Girard Life Insurance, Annuity and Trust Company, left suddenly, last Friday, with $10,000, more or less, made up of peculations from tenants.

—J. A. Griffes, trading as J. A. Griffes & Co., has sold the paint, glass and roofing business, at 2432 Kensington avenue, to Samuel Watson and Wm. Haughey, who have formed a copartnership and will continue the business in all its branches, at the old stand.

—The German Cabinet Maker's Beneficial Union has instructed its Executive Committee to prepare and place in the hands of manufacturers a circular to the effect that it is the desire of the Union that after May 1st its members shall work but eight hours per day.

—The Operative Plasters' Mutual Protective Union, at the last meeting, adopted a resolution declaring that on and after the first Monday in May, members of the Union shall work nine hours per day for five days in the week, and eight hours on Saturday; wages to remain $3.50 per day.

—Sealed proposals will be received at the office of chief quartermaster's department of the east, Governor's Island, N. Y., until March 1, for the construction of one or two sets of barracks of brick at Fort Hamilton. Plans can be seen at the office of the post quartermaster, Fort Hamilton, N. Y.

—The *American Architect* says: "If you will use quartered yellow (hard) pine you will not be troubled by its splintering and checking, and will, moreover, obtain a very handsome wood finish. Sap-run stock should be avoided, of course. It would cost rather more than white pine of equal quality."

—State laws often do harm. The New Hampshire lawmakers have driven $122,00 ',-000 worth of insurance capital out of that state. The *Insurance Age* says: New Hampshire has 3,181 manufacturing establishments, having capital of over $50,000,000 and producing annually $74,000,000 worth of goods. Now, where is the insurance to come from to make it *safe* to produce these goods?

—There is what might be called a rage or craze for artistic doorways and windows; much money is now often laid out upon doorways, as in years past was spent on the windows of a whole house, and there is apparently no limit to the expense to which house building will go in the matter of doorway decorations. The movement is an excellent one, and the result of an effort to overcome the tiresome similarity of newly erected Philadelphia houses.

—It is to be hoped that the reports that another war is to break out among the Trans-Continental Roads is not true. The average reader snuffs at this statement and says what odds is it to us whether they fight like Kilkenny cats. The more they fight the better for us. Not quite so fast. Competition in all things is absolutely necessary, but beyond a certain point is it protective of no good but harm. Confidence is absolutely necessary to prosperity. It will be far better for the interests of the entire country that the railroad companies should come to harmonious understandings, because, then capital would flow into new enterprises with more confidence, and there would be a general improvement in all those numerous industries dependent upon activity in railway construction.

GUARANTEED ROOFING PLATES.

From the "Ironmonger" of December 5th.

MESSRS. MERCHANT & CO., of Philadelphia, may justly claim to have revolutionized the roofing-plate trade in this country. When, a year ago, they became the representatives forthe United States of Gilbertson's Old Method and Camaret plates, they were enabled, with the aid of the manufacturers, to give a positive and definite guarantee of the quality of goods bearing their brand. This could only be done by taking the entire product of the works, the proprietors being under contract to maintain the standard of the production. This, they have not only done, but the quality has been improved.

The guarantee thus given by Merchant & Co., was the first of the kind ever issued, as to quality of material, coating and assorting. In fact, the understanding between them and the makers, placed the Philadelphia house in a position to do what had heretofore been impossible with most importers, who buy of London or Liverpool agents, and who are, therefore, not in direct communication with the manufacturers. Messrs. Merchant & Co., therefore, claim to stand alone among importers as the only direct representatives of works in Wales, whose owners are under contract to keep up the standard of a guarantee and to sell their brand to no other parties, either in England or the United States. Of course this policy of guaranteeing goods has been followed by others, but as they purchase of commission agents in London, the consumer naturally feels a doubt, as to whether the guarantees of such dealers can always be relied on as effective.

The course adopted by Merchant & Co., has resultd in largely increased sales, and many architects and builders have found it to their advantage to use the guaranteed plates. In some cases, however, contractors have, to enhance their profits, substituted inferior brands for those specified. Finally, at the request of numerous architects and riliable roofers, who have suffered through competition with these unreliable parties, Merchant & Co. have succeeded in making arrangements with the manufacturers to stamp each sheet, not only with the name of the brand, but with its thickness or guage. The effect of this, the firm feel satisfied will bring about a better class of roofing work than has heretofore been attainable, and resnlt in great benefit to all owners of property as we llas to responsible roofers, architects, and others engaged in the building trade.

THE PHILADELPHIA

Real Estate Record

AND

BUILDERS' GUIDE.

DEVOTED TO REAL ESTATE, BUILDING, ARCHITECTURAL AND INSURANCE INTERESTS.

[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL. I.—NO. 8. PHILADELPHIA, MONDAY, MARCH 1, 1886. PRICE 15 CENTS

A Scheme for a Real Estate Exchange in Philadelphia.

A SCHEME "To create in the City of Philadelphia a centre for dealings in Real Estate and to establish in said City a room for selling Real Estate and Securities at auction: and furnish a general meeting room for Real Estate dealers and brokers, to unite the various Real Estate and building interests of the city of Philadelphia and adjacent counties; to adjust controversies between members, and to furnish full information by collecting statistics in regard to Real Estate and building matters, and preparing and keeping files of maps and other records relating to Real Estate and subjects connected therewith. This will include information of all Legislative Acts of the City and State Governments, reports of the various committees on taxation, street and other improvements, and of awards and assessments affecting the realty in the city of Philadelphia and neighborhood."

The meaning of this is that the vast Real Estate interests of this city should be aroused to the fact that those representing the largest pecuniary interests in the city—the most solid, reliable, safe and permanent investment interests—should be banded together for mutual protection and benefit and for the security and greater advantage of the public.

It is not difficult to realize and believe that this city, with an area of 83,000 acres, now covered by the enormous number of 180,000 buildings, the value of whose real estate (including the above number of buildings) is estimated at more than $1,600,000,000, is to-day without a Real Estate Exchange.

The objects and aims then of this Exchange are not merely the maintenance of an auction room and the affording of a convenient place of reunion for persons connected with the Real Estate business, but they may be more broadly stated to be the following, viz:

To secure united and harmonious action on the part of all persons interested in any way in Real Estate, to inculcate just and equitable principles of business, to oppose objectionable legislation and to support or suggest that which is necessary or desirable, to gather and supply valuable statistics and other information as to all matters affecting Real Estate interests, to make and strictly enforce, just, equitable and uniform rules as to commissions and fees in Real Estate transactions, and, as to the conduct of all such transactions, to simplify and improve the present inefficient method of obtaining the standards of value of Real Estate; and to provide for the inexpensive and speedy settlement of disputes and differences in such transactions by means of arbitration.

In other words, the one main object of the Exchange is to weld together for the purpose of mutual protection and mutual interest into one homogeneous body all persons interested in Real Estate, not only the brokers, agents and other dealers in Real Estate, but also the landed proprietors, the owners of the soil, the agents who manage their estates, the architects who design their houses, the contractors or mechanics who build them, the lawyers and conveyancers upon whose professional skill they rely, and the capitalists and investors who either purchase such property or lend money secured by mortgage thereon.

Last, but not least, it is one of the objects and aims of this Exchange to protect public health by favoring an improved system of sanitation, and, by endeavoring to secure a rigid enforcement of the building laws, to prevent the sacrifice of human life to the greed and avarice of unscrupulous builders.

It is intended also that this Exchange shall be a bureau of information, where maps and statistics relating to the Real Estate interests of the United States may be consulted.

The dealings in Real Estate have assumed such proportions that the necessity for regulating and systematizing them has long been felt. This could only be done through an organization in which the individual is subordinate to the general interest, and independent action is controlled for the good of the many, and where, through coöperation, facilities can be obtained that would be beyond the reach of individual effort.

The Corporation to consist of all original subscribers to the capital stock and all persons to be hereafter elected members, as herein provided, and to whom ten shares of the capital stock shall be transferred.

Any respectable person may be elected to membership. Such person must be elected by his individual name. Firms, or corporations as such, cannot be members. This rule shall not apply to original subscribers, but to all who may be elected to membership or annual membership hereafter.

No person to whom stock may be transferred shall be entitled to any of the rights and privileges of the Exchange and Auction Rooms until he has been elected a member thereof by the Board of Directors, and no person or corporation shall hold at one time a greater or less number than ten shares of the capital stock.

Annual members shall pay into the Treasury a sum equal in amount to six per cent. of the par value of a full membership certificate.

The Exchange shall be open, to members only, from 10 to 11·30 A. M., and from the close of that hour until 4 P. M., to the public.

Members shall, when required, show their tickets between 10 and 11·30 A. M.

REAL ESTATE RECORD

AND

BUILDERS' GUIDE.

VOL. 1.—NO. 8. PHILADELPHIA, MONDAY, MARCH 1, 1886. PRICE 15 CENTS

THE PHILADELPHIA
REAL ESTATE RECORD,
AND
BUILDERS' GUIDE.
PUBLISHED EVERY MONDAY, AT 727 WALNUT STREET.

TERMS:
One Year, in advance, - - - - $5.00
All communications should be addressed,
REAL ESTATE PUB. CO.

PHILADELPHIA, MONDAY, MARCH 1, 1886.

BUILDING lots are too often neglected; little attention is paid to them until a buyer comes along, and then the owner feels mortified because he has nothing better than an ash-heap or a garbage yard to offer. This neglect is altogether wrong; it is an expensive luxury that lot owners should not—even if they are financially able—indulge in, because it is neither creditable nor profitable.

If the average lot owner has a horse for sale, he takes good care to have him properly groomed at least.

If it pays to groom a horse, in order to improve his looks, and make him seem more pleasing to the buyer, why will it not pay to groom your building lots, if only for the same reason?

Where it can be done without too great cost, building lots should be leveled and grass seed sown upon them.

The ashes and garbage of the neighborhood should be excluded, at any cost; a neat, cheap fence should be erected—if whitewashed so much the better—and bill-stickers should be made to keep off.

A little care given to vacant lots improves the appearance and enhances the value of the property in the whole neighborhood, the houses will command better rentals and sell for better prices, the lots cease to be eyesores, become inviting to buyers, and the chances for a sale are increased tenfold.

WE are to have a steel bridge across the Schuylkill at Market Street to all appearances. The Councils Committee decided that one, instead of two bridges, should be built and that one should be steel instead of stone. A strong sentiment has been worked in favor of a bridge on Walnut Street, but as the city is not rich enough to have two fine bridges they will put up one. There is no doubt whatever, but that the opinion presented by Mr. Furman Sheppard and others in favor of a bridge at Walnut Street are as they state, and that we are in need of a bridge there, but the city must wait. Naturally Mr. W. C. Allison, the car builder, opposed the proposed bridge, as it would interfere with his yard room. Among those who were present at the meeting of the committee were B B. Comegys, A. J. Antello and Samuel Wakling, who spoke in favor of the Walnut Street scheme. Mr. David W. Sellers represented R. J. Malone, of Lancaster, who made a bid of $1,000,000 for a stone bridge on Market Street. Surveyor Smedley thinks a bridge 76 feet wide, steel canta-lever, can be built at Market Street for $800,000, if the present piers can be utilized. The cost of a bridge at Walnut Street, he thinks would be $855,000, if it extended from 23d to 32d Streets; if it terminated at 31st Street, the cost he thought would be $575,000. Henry Clay argued against a stone bridge and against any bridge at Walnut Street, and moved that $300,000 be voted for a steel bridge at Market Street. The proposition to build a bridge at Walnut Street was voted down. After a thorough discussion, the $300,000 motion prevailed, and the piers will be examined by experts to see if they can be used.

GLASS flooring is said to be growing very popular in France. The industry in this country has a great deal to do to popularize it with builders and owners. Glass is used now where light is an absolute necessity, but why it should not be used throughout the entire floors of stores and warehouses, unless it is on account of its extra cost, there seems to be no justifiable reason. It could be made with tongue and groove, to lay the same as floor boards, with iron beams. It would certainly add to the safety of buildings against fire, and although the first cost would be greater yet it would outlast the building itself. Traulionie, a Frenchman, gives the tensile strength of glass as from 2,500 to 9,000 pounds per square inch, according to kind; crushing strength, 6,000 to 10,000 pounds per square inch; transversely, by his own trials, Milleville, N. J., flooring glass, one inch square and one foot between the end supports, breaks under a certain load of about 170 pounds; consequently, it is considerably stronger than granite, except as regards crushing, in which the two are about equal. Store floors made of glass would certainly make dark and dingy cellars, now useless, available for many purposes. Glass should be a good thing for kitchen floors, and we hope to see it tried before long.

THE Pennsylvania Railroad Company does not propose to take any immediate action to meet the cut of the Baltimore and Ohio Company on passenger rates to San Francisco, which are $42.50.

THOROUGHLY efficient fire extinguishing devices are certainly needed, despite the great advance which has been made in them during the past few years. A test was made last Wednesday, upon the police boat "Stokely," of a new standard branch pipe invented by Adam J. Morse, of Boston, designed to rapidly extinguish fires in holds of vessels or in warehouses. Mayor Smith was present, accompanied by members of the Board of Fire Underwriters, the Fire Marshal of the Pennsylvania Railroad Company, and several interested insurance agents. A stream was thrown 174 feet from a two-inch nozzle. The Mayor was pleased with the action, and ordered one to be placed upon police boat No. 2.

The pipe is about 4 feet in length, working upon a pivoted standard on the deck, and capable of being elevated or depressed, and graduating the size of the stream discharged. The Mayor said that "one man can set the apparatus at any angle and manage the stream as readily and effectively as eight men under the present system of using hose, and without fatigue."

WE are to have a telephonic communication between this city and New York. The Councils' Electrical Committee have been requested to grant permission to the American Telephone and Telegraph Company to lay underground wires on a number of streets for the purpose of completing telephonic and telegraphic systems with those other places. Philadelphia and New York ought, certainly, to be telephonically connected. The scheme is practicable, and there seems to be but little, if any, more difficulty in conducting a conversation at that long distance than at shorter ones.

THE House Committee on Commerce it seems has decided, by a vote of 9 to 4, to favorably report the Eads' Ship Canal bill, which provides a guarantee of $37,000,000 by the Government.

The bill was amended to provide that the ship with which the work shall be tested shall be 4,000 instead of 3,000 tons. Mr. O'Neill, and perhaps one or two others who voted for the bill, will oppose it in the House, their votes having been given with this understanding, and for the purpose of allowing the House to pass upon it. It is not believed the bill will pass, although Capt. Eads is working with great earnestness to secure favorable action.

LABOR, generally, is rushing into organizations and patterning after capitalists in their plans.

Free Lumber or Not?

A representative of the REAL ESTATE RECORD interviewed some of our leading lumber dealers in reference to the probable effect of the proposed placing of lumber on the free list, as contemplated by the Morrison bill recently reported in the House. There is at present a duty of $2 per M on Canadian lumber, most of which consists of white pine. At present New York lumber dealers are competing with Philadelphia and Williamsport in Canadian lumber despite the duty. The removal of $2 duty will naturally increase the Canadian supply, and correspondingly lessen the demand for Michigan pine, and lessen the margins of Northwestern dealers. The reduction will, of course, be of benefit to the consumer, and our local dealers apprehend that they would be no worse off under the proposed change, that is, they can make as much money out of Canadian as Michigan. Hence, so far as they are personally concerned, their interests are not jeopardized.

Hemlock cannot be sent from Canada to compete with ours, as they do not have it in large quantities. Hence, our hemlock men are not concerned, excepting that their prices for hemlock would be depressed by the lower prices for white pine from Canada. The railroads, for the sake of a long haul, would naturally make reasonable terms with the Canadian people.

The Northwestern lumber interests would suffer, but the middle men would not, and the retailer might be benefitted. But after all the question arises, would not the Canadians simply advance their lumber $2, or near that amount, and would not the reduced duties simply go into their pockets?

Shall We, or Shall We Not?

The *Ledger* remarks, very aptly, in reference to the sale of some of our public franchises:

"The Water Committee is to consider, tonight, a proposition for the sale by the city of its water works. The sale of the gas works has been under consideration for some time. The enterprising syndicates of capitalists, anxious to invest their money in such establishments, appear to have overlooked the Fire and Police Departments and the public schools. These do not produce a revenue, it is true, but arrangements might be made to do the work by contract with the city and to pay for the plant out of the profits in a manner entirely satisfactory—to the syndicate."

The anxiety of syndicates to buy our water works and gas works will start the public to thinking, if nothing else will, and it is to be hoped that it will eventually start them to voting—voting a better class of men into Councils. We have some of the ablest Councilmen now in our service that any city can show, but unfortunately they are too few in number to protect us against the possibilities of unwise legislation.

The selling of our water works and gas works to corporations is a movement in the wrong direction; it is taking the back track. It is a dangerous retrogression; it is unrepublican; besides, it is dangerous. In Western Pennsylvania towns franchises are granted to any company who desire to construct natural gas pipe lines. If we are to make any radical departure, let us make one that will allow of competition between those who desire to supply us with water and gas; and as to gas, let permission be allowed regardless of the system by which gas is produced. A great many difficulties will be removed by such a go-as-you-please policy as this. It may be open to some practical as well as legal objections, but if we propose to run into extremes let us have a good supply of them to choose from.

Is this the Way to Do It?

Architects, builders, manufacturers, educators and others are deeply interested in everything which points in the direction of solving the question of technical education. There is a great deal of nonsense written on this subject. Our experience in technical education is very limited. European countries are driving ahead, preparing an army of skilled artisans, and by that means they will be able to offset many of the advantages which we naturally possess. The people of the United States cannot, with all their energy and invention, compete with European countries, unless they adopt the system of technical education, and develop it to a corresponding degree of perfection. Mr. Van Taube, of the Grammarcy Park School, New York, gives some of his experience in a few practical words, as follows:

"There are at present thirty boys in this school, of ages varying from ten to eighteen years, who engage in technical work two hours every afternoon. Every mechanical work they undertake stands in co-relation with, and in gradation to, their theoretical instruction in the forenoon. I propose that the training in our school-house shall fit a young man not only for one but for many trades, such as work in wood and metals, plain and ornamental, work in solders, enamels, lubricants, dyes, and other applications of chemistry work in connection with mechanical appliances and steam engines, telegraphic and photographic work, etc., all of which can be reduced, on an analysis, to a few fundamental final processes, and can be confined to the use and instrumentality of a limited number of tools. That an intermediary step between the kindergarten and the actual trade is an absolute necessity in this country, there can be no doubt, and this gap the tool-house fills. If a young man without previous training were offered, for instance, as an apprentice to a carpenter, or blacksmith, or any other mechanic, he would simply laugh and say: 'You can't expect me to do anything with him, now that he is almost a man. He can never learn my trade. His fingers are already clumsy. He can never acquire the quickness of perception necessary to a good mechanic. It would be useless for him to attempt it.' And he would be right. It has at last come about that in the Russian public schools the learning of a trade is made obligatory, and throughout Europe polytechnic institutes, with courses of manual training, have been placed in the curriculum of the schools. That manual training will become an adjunct of free education in this country I have no doubt, for it is in America that mechanical industry is the exponent of the highest power, and primary education in mechanical pursuits is, therefore, or will be, the stepping stone to the highest honors and achievements."

Will the Plan be Modified?

MEETINGS of the employés of the Pennsylvania Railroad Company were held at several places last week. It is barely possible that the entire insurance programme will be opposed. The brotherhood of locomotive engineers and the brotherhood of firemen have been considering the whole plan. There are many features about it they do not like. They feel that the system may be extended to other railway corporations, and they don t wish to see a system established by the Pennsylvania Company which contains any elements of injustice or even unfairness. It is to avoid a bad precedent that they take such determined action. If the counsel of the organization is taken, a decided stand will be made against any insurance plan, but such as will stand the test of a thorough investigation. There is another reason why the locomotive engineers are opposed to it; they have an insurance feature in their own organization, which is one of the strongest cohesive features in it. Without it their organization would be less vigorous and more liable to disintegration. The railway managers know this and are slaying two birds with one stone. The are making friends with their employés and are dealing a blow at labor organization, which organized labor cannot very easily parry. It will be interesting to see what the leaders will do. If other railroad companies are generally adopting the system of labor organization, it will take away much of the attractiveness of trades unionism, which during the past two years has given so much attention to insurance. The railroad companies will insist on the compulsory feature of the case, while organized labor will oppose it. Last week the pay car went over the Philadelphia, Wilmington, and Baltimore Division and the New York Division, and men voted for or against the proposition. The voting has been generally against the plan as it now stands. The opposition to it was organized through the associations of engineers and firemen.

THE chairman of the sub-committee on the distribution of the unexpended tax recommended that it be disposed in the following manner: $50,000 for restoring the portion of the Park destroyed by the intercepting sewer; $10,000 for repairs to Memorial Hall; $7,500 for paving Washington Avenue from Twelfth Street to Broad; $7,050 for bridges at the county line; $10,000 for repairs to the Girard Avenue bridge; $16,000 for a sewer on Girard Avenue from Broad Street to the Aramingo Canal; $35,000 to the Guardians of the Poor for rebuilding the burnt buildings, and $1,500 additional to the pay-roll; $10,000 for more electric lights; $5,000 for putting wires under ground; $1,000 for music in the public squares; $4,800 for 100 additional gasoline lamps; $3,000 to Gilbert & Olmsted for professional services, and $4,821 to the Philadelphia, Wilmington and Baltimore Railroad Company for damages in opening Fifteenth Street. To these were added $8,000 for hygenic schoolbooks for the public schools, and $1,700 for repairs to the Chestnut Street bridge, making a total of $175,371.

REAL ESTATE.

Plumbing.

The Board of Health has finally adopted rules and regulations for the enforcement of legislation passed last June at Harrisburg. This matter has been before the Plumbers' Association and the Board of Health for some time. The plumbers have been very urgent in their reports to secure the establishment of these rules.

The rules require the registration of every plumber or person engaged in the business before April 1, 1886, and regulate the plans and specifications, quality of material and workmanship, inspection, material of house drains, arrangement and ventilation of the same, construction of vertical soil or waste pipes, quality and weights of soil pipes, joints and connections, traps, syphonage, drip or overflow pipes, water closets, rain water conductors, steam waste, cesspools and cellar drains.

Building Statistics.

There was expended during 1885 in the erection of buildings in the city of New York the sum of $45,000,000, besides $7,000,000 expended in the alteration of existing buildings. The following table shows how these figures compare with the corresponding returns from other cities:

	Estimated Population.	Outlay on Buildings.	No. of Build'gs.
New York	1,350,000	$52,000,000	3,368
Chicago	650,000	19,000,000	3,133
Boston	400,000	12,000,000	1,664
St. Paul	125,000	8,500,000	3,451
Minneapolis	140,000	9,700,000	3,370

Minneapolis expended about $69 to each inhabitant; St. Paul, $68; New York, $38; Boston, $32, and Chicago, $29. The average cost of the buildings in New York was more than in the other cities, that in St. Paul being the least. Among Chicago's buildings were nearly 350 "flats." The number of dwelling-houses erected in St. Paul and Minneapolis was not only proportionately but actually greater than the number built in the other cities.

Legal Decision.

A case has just been decided in the Supreme Court showing the legal relationship between a special partner and a general partner. The case was that of Conrow *vs.* Gravenstine. It was an action on a promissory note, brought in the court below, by George T. Gravenstine against William H. Brown and Joseph D. Conrow, trading as William H. Brown & Co. The note was drawn by the defendants to the order of Walls & Blackiston, and by them indorsed to the plaintiff. Conrow in defence set up his special partnership, filing the following affidavit (*inter alia*): "In January, 1881, I entered into a special contract with William H. Brown as a special partner, under the act of 1836, and its supplements. The contract was duly recorded and published, affidavit filed, etc. I paid in the full amount of my capital, no part of which was ever drawn out by me, nor did I ever receive anything as interest or profits thereon. I never acted on behalf of the firm, or in any way interfered with the firm's business. The plaintiff had actual notice that I was a special partner only. Deponent suggests that he is not liable for the debts of the firm defendant, unless the use of the words '& Co.' is a violation of the Act of 1836 and its supplements." Plaintiff thereupon took a rule for judgment for want of a sufficient affidavit of defence. This rule the Court made absolute, entering judgment for the plaintiff against Conrow. Conrow thereupon took this writ, assigning for error the above action of the Court. In the opinion by Mr. Justice Green, affirming the judgment, it is held that, where a party sued as a general partner in a firm sets up as a defence in an affidavit of defence the existence of a limited partnership, he must set out specifically that all the provisions of the Act of March 30, 1865 (P. L. 46), have been complied with. The omission to aver the posting of a sign in a conspicuous place, giving the names of both general and special partners, is a fatal defect.

Wharf Leases Sold at Auction.

M. Thomas & Sons, sold three year leases on the wharves of the Schuylkill River, on Tuesday, through J. D. Ellis, the right-of-way agent of the Schuylkill East Side Railway agent. The Pine street wharf went for $300; Wood street, $13.25; Cherry street, $150. The Race street wharf went to R. Patterson & Sons, Highway contractors, at $825.

The successful bidders for wharves on the Delaware River were: Philip Fitzpatrick, Davis' Landing, $20; Pennsylvania Railroad Company, Shackamaxon street, $300; Northern Liberties Market Company, Callowhill street, $2,500; John White & Son, Almond street, $500; Kensington Engine Works, Vienna street, $125; Henry C. Patterson, Poplar street, $300; Marshall Bros., Marlborough street, $300; Baeder, Adamson & Co., Allegheny avenue, $400; Gloucester Ferry Company, South street, $800.

Real Estate Sold at Auction.

James A. Freeman & Co., auctioneers, sold on Wednesday at the Philadelphia Exchange the following:

Three-story brick dwelling, 3639 Filbert street, lot 14 ft. 7 in. by 180 ft.	$2,325
Lot on Walnut street, E. of Fifty-fifth street, 30 ft. by 220 ft. 2 in	600
Three-story brick dwelling, 3909 Aspen street, lot 15 ft. 6 in. by 95 ft.	3,300
Two-story brick dwelling, 2330 Stewart street, lot 13 ft. 9 in. by 37 ft. 8 in	1,446
Lot, 1519 Stillman street, 18 ft. by 88 ft	587
Two-story brick house, 713 Hepburn street, subject to a yearly ground rent of $24; lot 14 ft. by 51 ft	1,390
Two-story brick dwelling, 2332 Stewart street, lot 14 ft. by 37 ft. 8 in	1,440
Three-story brick house, 424 Fothergill street, subject to a yearly ground rent of $15; lot 14 ft. 6 in. by 39 ft. 6 in	1,420
Three-story brick dwelling, 918 N. Fifth street, and three-story brick house, 915 Randolph street, lot 19 ft. by 142 ft	4,700
Four-story brick store and residence, S. E. cor. Thirty-seventh and Lancaster avenue, lot 18 ft. 1 in. by 110 ft	7,600
Three-story brick dwelling, 3641 Filbert street, lot 15 ft. 4 in by 180 ft.	2,325
Five acres meadow land, Thirty-fourth street and Ave., 39 South, Twenty-sixth Ward	1,150
Lot, Walnut street, E. Fifty-fifth street, 39 ft. by 220 ft. 2 in	600
Lot, Spruce street, E. Fifty-first street, 16 ft. by 65 ft	160
Two lots, Florence avenue, 36 ft. 7 in. by 100 ft	170
Two lots, near Fifty-first and Warrington avenue, 35 ft. 8 in. by 100 ft	170

—A green house, 120x24 feet is to be constructed in the Park, near Horticultural Hall, at a cost of $1,500.

New Enterprises.

—Wm. L. Elkins, of Philadelphia, is interested in a gas company supplying gas to several towns in Lower Marion.

—Saller & Stevenson, the Philadelphia Bankers have taken $72,000 worth of Woodbury Bonds for construction of the water works to be erected at that place.

—Benjamin Schofield, Jr., 1628 N. Fifteenth street, with others, have established a company, to be called the Barry Harvester Company, capital stock $40,000, to sell patent rights at Chester, Pa., for harvesting machinery.

—An organization has been formed in this city to act as an intermediary between capitalists and approved borrowers of money for long terms. Dr. Wm. Pepper presided at the meeting, and Mr. Morton McMichael acted as secretary. Mr. Wharton Barker, who has had a great deal to do with starting the company, explained with others, its proposed business. The capital stock of $1,500,000 has been fully subscribed.

—Henry C. Terry, of Philadelphia, applied for and obtained a charter for the Berwind-White Coal-Mining Company. Capital, $2,000,000; paid up. This is the largest coal company formed under the general law in the State, and is second in amount of capital only to the Reading Coal and Iron Company. The incorporators are Charles F. Berwind, Allison White, Edward J. Berwind, Henry S. Frank and John Whitehead, of Philadelphia, New York and Huntingdon.

—The people of Pittston, Pa., are endeavoring to secure the attention of some wealthy Philadelphians, interested in the expansion of our industries. Pittston would like to share some of the prosperity that is being showered on some of its sister towns in eastern Pennsylvania. The Board of Trade is sending out circulars setting forth the superior advantages of this town for manufacturing purposes, and proposing to aid manufacturers in procuring land, which can be had at a nominal price. The citizens of Pittston evidently have an eye to business.

Communication.

PHILADELPHIA, Feb. 27, 1886.

To the Phila. REAL ESTATE RECORD.

GENTS:—While we have not expressed ourselves regarding the proposed Exchange, we should like to be identified with any such movement, which would enhance the real estate interests of our city

Yours respectfully,

B. F. GLENN & SON.

—We call special attention to the project on the first page, relative to the establishment of a Real Estate Exchange in Philadelphia. The credit of taking the lead in this important matter is due to James H. Stevenson & Son.

Otis Bros. & Co.'s New Catalogue.

We are in receipt of Messrs. Otis Bros. & Co.'s new catalogue, it is the finest work of its kind we have ever seen. Every style of elevator which this firm makes, together with every part of the machinery, is beautifully illustrated. The book is handsomely bound and is highly ornamental as well as useful. The Philadelphia office of the firm is at 6 South Merrick street, if you are going to buy an elevator of any kind send for Otis Bros. & Co.'s catalogue.

BUILDERS' ITEMS.

Building Notes.

S. P. Colladay will erect a residence on Broad above Oxford, 21 by 106 ft.

C. B. Porter will also erect a three-story brown front on Broad above Oxford.

John J. Bateson will erect twenty-two two-story houses on Forty-fifth, above Marion.

H. C. Webster will build five two-story houses on Reed street west of Long Lane.

Robert Paul will build five two-story houses on Oakford street, west of Twenty-second.

William Elkin will build twenty-two two-story houses at Twenty-second and Oakford streets.

Benjamin Kitchen & Sons are erecting eighteen houses at Thirty-ninth and Walnut streets.

A National Bank is to be erected on the west side of Front street, below Norris, 36 by 100 ft.

F. A. Poth, brewer, will erect a residence on Girard above Twentieth, 24 by 106 ft., three stories.

Anthony M. Zane will erect nine three-story houses on Morris between Franklin and Eighth.

Courtland Rhodes will build fifteen two-story houses on Franklin st., below Lehigh avenue.

W. T. Roberts, will build twenty-nine houses at Seventeenth and Jefferson, and on Bouvier st.

The Pennsylvania Railroad Company will erect a station at the west end of Woodland Cemetery.

Fox & Brown will erect seventy houses, of two and three stories each, on Eleventh, Diamond and Warnock sts.

Charles C. Farnham will build thirty-six two-story houses on Latona street, between Twenty-second and Twenty-third.

Jacob Myers, Filbert street, has contracted for the building of a new dwelling house for Dr. Wistar, at 1317 Locust street.

Bids for the erection of a new building on Cherry street, below Ninth, from several builders went in on the 24th inst.

Charles M. Baker will build fifty-two three-story houses on Bouvier street above Montgomery ave., and six on Eighteenth street.

Rea & Riley, 627 Filbert street, have estimated on the same factory on Green street, and also on a dwelling-house to be erected at Fox Chase.

L. S. Landreth will erect seventy two-story houses, pressed brick fronts, marble trimmings, six rooms each, on Twenty-first, south of Federal.

William S. Kimball will build forty-two three-story houses, six and eight room each, on a new street between Thirty-second and Thirty-third.

B. Ketcham & Son, 1019 Brown street, have put in an estimate on the factory to be built on Green street above Franklin, for Powers & Weightman.

Henry Taylor, 922 Filbert street, has contracted to build a large dwelling house at Chestnut Hill, for Mr. Runk of the firm of Darlington, Runk & Co.

Strutt & McLaughlin, Sixteenth street below Walnut, have contracted for the erection of a new rectory for St. Stephen's Episcopal Church, to be erected at 1318 Locust street.

Joseph Stuckey will erect seventy-four houses on Kensington avenue, near West Moreland street. Eighteen will be three-story and fifty-six two-story, of five rooms each.

Wm. P. Matchitt is completing forty-six houses and intends to build 225 more on Dickerson st., between Fifteenth and Sixteenth, of five, seven, nine and eleven rooms.

Isaiah Shoemaker will erect thirty houses on Poplar street between Twenty-ninth and Thirtieth, of which twenty-three will be two-stories, seven rooms, and seven three-story houses of eleven rooms each.

William R. Dougherty, 1419 Sansom street, has several small jobs of building in hands, but no large contract. He has a bid in for the erection of a dwelling in North Erie, the architect of which is Edward McGrath.

Wm. C. McPherson & Sons, 325 Cherry street, have contracted for and are proceeding with the erection of a new building at 113 Arch street, for the firm of Crew & Levick, oil manufacturers and refiners, who were recently burned out.

Gonsalvo Richardson will erect thirty-six two and three story houses between Berks street and Montgomery ave. on Twenty-seventh street, and five two-story houses on Twenty-seventh street above Brown.

John M. Sharp will erect fifty-four two-story houses at Twenty-fifth and Brown, seven rooms each. Also, six on Park ave., below Berks, and six on Thirteenth below Berks, three stories, eleven rooms each, pressed brick and brown stone trimmings.

Charles W. Henry and James H. Lyon will build seventeen houses on Twenty-fifth street between Brown and Parrish; ten on Brown street, and thirty-eight on Taylor street, to be opened, of three stories and two stories, pressed brick front and brown stone trimmings.

Michaelson, Nicholson & Erickson will build forty-nine two-story houses, of seven rooms each, on Thirty-eighth, Aspen and DeKalb streets, and nineteen on Holly and Forty-second, five houses on Fifteenth street and, besides, will build twenty-two more for which plans are being prepared.

E. H. Flood will erect fifty-four houses, thirty-two of which will be on Nineteenth st. and Susquehanna ave., three stories high and ten rooms; eleven on the south side of Diamond, east of Twenty-third, eleven on Fontaine street, east of Twenty-third, seven rooms.

George W. Mock & Co., are preparing plans for three story and attic stores and dwellings of the Queen Anne style to be erected in Germantown; cost $12,000; red stone trimmings, fire proof, laid in cement, slate roof, hot air heating, skylights, stained glass, hardwood finish, tiling, wood mantels, dumb waiters, bath tubs let down flush with floor, electric lights, electric bells, speaking tubes, and conservatories.

James B. Doyle, Broad and North, and 907 Filbert street, has estimates in on a four-story factory to be erected on Green street above Franklin for the firm of Powers & Weightman; on a large dwelling-house at Landsdowne, Delaware County, for James Austen, of the firm of Sayen & Austen, dealers in rubber goods, 930 Market street; and a double dwelling at 434 Franklin street, to be erected for Isaac Levi, clothier.

The contractors who had put in bids for the new building to be erected at Seventh and Arch streets have had them returned to them. New bids will be issued, in consequence of the structure of the vaults in the architect's plan. The plan situated the vaults close to the curb, while the law does not allow a vault to be within five feet of the curb. Collins & Autenreith, 410 Walnut street, are the architects, but we understand that the law in respect to the locating of vaults in buildings has been altered since the plans were drawn.

Building Material.

We here present a review of the building material interests in Philadelphia, covering stone, cement, slate, lime, roofing, plaster, etc., showing the capacity and production of our local source of supply with quotations.

Mr. John C. Savery, dealer in builders' materials, 731 Walnut street, a leading authority in building interests, says that more money will be invested this year by one-fourth than last year, in houses, shops and factories. Port Deposit, Md., Mr. Savery says, is at the head of all the quarries for granite, and it has a wide reputation in Philadelphia, although the largest supply is obtained from Maine. The Pennsylvania Granite Company, with quarries at French Creek, Chester County, are at present turning out large quantities of Belgian block and curb granite and have many advance orders.

Most of what is known in the trade as "Brandywine Blue Stone," is brought from quarries near Wilmington, Del., operated by Dupont, Fry & Co., who have a wide reputation, and have contracted for the building of the Delaware breakwater.

The extensive quarries at Titusville and Lambert, operated by Mr. John C. Savage, are at present engaged in getting out large quantities of Belgian paving blocks and broken stone for concrete. Business is very brisk, and he is considerably behind in his orders.

The sandstone quarries, at Stockton, N. J. and Greensburg, now known as Wilburth, supply a great deal of the building and dimension stone used in the Philadelphia market. The Hummelstown Quarries, at Hummelstown, Dauphin county, Pennsylvania, also furnish a good, hard, durable sandstone for which there is a constantly growing market.

At Derry, Pa., a new quarry of hard sandstone has been opened, which yields a very fine and much admired quality of stone, for which there is a brisk demand.

Indiana Limestone still continues to be in large demand among the Philadelphia builders. Connecticut brownstone is also much in use, and is in demand all over the country.

Our reporter was shown a specimen of white freestone, to which the name of "Freedom stone" has been given, from the name of the town near which it is obtained, in Beaver county, western Pennsylvania. It is of a beautiful color and quality, and very excellent material for trimming and dimension stone. Mr. Savery has just introduced it to the Philadelphia market, and its reasonableness in price, 75 cents per cubic foot, and quality, especially recommend it to the trade.

There are numerous quarries around Philadelphia, where good cellar and facing stone can be had, prominent among which may be mentioned a quarry which is being operated by Mr. J. Maxwell Green, whose office is at 1020 Chestnut street, situated on the Media railroad, near Morton station, the yield of which is very promising.

The current price for granite is from 75 cents to $1.25 per foot, with a good demand of all kinds; the highest priced and best quality is chiefly used for monumental work.

Rough building sandstone is worth $2.50 to $3.00 per perch, markets firm. Indianapolis limestone is quoted at 75 cents to 80 cents per cubic foot, scarce and wanted.

Hummelstown sandstone is active and firm at 75 cents to $1.25 per cubic foot. Derry hard sandstone is bringing from 75 cents to $1.25, and in good demand. Connecticut brownstone is steady and moderately active at $1.25 per cubic foot.

Ohio Sandstone has lost its grip on the Philadelphia market, and is not so well thought of as it used to be.

The Empire Slate Mantel Works, with warerooms, at 1215 Race street, make all kinds of slate mantels, with fire-board or hearth set in place, at $10, $12, $14, $16, $18 and $20 each. They also manufacture a higher grade of mantels of slate and tile, or colored stone, at $60 to $250.

Slate hearths, in lots from the quarry, are worth 30 cents per square foot. As the size increases the price is higher, thus a hearth from four to five feet by eighteen inches costing 40 cents per foot. The factory, Jacoby and Winslow streets, is managed by Mr. Charles W. Walters, has been established since 1850. All kinds of slate, marble and soap-stone work are dealt in largely, and markets of the firm are all over the country.

Philadelphia receives a large quantity of slate from the quarries at Lehigh and Northampton counties. The present demand for raw slate is moderately good. The trade in slate mantels and manufactured work is rather depressed, as wood is superseding it for mantels and inside work ; the quotations for slate are $3.75 to $4. The inquiry is light and the local market very quiet.

Building Permits.

One gable wall, William and Bright streets, to Alexandr Miller, 2022 Gordon street.

Five two-story dwellings and one store, one 15 ft. by 36 ft., four 13 ft. by 28 ft., corner of Tasker and Woodstock streets, to Patrick Smart, 264 S. Twentieth street.

Front alteration, 16 ft. by 9 ft., Locust street, between Eleventh and Twelfth streets, to Harry Govet, 1331 Ellsworth street.

One one-story stone house, 16 ft. by 24 ft., Westminster ave., below Forty-fourth street, to Wm. Bien.

Four two-story houses, 11 ft. by 26 ft., Bodine street, between Lehigh ave. and Huntingdon street, to Charles Booth, 2052 Taylor street.

A cellar and underpin foundation, 24 ft. by 126 ft., 638 N Twentieth street, to John C. Morrison, 638 N. Twentieth street.

Two-story house, 11 ft. by 27 ft., Bringhurst street, between Wakefield and Main streets, to Ellen Lee Germantown.

One two-story stable, 20 ft. by 28 ft., Oreanna and Dauphin streets, to S. M. Button, 2522 N. Fifth street.

One three-story brick house, 20 ft. by 48 ft., Third and Dauphin streets, to same party.

One brick mill, rear of 4526 Main street, 37 ft. by 60 ft , to James Upton, 4326 Main.

One brick kitchen, 2212 Race street, 12 ft. by 14 ft., to W. L. Atkinson, 2214 Wallace street.

Two frame houses, 10 ft. by 38 ft., Adeline street, below Pratt street, to Thomas Waters 4825 Melrose street.

One brick store and dwelling, Twenty-ninth street, above Susquehanna ave., to Samuel Stewart, 2710 Dauphin street

One coal shed, 10 ft. by 74 ft. Wishart street, below Allegheny ave., to Thomas Bryan, 121 Dock street

One two-story house, 16 ft. by 20 ft., Bateman street, south of Wharton street, to Wm. McAvoy, 1341 S. Twentieth street.

One two-story brick building, 10 ft. by 16 ft., 2544 Coral street, to George Burton, 2218 Cedar street

Two five-story brick houses, 23 ft. by 40 ft., Front street, above Water street, to B. H. Smith, 1856 Camac street.

Front alteration, 16 ft. by 14 ft., Bainbridge, between Fifth and Sixth streets, to T. C. Henry, 622 South Front street.

One-story brick building, 12 ft. by 8 ft., 1732 S. Ninth street, to Thos. Mubrine, 1733 S. Ninth street.

Two three-story brick dwellings and stores, 16 ft. by 48 ft., Susquehanna ave., between Second and Third, to Joseph Shickey, 1832 Reed street.

One party wall, 8 ft. by 8 ft., 2619 Adams street. to James Wilson, 2619 Adams street.

A sitting-room and bath-room, rear of main building, Franklin, between Thompson and Master streets, to W. W. Berzorth, 128 S. Second street.

A two-story brick building, 1518 North Twenty-seventh street, 18 ft. by 36 ft., to Jacob Lang, 2208 Columbia ave.

Front alteration, Thompson, above Twelfth street, to George F. Payne & Co., 1211 Sansom street.

Twelve two-story houses, 15 ft. by 43 ft., West side of Eighth, between Huntingdon street and Lehigh ave., to Amos D. Kennedy, 2100 N. Sixth street.

New store front, 20 ft. front, Front street, between Diamond and Susquehanna ave., to John M. Buchannan & Bro., 1610 Vienna street.

One two-story back brick and store building, 14 ft. by 15 ft., Palmer, between Belgrade and Mifflin streets, to same party.

One-story stone office, 17 ft. by 21 ft., Cumberland, between Mill and Coulter streets, to Alfred W. Smith, Germantown.

Five two-story brick dwellings, 15 ft. by 40 ft., Reed street, between Long Lane and Twenty-second street, to H. C. Webster, 1811 Wharton street.

One brick house, 16 ft. by 48 ft., 921 S. Eighth street, to Pietro Tunozzello, 324 Carpenter street.

One two-story brick building, 16 ft. by 10 ft., Eighth and McClellan streets, to John Gannon, 2007 S. Broad street.

One two-story brick house, 15 ft. by 30 ft., Nineteenth and Fermon streets, to James J. McKenney, 1433 S. Seventeenth street.

Six brick houses, 17 ft. by 30 ft., Twenty-second street, between Allegheny ave. and Park street, to George W. Thorp, 2126 Park street.

One-story brick kitchen, 14 ft. by 11 ft., 2505 Frankford road, to W. B. McCleary, 1345 Christian street.

One two-story brick dwelling, 16 ft. by 28 ft.. Nice street, above Bass street, to McLaughlin & McNamara, Nicetown.

One two-story brick store and dwelling, 20 ft. by 46 ft., Nicetown, to same party.

One-story brick kitchen, 8 ft. by 19 ft., Auburn, between Eighth and Ninth streets. to Charles O'Neill, 620 South Thirteenth street.

Eleven two story brick houses, 18 ft. by 56 ft., to T. Lambrecht, 2620 N. Fifth street.

Sixteen two-story brick houses, 14 ft. by 25 ft., Orkney, between Somerset street and Lehigh ave., to same party.

Five two-story brick houses, 16 ft. by 40 ft., Woodland ave., between Sixty-third and Sixty-fourth streets, to John H. Kelley, Seventieth and Greenway ave.

Twelve two story brick houses, 15 ft. by 38 ft., Fifth street, between Cambria and Indiana streets, to Thomas L. Kelly, 2945 N. Fifth street.

One-story brick stable, 20 ft. by 18 ft.. Garfield street, above Wister, to Charles Wolf, 22 Bringhurst street.

Two-story brick dwelling, 17 ft. by 43 ft.. Indiana ave. and Dauphin street, to George Watson, 2074 Clementine ave.

One wood bath-house, 10 ft. by 6 ft., 420 N. Eight street, to T. Henry, 1713 Columbia ave.

Two brick houses, 16 ft. by 43 ft., Nineteenth, between Tasker and Dickinson street, to Samuel McClellan, 1827 Fitzwater streets.

One-story brick shop, 24 ft. by 30 ft., Norris and America streets, to M. K. Snyder, 1939 Hancock street.

Sixteen two-story brick houses, 15 ft. by 38 ft., Oakford, between Twenty-first and Twenty-second, William Elkins, 2044 Reed street.

One mansard roof, 16 ft. by 40 ft. Kensington avenue, between Adams and Letterly streets, to William Steele & Son, 2141 Howard street.

One-story addition to house and front and interior alterations, 14 ft. by 57 ft., Marlborough, below Belgrade street, to same party.

Ten three-story brick houses—one 20 ft. by 68½ ft., one 19 ft. by 68½ ft., and eight 14 ft. by 68½ ft., East Tioga, between Arcadia and Amber streets, to Dr. C. A. Max Wiehle, 319 N. Thirty-second street.

Front alteration, 918 Chestnut street, to Henry B. Seskie, 723 Jayne street.

One three-story brick icehouse, 20 ft. by 35 ft., Holman, between York and Adam streets, to Hallbach & Auhter, Twenty-sixth and Thompson streets.

Four two-story houses, 10 ft. by 38 ft., Amber, E. of Auburn street, to James Haller, 2839 Amber street.

Two two-story brick houses, 16 ft. by 32 ft., Mitchell street and Levering avenue, to Peter Brockenbach.

Four two-story brick houses, 14 ft. by 30 ft.. Mechanic, below Morton street, to D. P. Bruner, same address.

One two-story brick house, 18 ft. by 30 ft., Annette, between York and Cumberland streets, Christian Frost, 2422 Mascher street.

Two two-story brick houses, 15 ft. by 28 ft., 217 Godfrey street, to George Jackson, 922 S. Fourth street.

Two two-story brick houses, 16 ft. by 28 ft., Worth, between Third and Fourth streets, to same party.

Addition to third story, 14 ft. by 30 ft., 2143 Callowhill street, to Wiggins & Clarke, 781 Pennock street.

Thirteen two-story brick houses, 12 ft. by 28 ft., Tusculum and Kip streets, to Charles Bosset, 2114 Marshall street.

Four brick houses, 14 ft. by 50 ft., Poplar, between Twenty-ninth and Thirtieth streets, to J. L. Shoemaker, 3109 Powelton ave.

Two two-story brick houses, 15 ft. by 50 ft., Wishart, between Frankford road and Emerald street, to Eimwecthter Sons, 2147 Cumberland street.

Alterations at 917 Ernest street, 5 ft. by 14 ft., to John Hunter, 1150 S. Broad st.

One two-story house, 13 ft. by 14 ft., 2114 Fairhill st., to R. Buchanan, 2025 N. Twenty-second street.

One brick house, 20 ft. by 95 ft., Locust, between Thirteenth and Juniper streets, to Jacob L. Myers, 1115 Sansom st.

—The Builders' Exchange of Cincinnati is preparing an Act for the consideration of the Legislature to regulate the construction and plumbing of buildings within any city of the first class; which means Cincinnati.

—Sawdust and clay is a new brick mixture. They are said to be much better than the ordinary brick. A Chicago firm has the credit of bringing out this novelty. The bricks measure 13 by 6 by 4 inches, and, having two square holes running through them lengthwise, they weigh little more than common brick, although four times as large. They are laid between the outer and inner courses of a wall.

—The annual report of Superintendent Walker of the electrical department was submitted last week to Mayor Smith. The report is complete and interesting, and full of powerful suggestions. He makes the rather astounding statement that out of 342½ miles of wires, only 22½ are now in working order. He suggests that the entire city be furnished with electric lighting. The taxes collected from poles, wires, conduits, etc., during the year were $8,978.50. The department transmitted 231,482 messages and sent out 484 alarms of fire.

INSURANCE NOTES.

The Fire Commission.

The Board of Fire Commissioners, at their meeting on Tuesday, awarded contracts for the furnishing of horses to the Fire Department. William Stokely secured the contract at $272 per horse. The proposals for building the proposed new fire engine house were opened. J. L. Shoemaker offered to build a house on the east side of Thirtieth street, north of Poplar, and rent it for ten years, at $1,200 per year. The J. P. Baltz Brewing Company offered to erect a building on Thirty-first street, opposite Stiles street, to rent for ten years, at $900 per year, and offered to rent other buildings a little larger, at $1,000 or $1,200 per year. James Batt offered a house on Eighth street, below Girard, at $2,300. The matter is in the hands of the committee of real estate leases. By resolutions of councils, medical examinations will be discontinued for the present with applicants for positions. Proposals will be advertised, for chemical fire engines. Sixty fires were reported during the month. The services of Dr. John R. Hart were secured as veterinary physician, at $500 per year. The Board of Fire Escapes also met and reported some dereliction of duty on the part of managers of the Central Theatre. A number of applicants for certificates to erect escapes will report, which were not in accordance with the terms of the new law. Quite a number of escapes were approved of and certificates issued for their erection.

Insurance Companies.

—During 1885, the income of the Mutual Life Insurance Company of New York, exceeded $20,000.

—One million policies have been issued by the Prudential Insurance Company of America in ten years.

—The Delaware Mutual Safety Insurance Company, of Philadelphia, will only do a marine business in New York in future.

—The shares of the Girard Fire and Marine Insurance Company of Philadelphia are worth $333—par $100; and is a profitable investment for its stockholders.

—A. T. Sabine, 506 Walnut street, is the resident secretary of the Guarantee Company of North America. The total resources of the Company are over $800,000. The Philadelphia officers are gentlemen of the highest personal integrity, and well and favorably known in business circles.

—During the month of January, 1886, Pennsylvania had 22 fires, in each of which was $10,000 or over, and the aggregate from all was $2,122,000. Allowing $100,000 for smaller and unreported fires we have a total loss for the month of $2,222,000. This is an increase of $1,805,550 over the figures for the previous month and an increase of $1,622,500 over those for the month of January, 1885.

—An excellent record is shown for the Mutual Life Insurance Company of New York. Messrs. Bates & Lambert, of Philadelphia, general agents for the company, received $1,384,200.94 in premiums last year, of which $174,637.27 were first year premiums. During the seven years ending with 1885, this agency received total premiums of $7,215,865.14 of which $789,998.27 were first years premiums.

—An ordnance is under consideration to lay a water main between the Wentz Farm and Lehigh avenue. The item of cost is being looked into.

Fire Records.

At Boston, Henry D. Noyes & Co., publishers, No. 12½ Bromfield street. Insurance, $2,500; loss, $1,000. Joseph L. Bates, insurance $1,500; loss, $500. No. 13 Bromfield street, J. Strahan, dealer in house paper. Insurance, $10,000; damage, $7,000.

At North Stonington, Conn., the Laurel Glenn factory of Solomon Barber & Co. Insurance, $20,000; loss, $30,000.

At Hoboken, N. J., E. Bauman's paint store. Loss, $2,000.

At Dutton, Ont., a block of stores, on Main street. Insurance, $5,000; loss, $8,000.

At London, Ont., the Medow Lilly mills. Insurance, $7,000; loss, $30,000.

At Augusta, Ga., the stores of M. Colclough, Mrs. S. H. Meyers and E. Kaufman. Insurance, $12,000; loss, $18,000.

At Chicago, Brown Bros' shoe store, No. 92 State street. Insured; loss, $4,000.

At Chicago, a dwelling, owned by B. F. Jacobs. Insurance, $3,000; loss, $4,000.

At Bradford, Mass., the dwelling occupied by Wm. Jones and J. I. Fitcomb, and by Dr. Bond, as a drug store. Insured; loss, $1,500.

At Springfield, O., a dwelling on Grand avenue, belonging to Mrs. Howard, and occupied by J. C. Lord. Insured, $2,100; loss, $2,200.

At De Graff, O., the livery stable of Matt. Covington and residence of Dr. Bull. Insurance on stable, $1,600; loss, $3,000. Dr. Bull's insurance, $800; loss, $1,200. Other losses on which there is no insurance, losses, about $800.

At Stockwell, Ind., J. H. Ritchey, grocer. Insurance, $500; loss, $600. Jay & Mitchell, no insurance; loss, $900. John Royer & Co., general merchandise, insurance, $2,000; loss, $1,700.

At Paris, Ont., Appleby's block of stores on River street. Insurance, $8,000; loss, $15,000.

At Sammonsville, N. Y., the paper mill of Robert Wemple. Insurance, $16,000; loss, $25,000.

At Buffalo Gap, Dak., the business block containing the post-office, a jewelry store, grocery, clothing store and boot and shoe store. Insurance, $4,000; loss, $10,000.

At Pittsburg, Fleischman's millinery store, No. 508 Market street. Insured; loss, $5,000.

At Fond Du Lac, Wis., two buildings owned by Charles Rueping and the Bechand Bros., and occupied by Martin F. Sasse, boots and shoes; the Bechand Bros., saloon, and the cigar factory of Metz & Small. Insurance, $8,200; loss, $12,000.

At Lexington, Mo., the millinery rooms of Miss M. Price. Insured; loss, $50,000.

At 205 Hopkins street, Brooklyn, John Walters's grocery and dwelling. Insured for $800; damage, $2,500.

At Dalton, Ga., the Union Passenger Depot.

At Brownston, Ill., the flouring mill of A. B. Sale & Co. Insurance not known; loss, $30,000.

At Baltimore, the ruffle manufactory of P. F. Gehrman & Co., 5 Hanover street. Insured; loss, $15,000.

At Sioux Falls, Dak., the dry goods store of E. J. Daniels. Insured, $15,000; damage, $6,000.

At Paris, Tex., the Reagles block on Grand avenue. Insurance unknown; losses, $35,000.

At Sharpsburg, Pa., the Chicago House and three dwellings. Insurance, $5,000; loss, $8,500.

Corporations Chartered.

The following corporations were chartered at Harrisburg: The Johnstown Lumber Company, with $50,000 capital; the Eagle Ferroline Works, of Pittsburg, with $200,000 capital; the Elk Lick Bridge Company, of Carwensville, with $3,000 capital; the Clearfield Consolidated Coal Company, of Philadelphia, with $100,000 capital; and the Bucks County Trust Company, of Doy estown, with $250,000 capital.

—The city is called upon to spend a great deal more money than it feels able to. The finance committee has some very difficult work to do. The couucils highway committee wants $416,000 out of the Gas Trusts' surplus. They propose to divide it up in the following amounts: Two hundred thousand dollars for improved pavements on streets occupied by passenger railway companies, and $100,000 on streets not so occupied; $10,000 additional for grading; $20,000 for repairs to bridges; $35,000 for macadamizing Moyamensing avenue; $15,000 additional for paving intersections; $7,050 for county line bridges; $5,000 additional for repairs to sewers; $10,000 for paving Twenty-second street, south from Spruce, with Belgian blocks; ₹2,000 for covering the Snyder avenue sewer; $2,000 for preliminary estimates, and $10,000 for repairs to the Girard avenue bridge.

—The Alumni Association of Girard College, proposes to nominate a candidate for a position in the board of city trusts. The candidate named was Robert J. Johnson. The annual meeting will take place in May, when the nomination will be confirmed.

Mechanics' Liens.

Robt M Mitchell owner and cont—John Devlin claimant, 7 bldgs S W cor Eighth and Winton streets to S W cor Eighth and Jackson streets	71
Jas Axford owner etc—Jas J Tevin claimant, S E s Harvey st 122 ft N E of Adams st	36

ABBREVIATIONS.

Add.—Addition.	Exrx.—Executrix.
Alt.—Alteration.	K. & B.—Kitchen & Bath.
Assn.—Association.	M L.D.—Mechanics' Lien Docket.
B. & L.—Building & Loan.	Nat. Bk.—National Bank.
Bk.—Bank.	Sav. Bk.—Savings Bank.
B.B – Back Building.	t. t.—Terre Tenant.
Dwg.—Dwelling.	S.F.—Scire Facias to revive Judgment.
Est.—Estate.	
E.J.—Ejectment Suit.	
E.S.—Equity Suit.	
Exr.—Executor.	

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

CONVEYANCES.

PHILADELPHIA.

SUBURBAN SALES

MONTGOMERY COUNTY.

Wm R. Price to Caroline G. Clayton, a house and lot in Shoemakertown, Cheltenham township, for ..... $ 723.90

E. K. Blanck to Dr. Thomas E. Cooper, a house and over 45 perches of land in Hatfield township, for 5,000

Henry C. Bevan to Walter Bevan, half interest in 1½ acres of land in Lower Merion township, for 2,842

John Moser to Henry H. Wood, two tracts of land containing together 24 acres and 159 perches in New Hanover township, for 2,000

Henry H. Wood to John Moser, 88 acres and 73 perches of land in New Hanover township, for 3,200

Thomas DeWitt Cuyler to Clement A Griscom, ¼ of an acre of land in Lower Merion township, for 647.50

John Jamison to Mary B. Ambler, a house and lot on George street, Norristown, for 1,600

Executors of Jesse Zeigler to Charles Ramey, a house and lot on Oak street, Norristown, for 781

Charles Ramey to John T. Dyer, a house and lot on Oak street, Norristown, for 800

Andrew Orr to Walter W. Hood, a planing mill with two acres of land in Lower Merion township at Ardmore, for 3,000

James M. Engle to Edmund Y. Geiger, a building lot in Pottsgrove township, for 365

Anthony Williams to Annie M. Benners, 13 acres and 40 perches of land in Abington township, for..... 9,275

Jesse Gery to Adam and Milton Krauss, a house and creamery with 1 acre and 52 perches of land in East Greenville, for..... 2,720

George W Eadline to Frank Halberstadt, a house and 5 acres and 88 perches of land in Lower Merion township, for..... 4,000

Frank Halberetadt to Mary E. Eadline, same premies for..... 4,000

The heirs of Joseph Potts, Jr., Hy. Potts, Jr., and Edward S Davies to Josiah Keim, two building lots in Pottsgrove township, for..... 150.00

William C. Vanleer and John H. Custer to Allen Rogers and Josiah Benjamin several buildings and lots of land in Royersford, for..... 4,400.00

Davis Knauer to Josiah Keim, half interest in two lots of land in Pott's addition to Pottstown, for..... 100.00

Henry Ball and Maria Carson to Ann Ball, two frame and one brick houses on Main street, Morristown, for..... 6,300.00

Allen Rogers and Joseph H. Benjamin to Benjamin J. Latshaw, one third interest in a stove and fire-brick works and two lots of land in Royersford, for..... 4,033.00

Daniel Latshaw to Allen Rogers and Joseph Benjamin, a lot of land in Royersford, for..... 40.00

Peter Seasholtz to Josiah Keim, two lots of land in Pottsgrove township, for..... 500.00

Executor of John Groff to George W. March, fourteen lots on Marshall street, Norristown, for..... 1,042.00

William F. Solly to Solomon Gilbert, a brick stable and lot of land on Penn street, Norristown, for..... 8,600.00

William P. Jones to John W. Pass, a house and lot on Walnut street, Conshohocken, for..... 1,510.00

Mary F. Leidy to James Wilson, a house and lot on W. Main street, Morristown, for..... 3,500.00

Jas. Ward to John Ward, a house and lot on Elm street, Conshohocken, for..... 785.00

Chester County.

Borough of West Chester, Bath Springs Water Works, containing 132 32-100 perches, to Josiah Hoopes et al..... $1,350.00

Joseph T. Bernard, messuage and 9 acres 72 perches in the township of New Garden, to Harriet V. Dunlap..... 850.00

Ed. H. Hall, house and lot 20 ft. front on Matlack street, West Chester to Adelbert C. Lewis..... 1,450.00

George R. Chambers et al., a lot, 29 perches, in the township of Londongrove, to John F. Brown 175.00

John M. Pomeroy, four lots in the township of Sadsbury, to Jas. Johnson..... nom.

Joel B. Pusey et al. messuage and tract 13 acres 3 roods and 8 perches in the township of Franklin to Chandler Phillips..... 6,473.12

George W. Coulston, tract 24 acres 104 perches in the township of East Brandywine, to Hugh McNeil..... 600.00

James Thomas, four building lots in Downingtown, to Isabella C. Mitchell..... 2,600.00

Jacob L. Lammey, 105 perches in the township of West Nantmeal, to Evan Dampman..... 140.00

James Wagonseller, warehouse, 2½ acres in the township of Wallace, to Evan Dampman..... 4,200.00

James McKeenan, 149 sq. perches in the township of West Nantmeal to Jacob L. Lammy..... 1,034.00

Lucien Hoguet, assig., hotel in the township of Wallace, subject to mtge., to James Wagonseller..... 700.00

Jos. Pyle, small lot in the township of Londongrove, to Milton C. Pyle..... 125.00

Louis H. Zietz, lot in the township of Londongrove to Chas. S. Pyle 200.00

Jos. Pyle, lot in the township of Londongrove, to Chas. S. Pyle.. 84.00

Geo. R. Chambers, 8,000 sq. ft. in the township of Londongrove to Joseph Pyle..... 150.00

Job H. Jackson, 9,161 sq. ft in the township of Londongrove, to Geo. C. Jackson..... 1,883.00

Levi D. Thomas, lot in the township of Willistown, to Alban Hall..... 300.00

Whitfield B. Forbes, 64 perches in the township of Londonderry, to Wilson Baker..... 35.00

Daniel Levengood, building lot in the township of North Coventry, to J. Huston Gergin..... 275.00

Jacob Mast, 9 acres 30 perches in the township of West Caln, 1882, to Wm. E. Risel..... 1,250.00

Jos. M. Hobson, 7,500 ft. in the township of London Britain, to Alfred C. Leonard..... 100.00

Jos. F. Kervaugh, lot in the township of East Whiteland, to Margt. Catanach..... nom.

Sarah P. Lackey, house and lot, 581 sq. ft., to the West Chester Fire Co. No. 1, Church street..... 4,500.00

Thos. F. Furry, shops and 23 400 sq. ft. in the township of Willistown, to Alf Elliott..... 2,950.00

Lewis W. Shields, house and lot on Barnard street, West Chester, to Benj. Everhart..... 1,500.00

Bucks County.

Ernest Lawrence to Wm. M. Downing, Jr, lot in Bristol, Feb. 18, 1886..... $1,400

George W. Hall to Harry Duffield, lot in Middletown, Feb. 18, 1886.... 2,500

Henry Seiler to Hugh Mulligan, two tracts in Rockhill, Feb. 1, 1886..... 1,500

John Taylor to Hugh Mulligan, two tracts in Rockhill, Feb. 1886..... 3,000

Robert McCurdy to Hugh Mulligan, tract in Northampton, Feb. 15, 1886..... 3,000

Mary Ridge to Alfred R. Biles, 58 acres 128 perches in Bensalem, Feb. 19, 1886..... 6,000

Admrs. of John Gerhart to Collinan Gerhab, four lots in Rockhill, April 8, 1872..... 425

Josiah W. Leidy to Daniel P. Steiner, lot in Rockhill, Dec. 12, 1873..... 450

Collman Gerhab to Dan. P. Steiner, lot in Rockhill, June 16, 1873..... 600

Admrs. and heirs of Charles Lerch, to John Leidy Riegel, release, Jan. 16, 1886..... .....

John N. DeGroot to Wm. S. Daniels, lot in Bristol, Feb. 18, 1886..... 500

Thos. Headly to John N. DeGroot, release, Feb. 18, 1886..... .....

John Robbins to John N. DeGroot, release, Feb. 18, 1886..... .....

Samuel B. Thatcher to Levi O. Biehn 9 acres 130 perches in Hilltown, May 18, 1885..... 500

Levi O. Biehn to Robt. L. Priester, three tracts in Hilltown, Feb. 16, 1886..... 4,000

Joshua Bennett to Mary Sprogle, lots in Warminster, Jan. 7, 1886..... 175

Charles Patterson to John Backus, lot in Falls, Jan. 23, 1886..... 1,500

Joseph Anderson, Sr., to Andrew Carnahan, 80 acres 120 perches in Falls, Feb. 22, 1887..... 7,760

Edna Vansant to Louis N. Clayton, lot in Morrisville, Feb. 15, 1886..... 125

Burlington County.

Benjamin J. Stiles to Thomas Wilson, lot of land containing 8 acres and 62-100 in Chester township, for..... $1,077.50

Joseph Holme to Thomas Hess, two small tracts of land, in New Hanover township, for..... 800.00

William K. Taylor to Mary Etta Taylor, house and lot of land, in Medford township, near Medford, for..... 700.00

Lydia Thompson to Maggie I. Rogers, house and lot on the west side of St. Mary street, Burlington, for..... 400.00

Robert P. Hartley to Japhet Bowker, house and lot, in Medford, for..... 350.00

Josiah Sherman to Joseph Gerew, lot of land in Bass River township, consideration nominal.

Peter F. Mattson to Henry C. Deacon, small lot of land in Burlington township, for..... 50.00

Augustine J. Savage to William M. Paul, two lots of land at Riverside, exchange.

William M. Paul to Augustine J. Savage, two tracts of land in Delran township, one containing 49 acres and the other 1 acre, for..... 1,500.00

Charlotte Nugent to Alice S. Rossell, lot of land in Little Egg Harbor township, nominal.

Richard D. Cox to Josiah White, house and lot on Union street, Burlington..... 1,800.00

William B. White to John F. Randolph, two lots of land in the village of Tuckerton..... 950.00

Delaware County.

George Procter, Thornbury, a tract of 1 acre and 33¾ perches in that township, to I. Preston Thomas, of same place, for..... 100.00

John M. Broomall, Media, a lot, 72 by 140 ft., on Fourth street, that borough, to Wm. H. Miller, of that place, for..... 570.00

W. Lane Verlenden, Darby, a lot, 102 by 101½ by 113¾ ft., in that borough, to Wm. J. Hall, Joseph and Morgan Bunting, for..... 1,050.00

George Weigand, Chester, a frame house and lot, 19½ by 80½ ft., on Front street, in that city, to Thomas H. Schuler, of Clifton, subject to a lien of $800, for..... 300.00

Estate of Wm. Nuzum, Marple, a tract of 46 acres in that township, to John Rigby, of same place, for..... 5,434.00

Estate of Wm. Nuzum, Marple, a tract of 46 acres in that township, Plummer to Grubb, of Upper Providence, for..... 3,500.00

NOTES.

—People in the north-western section of the city are calling for more extended street railway facilities.

—Stacks of charters of one kind or another are being taken out at Harrisburg. Philadelphians are taking the lead in this now.

—Permission was granted to H. C. Lea, to build a vault under his pavement, on Seventh street, running 68 feet above Arch street.

—The same committee permitted the removal of a frame building from the Church of the Visitation, to a locality on Belgrade street.

—Baeder, Adamson & Co., will be allowed to construct a railway track across Allegheny Avenue, East of Richmond Street, to connect with the Reading Railroad.

—The Board of Highway Supervisors have under consideration a resolution providing that vaults under side walks shall extend within three feet of the curb line.

—The carpenters in the employ of the Philadelphia & Reading Railroad, in this city and vicinity, have joined the Knights of Labor. The carters have also organized.

—A good part of Chicago is lit up by a corona of electric lamps on the top of the tower of the Board of Trade building, 312 ft. above the street. The plant is of 40,000 candle power, and is probably the largest mass of electric light in the world.

—"Queen Anne" has gone West. We have gotten tired of her along the Atlantic coast. She is a nice old maid, but we have need of some more spritely company. The "French Roof" staid with us a long time; now it is hanging around the Pacific coast. "Romanesque" is now coming. He is a fine fellow, and if people have good sense they will welcome him and naturalize him for life.

—Two Pittsburg mechanics are credited with having discovered how to produce the finest wrought iron direct from the ore. This is alchemy reduced to practice. Metallurgists have been attempting this difficult problem for many years. It has been accomplished in the laboratory and to a small extent practically, but there have been many failures and iron and steel makers will be incredulous until they know more of it.

—An improvement in an important type of ventilators for domestic and office use has been made by Mr. Ellis, a surgeon of Gloucester, England. At the junction of the horizontal inlet and vertical distributing tubes there is an adjustable door for regulating or wholly excluding the admission of outside air. At the outer opening of the inlet tube there is stretched a piece of some sort of suitable cloth, which acts as a kind of filter to the entering air, and on the inner side of the strainer there is a chamber for the purpose of containing any desirable perfume or disinfectant.

—Secretary Davis, of the Society for the Prevention of Cruelty to Animals, has addressed a letter to Councils' sub-committee having charge of the petition to appoint meat inspectors. Such appointments should be made without delay. Cases of diseased animals, whose blood has been rendered impure by being trampled to death in transportation, are daily reported to the Society, which joins with the Butchers' Protective Association in urging the action to be taken. Large quantities of "bob veal" are also sold in our markets and the "shamblers" purchase diseased cattle at the abattoir and sell them under cover of night in down-town markets.

—In New York there is a tendency to run buildings to an enormous height. Within two years the number of buildings over four stories high have been doubled. Last year over $52,000,000 was spent in new buildings and in repairing of old buildings.

—The Pennsylvania Company will appeal its case to the Supreme Court as a matter of course. The question to be tried is, shall the Pennsylvania Railroad Company obey the constitution of the State of Pennsylvania? The company evidently regards it as a piece of insolence that they should be expected to do so.

—The Carpenters and Joiners' Union, No. 8, some time ago issued a circular to the builders to ascertain their opinion in reference to the reduction of the hours of labor. The builders have expressed a willingness to abide by a nine hour day, at the old wages rate. This is a concession that is very creditable to them, and with its acceptance a matter that might develop into serious trouble has been adjusted. It is to be hoped permanently. The German Stone Masons' Union has declared also in favor of the nine hour work day, but have not as yet conferred with their employers.

—The scarcity of boxwood, with its advancing price, has stimulated invention to find a substitute for use in the manufacture of loom shuttles. A powerful hydraulic press has been devised, and certain timber can be used for this purpose. This press consists of a strong cast iron top and bottom, with four steel columns and steel cylinder, with a large saw. In the centre of this ram is fitted a smaller ram, with a rectangular head fitting into a die, which is placed on the top of the large ram. The timber is placed in this die and a pressure of 14 tons per square inch is applied. The pressure is then relieved, and the large ram descends. The top pressure block, which fits the die, is then removed, and the small ram rises and pushes the timber out at the top of the die. The timber so treated is made very dense, uniform and close grained, and will take a high finish, and it is obvious that this is a process which might be applied with advantage in the substitution of comparatively cheap timber for the more expensive work for a great number of purposes.

—William Kane, of this city is the inventor of an automatic sprinkler, which was recently tested. It is intended to keep a small fire in check until the engines arrive. The sprinklers are intended to be placed in various portions of a room or building and attached to pipes through which the water passes at a pressure of ten pounds or more. The sprinkler is intended to be automatic in its action, and the water is held in check by a lever, the end of which is soldered. It requires a temperature of 150 degrees to melt the solder. When melted, a valve drops out, and a spray of water is started which will extinguish the flames. The water is thrown in every direction, and is sufficient to extinguish any fire at the start. It has been put to a very severe test: a frame building filled with shavings and raw cotton was fitted up with three of the sprinklers. The shavings were set on fire in different places, and in a few seconds it seemed as if it would be impossible to check the flames. In a very brief space of time, however, the fire had generated a heat of 150°, and the valve of one of the sprinklers was released. The machine at once, with a pressure of water through the pipes of less than twenty pounds, began to throw its thin but effective spray, and in three minutes the fire was completely subdued. This was done by the one sprinkler nearest the flames, which were not able to spread so as to require the services of the other two sprinklers, a few feet distant.

—Messrs. Weidner, Elkins & Kemble made a very good stroke in purchasing 10,000 shares of the Broadway and Seventh avenue Railway stock. The purchasers are not in the least concerned over the investigation now in progress, as to the legality of the charter granted. They believe they can retain possession of the Broadway road. The sale is a conditional one. Half of the stock is so be sold at $285 and the other half at $300 per share, and the sum of $200 per share is to be paid down. The buyers have from now until the first of January next to pay the rest. The matter of revoking the charter is now before the Legislature at Albany, but the purchasers have gone through the question with able counsel, and feel satisfied that the state cannot and will not annul the charter.

—The Boston Water Board is proposing to build an open conduit, a mile or more in length, from the outlet of the water system, in which large, rough boulders are to be placed. The water, rushing swiftly over and between these rocks, will be so agitated, it is thought, as to do away with that impurity which depends upon partial stagnation.

—An English surgeon has invented an improved ventilation for domestic and office use. It is said that English builders and architects are specially pleased with it. This is because they have not heard of some of our American devices in the same line. The English device is thus described: "At the junction of the horizontal inlet and vertical distributing tubes there is an adjustable door for regulating or wholly excluding the admission of outside air. At the outer opening of the outlet tube there is stretched a piece of some sort of suitable cloth which acts as a kind of filter to the entering air, and on the inner side of this strainer there is a chamber for the purpose of containing any desirable perfume or disinfectant."

Worth Knowing.

—Iron or steel immersed in a solution of carbonate of potash or soda for a few minutes will not rust for years no matter how damp the atmosphere.

—To imitate ground glass, paint the glass with the following mixture: Sandarach 18 drachms; mastic, 4 drachms, ether, 24 ounces; benzine, 6 to 18 ounces. The coarseness of the grain of the imitation glass will be governed by the quantity of benzine used.

—A plan for rendering paper as tough as wood or leather has been recently introduced on the Continent; it consists in mixing chloride of zinc with the pulp in the course of manufacture. It has been found that the greater the degree of concentration of the zinc solution the greater will be the toughness of the paper. It can be used for making boxes and for roofing.

—Never use a bolt longer than necessary. When the joint is screwed up the nut should never be more than full, and had better be a thread short of being full than half a thread over. If the bolts are too long, use washers sufficient to prevent the bolt being drawn too far through the nut. If a washer is placed under a nut on a rough cast iron flange it will be found to work much more satisfactory.

—The shrinkage of paper used by draughtsmen may be overcome by a system which has been adopted for many years. All drawing paper is ruled with very faint lines to either one-quarter or one-fifth inch scale, and the drawings are made to correspond with these lines. Whatever the alteration in size or form of the paper, the variation in any square of one-quarter or one-fifth inch is a matter of no importance, and the drawing and scale both being on the same base, a ready and certain means of correction always exist.

OTIS BROTHERS & CO.

MANUFACTURERS OF

PASSENGER and FREIGHT

ELEVATORS,

HYDRAULIC and STEAM.

No. 6 S. MERRICK ST., Philad'a,

OPPOSITE NEW CITY HALL.

Otis Brothers & Co. manufacture the "Standard" Hydraulic Passenger and Freight Elevators; also, all forms of steam, passenger and freight elevators, hoisting machinery for mines, breweries, etc. The record of the Otis' Elevator proves them to be unequalled in the world for safety, speed durability and economy.

ESTABLISHED 1852. ANNUAL PRODUCT 20,000 TONS.

PENCOYD IRON WORKS,

A. & P. ROBERTS & CO.,

OFFICE, 261 SOUTH FOURTH STREET,

PHILADELPHIA.

Beams, Channels, Angles, Tees & Merchant Bars.

SPECIAL ATTENTION TO STRUCTURAL IRON and STEEL.

Plans and Estimates for Roof Trusses and Riveted Girders.

Beams furnished from Stock and Cut to Length.

SEND FOR CHART OF SHAPES.

Car and Locomotive Axles, Hammered or Rolled, Iron or Steel.

BLANK BOOKS.

Blank Books have always been sold by the quire. Twenty-four sheets make a quire; but the Blank Book Makers have been selling from 12 to 20 sheets for a quire. The Public have been deceived. We shall inaugurate a new system, and sell our Blank Books by the hundred pages. Before doing this we offer our stock at a **REDUCTION OF 10 PER CENT.**

A PERTINENT QUESTION.

Why will you continue to buy Writing Papers by the quire, when you can save so much money by buying by the pound? Come see and be convinced; you can get almost double the quantity for the same money.

A First-class Plated Paper, 25 Cents per Pound.
A Linen Paper, 25 Cents per Pound.

IF YOU WANT

Any article in STATIONERY it will pay you to call and inspect our stock. We can sell at prices that will surprise you. Have the largest, best assortment and cheapest Papers ever offered for sale by anyone. This we will prove if you call.

All Grades of Writing Papers by the Pound.

PLAYING CARDS

From 6 Cents per Pack up.

PROGRESSIVE EUCHRE, in sets or separate parts.
POKER SETS, POKER CHIPS,
EUCHRE and WHIST COUNTERS,
CARD BOXES.

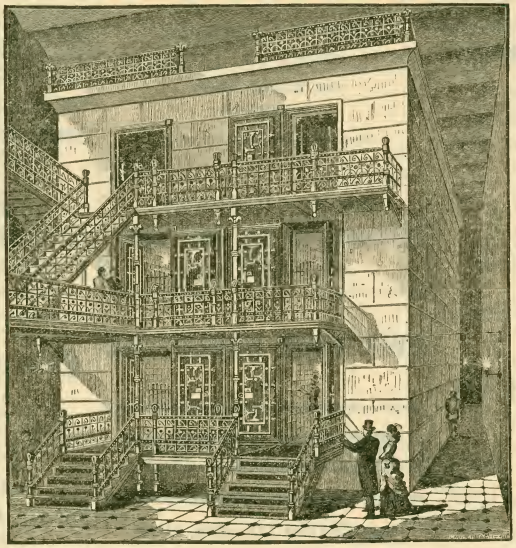
VOL. I.—NO. 9. PHILADELPHIA, MONDAY, MARCH 8, 1886. PRICE 15 CENTS

SAFE DEPOSIT VAULTS

—OF THE—

GUARANTEE TRUST AND SAFE DEPOSIT COMPANY.



THE GUARANTEE TRUST AND SAFE DEPOSIT COMPANY, in its fire-proof building, Nos. 316, 318 and 320 Chestnut St., Philadelphia, with its fire and burglar proof vaults, and all the necessary appurtenances for the prompt, convenient and safe transaction of its business—a structure unsurpassed in character and completeness by any building for a similar purpose in the country—is prepared to rent safes in its vaults, with combination locks that can be opened only with the keys held by the renters; receive for safe keeping, under guarantee, valuables of all descriptions, such as Coupon, Registered and other Bonds, Certificates of Stock, Deeds, Mortgages, Coin, Plate, Jewelry, &c., &c.; also Clothing, and other personal effects—assuming the fullest liability imposed by law. Receive Deposits of Money at interest, payable by check on demand, or on certificate payable on presentation. Act in the capacity of Executor, Administrator, Guardian, Assignee, Committee, Receiver, Agent, Attorney, &c., and execute trusts of every kind under appointment of States, Courts, Corporations, or individuals; collect interest or income and transact all other business authorized by its charter.

Safes of all desirable sizes, built inside of the Absolutely Fire and Burglar Proof Vaults of this Company, are rented at $9 to $125 each per annum. The larger Safes have Combination Locks. With the smaller each renter is furnished with keys—the only keys in existence that will unlock his Safe. The locks to these safes are all different and are changed with every change of renter. Each Safe has within it one or more Tin Boxes or Cases, in which to place the valuables deposited, under lock and key, held by renter. These Boxes or Cases are not to be opened within the vault, but must be removed to an adjoining room, fitted up with desks, screens, &c., where the owner, in perfect seclusion and privacy, can examine his Securities, cut off his Coupons, &c. A renter wishing to visit his Safe, must be identified by the Safe-keeper, who will always accompany him into the Vault. Any renter may, at his option, appoint a deputy to act in his stead; but in case of his death, no one but his legal representatives, duly authorized, can be permitted to have access to his Safe—in order that the interests of heirs may be completely protected. For the accommodation of Ladies, who may become Safe-renters, special provision is made, and separate apartments are fitted up for their exclusive use, with toilet room adjoining. Special accommodations are also provided within the Treasury for committees and officers of Insurance Companies and other corporations, whereby an examination of securities can be made without the trouble and risk of removing the same from the Deposit Vaults to and from their offices.

The Officers of the Company are:

THOMAS COCHRAN, *President.* EDWARD C. KNIGHT, *Vice-President.* JNO. S. BROWN, *Treasurer.* JOHN JAY GILROY, *Secretary.*

RICHARD WINSHIP, *Trust Officer.* HARRY J. DELANY, *Asst. Treasurer.*

PHILADELPHIA, MONDAY, MARCH 8, 1886.

AN important meeting of master carpenters and builders was held, Wednesday afternoon, at the office of Stacy Leeds & Sons, 120 N. Thirteenth street, to take action in reference to the proposition of the skilled workmen to reduce the hours of labor. The action which led to this meeting was taken by Carpenters' Union, No. 8. Mr. Joseph Cooper acted as President and Thomas Little as Secretary. The following firms were represented: Wm. C. McPherson & Sons, Yarnall & Cooper, Geo. Watson & Sons, Stacey Reeves & Sons, Mariner & Buckingham, J. E. & A L. Pennock, Benjamin Ketchum & Son, James E. Doyle, John Duncan, Kemp & Garrison, James Bradin, Kister & Orum, Adam A. Catanach, Thomas Little & Son, Richards & Shourds, William Devitt & Sons, T. H. Doan, Jacob Myers, Henry Taylor, George Payne & Co., Thos. Marshall, R. Q. Gibbon, Wendell & Smith, and John W. Lenny.

The employers in the building trade would prefer to see a ten-hour system continued, but recognize the right of their workmen to work less time if they are so disposed. They, however, feel that the threatened increase in the cost of labor, and therefore to the increased cost of material of all kinds, will work to the disadvantage of the building trade in the long run. Nearly all the builders present at that meeting expressed themselves as in favor of dealing openly and squarely with their workmen. After a thorough discussion it was decided to accept the nine-hour day, from May 1st, and the Carpenters' Union was notified to that effect. The employers spoke in the highest terms of their workmen, both as mechanics and as men.

This disposes of what might otherwise have resulted in a strike, which just at this time would be disastrous to the workmen, employers and the public. A movement of this kind is naturally productive of apprehensions in the minds of the community. It is a very easy matter for any employer to argue that to pay ten-hour wages for a nine-hour day will increase the cost of work, and bring about such a condition of things as will check enterprise, and work to the disadvantage of the trade. This figuring, while apparently correct, is open to criticism. It will be found, in the long run, that the reduction of the hours of labor to nine or eight will not be productive of the anticipated harm. Equalizing tendencies and influences will at once set themselves at work. The value and cost of labor will naturally increase, but, on the other hand, the value and cost of everything else will increase in like proportion, and workmen and employers will simply leave off where they started, neither one side or the other having suffered anything in money or business, and one side having gained one hour per day, which in itself is a good thing not only to the mechanics, but, taking a long view of that matter, to the public.

We are not theorists, and are not running after new-fangled ideas, nor, on the other hand, are we afraid of the consequences of a shorter day. The advantages secured by the workmen will be accompanied by the disadvantages of increased rent and of increased cost in everything they purchase. All these things work themselves out. There is an equalizing tendency in nature and in trade which will assert itself in spite of any force that can be brought against it.

The individual builder, in looking at an individual contract, naturally feels alarmed, and wonders how he will come out. His only escape is to discount the reduction in time and the increased cost, and let each succeeding brick push against its neighbor. The result will be satisfactory to all. Our productive capacity is increasing rapidly. If a sufficient supply of bricks cannot be made in nine hours or eight, means will be found to manufacture enough. There is no danger of shorter hours resulting in shortening material, to extend the figure. On the contrary, a benefit will result. The prosperity of a people is measured by the earning capacity of that people. If the working millions of America could, by some legerdemain, or new economic system, earn, say one-fourth or one-half more than they now are earning, demand from that source would increase one-fourth or one-half, and that improved demand would naturally improve the prices of all commodities sold. Looking at it in any light we may, there is nothing to be feared and many advantages to be secured.

OUR friends across the river are troubled with a short water supply. Quite a number of mills were obliged to shut down and a good many families are alarmed at the prospects of a water famine.

BRADSTREET gives some interesting information in reference to the cost of municipal lighting. The cost in Baltimore is $36.94 per year, used on dark nights only, or $46.19 if burned every night all year. In comparison the following figures are collected, showing the amounts paid in other cities: New York, $25; Boston, $31 85; Washington, $22; New Orleans, $24; Burlington, $25; Auburn, $17.50; Rochester, $18.12; Richmond, $44; Dayton, $21.11; Jersey City, $25; Cleveland, $17.50; Baltimore, $46 19. It may be interesting, also, to note the amount of lighting facilities which the larger cities possess. New York has 23,038 gas lamps, and 647 electric lights; Philadelphia has 13,555 gas lamps; Boston, 9,781 gas lamps, and 401 electric lights; and Baltimore, 5,191 gas lamps and 243 electric lights.

HERE are some practical suggestions as to to how floors ought to be made. Double floors make a house warmer and quieter, and save carpets, if the boards of the upper course cross those of the lower; but in this latter case it is very hard to get at gas pipes, etc. Where possible, a floor should be given a slight upward arch or chamber when laid, so that when it settles it will settle level instead of dishing. Narrow flooring strips last longer than wide ones, and do not cut the carpet so much as wide ones. Three four-inch boards, shrinking one-eighth inch each, make less cracks than a twelve-inch board shrinking three-eighths inch as sometimes happens. Of picture rails the author says: Now-a-days, most every one who thinks about it puts up a picture rail or moulding on which to hook picture cords. It saves plaster—and profanity.

PITTSBURG is sending out a strong delegation, with the exception of representatives of the labor interests, to represent the manufacturing interests of Western Pennsylvania before the Committee of Ways and Means. Manufacturers from Eastern Ohio are also present at Washington this week for the same purpose. A very strong presentation will be made, showing the inadvisability of the proposed changes. Eastern Pennsylvania has as yet taken no definite action, but individuals were present at the hearing and coöperated with their Western associates. The manufacturing interests generally do not fear any serious attack upon the tariff duties, but should a stronger vote than is now estimated be threatened when the final canvass is made a strong movement will be made not only of iron manufacturers, but of all other manufacturing interests.

THE REAL ESTATE RECORD has sent circulars to a large number of persons identified with the building interests requesting their affirmative or negative as to the desirability of the establishment of a Real Estate Exchange. A liberal percentage of answers have been received. Those who have not answered will favor the management with an early response.

This question is an important one. Were there even no more reasons than were given in the scheme published last week on our first page, the Exchange should be established. But there are other vital considerations not referred to. No urging ought to be needed to secure the necessary coöperation of interested parties. Property owners who want the best possible prices for their property will naturally seek its aid. Builders desiring to know the value of real estate and its fluctuations, will find in the Real Estate Exchange a valuable help. Knowledge that is now scattered in two, three or four hundred offices, or for that matter in one thousand offices, will be concentrated in one centre, to which all real estate operators, conveyancers, builders, property owners, insurance interests, and attorneys identified with real estate matters will come, each bringing something in the shape of experience or knowledge, or helping to create a demand for property.

It is no guess work to say that an Exchange of this kind would double the real estate transactions. It would enable persons of moderate means to keep themselves as well informed as the rest. It would create a fund of information and open a field of opportunities that cannot be found through any other avenue.

The surprise is that this idea of an Exchange was never seriously entertained before. Let immediate action be taken. Send in your responses for or against.

VERY few of the fire escapes would afford very little escaping in case of fire. They pass over windows out of which flames will roll first. Professor Eaton, an authority, suggests fire-proof turrets, with a stair case in the interior and lined with fire-proof material, built some little, but convenient, distance from the building and connecting with it by balconies. "Turrets of this fashion," says Mr. Eaton, "would dispel all sense of danger and be invaluable practically. From an artistic point of view, they are equally attractive. The modern ten-story building is very ugly. Its fire-escape addition is an abomination. Turrets would bring back the beauty of mediæval architecture."

THE Home Insurance Company of New York furnishes gratis to the public some valuable information relative to the prevention of fires, which architects and builders could read with interest by way of refreshing their memories. The instructions have reference to the erection of stoves and stove pipes, to furnaces, steam pipes, to the care of lamps, oil stoves, volatile oils, gas lights, ashes, and in shops to friction of machinery and spontaneous combustion.

Railroads vs. Real Estate.

These subjects, separately or collectively, afford so much scope for editorial discussion that there seems no end to them when once agitated. Their relation to each other are closer now than ever before, and their future relationship, so far as this great city is concerned, must present difficult and perhaps unsolvable problems. Our old city of Philadelphia seems to have lost its attractions, and the disposition of even the remaining few of its residents is migratory. The influx of people into the new sections of our city is something wonderful. Acres of houses have been built and occupied since the Centennial, and what seemed Utopian no later than 1876, has not only been realized, but the throngs who are to follow bid fair in the next decade to greatly outnumber those of the past. Suburban properties that were little thought of or hardly deemed available ten years ago, have suddenly opened up and now bid fair to command a large share of preference; and it is right here that the railroad question enters into that of real estate, for unless greater transportation facilities are provided by the horse railroads, and as all things must have a limit the further expansion of the city proper must necessarily be hampered, as a consequence, those suburban sections in adjoining counties which can now be reached quickly by the steam railroads, will receive greater attention to the detriment of the city growth. There is but one remedy, and that is more transportation. An elevated railroad must come, how soon will depend entirely upon the managers of the horse railroads. The remedy the REAL ESTATE RECORD suggests is that all roads, whether running north and south or east and west, should have during the hours of the heaviest travel, relay cars which they can switch in at intermediate points, by this means persons who are compelled to take the cars at long or short distances from their starting points, can do so with a moderate degree of assurance that they will be able to reach home without either being sardined, if a woman, or compelled to hang on a car step if a man.

Ten cars switched in as we suggest, in the space of about twenty blocks from the starting points of any railroad, between 5 and 6·30 in the evening, would afford so much relief, that we are surprised that it has not been tried. It is not the province of the REAL ESTATE RECORD to manage passenger railroads, but it is our right to enter our protest against every obstacle corporate, or otherwise, that impairs building operations or real estate interests in Philadelphia, and we mean to be heard every time.

THE Committee on Surveys has recommended the construction of 19,156 feet of branch sewers. The amount that property owners are expected to contribute is put at $40,915, or $30,000 less than the work will cost. An ordinance will be sent to Councils authorizing the construction of these sewers, and charging the excess, provided it does not exceed $15,000, to an item for branch sewers out of the annual appropriations to the department.

Builders and Building Associations.

The phenomenal growth of Building Associations is a matter of surprise and gratification to all who feel an interest in the improvement of the condition of the people. The past six months has stimulated interest in these popular associations and some new associations have been formed. One of our leading builders said last week that while it was true that the building and loan associations are vigorous and multiplying and likely to continue growing in number and efficiency, their sphere of usefulness was being somewhat curtailed by the construction of so many new houses, which are offered and sold at lower prices and on easy and inviting terms. He stated that as long as a man could buy a six or seven roomed house at $2,000 to $3,000 including lot, in a good neighborhood and convenient to cars and shops, at $200 to $500 down and easy monthly or quarterly payments, after that he will think twice over it before entering an association and borrowing money at 7 to 15 per cent., as is very frequently done, and putting up his own house. The value of much of the money going into houses in this city is estimated at 5 per cent. by the investors. Some of the houses erected through building and loan associations are built on 12 to 15 per cent. money. The difference makes an item worth looking at. The whole construction of houses with 5 per cent. capital, in blocks of 50 to 200 will naturally go ahead of the small retail and individual operations made with dear money. Some of the advocates of the old building and loan system say these extensive operations of investors will only strengthen the building associations, but it is difficult to see how they can. In a three thousand dollar house the difference in investment alone, calling them respectively 5 and 10 per cent., would be $150. But it may be answered, the selling price of the house will be made to cover that $150. The real question purchasers have to decide is: Can we get a better house in the association or by individual purchase? The bulk of those who are providing themselves with homes are answering in favor of the individual plan. Builders report a very active demand for houses of small size. They are picked up very rapidly. Hence builders are prospecting and constructing and scheming for still more extended operations. Cheap and abundant money is the basis of existing house building activity. Men who can build houses on five per cent. capital will crowd aside others who cannot build with less than 10 per cent. capital, to say nothing of the economic advantages of large operations as against individual operations.

THE patriots of the Twenty-fifth Ward, who compose the Public Improvement Association, propose to see whether they cannot abolish toll payment over a portion of Second street. They also propose to secure the opening of Venango street, between Third and Fifth, from Second street to Kensington avenue. Sixth street will pass under the Pennsylvania Railroad. Lawyers have been employed to carry the matter into court.

MOST employers naturally look upon arbitration as a device for robbing them of some of the authority which belongs to them. They are not disposed to accept or adopt any principle or proposition which will strengthen their employés in their position to accept or not accept current rates of wages. The work of organization is rapidly extending all over the country, and workmen are resolutely demanding that the principle of arbitration shall be accepted and put in force. Two or three years ago attempts were made in various State Legislatures to enact laws that would establish some sort of arbitration, but of late the method has been neglected, and labor organization itself relied upon to enforce the views of the workingmen.

STEPS will shortly be taken to place the Real Estate interests of this city upon a firm footing. The scheme proposed is meeting with hearty approval. The Real Estate Title and Trust Company also is being pushed through its preliminary stages. The lawyers feel that this movement is imperative. They propose to meet combination with combination. The conveyancers, real estate agents, property owners, insurance interests, as well as real estate lawyers, will coöperate in a movement which promises so many good results. The time is at hand for the contemplated action. The Real Estate interests need an Exchange. Over one thousand men are directly concerned in such an organization There are enough yard-wide and all-wool men in this one thousand to make a live Real Estate Exchange. Buyers and sellers of real estate would be obliged to come to the Exchange to obtain the highest and the lowest prices. It would be the natural centre of all important Real Estate operations.

THE Councils electrical committee on last Wednesday inspected the workings of the wires laid by the Brooks' Underground system, between the Broad street station and the Kensington station. Mr. Brooks proposes to make a proposition to the city to lay underground wires and maintain them for all public and private electrical business. The price Mr. Brooks will propose is that the city rent them at $30 per mile per annum and give the company 75 per cent. of the proceeds

CONGRESS has been working for years at a Bankruptcy Bill and it is now believed that one has been prepared which will meet all demands. The latest will differ in several different points from the Lowell Bill by the omission of the involuntary bankrupt feature. It seems impossible to devise any bill that will meet all the exigencies that are likely to arise.

PHILADELPHIA is providing herself liberally with streets. Last week's ordinances add some twelve or more miles of streets. Brick and mortar are advancing with giant's strides northwards and westwards. Next comes the necessity for well paved streets, but the requirements of the older and crowded sections of the city for improved streets is more urgent.

REAL ESTATE.

Corporations Chartered.

Charters were issued at the State Department this week as follows: Pittsburg, Knoxville and Allentown Railway Company. capital, $100,000; Pittsburg, Knoxville and St. Clair Street Railway Company, capital, $60,-000; Laughorn Improvement Company, of Bucks county, capital, $50,000.

Philadelphia's Wealth.

The value of the real estate of Philadelphia is estimated by the board of revision of taxes at $544,289,660. Suburban, $18,000,137; farm property, $18,706.174; personal property, $10,-307,644. Total $711,300,615.

The total return of real and personal estate subject to city tax for 1885 was $597,785,428, an increase of $14,172,745 over 1884, and an increase for 1886 of $12,524,187 over the preceding year.

Mistaken Economy.

The positive neglect and indifference with which some owners treat their properties is perfectly amazing, they seem to think that the cost of necessary repairs is money thrown to the dogs. They place their properties in the hands of an agent and compel him to meet the importunities of tenants for repairs while they keep in the background. Real estate agents are compelled to refuse repairs which they know to be actually necessary, because owners will not permit them to be made, this too to the detriment of the agents business and their personal popularity.

Is it any wonder that desirable houses in popular neighborhoods remain empty for months, while on the other hand less desirable properties are no sooner vacated than there are a dozen applicants anxious to secure them. There are scores of houses in this city which are barely tenantable and whose occupants are tortured with leaky roofs and inferior heating appliances, of course colds and sickness are the attending evils and the tenant has no redress; it would only be fair if the owners of these properties could be held legally responsible for the suffering and misery their shiftlessness causes the tenant.

Bills Now Before Congress for Different Public Buildings in Pennsylvania.

The aggregate amount appropriated or asked from the present Congress to date for public buildings in the State of Pennsylvania is $1,710,000. The status of the pending bills is as follows: Appropriating $175,000 for a post office at Lancaster, introduced into the Senate by Senator Cameron and passed; now in the House committee on public buildings and grounds.

To change the limit of appropriation from $80,000 to $250,000 for a post office at Reading, introduced into the Senate by Mr. Cameron and now in committee awaiting action of the House on Senate bills. A similar bill was introduced in the House by Mr. Ermentrout. A favorable report has been agreed upon, but the amount has been reduced from $.50,000 to $180,000.

Mr. Bayne has introduced a bill asking $500,000 for a building at Allegheny City Mr. Everhart for $10,000 for a building at West Chester, Mr. Sowden for $100,000 for a building at Allentown, Mr. Scranton to change the limit to $250,000 for the building at Scranton, also $200,000 for a Post Office at Wilkesbarre, and by Mr. Brown to change the limit at Williamsport to $200,000. Senator Cameron has introduced a bill asking $225,-000 for the proposed building at Williamsport.

With the exception of Lancaster, none of these bills have passed either house. The Reading bill will doubtless be favorably reported at the next call of the committee, with $70,000 reduction on the amount asked for. There is a disposition to make its passage by the Senate contingent upon the passage of the Lancaster bill in the House. Such a course, however, would be an injustice to Reading, as the Lancaster bill is an original measure, while Reading is simply a request for an increase of limit, as the original sum asked was insufficient, the most available sites requiring about one-half of the $80,0000 for purchase money.

The twenty Republican members from Pennsylvania are doing considerable log-rolling among members from other localities. All the Pennsylvanians except Sowden and Ermentrout asking appropriations are Republicans. It is not probable that all the bills will go through, as the amount stated is regarded by the committee as above the proportion due to Pennsylvania out of the whole sum to be recommended for such purposes. It will be interesting to see who will come out ahead. Major Hiestand having had his bill passed in the Senate has a decided advantage in the race, as he can offer inducements in the nature of prestige and aid in the Senate, which his colleagues do not possess.—*Times.*

Legal Decision.

It has always been a legal question to what extent transportation companies were obliged to pave and repave within municipal limits. There has been an old dispute between the Frankford and Southwark Railway in this city, dated back from 1882. The duty of passenger railways was defined by active assembly of July 7, 1857. A suit was instituted to recover from the railway company the cost of work done by the city which the company refused to do. The city recovered a judgement for $1,465, the full amount asked for.

The company removed the case to the Supreme Court. That Court, in an opinion by Mr. Justice Paxon, has affirmed the judgment entered in Common Pleas, No. 3, and holds that the consent of Councils had to be obtained before the company could occupy the city streets south of Cherry street. "It is settled law that Councils had the right to impose conditions in giving its assent (Mercer vs. The Pittsburg and Fort Wayne and Chicago Railroad Company, 36, Penna. St. Rep., 99; Dillon's Mun. Corp., Sec. 706). The consent of Councils was granted upon the condition that the company comply with the ordinances of Councils regulating passenger railway companies. Accordingly the company, July 8. 1857, filed a bond with the City Solicitor referring to the ordinance of July 7, 1857, reciting a resolution of the directors of said company, passed July 7, 1857, that the company would comply with the provisions of said ordinance,' and covenanting to faithfully comply with the provisions of the ordinance and perform all the conditions and execute all the provisions thereby imposed upon them. One of those conditions was (Section 3), that they "shall be at the entire cost and expense of maintaining, paving, repairing and repaving that may be necessary upon any road, street, avenue or alley occupied by them.' Having given bond to comply with this ordinance the company was plainly chargeable with the duty of paving the street in question, and whether it was above or below Cherry street is wholly immaterial. We find no error on the record." Judgment affirmed.

Changed Hands.

Hayes & Ellis' Sash and Door Factory and Lumber Yard, 4752 Main street, Frankford, has been purchased by Ellwood Allen, Esq., who has refitted the entire plant with new, modern, improved machinery. Mr. Allen is ready for business, with a complete stock of regular sizes of doors, shutters, sash, blinds, mouldings, etc.

BUILDERS' ITEMS.

Building Notes.

Marks Bros., Eighth and Arch streets, are adding another story to their stores.

Thomas A. Lynch, 108 S. Sixteenth st., has contracted for the erection of a dye-house and office for Raue & Co., dyers, Richmond street.

James D. Arthur, builder, is making extensive alterations and additions to the residence of Dr. R. M. Smith, 332 S. Twenty-first street. Hazelhurst & Huckel are the architects.

James B. Doyle, 907 Filbert street, the contractor for the new market-house at Girard avenue and Hutchinson street, is proceeding rapidly with its erection. The building has advanced as far as the first story.

A large building is being erected on Broad below Mercer street. W. H. Geissinger, 441 Chestnut street, is the architect.

Also, by same, a building is in course of construction on North Second and Somerset streets.

Phil. J. Walsh, Esq., is erecting two separate three-story frame cottages with stables and coachhouse attached to each, at Burmont, Delaware county, to cost $10,000. Robert K. Clark, 315 Arch street, and A. A. Campbell, 22 Strawberry street, the contractors.

William Gordon, builder, has erected and just completed an elegant residence in Germantown for Mr. W. E. Dobbins. It has already been sold to H. McMutrie, Esq., of Philadelphia, and is finished in the most approved manner. It contains twelve rooms, bath-room, etc.

Robert H. Tout, 217 S. Sixteenth street, is to build three large stores at Thirteenth and Market streets for Henry C. Gibson. G. W. and W. D. Hewitt, 310 Chestnut street, are the architects. He has also begun work on a dwelling-house at Twentieth below Chestnut street for Mr. Wm. Roberts, the architects of which are Messrs. Peabody & Sterratt, Boston.

Allen B. Rorke, 423 Walnut street, is making rapid progress towards the erection of the larger building, corner of Eleventh and Market streets, to be occupied by Hood, Bonbright & Co., wholesale dry goods merchants (808 Market street), for the Girard Estate. Already, about two-thirds of the work of excavating is done, and the foundation pretty well under way. Over three hundred men are employed, including masons, bricklayers, and the workmen who are employed in placing the structural iron in position. The building will have an iron front, to be erected by Cornell & Co., New York. James Pattison & Co., of N. Broad street, are doing the excavating and furnishing the foundation stone and brick work. The whole is being done under the supervision of the energetic foreman, Jacob Wentzelberger.

Mr. Rorke has another contract for the erection of a dormitory which is to accommodate four hundred pupils at Girard College. The building will be of white marble.

William E. Dobbins, 1001 Chestnut street, has contracted to erect a military academy for Rev. S. C. Clements, at Cheltenham, west of Philadelphia, to which a chapel will be added, of the Gothic order. Mr. Dobbins has been engaged in making extensive alterations in the present school building, and of the superintending of the academy's dwelling, and has just completed them. He has also in course of erection, at Ashbourne, on the Pennsylvania Railroad, six miles northwest from Philadelphia, twelve very attractive cottages, in the "Queen Anne" style. They are of nine and eleven rooms, with ornamental fancy brick fronts, and white, brown and blue stone trimmings, stained plate and mosaic glass windows. The interiors are furnished with walnut and mahogany wardrobes, washstands, electric bells, tiled vestibules and cemented cellar floors, hot and cold baths, etc. Four of these houses are finished; the other eight Mr. Dobbins expects to have completed during the spring. Ashbourne is growing rapidly, and is a most attractive locality for persons in search of a home. These houses of Mr. Dobbins are in the vicinity of Jay Cook's residence.

The market-house at Columbia avenue and Broad street is being altered. Ten new stores are in course of construction, and mostly rented. Two or three are already occupied by retail merchants. In addition to the above Mr. Dobbins has nearly completed a handsome residence at Ashbourne for Mr. John C. Roelofs, hat manufacturer, of Philadelphia, of the same substantial character as the houses he has already erected in that vicinity. The interior is to be of hardwood, and the different rooms of the building will be furnished with steam heat.

Mr. Robert G. Kennedy, architect, 224 S. Third street, is preparing plans for a large dwelling-house, of handsome brown stone, with mansard roof, with stable in rear, for Mr. J. J. Darlington, at Haverford Station, on the Pennsylvania Railroad. The house will be supplied with all the modern conveniences. In addition to the above, Mr. Kennedy is preparing plans for a store to be erected for George Stienman, hardware merchant, of Lancaster, Pa., to cost $60,000, and for a residence at Germantown, for Mr. Hy. Lewis, Philadelphia. Also for six three-story houses, of seven rooms each, with porches and front yards, at Forty-ninth st. and Chester ave., for Thomas Robb, Esq., of Philadelphia. Plans are also being prepared for a dwelling-house in the "Queen Anne" style of architecture, with carriage-house and stable, for Frank T. Pattison, at Rosemont, on the Pennsylvania Railroad, to cost $5,000. He is also engaged on plans for a handsome brown stone residence for Richard Davids, Esq., of Philadelphia, at Marion, on the Pennsylvania Railroad, a short distance west of Bryn Mawr. The entrance will be through an open vestibule. The floors will be level throughout, and the staircase will be lighted by windows on the south.

Mr. Kennedy is, in addition to the above, engaged in preparing plans for alterations on the residence of Mrs. M. P. Colkit, at Wayne, on the Pennsylvania Railroad. The sum of $15,000 is to be laid out upon the alterations of the house. A barn, to cost $12,000, and gate lodge, costing $6,000, are also to be built.

Also a residence of brown stone, with all the modern conveniences, and a stable, for Pierce Archer, Esq., at Wyneford, on the Pennsylvania Railroad, to cost $18,000.

Two houses, each of which will be three stories high, containing ten rooms, and finished in the most approved manner, are being erected on Walnut street, between Forty-second and Forty-third streets, by Burritt Sawyer. The plans were drawn by Robert G. Kennedy. The buildings will cost about $30,000.

—The author of a book on house building says:

"If you intend to make a *home* out of a house, give it plenty of storage room and real closets; not four-inch-deep places in which a man can't hang up a high hat." "A basement kitchen," in the author's opinion, "economizes room in the plan, keeps the first-story floors warm, and saves one chimney-stack," but he also adds that "it largely precludes personal supervision of servants by their mistress, and if there be no servants it may be found inconvenient when there are visitors."

Building Materials.

Marble dealers are well prepared to supply customers with the beautiful Florence and Florentine varieties of marble. These varieties are especially prized for monumental purposes, being exceptionally sound and uniform in color. The Florence, with its freedom from blotches, has variegated colors, fineness and strength of texture, all of which make it a marble that has already become popular with the trade. The Florentine is one of the best of the dark marbles—beautifully colored, fine grained and susceptible of a very high finish. In both of these varieties, buyers give the preference to that from Rutland, Vt., on account of exceptional soundness and uniformity of colors. Good marble is found, however, all the way from Maine to Georgia. Florence marble, extra dark, is quoted at $4.50 per cubic foot; dark vein, No. 1, $4; dark vein, average, $3.50; light or dark, No. 2, $2.75; light monumental, No. 1, $4; do., do., average, $3.50.

The slate trade for roofing is just about starting, and the outlook is very prosperous. Prices are fully maintained at $3.25 to $4 per square, according to size and quantity ordered. At the Ontalaunee Works, Lynnport, Pa., they make slate steps and platforms, floors, hearths, urinals, vault works, blackboards, register borders and mantels, and slate work generally. The William Penn Slate Quarry, Slatington, Pa., produces the celebrated Washington vein roofing slate, much in demand among Philadelphia builders and contractors. Extensive slate quarries exist at Lehigh and Northampton, Pa. Slate for flagging, stairways, etc., ranges from 15c. to 20c. per superficial foot, and is scarce. Blackboard slate is worth 25c. per square foot.

Builders and architects are looking forward to a busy season, and there is a promise of an increased demand for all kinds of slate. Lehigh and Bangor slate, 13x24, are quoted at $3 50; 12x24, $3.50; from 9x16 to 11x20, at $3.75; 7x14 to 10x14, $3.50; 8x12 to 8x14, $3.25, and 6x12 to 7x12, $2.75. No. 1 ribbon, all sizes, $3; No. 2, $2.50; seconds, all sizes, $2.50; hard vein slate, $4.25; Pine Grove, $4.25; Keystone, $4.55; Chapman, $4.65; Central, $4.25; red, $12; sea-green, $3; unfading green, $5.25.

The best plaster is worth to the consumer double the price of a poor brand, for the following reasons: first, it makes whiter and more durable work and castings; second, it is lighter in weight for the same bulk than any other; third, the barrels are larger, containing more bulk and value than any other; fourth, it is packed in new and well-coopered barrels, made expressly for the purpose. This selected calcined plaster, in lots of 30 bbls. or more, is worth $2 a bbl.; in less than 30 bbls., $2.25 per bbl.

Rosendale cement, 30 bbls. or more, $1.50 per bbl.; in less than 30 bbls., $1.75 per bbl. Improved hydraulic cement, $1.65 per bbl. Coplay cement, $1.30 per bbl. Portland cement, genuine imported English, is worth $3.50 per bbl.; No. 2, ditto, $3.25. Portland cement, French, Hemmoer's manufacture, is quoted at $2.65 to $3. Portland, German, from the same manufacturer, $2.65 to $3. Portland German cements, from Josson's mills, are worth from $2.50 to $3 per bbl. Portland, American, Saylor's, $2.50 to $2.75. Roman cement is quoted at $3 to $3.50; Keene's coarse, at $6.50 to $7, and Keene's superfine, at $11.50 to $12.

Cement mills are established all over the United States. Large quantities come to the Philadelphia market from Rondout, Ulster county, N. Y., Allentown and Selfridge Bridge, and numerous other localities in this State. The consumption of cement in this market is steadily on the increase, and prices have declined very considerably within the last two years. Lime is firm in price. White

lime of Teil is worth 28 to 35c. per bushel. Chicago and Wisconsin lime, in bulk, white mash, $1.25 to $1.50. Plaster of Paris, calcined, $1.25 to $2.25. Plastering hair, cattle, per bushel, 22 to 23c.; goat hair, 25 to 35c.; prime spinning hair, for plastering, 100 bushels or more, 25c. per bushel; in less than 100 bushels, 30c. per bushel.

The best quality of finishing lime is 25c. per bushel, of 70 lbs. to the bushel; the same quality they can deliver by the car load at 17c. per bushel. Portland cements are quoted by some at $3 to $3.50 per bbl.; Rondout, Ulster county, N. Y., cement at $1.25. The cement made in Pennsylvania is less used than that from Rondout. Plastering hair is selling at 30c. per bushel for No. 1, 70 lbs. to the bushel. Building stone, ordinary cellar sandstone, is worth $1.50 per perch, on the car, and in good demand.

Charles Este, lumber dealer, corner Seventeenth and Callowhill streets, quotes cypress shingles, 24 inch, heart, at $13 to $18 per M; 24 inch sap ditto, $10 to $12. Cedar shingles are worth $35 to $40 per M, 30 inch, hard dressed. Spruce laths $2.30 to $2.40. Cypress shingles are received from the South, laths from points in Pennsylvania, the West and Bangor, Me. The most of the lath he deals in he gets from Maine. The demand is fair, and the trade promises to be active during the spring and summer.

J. S. Thorn, manufacturer of building specialties, 1201 to 1209 Callowhill street, reports that his business, in all its departments, is quiet, with prices generally steady, with a very hopeful feeling prevailing, and anticipations of activity before long.

The demand for brick is good, prices firm; salmon is quoted at $6; hard, $9; stretchers, $12 to $14; pressed brick, $22 to $23.

Concrete Manilla Building Felt is strong, durable and water-proof, and will outlast almost any material in a frame building. It has been used in some of the finest mansions in the country, and as far as Portland, Oregon; also on national, State and public buildings. Some of the best architects, together with owners of buildings, unite in the opinion that it is invaluable at the sea shore, as it resists the action of the sea air, and retaining a solidity and hardness so requisite as a sheathing. Forplacing under slate or tin it has proved its excellence by dissipating all gases, and, where steam arises, causes the tin to last longer As a proof of its air-tightness, strength and durability, it is used in the lining of fermenting rooms, sulphur rooms and the like, receiving the medal and diploma against all exhibits at the Centennial, besides written reports from the Commissioners of the various countries there represented. These felts are sold by measurement, so that parties can at once determine the quantity their job requires. Special prices are made to architects and builders.

Conshohocken stone is possessed of great strength and crushing weight, and is especially adapted for bridges, heavy masonry and the foundations of buildings in general. It is a stone composed of laminated mica schist, and was used for the foundations of the new Public Buildings, Philadelphia, the Masonic Temple, South street Bridge, the Pennsylvania Railroad Company's Bridge at Manayunk and the Baltimore and Ohio Railroad Company's Bridge near Gray's Ferry. A large number of the churches of Philadelphia are built with foundations of Conshohocken stone, and it is made use of in most of the principal stores and dwellings for that purpose.

Charles G. Blatchley, 308 Market Street, so widely known as a manufacturer of a good pump, has been enlarging his facilities to meet an increasing demand. These pumps are designed for service in towns, villages, on railroads, and in private houses or in public places. The pump is made eight inches square, with heavy iron cap completely and securely closing the tap, with a substantial two-inch handle with extra large fulcrum pin and extra heavy links connecting with the rod. The bracket supporting the handle and fulcrum pin is made very large and heavy, and bolted on with four nine-inch bolts, extending entirely through the pump, and closed so as to prevent useless or mischievous interference with the inside working parts. This pump, from its construction and thoroughly substantial character, is peculiarly adapted for public places, where the same care and attention cannot be bestowed as in the case of private property. These pumps are furnished bored 3½ or 4½ inches, unlined or porcelain lined, the latter pump always much to be preferred, and with pipes 4, 4½, 5 or 6 inches square as may be desired. The price of the Blatchley town pump is unlined, 3½ or 4½ inch bore, 6 feet, $8.50; 7 feet, $9.50; 8 feet, $10 50. Porcelain lined pumps, 3½ inch bore, 6 feet, $10.50; 7 feet, $11.50; 8 feet, $12.50. He also manufactures extension and deep well pumps; patent rubber bucket chain pumps and chain pump material. The factory is located at West Graften, W. Va. For large buyers, Mr. Blatchley makes pumps in car loads to order, of special design, brand, finish, or color, to suit the wants of their trade. A price list will be furnished on application at the warerooms.

Building Permits.

Mansard roof, 128 ft. by 45 ft., Eighth and Arch streets, to George M. Nichol & Son, 217 Pear street.

Three three-story brick dwellings and two two-story brick dwellings, Forty-sixth and Chestnut streets, 18 ft. by 50 ft. and 16 ft. by 40 ft., to John E. Ruff, 825 Filbert street.

Two two-story brick houses, 16 ft. by 46 ft., Sixteenth, between Dickinson and Tasker streets, to James W. Hare, 1235 South Eighteenth street.

Five three-story brick houses and two stores, 16 ft. by 50 ft., Huntingdon, between Tyson and Hutchinson streets, to John Loughran, 2544 North Eighth street.

One three-story brick house, Ninth and Huntingdon streets.

One two-story store, Ninth and Tyson sts., and twelve two-story houses, all 15 ft. by 50 ft., to same party.

One two story house, 14 ft. by 26 ft., 2132 Wright street, to George Smith, 2133 Shurswood street.

To remove old front and replace with new, 14 ft., 1622 Randolph street, to Conrad Backle, 1711 Fawn street.

One underpinning 36 ft. by 20 ft., Tenth and Chestnut streets, to Fidelity Improvement Company, 252 South Fifth street.

One two-story brick house, 15 ft. by 28 ft., Mercy street, above Twelfth street, to J. W. T. Bitten, 1849 South Twelfth street.

One three-story brick store and dwelling, 21 ft. by 45 ft.; Germantown avenue, East of Ninth street, to John Wieble, 904 Arizona street.

Two-story stone addition to factory, Main street, below Shur's Lane, 27 ft. by 30 ft., to S. S. Keely, 350 Green lane, Roxborough.

One two-story brick house, 18 ft. by 48 ft., Cambria and Rorer streets, to Thos. Erwine, above address.

One two-story brick house and stable, 16 ft. by 44 ft., Tasker, above second street, to Geo. Wills.

Alteration to dwelling, 10 ft. by 30 ft. Lombard and Twenty-fifth streets, to James J. Gillen, 427 South Twentieth street.

One two-story brick house, 14 ft. by 15 ft., 5620 Vine street, to George Wetsel, 5620 Vine street.

Front alteration, 16 ft. front, 2409 Jefferson street, to Matthew Schmid, 217 Walnut street.

Thirty buildings, twelve stores three stories high and eighteen houses two stories high, 15 ft. by 60 ft., Germantown avenue between Lehigh avenue and Somerset street, to Thos. Battley, 2533 N. Ninth street.

Front alteration, 1118 S. Twentieth street, to Wm. Wilson, 1511 Moravian street.

One two-story house, 16 ft. by 50 ft., 204 Morris street, to J. W. Kuhn, 917 S. Fourth street.

Four two-story houses, 14 ft. by 42 ft., Clearfield, above Amber street, to John S. Baldt & Son, 2014 Clementine street.

One wall for shed, 4 ft. by 24 ft., Cumberland avenue, between Mill and Coulter streets, to S. B. MacDowell, 2147 Woodstock street.

Three-story brick building, 13 ft. by 15 ft., 2103 Delaney street, to Frank Thurwanger, 1618 North Nineteenth street.

Two three-story brick houses, 16 ft. by 40 ft., Allegheny avenue and Chatham street, to James Young, Chatham street and Allegheny Avenue.

One two-story brick house, 14 ft. by 18 ft., Indiana street, between Fifth and Sixth streets, to John Mitchell, 2441 Mascher street.

One alteration, 18 ft. by 32 ft., Waterloo, between York and Cumberland streets, to same party.

One-story addition to building, 33 ft. by 49 ft., Coral, between Taylor and Adams streets, to S. Humphries, 2531 North Eleventh street.

One two-story brick building, 16 ft. by 16 ft., 4070 Kershaw avenue, to James Kehlt, 5005 Paschall street.

One three story brick store and dwelling, 20 ft. by 16 ft., 4145 Lancaster avenue, to Geo. Meyers, 4147 Lancaster avenue.

Three two-story stone and brick cottages, with Gothic Penn roof, 10 ft. by 47 ft., Rittenhouse, between Main and Green streets, to E. H. Hammun, Germantown.

One brick shop, 14 ft. by 15 ft., 2913 Ridge avenue, to John Rite, same number.

Two two-story brick houses, 14 ft. by 37 ft., Emerald, between York and Dauphin streets, to Frank Dittrick, 2735 North Front street.

Three two-story brick houses, 14 ft. by 44 ft., Haverford, between Fifty-fifth and Fifty-sixth streets, R. C. Dothard, 3122 Paschall street.

One two-story brick stable, 50 ft. by 36 ft., Ludlow, between Thirty-eighth and Thirty-ninth streets, to Jacob R. Garber, 1211 Spring Garden street.

One story brick office, 10 ft. by 29 ft., Chestnut, above Thirtieth street, to A. M. Greene, 1315 South Sixth street.

One-story kitchen and two-story stable, 12 ft. by 15 ft., and 14 ft. by 24 ft., 4111 Market street, to John Anderson, 4223 Market street.

One-story brick carriage-house, 16 ft. by 18 ft., Waterloo street, above Columbia avenue, to E. Schmid, 1713 Mescher street.

One story brick building, 16 ft. by 28 ft., Maiden lane and Wharton street, to John Royd, same address.

A four-story brick factory, 16 ft. by 62 ft., Eleventh, above Market street, to P. H. Somerset, 1513 North Twelfth street.

One two-story brick stable, 15 ft. by 19 ft., Ridge avenue and Jefferson street, to William O. Gilbert, same address.

One third-story addition, 12 ft. by 21 ft., 1747 North Twenty-first street, to T. Dewbery, 307 North Eighteenth street.

Two-story lumber shed, 44 ft. by 16 ft., Norris, above Frankford avenue, to A. Richart, 1512 Otis street.

Two-story work-shop, 29 ft. by 30 ft., Norris, above Frankford avenue, to same party.

Two-story work-shop, 18 ft. by 45 ft., Southwest corner of Trenton and Norris streets, to same party.

One three-story house, 20 ft. by 56 ft., 125 Callowhill street, to S. S. Meyers, 979 North Fifth street.

INSURANCE NOTES.

Fire Records.

At Ashland, Wisconsin, Leahy & Garnish's hardware store, loss $8,000.

At Chicago, Joseph Solomon's dry goods store. Insured ; loss on building, $3,000 ; on stock, $18,000.

At Portland, Me., on Long Wharf, loss between $60,000 and $70,000.

At Baltimore, the store of Chas. Weiller & Sons, clothing manufacturers, loss $50,000. The store of G. S. Howser, loss $30,000. Loss on building, $15,000. Stock and building insured.

At Rusk, Texas, Rusk Penitentiary Works, machine shop and machinery. Loss, $75,000.

At Troy, N. Y., skating rink and carpenter shop. Insurance, $25,000; loss, $45,000.

At Galveston, Texas, Cotter's planing mill. Loss, $15,000.

At Ostrander, Ohio, three stores occupied by Thompson Bros., general merchandise ; Houtz & Sons, meat and fruit market ; and Dodds & Ferguson, general merchandise. Insurance, $3,300 ; loss, $9,000 or $10,000.

At Versailles, Ky., several stores and a residence. Insurance, $15,000; loss, $40,000.

At Baltimore, John Fangmeyer's residence. Insurance, $3,000 ; loss, $4,000.

At Windsor, Ont., Walsh's boot and shoe store. No insurance ; loss, $3,000.

At Worcester, Mass , the L. D. Thayer Manufacturing Co., makers of galoons, &c. ; W. F. Bancroft, manufacturer of spinning machinery. Loss on building, $20,000 ; Bancroft's loss, $20,000; the Thayer Company's $30,000.

At Harrisonburg, Va., Cooper & Hancock's skating rink and buggy salesroom ; Joseph Ney's empty store-room and warehouse, belonging to Sprinkle & Son. Insurance on Cooper & Hancock's stock, $3,000, loss $4,000; Ney's insurance $400, loss $600 ; Sprinkle & Son had no insurance, loss $600.

At Port Perry, Ont., the stores occupied by James Boxall, stoves ; W. T. Parish, hardware, and J. H. Brown, general store. Loss, $30,000.

At Nashau, N. H., Howard & Co., in Beason's Block. Insured, $8,000 ; loss, $15,000 ; insurance on block, $9,000 ; loss, $15,000.

At Derkinsville, Vt., A. C. Sawyer's general store ; insured ; loss, $4,000. H. H. Hick's brick dwelling and barn ; insured ; loss, $1,500. Dwelling and barn of Charles Dike ; insured ; loss, $800.

At Homestead, Pa., Mrs. Jane Rattigan's residence, insured, $2,800 ; loss, $3,200. Richard Holt, insured $1,500, loss $3,000 ; J. W. Bower, insured $1,500, loss $3,000 ; Mrs. Brown, insured $1,500, loss $2,000 ; E. J. Attwood, insured $1,800, loss $3,000.

At Niagara, Ont., seven shops on Queen street. Insured ; loss, $3,000.

At Portland, Me., the store of Chas. Day. Loss, $13,000.

At Evansville, Ind., Fred. Bauer's saloon and grocery. Insurance, $2,500 ; loss, $7,800.

At Algona, Ia., Elmendorf & Field's general store, George Galbraith's dry goods store, Theo. Churchill's grocery. Insurance, $8,000; loss, $12,000.

At Shamokin, Pa., the Mineral Railroad and Mining Co.'s coal mine. Loss cannot be estimated.

At Buffalo, N. Y., the soap works of Jabesh Harris, on Seneca street. No insurance on building, loss $8,000 ; stock and machinery insured ; loss, $9,500.

At Paris, Ill., the barn of Reed Boatman. Insured for $2,600 ; loss, $6,000.

At Atchison, Kan., J. C. Crall's livery stable. No insurance, loss $18,000. Donald Bros.' dry goods store. Insured ; loss, $20,000.

At Littleton, N. H., the Maple House, owned by Allen Peabody. Insured, $3,000 ; loss, $5,000.

At Clermantville, O., the residence and barns of John Idlet. Loss, $4,000.

At Boston, the dwelling owned and occupied by Wm. J. Fox, Aberdeen street. Insured ; loss, $3,500.

At Samantha, O., the barn of Thomas Patton; insured for $3,200.

At Mount Vernon, O., the barn of Samuel Ewalt. Insurance, $1,200 ; loss, $2,000.

At North Amherst, O., the residence of J. M. Jackson. Insured for $1,500 ; loss, $2,300.

At New York, the Home Insurance Company, 254 Broadway. Loss, $1,000.

At New York, the brick dwelling, 107 McDougall street, owned by Mrs. Glesson. Insured ; loss, $2,500.

At Palmerston, Ont., the Methodist Church. Partial insurance ; loss, $4,000.

At Kearney, Neb., the American House and six other business buildings. Partly insured ; loss, $15,000.

At Chicago, the machine shops and printing office, 34 and 36 West Monroe street. Loss, $10,000.

At Patchoque, L. I., the residence of David Ritchie. Partially insured ; loss, $2,700.

At Colrain, Mass., the James Hotel. Partly insured ; loss, $3,000.

Exr.—Executor.	

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

C. K. Vansciver to Abraham Master, Abraham Perkins, E. Budd Master, E. K. Master, Albert G. Shaw, Ellis R. Oliver, George M. Heisler, Isaac P. Fenimore, Timothy M. Bishop, Charles R. Fenimore, Charles M. Riley and Robert Vansciver, trustees, a lot of land adjoining the Coopertown meeting-house..... 200.00

Peter Lynch to Alfred K. Brittain, house and two lots of land in Mt. Holly..... 1,100.00

Doings of Common and Select Councils.

—Mayor Smith suggests that the city buy the Third Regiment armory.

—Quite an array of citizens protest against the opening of Glenwood avenue in the 25th Ward.

—John J. Kennedy has the contract for the construction of section 10 of the intercepting sewer.

—The Pennsylvania Railroad Company has been directed by ordinance of Select Council to erect a safety gate at Clinton ave. and Cumberland street.

—The bill to construct the intercepting sewer at $8.40 per lineal foot and $2.00 for twelve-inch pipe was laid over for a few days. The entire contract price is limited to $18,000.

—Appropriations have been made from the surplus of the year 1885, to the Department of Highways, Surveys, Law, City Property, Police, Electricity, Poor, Education and Fairmount Park.

—A certain space is to be set apart on the north side of the new City Hall, east of the Reynolds' Monument, on which to erect an equestrian statue to the memory of the late General Winfield Scott Hancock.

—Select Councils does not seemed to be worried over the possibility of the spread of contagious diseases, and when a resolution is presented, or an ordinance presented for approval, they are quietly laid aside.

—The American Surety Company, of New York, is to be the security of Michael O'Rourke, the contractor for section nine of the intercepting sewer, if Councils are willing to accept. Councils prefer securities within the jurisdiction of the courts.

—At last the unsightly market sheds on Girard avenue between Sixth street and Frankford avenue are to be removed. The Commissioner of Markets and City Property will take them down by December 31st. These are one of the remaining remnants of our early days.

—A quite influential minority on the finance committee are up with a report recommending the expenditure of $450,000 for a Walnut street bridge. If the city will authorize a private corporation to build a bridge and collect tolls from the street car companies and vehicles, the bridge can be built and made to pay from the start, but our prying lawyers might not be long in finding some constitutional obstacles.

—Real estate operators have been for some time past deeply interested in the efforts that have been made to secure the opening and grading of streets in new sections of the city as well as in some of the older sections. A great deal of influence has been brought to bear to have grading and paving done, in order that property might be increased in value and building operations undertaken. The building season is near at hand.

—Last week Select Council appropriated $175,731 from the surplus for the following purposes: For opening Fifteenth street, from Carpenter to Washington avenue, $4,821.11; paying one-half the cost of new county bridge, $7,050; repairing Girard avenue bridge, $10,000; sewer on Girard avenue, from Broad street to Aramingo Canal, $60,000; strengthening the abutments of Chestnut street bridge, $1,700; legal services in State tax cases, $3,000; music in the public squares, $1,000; lamps of the Malloney pattern, $4,800; additional electric lights, $10,000; putting wires under ground, $5,000; extra help in the Almshouse, $1,500; rebuilding the burned wing of the Philadelphia Hospital, $35,000; books for the Board of Education, $8,000; repairing damages to the East Park caused by building the intercepting sewer, $50,000; care and repair of Memorial Hall, $10,000.

The Union Passenger Railway Company have requested permission to lay their tracks over certain streets, for which franchises are held by the Lehigh Avenue Railroad Company, and they have been requested to state what particular streets they desire to use, in order that there will be no clashing of interests, and no midnight track laying or midnight tearing up of track by opposing interests.

—No small amount of log rolling has been indulged in among the members of Common Council. At the last meeting quite a batch of ordinances were passed authorizing the opening and paving of new streets and the transfer of some houses and some other work as follows: To authorize the grading of Lamb Tavern road, from Eighteenth street to Lehigh avenue, and to construct a bridge thereon; to permit the Knickerbocker Ice Company to erect a frame ice house on a lot, at the Connecting Railroad, between Twenty-ninth and Thirtieth streets; to authorize the grading of Tioga and Ontario streets, in the Twenty-fifth Ward; Eighteenth street, from Wingohocking street to Fisher's lane; Forty-second street, from Woodland avenue to the West Chester Railroad; Leithgow, Clearfield, Fourth and Taylor streets; Paschall avenue, Fiftieth and Eaglesfield streets; Free land and Ridge avenues, Roxborough, and Haines street, from Fifteenth street to Old York road; to authorize the opening of Meadow street, from Paul to Main street; McKean street, from Thirteenth to Juniper, and Snyder avenue, from Thirteenth street to Broad; to change the name of St. Mary street, between Hurst and Eighth streets, to Carver street; to authorize the paving of Clearfield street, from Fourth to Lawrence, Fourth street, from Indiana avenue to Clearfield street, and Perot and Meredith streets, from Twenty-fifth to Twenty-sixth street; to grant permission to the Church of the Nativity to transfer a frame building from C street to the northwest corner of Belgrade street and Allegheny avenue; resolution discharging the Committee on Highways from further consideration of the ordinances to open Hancock street and grade Coral street and Wheat Sheaf lane.

BOSTON people are very proud of their public schools and insist that they are better adapted for school purposes than any school-houses in the United States. They account for this excellence because the city has had for the past twelve years an official architect to design its buildings. A correspondent in boasting of this fact says:

"For example, the grammar school-houses of Boston recently erected, have a floor area of sixteen square feet and a cubic space of 216 feet to each scholar, with a supply of pure air of from fifteen to twenty-five cubic feet per minute, per scholar; figures which are obtained in but few school-houses in this country, and which are far in advance of the average school-houses in European countries, as given in Dr. De Chaumont's report to the International Congress of Education, held in Brussels in 1880. As to being bound down by the traditions of his office, it is seldom that a city architect can retain his office for a longer term than five years, and his successor, while he has his predecessor's plans to study, will naturally be ambitious to outdo him if possible."

It is not necessary to employ an architect for this purpose. Far better services can be secured by calling for plans.

Car and Locomotive Axles, Hammered or Rolled, Iron or Steel.

GUARANTEE ROOFING PLATES.

From the "Ironmonger" of December 5th.

MESSRS. MERCHANT & CO., of Philadelphia, may justly claim to have revolutionized the roofing-plate trade in this country. When, a year ago, they became the representatives forthe United States of Gilbertson's Old Method and Camaret plates, they were enabled, with the aid of the manufacturers, to give a positive and definite guarantee of the quality of goods bearing their brand. This could only be done by taking the entire product of the works, the proprietors being under contract to maintain the standard of the production. This, they have not only done, but the quality has been improved.

The guarantee thus given by Merchant & Co., was the first of the kind ever issued, as to quality of material, coating and assorting. In fact, the understanding between them and the makers, placed the Philadelphia house in a position to do what had heretofore been impossible with most importers, who buy of London or Liverpool agents, and who are, therefore, not in direct communication with the manufacturers. Messrs. Merchant & Co., therefore, claim to stand alone among importers as the only direct representatives of works in Wales, whose owners are under contract to keep up the standard of a guarantee and to sell their brand to no other parties, either in England or the United States. Of course this policy of guaranteeing goods has been followed by others, but as they purchase of commission agents in London, the consumer naturally feels a doubt, as to whether the guarantees of such dealers can always be relied on as effective.

The course adopted by Merchant & Co., has resultd in largely increased sales, and many architects and builders have found it to their advantage to use the guaranteed plates. In some cases, however, contractors have, to enhance their profits, substituted inferior brands for those specified. Finally, at the request of numerous architects and rillable roofers, who have suffered through competition with these unreliable parties, Merchant & Co. have succeeded in making arrangements with the manufacturers to stamp each sheet, not only with the name of the brand, but with its thickness or guage. The effect of this, the firm feel satisfied will bring about a better class of roofing work than has heretofore been attainable, and result in great benefit to all owners of property as well as to responsible roofers, architects, and others engaged in the building trade.

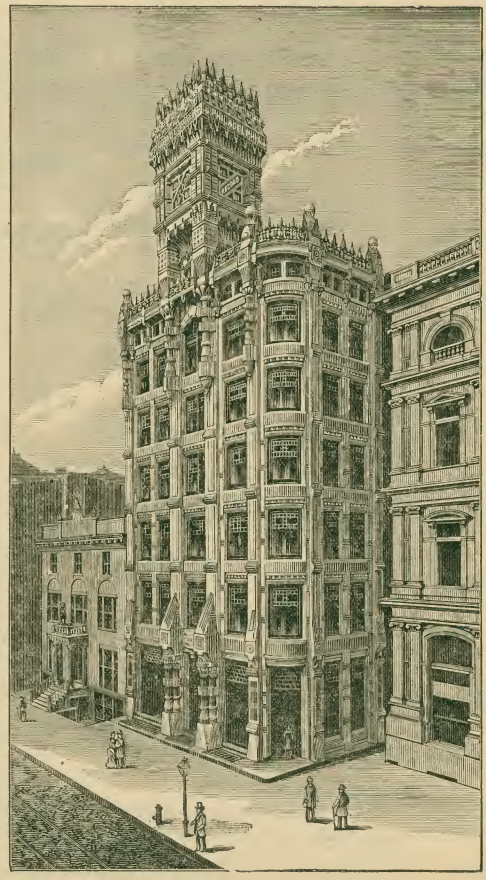
DEVOTED TO REAL ESTATE, BUILDING, ARCHITECTURAL AND INSURANCE INTERESTS.

[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL. I.—NO. 10. PHILADELPHIA, MONDAY, MARCH 15, 1886. PRICE 15 CENTS

THE "RECORD" BUILDING.

THE home of *The Record* is in a granite building of massive proportions, adjoining the new Post-office on Chestnut Street, above Ninth. Its design, as shown in the cut, is simple, presenting to the eye a monolithic effect and at the same time an impression of architectural grandeur. A series of piers and lintels rises tier after tier to a height of 96 feet. A very graceful effect was produced by curving the eastern corner of the front at the projection from the Post-office line, whereby the stiff appearance of an angular corner was avoided. In contrast with the severely classic effect of the Post-office, the general finish of the front of *The Record* building is marked by no rigid adherence to classic details. The structure is surmounted by an ornamental balustrade of original and artistic design, and a tower rises forty-one feet from the cornice, making an altitude from the foundation to the top of the building of 137 feet. The entrance is flanked on each side by a group of triple columns in two sections, each column being 16 inches in diameter, surmounted by massive projecting piers which batter to the pilasters above. These pillars are of polished dark-blue Quincy granite. The sashes of the windows are Queen Anne in general style, bordered with stained-glass squares. The interior of the building is a marvel of completeness in the details necessary to make a perfect publication office. Six stories and a basement comprise the floor space of the edifice, the major part of which is taken up with the different departments that go to form the working force of a great daily newspaper.



The publication office is unexcelled for beauty of appearance and fitting appointments. It opens on Chestnut Street, at the curve of the building front. The massive doors are richly carved with scroll-work decorations in bronze. At night, with the flood of electric lights in full blast, the sight is impressive. Cherry-finished hard woods, closely paneled, range seven feet high. Large panels of cherry and chestnut rise above, while beyond them is an elegant cornice, with ample frieze. The flooring is of black and white marble, with a border of Swanton chocolate and black marble tiles. The ceiling is decorated with Lincrusta Walton, that shows bright flowers and trailing vines in a wealth of color. The counter, running from end to end on the west side, is constructed of mahogany, with a cherry front. A commodious desk, with a screened elevation, is located at each extremity. A row of speaking tubes at the rear end of the counter gives communication with every part of the building, and telephones connect the office with all sections of the city for the convenience of *The Record's* patrons. Pneumatic tubes connect with the Western Union building, at Tenth and Chestnut Streets, for the quick transmission of Associated Press news, and also with the editorial and composing rooms.

REAL ESTATE PUB. CO.

PHILADELPHIA, MONDAY, MARCH 15, 1886.

WELL-INFORMED builders in this city have in some cases expressed the opinion that if workingmen continue to demand higher and higher wages, that next year the building trades will come to a standstill. If the successes the workmen have met with this year will turn their heads as success often has heretofore, the employers will naturally look for impracticable demands. If the workmen are wise, they will let their victories stand where they are, this year at least, and not overdo or crowd enterprise to the wall, or frighten away investors. The laborers, skilled and unskilled, are certainly entitled to share in all the progress of the age. The theory of our government justify them in doing the best they can for themselves, and the natural rights inherent in every individual and in society also justifies them in seeking to sell their labor at its highest price. For the best interest of all, however, it is necessary that those who control great operations should feel an assurance that their investments will not be jeopardized by fluctuating costs or material. The workmen have acted wisely this year in making known their demands at the outset. They overlook one of the secret causes of the existing prosperity, viz., the low prices of material during the past two years. If material had been 10 or 15 per cent. higher during 1884 and 1885, the building activity of 1885 and the promised activity of 1886 would not have come, or be in sight.

SO IT seems that the Gas Works are to go for $15,000,000, if buyers can be found to pay that price. There seems to be some Constitutional doubt as to the right of the city to dispose of the gas supply. This sale is dictated by political rather than commercial considerations. The question as to sale or no sale will be determined on March 17th. Public opinion, outside of political circles, puts the whole matter up as a political job, in which a few are to profit greatly, and the public are to be compelled "to pay the highest price the traffic will bear," to quote a railroad phrase.

WHILE builders and investors are watching with an eagle eye opportunities in suburban localities they are overlooking opportunities in the older portion of the city. A few men will be smart enough in a short time to profit by the opportunities presented there. There are opportunities of purchasing old properties, occupied by business rookeries that ought to be torn down and fine commercial structures erected in their place, with all modern improvements and attractions. It is rather surprising that the business men of to-day, or so many thousands of them, should be content to put up with the kitchens and dining-rooms and garrets, or even parlors, of those who have been occupying the dwellings of our business section. This is genuine provincialism. It is a wonder that the ghosts of the ancient cooks and chambermaids do not arise and drive them out, and tell them to make suitable business haunts for themselves. A little enterprise of this kind is needed. If there is any doubt on this point, let the earnings of some of our elevator buildings be compared to the earnings of adjoining properties, and the question is answered.

THE advancing tendency in real estate in this city has resulted recently in a few rather large transactions. Parties who have been offering real estate at reasonable prices, it is understood, have withdrawn some of their offers within thirty days. Two very large operators, it is understood, have purchased $300,000 worth of real estate within a short time, an unusually large transaction. The tendency of real estate, both city and suburban, is naturally to a higher range of values. Last year every operation was strictly legitimate. So are those of 1886, but in some of them there are symptoms of a speculative feeling, which, if it goes far, will counteract the healthful influences now at work, to some extent. Last year there was a great deal of real estate offered; this year there is less, although as much is available as last year. Holders of real estate are more confident than twelve months ago that their property will be wanted for building purposes, and they are naturally anxious to profit by 10 or 12 per cent. appreciation.

THIRTEEN per cent. is recognized as a very fair figure in investments in building properties. If higher wages and higher prices of material should threaten a reduction to 10 or 8 per cent., there would be naturally less inducement to builders and investors. In some cases profits have run as high as 16, 18, and even 20 per cent., where profitable purchases were made in real estate.

THE very influences that are now advancing prices, increasing demand and strengthening confidence in business and manufacturing circles, are laying the foundations for a reaction, which may not set in, perhaps, for a year or two to come, but which is bound to come if the history of the past is worth anything. There have been ups and downs as long as men can remember. We are now in an era of advancing prices. Considering the enormous amount of machinery, the wonderful manufacturing processes at our command, and the rapidity with which products of all kinds can be turned out, it may be surprising that there is any possibility for prices to advance. But they are advancing, nevertheless. As a rule, manufacturers look to the requirements of only twelve months ahead. During the past six months a great increase in capacity has been made. Two causes are at work to produce a reaction: first, the advancing tendency in prices, which will go to check enterprise and investment; second, the increasing supply of products of all kinds, which will in time crowd prices down. These two influences will meet together at a common point some time in the future, and then the reaction will set in.

A DECISION, it is understood, is to be made on March 25th by the General Manager of the Pennsylvania Railroad on the question of insurance. About 18,000 of the 43,000 employés of the company are enrolled. This action does not tally with the expression made at the delegate meeting. No doubt, a great many joined believing it to be to their interest to do so.

THE architects have scarcely any information ready for the public eye. All are, however, quite busy in preparatory work and estimating. They assure our representatives that prospects were never better for an active year. Competition is quite active for the work to be done, but better prices than last year are paid for the better classes of work.

THE "Tree Fool" has been at work in Franklin Square this winter in good earnest. Many of the trees bore no external signs of decay, yet they with the rest were cut down, and are things of joy no more. The lopping-off process is now going on almost daily.

THIS fine weather of the past week has started improvements all over the city; repairs, alterations and building operations have begun. Building material men are getting very busy, and prospects were never better

Why Don't They Organize?

Yes, why don't they? They seem to be waiting one for the other. We are rapidly growing impatient over the delay; and, although it is not in keeping with good manners, yet, if some of our Real Estate magnates do not take the initiative and call a preliminary meeting, the REAL ESTATE RECORD will do so. Hundreds of replies from Real Estate agents, brokers and conveyancers have been returned in answer to the circular sent out by this paper asking the recipient to state if he was in favor of a Real Estate Exchange in Philadelphia, or opposed to it. Not a single negative answer has been received; every answer has been in the affirmative, and many prominent men urge immediate action.

We protest against further delay; the preliminary meeting should be held at once. A few representative Real Estate men should meet and arrange for a convention to be held at an early day. At this meeting a committee on organization should be appointed. A charter could be obtained, location selected and the organization completed.

There are many cogent reasons for an Exchange, and we assure all who are opposed to such an organization that they are welcome to our columns if they desire to be heard against its being established.

Judge Gordon's Decision.

The decision of Judge Gordon in the Horace Binney case, if permitted to stand, must materially strengthen the business of the responsible Real Estate lawyers and conveyancers of this city and State; for, when it becomes a settled point of law that he who assumes the position of legal protector for a client becomes responsible for his mistakes, and must make good all losses that his negligence or ignorance entails upon the client, much of the lost confidence will be restored, and the clientage that has left them will be largely regained.

Persons seeking professional assistance in their Real Estate transactions desire safety and security over every other consideration; the high character or legal acumen of the gentleman whose mistake ruins a man, and wrests from him his life's earnings, carries very little consolation with it.

It is this very element of responsibility and security which has built up the Title Insurance companies, for no man, however economical, would be harassed with doubt and uncertainty if it could be avoided. The element of safety is paramount; it overrides every question of sentiment or preference, and if lawyers and conveyancers desire to recover their business they must meet the Title companies on their stringent points.

We believe Judge Gordon's decision to be good law, and we think it must hold, notwithstanding the dissent of such an able jurist as Judge Ludlow, whose exceptions seem to be based upon limitation alone. Judge Gordon is particularly clear and forcible in his very lucid discriminaton between a legal and a moral fraud. We cannot distinguish the difference between that criminal negligence which would hold a person responsible for another's death and that negligence, criminal or otherwise, which entails upon a man and family loss, misery and suffering, perhaps greater than death itself.

We give Judge Gordon's decision, in full:

"The Court finds that he (Binney) voluntarily did an unlawful and wrongful act, which he knew he had no right to do, and in the doing of which he was in the discharge of no other lawful and proper duty. By reason of Mr. Binney's wrongful entry of satisfaction Morris Brown was deceived into believing that he was purchasing an unincumbered property, and on the strength of that reasonable belief parted with his money. Subsequently he was evicted from his home, his title was destroyed, and his property was entirely lost to him. Surely, if there ever was a case in which a court of equity, to prevent a manifest injustice, should pronounce that act a fraud, this is the case. There is nothing in the evidence to give any other color to it than that of fraud. All that has been argued to show that Mr. Binney's act was an innocent mistake is merely an assumption, and is based upon the well-known character of that gentleman for probity. But that assumption is not a fact of which the Court, in this proceeding, can take judicial notice. The proceedings are therefore referred back to the master to state an account in accordance with this opinion."

The Western Nail Association met last week and re-resolved to fight it out. This means dear nails east, because of the heavy demand which will be made on eastern factories. Prices are $2.40, $2.50 and a steady increase of orders is probable. A good many steel nails will be thrown upon the market.

JUDGES THAYER AND ARNOLD on Friday last heard the argument of Deputy-Attorney General Snodgrass, on behalf of the Commonwealth, on the question of imposing an additional three mills tax on the capital stock of Insurance Companies as represented by the "mortgagees, money owing by solvent debtors, whether by promissory notes, penal or single bill, bond or judgment, and all public loans or stocks," in which the capital is invested. Decision was reserved.

THE industrial activity in and about this city is certainly very encouraging. Manufacturers are enlarging their plants, adding additional machinery, pulling out old things and putting in new, preparing for a greater production and counting upon a general improvement in trade. No doubt their judgments are correct. They know that the consumptive capacity of the country must increase; that markets will be opened both at home and abroad for our surplus products; that the cheapening process will continue in spite of an occasional upward tendency. Little industries are springing up all over the country. Silk mills in sight of blast furnaces, is a phenomenum; Gingham mills in hearing of rolling mills is a probability. These facts indicate the elasticity of our industrial system. They also show the extent to which diversification can go.

BUILDERS' hardware will not be advanced materially, according to the opinion of manufacturers and dealers. At the same time, it would be well to have requirements covered.

THE builders are arranging and preparing. No very large enterprises have been agreed upon during the week. The outlook is bright, however, for large operations.

REAL ESTATE.

A Fire-Escape for a Public School.

The Committee on Property of the Board of Education, in conjunction with Councils Committee on Schools, on Friday last, awarded a contract for the erection of a fire-escape and stairway in the school at Pine and Quince streets, to W. W. Crane, for $3,-159.20.

The Health of the City.

Last year there were 610 deaths from typhoid fever, 375 deaths from scarlet fever, 600 from diphtheria. Major Veale very correctly summarizes the situation by saying that "a better water supply, a better sewerage system, and a perfect food inspection might reduce the death rate on these diseases."

The New Bank.

The Southwestern National Bank, 527 S. Broad st., will commence business about 1st of May. The following Board has been elected: John Gardiner, John B. Parsons, H. B. Rosengarten, John Hunter, John A. Stevenson, John O'Donnell, Henry Whiteley, Jacob J. Hitschler, W. W. Alcorn, W. B. Mendenhall and W. S. Fox.

Jacob Reed's Sons.

Jacob Reed's Sons seem to be determined to outdo all competitors in the clothing business on the question of show windows. Their new store—918 Chestnut street—is to have in its show window a sheet of glass which is supposed to be the largest in the United States. It measures 9 feet 4 inches in height, and is 16 feet 6 inches long. Bets are even that it will be broken in setting it.

Cut Nail Production in 1835.

The total production of cut nails in 1885 was 6,696,815 kegs of 100 pounds each, against 7,581,379 kegs in 1884 and 7,762,737 kegs in 1883. The production of 1883 was the largest ever attained. As compared with 1884 there was a falling off in 1885 of 884,564 kegs or over 11 per cent., while as compared with 1883 there was a falling off in 1885 of 1,065,-922 kegs, or almost 14 per cent. The decreased production in 1885 is very largely due to the stoppage of many Western nail factories for the last seven months of the year.

Charters Granted.

McCarty Gas Company, of Philadelphia, with capital of $100,000.

J. L. Kent Company, of Philadelphia, capital $50,000, for the erection of wharves, shed, etc., for the receipt and storage of lumber. Mortgage Trust, of Philadelphia; capital, $500,000. Bernice Coal Company, of Philadelphia; capital, $25,000; George H. Sewers, treasurer. Henry Disston Manufacturing Company, of Philadelphia; capital, $10,000. Pennsylvania Natural Gas Company, the business of which will be carried on in Washington and Alleghany counties; capital, $500,000. The Electric Company, of Washington, Pa.; capital, $5,000.

Kensington Improvements.

Hughes & Paterson, iron manufacturers, are enlarging their works, at Richmond and Otis streets, by the erection of a puddle mill, 210 feet front on Richmond street by a width of 80 feet. This enlargement compels the removal of the workshop of Bradlee & Co., chain makers, on Richmond street and Gunners' Run, and that firm are now having erected a new workshop at the southwest corner of Beach and Otis streets, 166 feet by 61 feet in dimensions.

Registration of Plumbers.

The new rules for the registration of plumbers go into effect April 1st. All plumbers are to be registered at the office of the Board of Health. After a good deal of work on the part of the Board of Health and the Plumbers' Association, rules were agreed upon, which are to be enforced in reference to all sanitary work. They provide very minutely for the methods of plumbing and drainage, and all plans for such work must be approved by the Board under a penalty.

How to Avoid Fire Traps.

Where all spaces are left in vertical walls, that are either wholly or partly enclosed by wood, these spaces should either be filled completely with some porous, incombustible material, or else frequently cut off and divided in such a way as to have no more communication with one another than the cells of a honey comb. In no other way can a wooden wall be made anything else but a fire trap, and if fire is not caught in it, it will be because no fire ever happened to come that way.

Fire Engines.

An engine made by the La France Fire Engine Company, of Elmira, N. Y., was tested on the north end of the Chestnut street bridge, in the presence of several of our fire and insurance authorities, last Thursday. A stream of water was thrown through a 1⅜-inch nozzle, connected with the engine by two lines of hose, each about one hundred feet in length. A 1⅛-inch and a 1½-inch nozzle were afterwards used, and later two separate streams were thrown at the same time. During the time the engine was working its average steam pressure was 120 pounds. The weight of the La France engine is said to be 7,200 pounds.

The State Board of Health.

The State Board of Health have called a convention which is to meet in this city on the 12th of May next, and which is to be composed of the leading sanitarians of this country, for the purpose of discussing methods for the prevention of sickness and death, the improvement of the sanitary condition of Pennsylvania and the best way to promote longevity. All the different scientific subjects pertaining to sanitation are to be discussed at length. The convention will remain in session for three days.

Cape May's Water Works.

The City Council held a meeting on Friday night to open bids for the sale of the water works. The highest bidder was W. W. Taylor, who bid $22 000, the next bid being $20,-000. Councilman Denizat moved that Taylor's bid be accepted and President Dougherty, who was in the chair, seconded the motion. Councilman Williams claimed that the President had no right to do this and the bids were finally laid aside for further investigation. President Dougherty, in a huff, called Mr. Williams to the chair and then wrote out his resignation. The President pro tem. declined to receive it, on the ground th t it should first go to the Mayor, and Mr. Dougherty put on his hat and left the room. His action causes considerable comment.—*Times.*

—The bill drafted by Speaker Armstrong at the instance of the business men and City Council of Camden, and intended to encourage manufacturers in that and other cities of the State by permitting rebates in local taxation upon manufacturing plants, is still in the committee of the House, and is expected to be reported negatively.

Buildings for the Fire Commission.

—The Fire Commission held a meeting on Wednesday afternoon, at Broad and Race streets; President Loudenslager in the chair. The contract for the new engine house at Bridesburg was awarded to Jacob Zimmerman, who agreed to sell it to the city for $6,400, or rent it for $750 per annum. The committee was instructed to readvertise for bids.

The J. & P. Baltz Brewing Company made three proposals for the erection and leasing of a house on 28th street, above Girard avenue, and in consequence of the proposals not having been considered, the matter was referred back to the committee. The brewing company has agreed to lease the property at from $900 to $1,200 a year. The committee recommended that William H. Vankirk be awarded the construction of the house, at a rental of $1,400 per year, hence the reference back to committee. Charles J. Gallagher proposed to build a new house for Engine Company No. 20, at Tenth and Hunter streets, to rent for $2,500 a year or sell for $30,000; also to build a house at 918 Filbert street, to rent for $2,000 a year or sell for $20,-000. As there was some doubt as to whether the company would be obliged to vacate its present quarters at 911 Filbert street the proposals were referred back to Committee on Real Estate and Leases, with instructions to ascertain whether the owner of the present engine house desired possession of the house.

The Committee on Real Estate and Leases was also instructed to readvertise for bids, for the construction of a house, between Sixth and Tenth and Poplar and Master streets. The only proposition made was one from James Batt, to build a house for a truck company, and lease it for $2,200 per year.

Chief Engineer Cantlin reported that a hose company had been placed in service at Chestnut Hill. He submitted a copy of a letter from President Parsons, of the People's Passenger Railway Company, commending the department for the promptness and efficiency of its service at the fire at the car stables on Wednesday night of last week.

The Committee on Supplies and Repairs presented a resolution recommending the location of a chemical fire engine at Chestnut Hill, which was adopted.

The Board of Fire Escapes met and granted several certificates to owners of property, who had erected proper escapes.

New York News.

—The New York Real Estate Exchange is steadily increasing in membership.

—The officials of New York and Brooklyn are contemplating assessing property at its full value and the Real Estate Exchange has the subject under sub-committee investigation.

—The Legislature at Albany is having a good deal of work given to it by the New York Real Estate Exchange and the watchful eyes of that organization do not permit any bad work to be done.

—The real estate operations in New York city for January and February foot up $305,-429. It is said that there has been nothing like this in the previous history of the city. The plans for February 1885 called for 211 buildings, while this year, the number reaches 359. The expenditures for February last year were $3,469,350; this year, for the same month, $5,236,600, and for the two months the figures are $9,060,788. This shows a doubling of the amount of money invested in buildings in two years. New York is now calling for rapid transit between the Battery and Harlem River, so that business men can travel the distance in three quarters of an hour.

—In some of the larger cities there is a reaction in favor of lower rents, due to the decrease in the average incomes. In New York the result is, first, to decrease the cost of living, and secondly, to decrease the average of incomes. Thus there are fewer people able to pay large rents. In illustration we find large expensive apartments a drug in the market. A real estate broker says that he has 115 keys of large suites to rent and few inquiries. For the smaller apartments and houses there is an active demand, showing that the depression is not general, but confined to the more expensive and extravagant scale of outlay. Nor is this by any means an unhealthy sign. It indicates a return to more conservative habits of expenditure, of greater thrift, and accordingly of greater accumulation of wealth. When it is considered that New York is ahead of any other capital in the price paid for land, does it not show that we are on the threshold of a reaction which shall bring about a more equal ratio between land values in this city, London, Paris and Vienna?

—A new Broadway Arcade railroad bill has been introduced in the New York Legislature, which calls only for an excavation of the street, from curb to curb, a distance of 44 feet. This will allow the company to construct four tracks of the ordinary gauge or two for accommodation and through trains. The through trains are expected to make the distance from the Battery to Harlem River in twenty minutes, and the accommodation trains will make much faster time than the present elevated roads, or any other means of transit that will ever be practicable above ground. The first section of the road from the Battery to Fifty-ninth street is required to be completed in five years and the remaining distance to Harlem River within three years thereafter. Subways for the accommodation of water, gas, steam and other pipes are to be built under the railway track on both sides of the street, with openings every quarter of a mile affording convenient access to the pipes. The capital stock of the company is fixed at $25,000,000, divided in 250,000 shares. A number of prominent citizens and capitalists in the city are reported to have recently enlisted in the enterprise, and there is a fair prospect that another summer will witness active work on this long-delayed and much-needed improvement. Like all great enterprises that have come to be an acknowledged necessity and are on the eve of fulfilment, the Arcade has suddenly encountered a rival in the shape of the "District Railway Company," so-called, which, judging from the pictures of it that have been scattered about the legislative halls, is a sort of burlesque abortion of the Arcade. It is a scheme that was examined and rejected by the engineers of the Arcade a long time ago as inadequate to the needs of rapid transit and utterly impracticable. It proposes to run under Broadway; but how it expects to get there is a mystery, for the sole right of way under that street was secured to the Arcade company years ago by legislative charter that has not yet been repealed and is not likely to be.

—Merchantville and Pensauken, New Jersey, are to have a hundred new houses this spring.

—The preservation of scaffold ropes is a matter of great practical importance when scaffolding remains erected for any considerable time, especially in localities where the atmosphere is destructive of hemp fibre. It is suggested that in these cases the ropes should be dipped, when dry, into a bath containing twenty grammes of sulphate of copper per litre of water, and kept in soak in this solution for four days, afterward being dried. The ropes will thus have absorbed a certain quantity of sulphate of copper, which will preserve them from the attacks of animal parasites and from rot.—*Manufacturers' Gazette.*

BUILDERS' ITEMS.

Building Notes.

PLANS and drawings for a new chapel annex are being considered by the vestry of the St. Mark's Protestant Episcopal Church, Frankford.

THE foundations for a new station are being laid on the Pennsylvania Railroad at Holmesburg. The building is to be similar in construction to that at Chelten avenue, Germantown.

A NUMBER of builders have sent in estimates for the erection of a cottage dormitory on the Bryn Mawr College property. The bids were opened on Saturday, March 6th, but no decision has yet been arrived at.

GEORGE F. PAYNE & Co., 1211 Sansom street, are making extensive alterations on the residence of Lewis C. Gratz, Esq., at Roslyn Heights, Chestnut Hill. The architect is Arnold H. Moses, 226 Walnut street.

THE Southern portion of the new depot and stables of the Union Line, on the square bounded by Huntingdon street and Lehigh avenue and Hancock and Mutter streets, is under roof, and of the northern portion the walls are just going up.

HAZELHURST & HUCKEL, architects, 508 Walnut street, are preparing plans for a large hotel at Point Lookout, in the Chesapeake Bay, for Mr. Anthony M. Zane, of Philadelphia, and for a residence at Benizet Station, P. R. R., for Mr. S. M. Gilbert. The house will be stone to the eaves, and the architecture in the Queen Anne style. They have also in progress plans for a residence and stable at Longport, N. J., for Mr. Long. The house will be in the Queen Anne style, with hardwood finish.

Building Materials.

THE Bristow Brown Stone Company, of Virginia, chartered by the Legislature of Virginia, has its Philadelphia office at 19 S. Ninth street. The officers are, Hon. James Pollock, Philadelphia, president; Hon. Henry A. Atkinson, Jr., Richmond, vice-president; Michael B. Portiaux, Richmond, secretary; Robert C. Rothe, Philadelphia, treasurer; Benjamin F. Ashwood, Philadelphia, asst. secretary and general manager. The quarries of the company are located at Brentsville, Prince William County, Va., about 40 miles from Washington, D. C., 33 miles from tide water at Alexandria, and three miles from Bristow Station on the Virginia Midland Railroad. Experts have pronounced the stone to be of the best quality. The quarries are well located for working, and the stone can be taken out at comparatively small expense.

THE Warren Ehret Roofing Company (Limited), 107 South Second Street, are engaged in the manufacture of roofing adapted to buildings of all descriptions, and to all climates, and which can be applied to steep or flat roofs at a trifling cost. It combines the best known water-proof composition, with the best quality of roofing felt. It is pliable, clean, light, cheap and durable. It is put up in rolls of 100 square feet; each roll covering 100 square feet of roof, or a space 10 ft. by 10 ft., and is 32 inches wide. The materials used in the construction of this roofing have been used in various ways for roofing purposes for more than thirty years. An order for 100 square feet is sent out in the following manner: 1 roll of roofing, 8 gallons of "slag cement," 1 pound of tin caps, 1 pound of roofing nails. The Company also manufactures the "Slag-Stone Composition Roofing," which is both fire and water-proof, and is remarkable for its durability and cheapness.

—Higher rents and higher priced products will be the inevitable outcome of the present upward tendency in all directions.

Recent Building Patents.

EMBOSSNIG WOOD.—The wood is embossed by means of a roller upon the periphery of which projecting figures and designs are arranged. The outline of the design is formed into a cutting edge, to cut the fibres of the wood.

BUILDING WALL.—The side stretches of brick or other material are placed lengthwise with and on both sides of the walls, and have their inner corners beveled. Interior rectangular ties are arranged in the recesses between the beveled part of the stretchers.

LATHING.—The lathing consists of thick boards, having one edge beveled in one direction and the other edge beveled in the other direction, and thin boards interposed and filling the spaces between the thick portions.

FASTENING WIRE LATHING TO IRON FRAMES OF BUILDINGS.—A T-shaped fastener is employed, the shank of which is passed through the lathing on one side of a perforated furring strip, and through the holes in said furring strip. The ends of the shank are then bent down.

METAL ROOFING.—The edges of the sheets are bent up, and one edge is cut out at intervals to form notches. These notches are engaged by hook-shaped cleats, which are nailed to the roof. The standing edge of the adjoining sheet is perfectly straight, and is of such a height that it may be folded over the recessed edge of the first sheet.

VENTILATOR.—The upper part of the flue is surrounded by a petticoat, upon the upper portion of which there is an annular gauge, that is provided with four holes that register with holes in the petticoat. A jacket surrounds the entire structure. This jacket is also perforated and contains inner upright partitions that separate the several perforations.

HEAT REGULATING DEVICE.—The object of this device is to maintain a uniform degree of heat in a room. It is constructed of an upper and lower rubber or metal plate secured together at their ends by clamps and a bolt. It is placed in a room near a door, and when the heat becomes too intense, the upper plate will be bulged out and a lever attached thereto will be made to press the door and open it, thereby allowing the heated air to escape.

ENAMELING SHEET METAL ROOFING PLATES.—The process consists in dipping the plates in the enamel, removing the surplus by centrifugal action, baking the plates in muffles, and finally cooling them. The enamel is composed of 57 parts of silica acid, 24 parts of carbonate of soda, 10 parts of calcium, 1½ parts of nitrate of soda, 6½ parts of chlorate of soda and 1½ parts of stannate of soda. These ingredients, after being melted and ground, are mixed with 10 per cent. of silicate of alumina, 10 per cent. of calcined borax, and with water so as to form a thin paste.

Building Permits.

Second-story addition, 10 ft. by 14 ft., Orthodox, between Lackawanna and Jefferson streets, to Cox & Strickler, 235 Orthodox street.

One bulk window, 13 ft. by 39 ft. Martingale, between Tenth and Eleventh streets, to P. Scherer, 115 N. Seventh st.

Addition to building, 10 ft. by 6 ft., 2455 N. Sixth street, to David Shull, 2555 Orkney street.

One two-story brick house, 48 ft. by 45 ft., Norris and America streets, to M. K. Snyder, 1939 Hancock st.

Two two-story brick houses, 14 ft. by 34 ft., Fernon street, between Eighth and Ninth streets, to W. N. Rowan, 929 South Eleventh street.

One two-story wood bath-house, 10 ft. by 10 ft., 1708 S. Ninth st., to Margaret Watson, 1700 S. Ninth st.

One-story brick outhouse, 19 ft. by 30 ft., Water, between Callowhill and Willow sts., to Wm. Orem, 981 Marshall st.

Nineteen two-story brick houses, 12 ft. by 26 ft., Orkney, between Somerset and Cambria streets, to Charles Rossert, 2114 Marshall street.

One iron chain factory, 50 ft. by 106 ft., Beech and Otis sts., to Bradlee & Co., Richmond and Ash sts.

Addition to building, 20 ft. by 30 ft., Wyoming and Market sts., to John Dickinson, 2308 St. Alban's place.

One-story brick kitchen, 17 ft. by 18 ft., Eighth, above Walnut st., to McFetridge & McConnell, 1608 Spruce st.

One brick house, 10 ft. by 32 ft., Chelten avenue and Chew st., to Albert Hamilton, Branchtown.

Five two-story houses, 16 ft. by 45 ft. Fifteenth, between Federal and Ellsworth sts., to John White, 1840 Federal st.

One stone church, 96 ft. by 180 ft., Robeson and Cresson streets, to P. Loughrey, 4247 Main st.

Fourteen brick dwellings, 15 ft. by 50 ft., Ninth, between Huntingdon st. and Lehigh ave., to N. L. Heist, 712 West Cumberland street.

Two-story brick shop, 16 ft. by 29 ft., 518 Redwood street, to John A. Antonio, 439 Redwood street.

Two-story back building, 15 ft. by 23 ft., 1520 Frankford road, to George Shegog, 1713 Leib street.

One three-story brick and stone dwelling and two-story stable, house 21 ft. by 86 ft., stable 25 ft. by 56 ft., Broad, between Oxford street and Columbia avenue, to Jacob R. Garber, 1211 and 1213 Spring Garden street.

One brick bakeoven, 6 ft. by 8 ft., 816 Preston street, to Gustav Nolde, 816 Preston street.

Four two-story brick houses, 15 ft. by 42 ft., Union, above Ogden street, to Steinmetz & Thompson, 844 Union street.

Three houses, Southwest corner Thirty-seventh and Filbert streets, and four West side of Thirty-seventh, below Filbert, 15 ft. by 39 ft. and 15 ft. by 48 ft., to John Shedwick & Son, 3408 Race street.

One three-story brick house, 20 ft. by 35 ft., Richmond, above Somerset street, to John Janda, 2823 Edgemont street.

Twenty-six three-story dwellings, 14 ft. by 32 ft., East and West side of Hicks, between Dickinson and Tasker streets, to Friel & Simpson, Nineteenth and Wharton streets.

Thirty two-story and two three-story brick houses, 15 ft. 8 in. by 51 ft., East side of Twenty-Seventh street, between Montgomery avenue and Berks street, to Jacob E. Ridgway, 1812 Spring Garden street.

One two-story brick building, 14 ft. by 28 ft., 620 McClellan street, to John Escaredel, 432 McIlvaine street.

One two-story brick store and dwelling, 14 ft. by 28 ft., Fifty-seventh street, above Chelsea street, to John A. Daley, Fifty-seventh and Chelsea streets.

One two story store and dwelling, 17 ft. by 47 ft., Twentieth street, above Fernon street, to same party.

One two-story brick store and dwelling, 14 ft. by 35 ft, Woodstock, above Dickinson street, to same party.

Two two story brick dwellings, Thirteenth street, below Roxborough street, to William Cody, Park avenue and Roxborough street.

One two-story back building, 12 ft. by 26 ft., 810 North Fifteenth street, to Samuel J. Rea, 1741 Fairmount avenue.

A two-story brick kitchen, 10 ft. by 14 ft., 81 Wister street, to Charles S. Bringhurst, Germantown.

One-story back building, 20 ft. by 18 ft., 150 Front street, to Carson and Spare, 914 Walnut street.

Twenty-five two-story brick dwellings, 14 ft. by 28 ft., Fernon street, between Twentieth and Twenty-first streets, to Simpson & McVickar, 2008 Garret Street.

One three-story store and dwelling, 19 ft. 9 in. by 75 ft., Ridge avenue, between Wylie and Francis streets, to Arthur Hindle, 1522 North Twenty-first street.

Fourth floor alteration, Ridge avenue and Seventeenth street, to John Magreuer, 2128 Sharswood street.

One-story brick office, 12 ft. by 12 ft., Broad, above Fitzwater street, to Giles & McMichael, 750 South Nineteenth street.

Three-story brick dwelling, 18 ft by 28 ft., Franklin and Poplar streets, to William Teklenburg, 1614 Cadwalader street.

Twelve two-story brick houses, 13 ft. by 27 ft., Watkins, between Eighth and Ninth streets, to Hugh McNeil, Buck road and Nineteenth street.

Front alteration, 16 ft. front, Front, above Callowhill street, to Thos. Shafer, 320 North Fifth street.

Alteration, 16 ft. front, 1204 Mifflin street, to Thomas McFarline, 922 South Twenty-first street.

One brick livery stable, 36 ft. by 65 ft., Germantown road, between Somerville and Somerset streets, to D. C. Schuler, 2263 Fairhill st.

Alterations to front of 2121 and 2129 South street, to Solomon Chuley, 2803 Mervine street.

One two-story brick house, 18 ft. by 50 ft., Thirteenth and Snyder avenue, to John O'Neil, 1330 Jackson street.

One two-story brick building and alteration, 14 ft. by 10 ft., 335 Bridge street, to Samuel P. Echert, 4812 Cherry street.

Six three-story brick buildings, 18 ft. by 51 ft., Thirty-fourth, between Chestnut and Walnut streets, to Charles W. Budd, 1642 Green street.

Eight three-story brick houses, 19 ft. by 59 ft., Chestnut, between Thirty-fourth and Thirty-fifth streets, to same party.

One two-story brick building, 15 ft. by 18 ft., Frere street, above Moore, to Wm. Hallwell, 205 Williamson street.

One two-story brick house, 15 ft. by 28 ft., Meehan avenue, above Musgrove street, to Martin Hetzel, 45 Church street, Germantown.

One-story brick stable, 14 ft. by 24 ft., Amber street and Hunt lane, to Dickson Bros., 2817 Frankford avenue.

Three-story brick building, 14 ft. by 52 ft., Fifteenth, between Oxford street and Columbia avenue, to James Beatty & Son, 2114 Green street.

Two story brick building, 14 ft. by 12 ft., 3734 Melon street, to John Dempsey, 3734 Melon street.

One three-story brick house, 14 ft. by 16 ft., 857 Darien street, to Charles A. Ascinvoth, 441 North Fourth street.

Alteration to house, Eighteenth and Pine streets, to Samuel R. Stewart, 2358 North Sixth street.

Seven two-story brick houses, 14 ft. by 30 ft., Mechlin street, between Wisteria avenue and Wistar street, to Charles Ruth, 56 Bringhurst street.

Eighteen two-story brick houses, 14 ft. by 28 ft., Latona street, above Twenty-second, to William Shelley, 1530 Wharton street.

One three-story brick house, 20 ft. by 16 ft., Richmond, above Clearfield street, to George Wiler, 3106 Richmond street.

One two-story brick stable, 16 ft. by 27 ft., 2140 Fox st., to Wm. B. Brown, 2145 Dickinson st.

Seven two-story brick dwellings, 16 ft. by 45 ft., Ringgold and Berks sts., to Henry C. Altemus, 117 S. Thirteenth st.

Addition to warehouse, 20 ft. by 84 ft., 1742 Market street, to W. Haigen, 1507 Fairmount avenue.

Eight two-story houses, 14 ft. by 42 ft., Reese, above Cambria sts., to same party.

Three-story brick building 14 ft. by 24 ft., 1239 N. Seventeenth st., to Conrad Bachle, 1711 Fawn st.

One two-story brick house, 10 ft. by 42 ft., Oxford, above Main sts., to Thos. B. Taylor, 4439 Paul st.

Four three-story brick houses, 16 ft. by 57 ft., Sixth, above Berks sts., to T. W. Smatiz, 1545 Hutchinson st.

Five brick houses, 13 ft. by 44 ft., Marshall, above Venango sts., to N. J. Spane, 120 East Cumberland st.

One two story brick house, 16 ft. by 43 ft., Jackson st., above Long lane, to W. J. Wilkin, 2025 Fitzwater st.

One two-story stable, 32 ft. by 18 ft., Anthony, above Dickinson st., to Robt. Hamilton, 1540 S. Seventh st.

One two-story brick stable, 16 ft. by 24 ft., Philip and York sts., to A. Heinke, 2250 Fairhill st.

Five three-story brick houses, 16 ft. by 58 ft., Belmont ave., below Wyalusing ave., to Jacob Reshtley, 2519 Franklin st.

Two-story brick stable, 13 ft. by 50 ft., 1839 N. Tenth st., to Chas. Okringlonicz, 423 Brown st

Five two-story brick houses, 15 ft. by 42 ft., Emerald, above Huntingdon st., to Henry Toulds, 3428 Frankford rd.

One two-story factory, 38 ft. by 72 ft., Hemlock, above Righter st., to Jas. A. Lewis, Sumac st.

Two-story stable, 30 ft. by 170 ft., Columbia st., above Thirtieth st., to Knickerbocker Co., Sixth and Arch sts.

Two two-story brick houses, 13 ft by 44 ft., Tacony, above Paul st., to Taylor & Roberts, 238 E. Orthodox st.

Three three-story dwellings, 17 ft. by 38 ft., Bainbridge, above Seventeenth st., to James Howard, 1336 Pine st

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

Items of News

—The office of Drake & Stratton, railroad contractors, at Gray's Ferry, was burned early Wednesday morning, causing a loss of $300.

—Capitalists of Paterson, N. J., are working, through the Board of Trade of Reading, Pa., to interest the citizens in a silk mill to be located in Reading.

—The Williamsport *Gazette and Bulletin* states that the amount of lumber stocked at that place this season will be at least 40,000,000 feet less than last year.

—The New York carpenters and joiners have been successful in their strike for increased wages. Nearly all of the employers have agreed to the $3.50 rate for a day of nine hours, and eight hours on Saturday.

—Mr. Frank L. Bodine, of this city, who is President of the Window Glass Association, appeared before the Congressional Ways and Means Committee, on Tuesday last, and made a forcible argument against the reduction of the duty on window glass.

—The school buildings in Frankford come under the censure of the Board of Health. At Main and Foulkrod streets the school suffers from an insufficient water supply. A wet and unhealthy cellar is the evil at Meadow and Cherry streets, while defective flues and foul outhouses cause complaints at Bridesburg.

—Mr. Oates' bill prohibiting aliens from acquiring titles to lands in this country has been reported against by the House Judiciary Committee. During the discussion Mr. Oates stated that upwards of 21,000,000 acres of land in the United States were under the control of foreign corporations or individuals, lords, dukes and other noblemen being well represented.

—Mr. Hewitt has introduced a bill authorizing the President to appoint a commission of seven experts, skilled in the investigation, production and use of metallic substances and other structure materials, to execute tests and experiments on iron, steel and other materials used in the construction of bridges, buildings and mechanical structures, and deduce useful rules therefrom.

—There is a movement on foot to abolish the present system of selling under foreclosure through a referee. It is claimed that considerable loss accrues to the parties through the default of referees to account for the ten per cent. paid into their hands. One important firm is stated to have lost $20,000 in this way. The proposed bill seeks to transfer these sales to the Sheriff, who gives bonds for all moneys in his hands.

—A bill has been introduced in the House to regulate the planning, construction and superintendence of public buildings, the main feature of which is the abolishment of the office of Supervising Architect of the Treasury Department, and the substitution in its stead of a Board of Public Buildings and a Commissioner of Architecture. The duties of the latter are limited to the erection of new buildings, or repairs of old ones, where the total cost of the work is estimated not to exceed the sum of $50,000.

—The project of bridging the Hudson river at Poughkeepsie has been revived. A meeting of the stockholders of the Poughkeepsie Bridge Company—the first since 1878—was held recently. The company was chartered in 1870 and authorized to issue $5,000,000 each of stock and bonds. Some $575,000 of the share capital was paid in and expended on the work. One pier stands about twenty feet above the water and the foundation for another is partly laid. Lack of funds prevented the prosecution of the work, but it is said by friends of the project that after the long delay money has been secured to complete the bridge. It is estimated by the company's engineer that it can be finished for from $2,250,000 to $2,500,000. The money is to be raised by the sale of first mortgage bonds.

On Free Lumber.

The Canadian *Journal of Commerce* contains some correspondence upon the question of free lumber, which states that the general impression is that pine and spruce lumber are to be put on the free list along with hemlock, whitewood, sycamore and basswood, because the bill provides for putting on the free list sawed boards, planks, deals and other lumber of hemlock, whitewood, sycamore and basswood, and all other articles (not kind) of sawed lumber. Should the bill pass in its present shape, the only kinds of lumber to be made free are those specially mentioned—hemlock, whitewood, sycamore and basswood, which now pay a duty of one dollar per M, or half the duty levied on pine or spruce.

The present tariff places the duty on boards, planks, deals, and other sawed lumber of hemlock, whitewood, sycamore and basswood, not planed or finished, $1 per M feet. Boards, planks, deals and other lumber sawed from other varieties of wood, not elsewhere specified, not planed or finished, $2 per M feet. As the proposed bill does not repeal any clauses in the existing tariff, unless specially mentioned, and puts on the free list all sawn lumber mentioned in the first clause, viz, hemlock, whitewood, sycamore and basswood, it leaves unaffected, and still subject to duty by the second clause, all sawn lumber of other varieties of wood, including pine and spruce, so that, as regards Canadian lumber, the bill will have no effect but to give free admission to the limited amount of hemlock now going to the United States, the other woods, whitewood, sycamore and basswood, not being produced in Canada in excess of home requirements. The value of all these woods, including hemlock, imported by the United States in 1873 was $309,607, returning a duty of $35,394, while the pine and spruce lumber imported the same year amounted to $6,649,642, paying duties $972,821. The clause "Wood manufactured not specially enumerated or provided for (proviso inoperative when imported from a country laying an export duty)" is misleading, as it leaves the impression that by such might be intended boards, planks, deals and other sawed lumber of all kinds of wood to be admitted free; but such is not the case, as all other than those made of hemlock, whitewood, sycamore or basswood are specially enumerated as "all other varieties of wood," and are fully provided for in the existing tariff by a duty of $2 per M feet when not planed or finished, $2.50 when planed on one side and $3 per M feet when planed two sides. The proviso inserted in this clause leaves the false impression that such a duty exists, whereas this no doubt refers to the Canadian export duty on pine and spruce saw-logs and not on manufactured wood, and this duty is only $1 per M feet or one-half that of the United States on pine or spruce lumber, but, which, will no doubt be raised to at least the same rate as that imposed by the United States on the sawn lumber.

—Lime mortar, with a little admixture of Rosendale cement, is generally used on wire-lath, and stands very well, particularly where a little sheltered, as by an overhanging gable or eaves. There is no need of painting it, but a certain amount of protection against washing is obtained by the "pebble-dash" of thin lime and pebbles, which is often thrown over it.

Board of City Trusts.

The Board of City Trusts held a meeting last Wednesday, W. Hayward Drayton, presiding. The report showed that there were 1,130 boys in Girard College, that 11 had been received during the month and 22 were sent out on trial. It was agreed to admit 22 more.

Mr. Caven, from the Committee on Real Estate in the City, reported the receipts for the month as $640.08; payments, $74,511.24; excess of payments, $68,463 14; net income for the year 1886 to date, $383.64; last year, $60,927.34, an apparent decrease of $61,311. The expenditures for 1886 include city taxes, which, in 1885, were not paid until a month later, and amounted to $72,640 50. The actual increase of net income was $11,329 50.

The Committee on Minor Trusts recommended that the contract for the new kitchen at the Almshouse be awarded to W. R. Frazier, at $2,935; for the extension to Wills Hospital to George F. Payne, for $16,500; and for the heating apparatus for the same to Orlando Kelsey, at $3,987. Agreed to.

—David R. Walker, Chief of the Electrical Department, in his report for 1885, refers to his visits to other cities to see what advantage had been made in disposing of overhead wires, and probable cost of placing the wires underground. He found different systems in use, and no uniformity in construction. The returns made to the department for poles, wires, etc., and mileage of wire amounted to $25,472.50, of which sum $8,987.50 has been paid into the City Treasury, leaving unpaid $16,485. There were on December 31, 1885, on the city highways 4,822 poles, exclusive of those along railroad tracks and city poles, being an increase of 191 over 1884; 4,388 miles of telegraph and telephone wires, a decrease of 131 miles; 157 miles of electric light wires, an increase of 42 miles, making a total of city and all other overhead wires of 5,063 miles, being an increase of 38 miles over the previous years; 5,808 poles, being an increase of 418; 11,039 attachments to city poles, a decrease of 1,233; to support 3.33 miles of wire, a decrease of 131 miles. There were issued 386 permits for erection of wires and repairs, a decrease of 351, this decrease being mainly caused by the position taken by Councils against the overhead service.

There were 198 electric lights maintained during the year at a cost of 53⅓ cents per lamp, per night. As a result, 425 gas lamps were extinguished. He recommends fire signal instruments in every building where helpless persons are confined, and in every school, theatre, etc. Chief Walker asks an appropriation for a repair shop, with necessary machinery.

OTIS BROTHERS & CO.

MANUFACTURERS OF

PASSENGER and FREIGHT

ELEVATORS,

HYDRAULIC and STEAM.

No. 6 S. MERRICK ST., Philad'a,

THE PHILADELPHIA
REAL ESTATE RECORD,
AND
BUILDERS' GUIDE.
PUBLISHED EVERY MONDAY, AT 727 WALNUT STREET.

TERMS:
One Year, in advance, - - - - $5.00
All communications should be addressed,
REAL ESTATE PUB. CO.

PHILADELPHIA, MONDAY, MARCH 22, 1886.

EVERY man has his weak points, so it is said; every newspaper has its weak points that weak point is a hobby; if there are no hobbies to be found, they must be made. THE REAL ESTATE RECORD has no desire to ride a hobby, but it does desire to call attention to the necessities of Philadelphia, such as they are likely to be three or five years hence. The greatest want of our city at this time, is more rapid transportation facilities. Our cable system is doing much to meet the requirements; it is certainly satisfactory to the West Philadelphian to be able to travel from Front Street to the terminus of the Market Street road in thirty-two or thirty-three minutes; it is not possible even for an elevated road to enable its patrons to travel that distance in very much less, counting in stops; it may be true, as the cable interest says, that that system can be extended throughout the city as completely as the horse-car system now is. It may also be said that an elevated road cannot do this, that it cannot extend up one street and down another all over the city, and that therefore the cable system is the only practicable one. There are two sides to this question. It may be asked that even if an elevated system would reduce the Market Street schedule, from 33 or 32 minutes to 20 minutes, that this advantage to a comparatively small portion of the people in Philadelphia would not off-set the disadvantages of locomotives over-head, and a heavy elevated road destroying the beauty of the streets it might use, and destroying the value of property immediately adjoining. This is a short and narrow view of the case. Philadelphia has nearly one million population, and at its rate of progress during the past five or ten years, it will be in five or ten years more a mighty city. It is unnecessary to go into arguments to show that our progress would be greatly assisted by an elevated road East and West, North and South, which would enable wage workers and persons in more comfortable circumstances to reach points three to six miles away, in from 15 to 30 minutes. Philadelphia needs an elevated road. New York certainly needed her system, but for special reasons. The shape of the city demanded that system; the population had but one way to extend. Here we have several directions for its expansion. A cable road would benefit relatively fewer here than in New York. There everybody down town must go up town; here everybody down town can scatter to the four points of the compass. Nevertheless more rapid facilities are imperatively needed. We are, however, practically under the control of a syndicate, fortunately not of the Jake Sharp pattern, but of a pattern equally determined to hold whatever advantages they possess.

CHIEF Commissioner of Highways, McDonald, proposes to establish a very severe, but just rule with contractors. He has informed Francis Kilpatrick and Michael O'Rourke, that they cannot receive any money on account, until they have deposited the necessary security for the proper performance of the work. If the security is not forthcoming, the chief will take action. The public will endorse Mr. McDonald in this course, and if he shows a determination to hold all contractors to the terms of their contracts, he will have very little trouble with them hereafter. City contractors are in the habit of being a little lax because they could. When they find they cannot, they will make the best of their bad or good bargain, and do what they agreed to do and are paid to do.

WEST PHILADELPHIA will run a close race this year in building operations with the north-western section of the city. It is a most desirable section, with its P. R. R. facilities, its cable lines and Chestnut and Walnut and Arch Street lines and connections. The B. & O. Company intend to extend all possible facilities to the people in the south-western section of the 27th Ward, and will no doubt stimulate investments in that direction. Several real estate operators have been quietly looking around through the 24th and 27th Wards, with the supposed purpose of purchasing. Land is held quite firmly in all desirable localities, but there are withal, enough ready and anxious holders of real estate to enable buyers to obtain ground space for brick and mortar.

OUR list of transfers this week shows that business is rapidly improving. The bulk of the transactions are of and in small properties, it is true, but they aggregate well. The transfer of real estate is a fair indication of industrial and commercial health. The volume of business will increase steadily.

WE are assured that a preliminary meeting of a few prominent gentlemen who represent the real estate interests of this city, and who are in favor of a Real Estate Exchange, is to take place at an early day. The question will be thoroughly ventilated at this meeting, and, if it is considered advisable, arrangements will then be made to obtain a charter and perfect such other details in order that the organization may be completed as expeditiously as possible.

IT is very strange that purchasers of real estate are frequently so careless as to their title deeds. It is announced by M. Thomas & Sons, auctioneers, that they have in their possession about 450 deeds, briefs of title, satisfied mortgages, etc., of properties offered by them at public sale, which should be in the possession of the parties now owning the properties to make the chain of title complete. Such carelessness as this ought to be made to cost those who are guilty of it a little trouble and annoyance at least. They need a lesson, which some of them some day will receive.

REAL ESTATE AGENTS report liberal renting and selling. The better times are inducing each family to live in a house of its own. When depression comes, people "double up," go into boarding houses, or wander off, and thus throw a surplus of house room on the market, with a resulting loss in idle houses or reduced rents. The present tendency is to buy, and the tendency is being stimulated by builders and agents.

THE facts are that, while the architect's responsibility is as real and as serious as the contractor's responsibility, the two do not cover the same field at all. The contractor alone is responsible for the honest and workmanlike execution of his contract. He makes his bid, signs the agreement, purchases his material, selects his employés, and they work by his orders. They have no direct dealings with the architect, receive no orders from him, and do not recognize any direct authority but their employer, who, in turn, is solely responsible for their work, and cannot relieve himself by shifting any part of it on the architect. The latter has a similar responsibility in regard to the drawings and specifications which he supplies, and any mistakes in them which may be made by the draughtsmen whom he employs.

WE will feel greatly indebted to our readers for any information as to contemplated building operations, whether city or suburban. Our architectural friends will receive due credit in our architectural notes for building news they may send us for publication.

REAL ESTATE.

Real Estate Matters.

Real Estate is generally held at from 10 to 25 per cent. higher than a year ago. The notable exception to this statement is to be found in the immovable character of Real Estate values in the older section of the city. The list of transfers shows healthy condition in the Real Estate market; according to the statements of Real Estate authorities, considerable land is now in negotiation for actual building requirements, as well as for speculative purposes.

There is a great deal of confidence among buyers and sellers as to the upward tendency, nearly all believing that there are good reasons for the strong upward tendency manifesting itself, and hence the somewhat speculative inquiry that many operators report. This tendency, however, is being held in check by higher prices than last year. There is no doubt but that if last year's prices were taken, this speculative tendency would be stimulated and that a great deal of land would change hands.

Some real estate operators mentioned this week that they had instructions from investors to watch for what they considered bargains, but bargains are not going begging. Something like negotiations are pending for blocks of houses which were built last year, and which builders would be glad to dispose of, but the progress made is not very encouraging; prices have been asked and named. The prices named show that the builders and owners are not anxious to throw their properties out of their hands. This is natural, because the properties are in good demand, and sell readily and at good prices to individual buyers.

There will be no anxiety on the part of builders to sell in blocks, large or small, as long as they find individual buyers anxious and able to purchase, even though payments are small and scattered over long periods; at the same time, it may be mentioned that there is considerable capital hanging around the Real Estate market waiting for a chance. For the next few months it is not at all likely that large operations of this character will be announced; the builders are financially able to hold their properties, and will not dispose of them without fair margins.

It is quite probable that there will be a good deal of business in some of the older and finer properties between Broad street and the Schuylkill; the newly made rich, to use a phrase, are seeking more desirable locations, to the extent of their means, and some of the old-timers are quite willing to vacate and give way to the upstart, not speaking disrespectfully, who are anxious to be located in desirable neighborhoods. A few Real Estate operators have had quite a number of inquiries of this character, and think they will be able to accommodate their customers.

Suburban Properties.

During the past week or two, negotiations have progressed satisfactorily for the purchase of several large properties in the Twenty-seventh, Twenty-fourth and Twenty-eighth Wards. The growth of building operations in these Wards have given quite a start to Real Estate, and some holders are asking one-half more than they were willing to take two years ago.

Some of these will be left in the cold; there is entirly too much land available to make it possible for an individual to realize more for his property than it is worth. It is right here that a Real Estate Exchange will be of service to both buyers and sellers. As well might a merchant attempt to sell cloth without a yard stick, or a grocer to sell sugar without scales, as for Real Estate men to get along without an Exchange. True, they have done so, but their dealings have had a more or less haphazard character; there has been no way by which the legitimate values could be ascertained or established. It has been merely a question, "What will you take?" "What will you give?' It is certainly high time that Philadelphia Real Estate interests, representing as they do hundreds of millions of values, directly and indirectly, should establish system in place of guess work, and introduce the yard stick instead of the rule of thumb. It does not answer to say, "Yes, we are getting ready; what we say is all true, but it takes time." That is no business-like answer; an Exchange cannot be any more satisfactorily established next September than next month.

A New Bridge Over the Mississippi.

At Eagle Point, one mile north of Dubuque, Iowa, a new steel railing bridge is to be built, and is to cost $1,000,000. All railroads that desire to do so, are to use this bridge as a means of access to Dubuque.

Charters Granted.

Charters were issued at the State Department, last week, as follows: Keystone Coal Company, of Wilkesbarre, capital, $80,000; Eastern Market Company, of York, capital, $20,000; Guarantee Land and Improvement Company, of Philadelphia, capital, $5,000.

Another Bank.

Messrs. Jacob Schandein, John J. Alter, Theodore C. Ingel, Jas. B. Doyle, Harry P. Cronell, J. Catherwood Robinson and Henry Mosebach are the promoters of a scheme for organizing the Northwestern National Bank with a capital of $200,000. The new bank is to be located in the neighborhood of Ridge and Girard Avenues.

Sales of Real Estate.

$4,300 dwelling, 3902 Brown street; $2,100 dwelling, 3606 Walnut street; both properties sold by Nicholson, Erickson & Michaelsen.

$9,000 lot and dwelling, 1823 Spruce st.

$10,000 lot and dwelling, 22x150, Eighteenth st., S. of Vine.

$7,925 dwelling, 505 Franklin st.

$52,000 lot on Eleventh, from Diamond to Susquehanna.

Park Regulations.

Superintendent Thayer was instructed, on Friday, by the Park Commission Committee on Superintendence and Police to put a stop to contractors removing sand in large quantities from the bed of Wissahickon Creek. Hereafter any one person will be allowed to take away only two loads at a time. An application from the Fairmount Steamboat Company for permission to erect a landing at Peter's Island was refused.

John Hunter's Report.

The Receiver of Taxes submitted his report on 12th inst. The city tax assessment amounted to $10,718,102.83; additions by order of the Board of Revision, $3,819 56; allowances, $33,553 11; net assessment, $10,688,369.28; amount of city tax received, $10,051,949.23; discount allowed, $47,021 21; penalty added, $54,175.70; net penalty, $7,154.49; net amount of city tax received, $10,059,103.72; cash received from poll tax for February and November elections, $11,392; fees, $4,274.10; "conscience" money, $960; State tax, $327,116.01; delinquent tax, $743,154.76; lien costs collected, $572.47; total amount paid into the city Treasury, $11,146,609.68; amount of tax remaining unpaid for 1885, and on which penalties are to be added, $635,420.05. Amount of taxes carried to the delinquent register: City, $876,513.81; State, $100,204.73—total, $776,718.54.

Proceeds of a Foreclosure Sale.

James Penn Maccain filed a report in Court, last week, as Auditor for the distribution of a fund arising from a sale of the Fairmount Woolen Mill, on Linn street, east of Twenty-fourth, under foreclosure of a mortgage. The mill was sold as the property of John B. Nelson. The fund was claimed by the latter's widow, and by Nelson Bros. & Co. as creditors. It amounted to $1,108.35. Court costs swallowed $539.90 and the remaining $568.45 is awarded to the widow.

A New Hotel for Germantown.

Messrs. William H. Scott, John C. Jones, Henry T. Mason, Joseph S. Potter, George T. Preison and Samuel F. Freeman are the principal stockholders in a company which has been organized for the purpose of erecting and maintaining a new hotel which is to be erected at the corner of Pulaski and Chelten Avenues, Germantown, near the Chelten Avenue Station of the Pennsylvania Railroad. The capital stock is to be $200,000, $125,000 of which is to be expended in the erection of the house.

New Jersey Matters.

Some fifty houses are in course of erection at Woodbury.

A matting factory is about to be established at Mt. Holly by Thos. H. Flynn.

A steeple and town clock, to cost $2,000, are to be placed on the First M. E. Church, of Millville.

Articles of incorporation have been filed with the Camden authorities for the Electric Gaslight and Salvage Sewing Machine Companies. The incorporators of both are Pennsylvanians. The capital stock of the latter is $500,000, but it is proposed to begin business with $2,000.

Mr. Rudolph Hering.

The friends of Mr. Hering will be pleased to learn of his good fortune in securing the position of Chief Engineer of the Drainage and Water Supply Commission of the city of Chicago, at an annual salary of $10,000.

Mr. Hering is in the prime of life, and in the zenith of his usefulness. He has an excellent record in this city as an engineer connected with the Park, and as First Assistant Engineer of the Survey Department. He has had considerable experience on the question of drainage, and no one is better qualified to fill the position. The citizens of Chicago have every reason to congratulate themselves in securing the services of so competent a man.

Smart's Block.

The property known as Smart's Block, situated at the northwest corner of Eighth and Race streets, and which belongs to the estate of John Smart, whose will declares that it shall be used for an industrial home for women, is to become the subject of serious litigation. The will which the heirs are going to contest was made in 1878, and was drawn by Horatio Gates Jones, Esq., and is in the custody of the Pennsylvania Company for Insurances on Lives and Granting Annuities. Mr. Smart was engaged in the jewelry business, on Market street, before the war. He retired from business about the year 1865, and left an estate of about $125,000. It is claimed that he was of unsound mind when he made the will.

Mr. Allen B. Rorke denies that he has had any trouble with the mechanics or workmen engaged on Hood, Bonbright & Co.'s new building, at Eleventh and Market streets, neither does he anticipate any.

Secretary Whitney at League Island.

The question of reopening the League Island Navy Yard is to be determined by Secretary Whitney, who, with David B. Harmony, Chief of the Bureau of Yards and Docks, of the Navy Department, visited the Island, on Friday last, in order that he might give the question intelligent consideration. Commandant Law and Civil Engineer Endicott accompanied the gentlemen in the tour around the yard, and pointed out the advantages to be derived by making League Island a naval depot. Secretary Whitney thought the island unhealthy, and stated that before anything in the way of naval construction can be done there the place will have to be filled in and made habitable. He was surprised at the magnitude of the plant, but stated that he would not be prepared to give an opinion as to the merits of League Island until he had seen the yards at Nofolk, Mare Island and Pensacola.

An Important Verdict.

The suit of Henry S. Camblos, of New York, in right of his wife Mary, against Jos. F. Tobias, of Philadelphia, to recover a half interest in a tract of land near Bryn Mawr, resulted, on Thursday, March 18th, after a three-days' trial in the courts at Media, in a verdict for the plaintiff. The land, it was testified, is valued at from $150,000 to $200,000. Several years ago it was bought by Joseph Seneff, a well-known merchant of Philadelphia, and father of Mrs. Camblos and Mrs Tobias. But Mr. Seneff got into financial difficulties, and Mr. Tobias, buying up some judgments against him, had the property sold at sheriff's sale, and he bought it in. The purchase, it was contended, was coupled with a trust in favor of Mr. Seneff's daughters, Mr. Tobias' own wife and Mrs. Camblos. Mr. Camblos had placed $7,000, he swore, in Mr. Tobias' hands, that he designed to be paid towards the purchase. Mr. Seneff died and Mr. Tobias denied the trust. A reconciliation failing, the question was submitted to a jury, with the result as stated above. The action being an equitable ejectment, one verdict is conclusive unless it should be reversed by the Supreme Court. Daniel Dougherty was senior counsl for the plaintiff and Thomas J. Diehl for the defendant.

The American Investors' Security Company.

This is the name of a company which has been formed in New York and which is to have representatives of financial institutions in America and Europe connected with it.

Its purpose is to examine and report upon all kinds of securities offered to the public for investment; it is to have a bureau of information and subscribers are to be furnished with written expert information. All new enterprises meeting with the approval of the company are to be assisted in obtaining the required capital.

The directors include: Logan C. Murray, president of the United States National Bank; J. Edward Simmons, president of the New York Stock Exchange; J. Hobart Herrick, ex-president of the New York Produce Exchange; N. T. Sprague, president of the Sprague National Bank; Levi M. Bates, of Bates, Reed & Cooley; Charles Spear, vice-preside t of the Shoe and Leather Bank; N. C. Miller, president of the Board of Underwriters; Rastus S. Ransom, law partner of Ex-president Arthur, and Chas. B. Wright, Dell Noblitt, Winthrop R. Cunningham and W. B. Murdock, of this city.

The presidency of the company has been tendered to General Charles H. T. Collis, formerly of this city. General Collis has accepted the position.

A Liberal Offer.

St. Louis Dispatch to the Cincinnati Enquirer.

The N. O. Nelson Manufacturing Company, of this city, have made an offer to their employés which proposes to make each one of them personally, directly interested in the success of the company's business—a proposition to divide the profits of the business with the employés. After allowing 7 per cent. interest on actual capital invested, the remainder of the profits will be divided equally upon the total amount of wages paid and capital employed. Each employé will receive his proportion of the profits according to the wages paid him. All employés who have served the company six months or over within the year and who have not been discharged for good cause will share in the distribution. In addition, the company offers the employés the privilege of conducting a coöperative store. Each employé contributes $5, in installments of $1 a week, which is to be invested in groceries and provisions. These goods are to be sold at the usual profits, which are to be invested in other goods as required, and the surplus divided among the members. The employés elect their own managers and operate the store, while the company offers to allow the regular buyer of the establishment to do the buying, and they also furnish the store-room. The store will be open at the noon hour and on Saturday from 5.30 to 6.30 P. M.

The City and the Rascals.

The Committee of Councils in postponing its intended meeting to consider the sale of the gas works, was no doubt influenced in part by the action of the citizens meeting, or rather by a knowledge of the preferences of the business men. Among those present were: Wm. G. Huey, David H. Lane, Geo. G. Pierie, Thomas Fitzgerald, John W. Frazier, John Hunter, Wm. W. Alcorn, Robert H. Hinckley, Dr. Thomas Hunter, Philip C. Garrett, Sam'l Marshall, John Wanamaker, Prof. E. L. James. Frank Wells, Walter Wood, William V. McKean, Henry C. Lea, James A. Wright, Joel J. Baily, George H. Earle, John Field, E. D. Lockwood, John Lange, Wayne McVeagh, Silas W. Pettit, John C. Hunter, John McLaughlin, James Evans, Robert McWade, Francis B. Reeves, Charles Spencer, John Y. Huber, Charles Emory Smith, William W. Frazier, John R. Baker.

After a desultory discussion there was an almost unanimous vote against the proposed sale. Opinions were very wide as to the value of the works. Some, who spoke, furnished evidence of the shameful management of the works, of the increasing expense account and of the impossibility of securing good and cheap gas. Objection was made to the crudeness of the pending ordinance covering the proposed sale. Every one knows that a syndicate are waiting to snatch the gas works out of the control of the city at one half, or less, if possible, of its actual value. Wm. Sellers, Esq., Henry C. Lea, and many others spoke condemnatory of the sale. A committee was appointed to watch the rascals and with power to call a future meeting. The committee is, Walter Wood. Joel J. Bailey, Thomas Mackellar, Char Spencer, Henry C. Lea, Wm. Sellers, John Y. Huber, John Field, Henry B. Tatham and John Hunter.

—Two hundred brickmakers, employed in the southern part of the city, gathered Friday night in the hall at the corner of Reed street and Long lane, to form a permanent organization with the aim of securing an advance in wages and entering the Knights of Labor. William Marsden was elected President, James Campbell, Vice-President; E. Hugh, Secretary; George Harper, Assistant Secretary, and Henry Huff Treasurer.

Building Societies.

THE "Republic, No. 2," has paid out within six weeks $18,973.60 for loans and withdrawals.

THE "Standard" started in 1873 with 1,600 single shares and ten series, and has now 4,444 shares. Six per cent. interest was charged, and the premium is 20 cents per share per month.

THE "Good Hope" is seventeen years old, and has assets of $120,669.25. Receipts for the last year were $55,056.37. There are eleven series and 1,833 shares. Profit on sixth series, $51.54.

THE "Columbia Avenue's" receipts last year were $42,782.44. The loans were $31,400. On the first series $120 were paid, and are worth $187.08. It has paid over 10 per cent. per annum for the past ten years.

THE "Randolph's" receipts for the year were $46,078.80. Disbursements: loans, $23,800; stocks withdrawn, $11,840.25. There are eleven series, and 1,754¾ shares. The third series is eleven years old, and shows a profit of $68.

THE "People's," of Camden, is fifteen years old. Its assets are $132,113.09, of which $108,050 is invested in bonds and mortgages; $22,800 in real estate, and $990.49 is in dues unpaid. Receipts for year were $45,495.10. On the sixth series the profits have been $75.95.

THE "Germantown" is fourteen years old, and received last year $21,846.53. Three series have been paid off. The fourth series has paid in $120 on each share, and is worth $181.56. This society loans $200 on each share, premium paid monthly for one year only, if any is bid.

THE "Reliance," of Germantown, has 2,500 single shares, divided in five series. The first series are valued at $50.95; paid in, $40.50; gain, $10.45. Second, $25.79; paid in, $22.50; gain, $2.50. Third, $18.50; paid in, $16.50; gain, $2. Fourth, $11.15; paid in, $10.50; gain, 65 cents. Fifth, $4.75; paid in, $4.50; gain, 25 cents.

THE "Merchants and Mechanics'" reports that during the past six months $6,655.92 was received, $351.02 of which was a balance, $5,304.90 was received from dues, fines, interest and premiums, and $1,000 from loans repaid; $2,286.84 was paid out on withdrawals, $2,000 to loans, $85 to sundries, leaving $2,283.08 in the hands of the Treasurer. The assets are $26,950.80, of which $24,400 are invested in bonds and mortgages.

THE "Allegheny Avenue Society" is sixteen years old. Its assets are $142,485.52. Its Sixteenth Series has just been opened. The shares in the Sixth Series are worth $182.93, representing a profit of $62.98. The officers are: President, John Bonner; Secretary, Andrew Stewart; Treasurer, Joseph Hollard; Solicitors, J. Duross O'Bryan and Ferris; Directors—James Smith, Edward Morris, M. McCullough, Timothy A. Gallagher, William Gallagher, Bernard Henry, Charles Creran, Edw. Walsh, B. McAnally.

THE "Ridge Avenue" is seventeen years old The assets of the society are $119,562.80, of which $113,200 is invested in securities, $2,434.21 is the amount of dues in arrears, and $3,928.59 is a cash balance in the treasury. The receipts for the year were $45,219.63, of which $1,938.27 is a balance from last year; $32,481.36 was received from dues, interest and premiums, and $10,800 from loans returned. The expenditures were $45,219.63, divided as follows: To matured stock of the fourth series, $13,000; to withdrawn stock, $6,783.43; to loans, $20,800; expenses, $507.61, and the cash balance noted in the assets.

—The parochial school of St. Joachim's Roman Catholic Church is about finished and will be ready for occupany in April.

BUILDERS' ITEMS.

Gossip of the Week.

Charles W. Hall is building 12 houses on Marion ave., above Forty-fifth st.

Several school-house repairing contracts have been placed by the Property Committee of Councils.

H. Grau is building two dwellings, 16 by 50 ft., three-story, on the south side of Hamilton, above Thirty-eighth st.

Plans and specifications for a new school house at 20th and Catharine streets have been ordered by the Board of Education.

Howell is putting up 100 houses, two-story, on the block bounded by Aspen, Thirty-ninth, Thirty-eighth and Renox sts. They have begun excavation.

Wm. J. Shedwick, the builder, No. 676 N. 34th street, will erect five three-story dwellings on 37th street, near Rockland, 15 ft. by 48 ft.

Joseph McKeever, 1505 Federal street, will build on Tasker street, above Nineteenth, six two-story houses, 16 ft by 45 ft.

Thos. P. Twibill, 6 S. Merrick street, has sold to Katharine E. Henzler, lot on north side of Tasker street, east of Carnarvon, 70 ft. by 65 ft. 6 in., for $9,825.

D. C. Seidel, the broker, has sold to Dennis Drislane, the property No. 491 N. 4th street, 18 ft. 8 in. by 108 ft. for $6,650.

Messrs. Elkins and Weidner have purchased of Chas. F. Glading, a lot on south side of Master street, 273 ft. west of 29th street; also, a lot, corner of 28th and Mount Pleasant street, for $30,000.

The Commercial Ice Company have bought of Sarah Ann Young the property on South Penn Square, 152 ft. west of Broad street, 18 ft. by 92 ft., $30,000

The Olney Land Improvement Co. have purchased of Walter S. Hilmer, 15 acres, 1 rood, 24 1-10 perches for $25,000.

W. Fred Snyder, real estate broker, has bought 3 lots at Second and Hancock streets, irregular shape, $20,000.

Nickelson, Ereckson and Michaelson will erect 49 two-story house on square bounded by Fairmount ave. 38th street, Ashen and DeKalb aves., West Philadelphia, 15 ft. by 46 ft. each.

Mr. D. H. Budd is to erect 14 houses on the corner of Chestnut and 34th streets. Eight on Chestnut street and six on 34th street; the Chestnut street houses are to be 19 feet front with court yards of 14 feet. The 34th street houses are to be 18 feet front with 12 feet court yards. These houses are to be built of fancy prepared and enameled peerless bricks, hardwood finished and to cost on Chestnut street $10,000 each, and on 34th street, $7,500 each.

Building Permits.

Wood addition, 14 ft. by 14 ft., Willow Grove and Turnpike-road, to Joseph Smith, same place.

Two two-story brick houses, 15 ft. by 45 ft. and 16 ft. by 45 ft., Mutter and Huntingdon sts., to F. Schmidt, 2607 Mascher st.

A three-story store and dwelling, 18 ft. by 53 ft., Fifteenth and Carlisle sts., to C. A. Snyder, 1710 Master st.

Four three-story brick houses, 18 ft. by 51 ft., Forty-ninth st., above Chester ave., to Jas. D. Arthur, 223 Levant st.

Four three-story brick houses, 24 ft. by 38 ft., St Bernard pl., above Chester ave., same party.

One two-story brick dwelling, 18 ft. by 39 ft., Bailey, above Oxford st., to Wm. H. Martin, 710 N. Seventeenth st.

One two-story brick shop, 10 ft. by 28 ft., Queen, above Second st., to Sam'l H. Trickett, 336 Borden st.

One wooden bath, 10 ft. by 10 ft., South, above Fifteenth st., to Henry Bellis, 1816 N. Sixth st.

Two three-story brick buildings, 30 ft. by 40 ft. and 50 ft. by 60 ft., Adams, above Emerald st., to Firth & Foster, Taylor and Emerald sts.

Interior alterations, Broad, above Filbert st., to McKee Bros., rear of 19 S. Thirteenth street.

Two three-story brick houses, 16 ft. by 50 ft., Hamilton, ab. Thirtieth st., to H. Grau, 655 Preston st.

Front alteration and back building, 10 ft. by 14 ft., Thirteenth, below Spruce st., to N. J. Watson, 1335 Bancroft st.

Corner alteration, Thompson and Hucherson sts., to Theo. Sheldrick, Seventeenth and Vine sts.

One two-story wood house, 16 ft. by 38 ft., Seventy-seventh, between C and D sts., to J. B. Brown, same place.

Two two-story brick houses, 15 ft. by 37 ft., Franklin, above Sellers st., to Robt. Corson, Frankford.

One three-story brick house, 19 ft. by 48 ft., Thompson, above Thirty-first st., to C. Dollinger, Thirty-second and Thompson sts.

One two-story brick brewery, 17 ft. by 34 ft., Queen's lane, above the railroad, to John W. Hohenhadel, same place.

Front alteration, 15 ft. by 20 ft., 316 Franklin st., to Clarkson Fogg, 1114 Mt. Vernon street.

A five-story factory, 52 ft. by 170 ft., Tioga st., above Trenton ave., to Wm. Steele & Son, 2141 Howard st.

One brick office and stable, Cumberland and American sts., to John Gill, 1546 Franklin st.

Second-story addition, 10 ft. by 12 ft., Lancaster ave., above Fiftieth st., to George W. Gray, 5026 Merion ave.

One-story brick kitchen, 9 ft. by 12 ft., Warren and Baring sts., to Thos. C. Sloan, 51 N. Fortieth st.

One brick stable and third-story addition to house, 16 ft. by 27 ft. and 12 ft. by 27 ft., Franklin st., above Master, to E. Soux, 1950 Mervine st.

A third-story addition, 8 ft. by 25 ft., Memphis and Norris sts., to I. H. Fiedler, Sepviva and Norris sts.

One two-story brick house, 15 ft. by 31 ft., Montgomery ave. and Wildey st., to C. G. Harris, 908 E. Norris st.

Six two-story brick houses, 16 ft. by 45 ft., Tasker, between Eighteenth and Nineteenth streets., to Joseph McKeever, 1505 Federal street.

One one-story brick kitchen, 12 ft. by 14 ft., 711 S. Second st., to John W. Mitchell, 1431 Dickinson st.

One two-story back brick building, 9 ft. by 16 ft., 2307 North Seventh street, to Stewart Bros., 2154 North Fifth street.

Two two-story brick houses, 14 ft. by 30 ft. Prospect street, above Ridge ave., to Ernest Rangnow, Roxborough.

Fourth-story addition, 15 ft. by 40 ft., 240 South Eighth street, to Charles Lane, 619 Commerce st.

One two-story back building, 12 ft. by 26 ft., 1324 Passyunk avenue, to John Greenan, same address.

Two three-story brick houses, 16 ft. by 51 ft., Dauphin, above Tenth street, to Wm. C. Merritt, 1021 Nevada street.

To rebuild a wall, 20 ft. deep, 866 Taney street, to James T. Lamb, 719 South Ninth Street.

One five-story brick building, 65 ft. by 130 ft., 715 to 719 Arch street, to Tanan & Cooper, 4 South Broad street.

One frame house, 16 ft. by 45 ft., Rock Ferry Road, to Daniel Bader, same address.

Seventeen two-story brick houses, 14 ft. by 29 ft., Walnut Lane and Hancock street, to D. S. McNabb, 208 Mill street.

One two-story and one three-story brick dwelling, 15 ft. by 32 ft. Sunnyside and Reading Railroad, to John F. Reichardt, 135 James street.

Two-story back building, 11 ft. by 14 ft., 2342 Jefferson street, to E. H. Seasholtz, 2530 Columbia ave.

Addition to foundry, 40 ft. by 50 ft., Northwest corner of Twenty-third and Race streets, to W. L. Atkinson, 2214 Wallace street.

Boiler-house and brick smoke-stack, 60 ft. high, 15 ft. by 17 ft., 566 East Norris street, to James Doak, Jr. & Co., 566 East Norris street.

New brick front, 14 ft., 2018 East Cumberland street, to Edward E. Kelley, 2530 Sepviva street.

Back kitchen, 15 ft. by 40 ft., Jefferson, between Twenty-second and Twenty-third streets, to P. D. Philsterer, 2065 Ridge ave

Two-story back building, 11 ft. by 30 ft., 613 North Seventh street, to Henry Koch, 559 Chatham street.

A two-story brick stable, 32 ft. by 70 ft., Vineyard, between Eighteenth and Nineteenth streets, to Frank W. Tweed, 2630 Brown street.

One two-story brick house, 14 ft. by 30 ft., Otto street, below Spencer street, to John O. Broadbent, 314 Haines street.

A new cellar wall under house, 60 ft. deep, 995 Marshall street, to Edward H. Flood, Twenty-second and Diamond streets.

Four three-story brick houses, 16 ft. by 54 ft., Fifth, above Washington ave, to M. Jennings & Son, 414 Christian street.

One brick workshop, 18 ft. by 40 ft., Bridge street, below Ridge ave., to C. C. Linahan, 3203 Ridge ave.

One three-story brick house, 17 ft. by 51 ft., Trenton avenue and Mill street, to James Sykes.

New roof, 25 ft. by 32 ft., Johnson, between Jefferson and Adams streets, to Thomas Wright & Son, Harvey street.

One store window, 16 ft. front, Locust avenue and Armat street, to same party.

One three-story brick house, 34 ft. by 53 ft., Main, above Herman st., to McManes Bros., 4 Evans st.

One two-story brick house, 19 ft. by 41 ft., Torresdale, above Vankirk st., to Duryea & Childs, 2410 Amber st.

A two-story back building, 14 ft. by 16 ft., Rittenhouse, above Adams street, to same party.

One two-story brick building, 16 ft. by 31 ft., 1412 South Broad street, to Joseph E. Lawrence, 1322 Dickinson street.

Front alteration, Second and Federal streets, to Charles G. Weed, 208 Federal street.

One three-story and four two-story brick houses, 15 ft. by 40 ft. and 13 ft. by 42 ft., Indiana avenue, above Reese street, to John Schieler, Fairhill and Cambria streets.

Seven two story houses, one 14 ft. by 42 ft. and six 13 ft. by 42 ft., Reese street, above Indiana avenue, to same party.

One two-story back building, 14 ft. by 6 ft., 2224 North Front street, to Thomas Matthew, 2334 Hancock street.

One two-story back kitchen; 18 ft. by 8 ft., Twenty-first and Fitzwater streets, to Andrew Rankin, 2104 Fitzwater street.

Four two-story houses, 13 ft. by 23 ft., Wellington street, below Kensington avenue, to same party.

One three-story brick building, 18 ft. by 54 ft., Vine, above Sixty-second street, to Wm. Douglass, 330 North Sixty-third street.

Two two-story brick houses, 16 ft. by 42 ft., 50 and 51 Willow avenue, to Louis C. Smith, 619 Brooklyn street.

One two-story brick building, 10 ft. by 19 ft., Eighteenth, above Callowhill street, to Daniel O'Leary, same place.

Four two-story brick buildings, 13 ft. by 40 ft., Twenty-seventh, above Dauphin street, to Samuel Stewart, Sr., 2710 Dauphin street.

One back building, 13 ft. by 30 ft., 2315 Fairmount avenue, to J. Wilson & Sons, 2222 North Eleventh street.

Two two-story brick houses, 18 ft. by 26 ft. and 18 ft. by 32 ft., one on Aramingo, above Almond street, and one on Adams, above Almond street, to William C. Haddock, 2427 Sepviva street.

Fourteen three-story brick houses, 17 ft. by 52 ft., Norris, above Twentieth street, to Henry D. Erker, 4161 Germantown avenue.

Fourteen two story brick houses, 14 ft. by 41 ft., Franklin, above Huntingdon street, to C. Rhodes, 1511 Girard avenue.

Five two-story brick houses, 14 ft. by 40 ft., Sixth and Cambria streets, to Joseph S. Slifer, 420 Bainbridge street.

One two-story back building, 9 ft. by 16 ft., 2307 North Seventh street, to Stewart Bros., 2154 North Fifth street.

Six two-story brick houses, 15 ft. by 45 ft. McKeon, above Tenth street, to Gottlieb Schaal, Thirteenth and Tasker streets.

Ten two-story brick houses, 16 ft. by 40 ft., Morris, above Eighth street, to Hugh McNeile, Ninth street and Buck road.

Three two-story brick houses, 12 ft. by 30 ft., Clementine, above Emerald street, to Hiram A. Miller, 1210 Ridge avenue.

Seven two-story brick houses, 15 ft. by 38 ft., Emerald, above Clearfield street, to same party.

Forty-nine two-story houses, 15 ft. by 46 ft., on square of ground bounded by Fairmount avenue, Thirty-eighth, Aspen and De Kalb streets, to Nicholson, Erickson & Michaelsen, owners and builders, 3949 Lancaster avenue.

Five three-story brick houses, 17 ft. by 55 ft., Preston, above Reno street, to Fred L. Michaelsen, 3949 Lancaster evenue.

Four three-story stores and dwellings, 18 ft. by 44 ft., Second and Susquehanna avenue, to Joseph Strickey, 1832 Read street.

Three stores on Market street and four dwellings on Filbert street, below Fortieth street, 20 ft. by 100 ft. and 15 ft. by 38 ft., to H B. Leskie, 723 Jayne street.

Two two-story dwellings, 14 ft. by 49 ft., McClellan, above Sixth street, to Robert Gallagher, 636 McClellan street.

Two three-story houses, 18 ft. and 16 ft. by 50 ft., 1721 North Thirteenth street, to Chas. F. Brown, 2156 Mervine street.

One one-story brick building, 13 ft. by 14 ft., 1024 Wallace street, to Joseph McNutt, 2320 Sepviva street.

Third-story addition, 20 ft., by 32 ft., Frankford road, above Cumberland street, to Thomas Barn, 2131 East Cumberland street.

New brick front, 16 ft., Twenty-sixth, above Brown street, to Charles D. Hill, 2623 Poplar street.

Two three-story houses, 18 ft. and 16 ft. by 42 ft., Brown, above Pennock street, to W. S. Charlton, 2720 Brown street.

Seven two-story brick houses, 15 ft. by 42 ft., South side of Brown, above Pennock street, to same party.

Eleven three-story dwellings, 15 ft. by 43 ft., Perkiomen, above Wylie street, to Woelfel & Shmunk, 2644 North Fifth street.

One brick stable, 16 ft. by 26 ft., Twenty-eighth and Girard avenue, to Robert Brown, 2720 Brown street.

One brick Summer house, 14 ft. by 18 ff., 418 North Fortieth street, to John M. Leany, 523 South Forty-second street.

One three-story store and dwelling and four two-story stores and dwellings, 12 ft. by 28 ft. and 17 ft. by 23 ft., Twenty-eighth and York streets, to Peter Byrne, 2048 North Twenty-ninth street.

One two-story house, 12 ft. by 28 ft., State, above Thirty-ninth street, to Chas. C. Sloan, 858 North Forty-fourth street.

Three two-story houses, 14 ft. by 39 ft., Collar street above Girard avenue, to A. Hetzell & Son, 205 Richmond street.

Underpinning two fronts, 1014 and 1016 Arizona street, to Baumann & Leeds, Eighth and Parrish streets.

Fourth-story addition, 18 ft. by 30 ft., 1109 Buttonwood street, to Haines, Jones & Cadbury, 1136 Ridge avenue.

New brick front, 16 ft., 1514 Christian street, to Du Ross & Welsh, 758 South Broad street.

Ten two-story houses, 14 ft. by 36 ft., Bancroft street, to Robert Montgomery, 1836 Wharton street.

Three three story houses, 17 ft. by 55 ft., Twentieth and Long lane, to Thos. Marshall, 1336 Hillary street.

Alteration, 180 ft. by 37 ft., Thirteenth, between Chestnut and Market streets, to John Wanamaker, owner, 1336 Walnut street.

Four three-story houses, 14 ft. by 31 ft., Canal street, above Girard avenue, to E. Schmid, 1713 Maseher street.

Four three-story houses, 14 ft. by 31 ft., St. John street, above Girard avenue, to same party.

Two-story addition, 18 ft., by 24 ft., Lyceum avenue, above Manayunk avenue to William H. Sperry, Germantown.

One three-story dwelling, 18 ft. by 40 ft., Powelton avenue, above Thirty-ninth street, to William Bunch, 408 North Forty-first street.

A one-story brick shop, 18 ft. by 32 ft., Salmon, above Buckius street, to Amos R. Crosta, 4621 Salmon street.

A second-story bed-room, 16 ft. by 14 ft., Garden, above Church street, to same party.

Front alteration, 16 ft., Richmond, above Kirkbride street, to same party.

One two-story store, 16 ft. by 84 ft., Richmond, above Church street, to same party.

Six three-story dwellings, 16 ft. by 56 ft., Seventh, above Montgomery, to W. H. Bilyeu, 1725 Franklin street.

One two-story back building, 13 ft. by 16 ft., 2115 Fitzwater street, to Samuel Young, same place.

One two-story back building, 9 ft. by 12 ft., 4230 Silverton avenue, to L. V. Granger, 819 Union street.

Addition to factory, 12 ft. by 12 ft., Fifty-fourth street and Wyalusing avenue, to Nathan R. Yewdall, Fifty-fourth and Girard avenue.

Three three-story stores and dwellings, 18 ft. by 54 ft., Cambria and Lawrence streets, to Robert Buchanan, 2025 North Twenty-second street.

One two-story brick house, 23 ft. by 52 ft., Adams street, above Washington ave., to H. Buzby, Germantown.

A one-story brick store, 16 ft. by 50 ft., Huntingdon, above Memphis street, to Donahue & Lee, 2322 Lehigh ave.

One two-story back-building, 12 ft. by 12 ft., Seventh, above Thompson street, to S. Levi, 1435 Marshall street.

Two two-story brick houses, 14 ft. by 30 ft., Venango, above Myrtle street, to Charles Roth, 5 East Silver street.

Twenty-five two-story dwellings, 14 ft. by 35 ft., Forty-fifth, above Merion street, to John Bateson, Jr., 1002 South Nineteenth street.

One two-story brick building, 20 ft. by 38 ft., Birch, above Edgmont street, to Judge & Snyder, 2814 Edgmont street.

One boiler-house, 24 ft. by 28 ft., Chestnut, above Twenty-first street, to Edwd. Delaney, 913 South Twentieth street.

One two-story brick house, 17 ft. by 28 ft., Alamendo street, above Lehigh ave., to Aug. Schrieber, 2030 Howard streets.

One three-story dwelling and one two-story shop, 18 ft. by 17 ft. and 18 ft. by 57 ft., York and Carlisle streets, to G. W. Schweim, 1616 Germantown ave.

One brick boiler and drying house, 50 ft. by 60 ft., Thompson, above Cumberland street, to John T. Lewis & Bros., 2570 Thompson street.

Five two-story brick houses, 16 ft. by 37 ft., Nineteenth and Mountain streets, to T. J. Milnarnow, 2026 Christian street.

One back building, 12 ft. by 16 ft., 1210 Alder street, to Henry G. Schultz, 2623 Germantown ave.

One wagon shed, 18 ft. by 30 ft., 2615 Germantown ave., to William E. Dunsford, 2734 North Eleventh street.

One addition to brick building, 9 ft. by 13 ft., 1624 Spruce street, to Stacy Reeves & Son, 120 North Thirteenth street.

One alteration, 16 ft. by 40 ft., Kensington ave. and Harrowgate street, to C. B. Medford, same place.

One one-story kitchen, 8 ft. by 16 ft., 1116 Mifflin street, to Michael Whalen, 1120 Mifflin street.

Two two story houses, 10 ft. by 48 ft., 1221 Snyder ave., to same party.

Two three-story houses, 15 ft. by 44 ft., Allegheny ave., above Emerald street, to Dickson Bros., 2817 Frankford ave.

Five two-story houses and one store and dwelling, 15 ft. by 17 ft. and 21 ft. by 36 ft., Cope street, above Amber street, to same party.

One bath room, 12 ft. by 10 ft., 737 Spring Garden street, to William F. Dunlap, same place.

One-story back building, 10 ft. by 15 ft., 302 Norris street, to Christian Joss, 504 Vine street.

Two-story addition, 10 ft. by 12 ft., Thirty-seventh and Aspen streets, to John Stutt, same place.

A three-story brick store and dwelling, 20 ft. by 69 ft. 4075 Haverford ave., to Robert F. Shriner, 4509 Haverford ave.

One three-story store and dwelling, 20 ft. by 58 ft., Forty-ninth street and Woodland avenue, to James C. Dalbey, 2012 Lombard street.

Two two-story brick houses, 20 ft. by 42 ft., Fifty-sixth st. and Woodland ave., to Robert H. Parker, Mt. Moriah.

One two-story brick house, 15 ft. by 40 ft., Unity st., above Elizabeth, to J. & E. Mattes, Fox Chase.

Front alteration, 2039 Lombard street, to Robert McCloskey, 2133 Lombard st.

One two-story brick house, 16 ft. by 44 ft., Sprague and Woodbine avenue, to John G. Schuyler, Germantown.

Two-story brick building, 16 ft. by 42 ft., Chelten ave. and Chew st., to M. D. Martman, Germantown.

Front alteration, 1731 Passyunk avenue, to Thos. Martin, 1317 Reed st.

One two-story addition, 18 ft. by 58 ft., Susquehanna av., above Broad st., to Jno. West, 1508 Susquehanna ave.

One one-story office, 5 ft. by 7 ft., 1850 Frankford ave., to J. L. Grauer, 1850 Frankford avenue.

One two-story house, 15 ft. by 51 ft., Reed street, above Clarion, to Porter & Thompson, 2037 Filbert st.

One two-story house, 15 ft. by 34 ft., Thompson st., above Tioga, Christian Gunther, 3510 Thompson st.

One addition to building, 18 ft. by 36 ft., 213 S. Ninth st., to Marriner & Buckingham, 716 Cherry st.

One addition to building, 9 ft. by 12 ft., 2226 Jefferson street, to Jacob Wolf, same place.

One three-story cottage, 136 ft. by 110 ft., Broad and Vine sts., to E. F. Durang, 1200 Chestnut st.

Two three-story houses, 16 ft. by 54 ft., Rittenhouse st., above Wayne, to Thomas W. Wright, 7 Harvey st.

One two-story brick dwelling, 16 ft. by 30 ft., Elizabeth street, above Sellers, to R. C. Wumals, 4620 Worth st.

One two-story brick building, 8 ft. by 8 ft., 949 Passyunk ave., to Mary A. Harold, same place.

One bay window, 6 ft. by 12 ft., Fifteenth st., above Columbia ave., to Jacob R. Garber, 1211 Spring Garden st.

Ten two-story houses, 15 ft. by 30 ft., Knox st., above Chelten ave., to John Briedling, Lehman and Knox sts.

Delaware County Building Notes.

Frank Strickland of Philadelphia, will build on a lot 50 by 191 ft. on Bridge street, Morton.

Mrs. S. J. Ash of Philadelphia, intends soon to commence the erection of a dwelling at Baker and Maple streets, Morton.

The two-story brick dwelling on Jasper street, east of Orange, Media, the lower story of which was recently used as a lock-up, is being demolished. The owner, Lewis Miller, will make an addition to the house on the corner. I. N. Flounders is doing the work.

Last week James Moore, the restaurateur on South avenue, Media, purchased the three-story brick building at Jasper and South avenue, from J. M. Broomall. The price was $9,000. The purchaser will take possession on April 1. Mr. Broomall has removed his law offices to the opposite side of the street.

Media borough has bought the lot at the northeast corner of State and Jackson streets, 40 ft. front, from Messrs. Vernon & Cooper, at $45 per foot. Upon this piece of ground there will be erected in the near future a substantial brick building for the several uses of the borough. The lower story will be for a lock-up, and in another department the recently purchased fire engine and hose carriage will find lodgment. The upper story will be devoted to council chambers. Plans are now being drawn to be submitted to the borough fathers at their next meeting.

The lot, 40 by 150 ft., on State street, Media, between South avenue and Olive, was sold by Thos. J. Haldeman to Burdsall & Adams, for $100 per foot. The lot will most likely be improved the present year by the erection of a commodious building into which the purchasers will remove their cigar manufactory. The price is not thought high, when its fine location as a business stand is taken into consideration.

The double brick house of William Russell, Front and Monroe, Media, is near completion. W. H. Newlin, Jr., is the architect and builder.

Operations will soon commence on a fine two-story building, store and dwelling combined, for H. D. Pratt, Media, on State, east of Jackson, and almost opposite his present residence. The building will be 36½ ft. front by 50 ft. deep, and will be occupied by him when completed. W. H. Newlin, Jr., is the architect and contractor.

Wm. H. Tricker will build a 2½-story house, the first story of brick, the remainder frame, on a lot adjoining his father's, Front street, Media. The main building will be 18 by 28 ft., with a 1-story kitchen, 12 by 13 ft. Jos. Seal is the contractor.

Jesse M. Baker will build a 2½-story brick house on 3d street, east of Monroe, Media. The main building is 18 by 24, with an addition, 12 by 23 ft. Joseph Seal is the contractor.

What Labor is Doing.

Labor difficulties are gradually subsiding. The carpenters' organization at a meeting a few days ago stated they had received replies from 114 builders and bosses, all favoring the nine-hour work day, at the old wage rates; several more have since been heard from to the same effect. Several builders were in favor of an eight-hour day, with a corresponding reduction in wages; among them were Wm. T. Wilkins, Wm. Thurwanger, Benj. F. Spare, Frank Tweed and Thomas Garber. The stone masons' association have been initiating new members; the recent additions number over 200. The granite cutters secured the consent of their employers to a nine-hour day from March 1st; the workmen agreed for a reduction from $3.25 to $3 per day. Strikes are occurring in other industries, but friendly relations are being gradually established, and by the 1st of April peace will reign in Warsaw. The nine-hour day means, of course, 10 per cent. less labor, and, if arithmetic means anything, it means at least that much additional cost, so far as the element of labor is concerned, and that extends into every branch of building interest. What the effect may be it is, of course, not possible to say, in the light of experience. The reduction is something new; business interests have been more injured by fluctuating values than by high prices. The price of labor has been an uncertain factor; there will be an advantage in having its value fixed. The REAL ESTATE RECORD does not belong to that school that apprehends disaster simply because the creators of values are well paid. No organization of laborers can work permanent detriment to the building interest; rashness may check enterprise and cause temporary embarrassment, but the underlying laws of trade will assert themselves in spite of all possible opposing combination.

Trade Report.

The receipts of lumber during the past week at Philadelphia, indicate that building activity has certainly set in. Receipts for four days of last week were between five and six millions of feet, and dealers say the receipts for the current week will run between seven and eight millions, at least. Most of this lumber is already sold. It consists largely of white and yellow pine, and hemlock. An effort has been made by the white pine interests to advance prices, but the efforts have not been successful, and there is no difficulty, it seems, in placing contracts for lumber supplies at terms satisfactory to dealers and buyers. Hemlock is selling at $12 to $15 per thousand; yellow pine from $17 to $22. There is some uncertainty as to what freight rates will be.

Some builders speak of a temporary scarcity of a supply of brick, but there will be no trouble when the season is fairly opened, as all the yards are in shape to supply any probable demands. Prices will be about the same as last year.

LATH—Fair arrivals of lath are reported. Dealers are disposed to carry a good deal of stock, and prices are firm.

LIME—Dealers in lime report a good deal of inquiry, several good contracts and strong prices.

HARDWARE—The manufacturers of builders' hardware are exceptionally busy, but the distributors report only a little business in progress. Demand will take care of itself in due time.

IRON—Finished iron of all kinds is in abundant supply and prices are rather weak considering the high cost of raw material. Sheet iron is selling at 3 to 4 cents per pound at mill; nails are quoted at $2.40 to $2 50. To all appearances, the western strike will continue, and this means that the eastern makers will sell their product at strong figures, and have all the business they can do.

SLATE—The slate quarries of Northampton county are being worked with a good deal of activity. Receipts have not yet begun to arrive. Some large contracts have already been placed, and agents report the probability of a very active demand. Prices are rather low. The shipments for 1885 from the Slatington region were 526,960 squares, of which about 200,000 squares came from Bangor and Penaroyl.

Present prices of roofing slate on board cars here, as adopted by the National Slate Exchange at the annual meeting February 10:

24x14 and 12, 22x12 and 11, 20x12, $3.50 per sq.; 20x11 and 10, 18x10 and 9, 16x9 and 8, $3.75 per sq.; 14x8 and 7, $3.50 per sq.; 12x8 and 7, $3.25 per sq.; 12x6, $2.75 per sq.; No. 2 slate, $2.50 per sq.; No. 1 Ribbon, $2.75 per sq.; No. 2 Ribbon, $2.50 per sq.

Hard vein slates, 16x8 and 8, $4.25 per sq.; all other sizes, $4.00 per sq.

INSURANCE NOTES.

The Fire Marshal's Report.

Fire Marshal Wood reported to the Mayor that there were 1,137 fire alarms last year, or 259 more than in 1884. The total money loss for year, $1,851,562.90. There were 41 deaths, 21 being killed and 14 injured alone at the Almshouse fire; the other deaths were due to coal oil lamp explosions. 89 fire-escapes were erected.

Steam Pipes and Fire.

A civil engineer gives this bit of opinion on the prevention of fires from steam pipes. "Partly on that account, and to prevent the motion due to continual expansion and contraction from breaking the plastering, as it always does through walls, partitions and ceilings when the undermentioned precaution is not taken, I specify that the holes for the steam or hot water pipes are to be bored so much larger than the pipe (a quarter of an inch is sufficient) as to allow of inserting a sheet iron or, better still, a tin tube, leaving a space of say one-eighth of an inch all around the pipe, with two or three little tacks or stone or iron wedges between them to keep the hot pipe from contact with the outer metallic ring. Bright, clean tin is the best thing that can be used."

Fire Record.

At Warsaw, Wis., the Lake Shore House. Insurance, $5,000; loss, $6,000.

At Rockford, Ill., the Rockford Steam Bakery. Fully insured; loss, $10,000.

At St. Catharine's, Ont., Coy Bros.' hardware store and Gibson's book store. Fully insured; loss, $10,000.

At Hammond, Ind., the Miller Buggy Company's Works. Insurance, $10,000; loss, $30,000.

At Pontiac, Mich., Pontiac Rolling Mills, and dwellings, owned by Taylor Bros. Half insured; loss, $50,000.

At Hinton, W. Va., New River Hotel. Loss, $5,000.

At Chicago, Dermal Bros., furniture. A. O. Slaughter, owner. Insurance on stock and property, $10,000 each; loss, $45,000.

At Philadelphia, J. H. Billington's bobbin manufactory. Loss on factory, $5,000; on machinery and stock, $38,000.

At Toledo, Ohio, Varney, Taylor & Co., elevator and storage buildings and grinding mills. The Yaryan Manufacturing Company, which owns the patent on the new process, loses $8,000 worth of machinery. The total loss on the linseed oil works, including the Yaryan Company's loss, is $130,000. The losses of the others, including the railroads, amount to $10,000. The insurance on the new-process mill is put at $30,000, of which the New York Mutual holds $10,000. The other buildings and machinery were insured for $50,600 in twenty-seven companies, none of which held over $5,000. The company will rebuild at once and continue the business.

At York, Pa., Scholl & Bullinger's warehouse. Insurance, $20,000; loss, $30,000.

At Wheeling, W. Va., Henry Blumenburg's residence. Loss, $5,000.

At Hammond, Ind., M. M. Torule's factory building. Insurance, $3,000; loss, $6,000.

At Suncook, N. H., two houses, occupied by several families. Partly insured; loss, $10,000.

—A German mixture for the removal of ink spots and writing on paper, consists of alum, amber, sulphur and saltpetre, one part of each, in fine powder, mixed.

To Enamel Cast Iron.

A German paper says, Otto Holrenz, of Beresdorf, has devised a new process for preparing iron vessels for enameling. He sets out with the assertion that the enamel adheres to the white iron better than to gray, because the latter contains a mixture of uncombined carbon (graphite); hence, the articles to be enameled should be cast in iron, the surfaces of which are free from graphite. To accomplish this the mould in which the iron is cast is made of damp sand covered with a substance that will take up carbon and remove it. The best substance for this purpose is sulphur, which combines with the free graphite to form sulphide of carbon, which burns as soon as formed. Holrenz, therefore, dusts the moulds with fine sulphur powder, either alone or mixed with pulverized quartz or charcoal dust. The mixture contains more or less sulphur according to the quality of the iron used, but always has enough sulphur to convert the surface of the iron in contact with the mould into white iron.

—Messrs. Sharpless & Watts, Fifteenth and Chestnut streets, have some new and interesting features in tile work, from which, for fastidious dwellings, architects should be able to make any desirable selection. The model bath room fitted complete in one corner of their spacious store embraces everything that is cleanly, and leaves nothing that can serve to catch dust or dirt. The cast iron bath tub is lined inside and out with tiles, the outside corresponding with and completing the frieze of the entire room. The inside of plain white. Tub, floor, walls, everything of tiles. The Onyx design for drawing-room fire-place to be seen adjoining this, carries out in full the general design of luxury. The tile-mosaic work is, however, *the feature*. This work originated with the firm, and they are *the only* manufacturers of it, Philadelphia furnishing Chicago, New York, Boston and even London and Paris with fire-places made of this style. A tile-mosaic hearth is now completed and on exhibition awaiting shipment, that competent critics pronounce unsurpassed. The new broken joint floor tile is of their patent, and will soon be ready to be placed on the market. The special feature being that the joints when completed cannot be detected, giving a novelty for flooring.

—$37,669,267 is the estimated increase in the value of real estate for 1885 in New York city, as the result of the pressure of population and the consequent demand.

—Passyunk Avenue Damages.—The Jury of View appointed in the matter of opening Passyunk avenue from 25th street to Schuylkill have filed their report finding the damages to be $12,668.02 and that they be paid by the city.

—About 200 tin roofers and cornice-makers met Friday evening at the southeast corner of Eighth and Walnut streets for the purpose of effecting a union with the Knights of Labor. Several organizers from District Assembly No. 1 addressed the meeting. The proposition to become a branch of that organization was favorably received, though definite action was postponed for one week.

—The Board of Fire Escapes, in their report to the Mayor, thinks it will be necessary to enforce severer measures in order to compel a fulfillment of the law on the part of the owners of large buildings now being erected. The appropriations for the year, according to the report of the Fire Commissioners, were $538,566; of this amount, $531,843.23 were expended.

Things Worth Knowing.

—A metal that expands in cooling is very useful. Take of lead, nine parts, antimony, two parts, bismuth, one part.

—The following easy method for drilling glass should not be forgotten: Stick a piece of clay or putty on the part where you wish to make the hole. Make a hole in the putty the size you want, the hole reaching to the glass, of course. Into this hole pour a little moulten lead, when, unless it is very thick glass the piece will immediately drop out.

—One who has tried everything, says that after an experience of fifteen years he has found nothing to equal the following as a cement for leather belting: Common glue and ising-glass, equal parts, soaked for ten hours in just enough water to cover them. Bring gradually to a boiling heat and add pure tannin until the whole becomes ropy or appearance like the white of eggs. Buff off the surfaces to be joined; apply the cement and clamp firmly.

—A good wood filler is made as follows: Take boiled linseed oil and corn starch, and stir into a very thick paste. Add a little japan, and reduce with turpentine. Add no color for light ash; for dark ash and chestnut use a little raw sienna; for walnut, burnt umber and a little venitian red; for bay wood, burnt sienna. In no case use more color than is required to overcome the white appearance of the starch, unless you wish to stain the wood. This filler is worked with brush and rags in the usual manner. Let it dry for forty-eight hours or until it is in condition to rub down with No. 0 sand-paper. If an extra fine finish is desired, fill again with the same materials, using less oil, but more japan and turpentine.

—The following is said to be an excellent method of fastening cloth to the tops of tables, desks, etc: Make a mixture of 2½ pounds of wheat flour, 2 tablespoonfuls of powdered rosin and 2 tablespoonfuls of powdered alum; rub the mixture in a suitable vessel with water, to a uniform smooth paste; transfer this to a small kettel over a fire, and stir until the paste is perfectly homogeneous without lumps. As soon as the mass becomes so stiff that the stirer remains upright in it, transfer it to another vessel and cover it up so that no skin may form on its surface. This paste is applied in a very thin layer to the surface of the table; the cloth or leather is then laid and pressed upon it and smoothed with a roller. The ends are cut off after drying. If leather is to be fastened on it, it must first be moistened with water, the paste is then applied and the leather is rubbed smooth with a cloth.

—Wire or fibrous nails are coming into use, and are claimed to be, in some respects, quite an improvement upon the ordinary cut nail, especially on the score of tenacity. They are not only tough, but stiff, and will penetrate hard wood, where cut nails would break sharply off or become badly crooked.

—"Horse Sense" is well illustrated in the way that some of them perform their duties on the top floors of New York warehouses, where other power is not available, in the work of hoisting goods to the different floors. In one case a horse has thus been kept at the top of a high warehouse for eleven years, without having been down to *terra firma* but twice in the whole time. The horses are directed when to pull and when to stop, pulling by the sound of the check rope when shaken from below, to which they invariably give a prompt attention that might well be imitated by many workers in a higher field, but otherwise they are always left to themselves.

Largest Elevator in the World.

The erection of the Union Elevator at Minneapolis Junction, on the Manitoba road, this year, gives to Minneapolis the distinction of possessing the largest grain elevator in the United States, and, its owners claim, the largest in the world. No other building in the city attracts so much attention as this large house, whose gray corrugated walls loom up against the clouds like a mountain. The cities of New York and Chicago have a number of groups of buildings under the name of one storehouse, whose combined capacity is greater than the Union, but no other independent building in the United States equals it in size and capacity. The total cost of the building is $300,000. It is 336 feet long, 92 feet wide, and 175 feet high. Its actual storage capacity is 2,000,000 bushels. There was used in its construction 6,500,000 feet of lumber, and thiry-two car loads, or 10,000 kegs of big nails were required to hold the planks together. Mr. Cook, the enthusiastic young foreman in charge of the building, says the actual number of nails was 13,353,900, although he declined to say that he had counted them. A giant Corliss engine, of 450 horse power, moves the machinery, and its steady strokes are almost noiseless. The elevating capacity is 175,000 bushels per day, but this can be increased to 250,000 bushels on a pinch. The proprietors say that they can handle the entire crop of Minnesota and Dakota during the season. On every floor of the building are automatic sprinklers, which deluge the place in case of fire. As an extra precaution, 800 feet of 2½ inch fire hose and eighteen fire extinguishers are stored in handy places about the building.

—The repeated application to copper or brass of alternate washes of diluted acetic acid and exposure to the fumes of ammonia, will give a very antique-looking green bronze.

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

Items of News.

—Lancaster County, Pa., is to have a new jail.

—A new Methodist church is to be built in Germantown.

—A new National Bank is to be located at Ninth and Girard ave.

—Woodbury, N. J., is to be supplied with water-gas by a private company.

—A public bath-house is to be erected on Master street, below Twenty-sixth.

—The question of introducing the study of architecture in schools is being discussed.

—David Struthers will have a fine hotel for summer occupancy at Sea Isle City.

—$4,000,000 worth of granite block street pavement is to go down in Cincinnati this summer.

—W. W. Crandall has the contract for putting in electric bells at the Stevens school. Price, $98.12.

—R. E. Miller, of Camden, is building a handsome residence on North Broad street for his future occupancy.

—The Rockingham House, Absecom, has been sold to Mrs. Price, of Philadelphia, who assumed charge last week.

—The Hebrews contemplate the erection of a new school building, but the location has not yet been determined upon.

—The receipts of lumber during the past week have been unusually large. Our list of permits is steadily increasing.

—W. W. Crane erects a fire escape stairway at the Pine and Quince street schoolhouse. Contract price, $3,159.20

—The Scientific Society of the University of Pennsylvania decided that a steel bridge over the Schuylkill at Market Street was the best.

—The Germania Building Association, of Pittsburg, was chartered at the State Department on Wednesday morning, with a capital of $200,000.

—A stocking factory is to be erected at Phœnixville, to employ 100 hands. It will be built and operated by E. R. Wright, of Norristown.

—The stone-cutters employed by Ryan & McDonald on the B. & O. Railroad, near Mt. Moriah, have refused that firm's offer of $2.75 per day.

—Theo. Walton, the "plunger," it is said, is connected with the scheme for the establishment of a one million five hundred thousand dollar hotel.

—The factory of the Pennsylvania Match Company, situated at Eighth and Cantrell streets, was partially destroyed by fire on Wednesday night.

—The Williamsport Board of Trade, through Senator Don Cameron, have presented Congress with a protest against the reduction of the duty on lumber.

—Joseph J. Read, of Camden, has purchased, at public sale, the Ashland House, situated on Pennsylvania and Atlantic avenues, Atlantic City, N. J. Price, $24,325.

—The Superintendent of the Public Buildings was directed to carry out the suggestions made by Professor Barker for protecting the City Hall tower from the effects of lightning.

—Mr. Thomas Green, proprietor of Green's Hotel, cor. Eighth and Chestnut streets, has purchased the property, 727 Chestnut street, for $100,000. This property is to be added to the hotel.

—On Tuesday last, the House Committee on Ways and Means, by a strict party vote, decided to retain the lumber clause as it was prepared by Morrison, which is practically free lumber.

—Mr. E. A. W. Hunter, of this city, has bought the building formerly occupied by the Hospital of the Good Shepherd and twenty acres of ground from the Villa Nova College for $1,700 per acre.

—The up-town branch of the Brickmakers' Protective Association on Wednesday evening appointed committees to organize branches at Twenty-seventh and Huntingdon streets and at Bridesburg.

—The Wilmington Bricklayers' Assembly Knights of Labor have resolved that after the month of April nine hours shall constitute a day's work for members of the Assembly, with same pay for ten hours as ruled last year.

—The Brandywine Granite Company of Wilmington, Del., has also withdrawn its bid for supplying stone for the gate-house of the Croton water-works. This company's bid, $100,000, was the lowest, and was withdrawn on account of the unsettled condition of labor.

—The Harlan & Hollingsworth Company, of Wilmington, Del., have refused a contract amounting to $225,000, to build two iron ferry boats for the Hoboken Land and Improvement Company of New Jersey. The possibility of a general labor agitation over the whole country during the summer is the reason given for their refusal.

The First Moravian Church, corner Franklin and Wood streets, will be removed. It is desired to build a new church in some central location, and, in the meantime to immediately remove the remains of the dead buried in the churchyard at Franklin and Vine. The late Mrs. Mary Ritter bequeathed the church a sufficient sum of money to purchase a new burial-ground, and the board have bought two sections in Ivy Hill Cemetery, near Chestnut Hill. The removal of bodies will be commenced early in the Spring and the board desire that persons intending to remove their own dead at their own expenses will at once communicate their desires to the secretary.

—M. N. Baker, architect, says: The women of our land should have more interest in architecture. Many might be found, who, by their conversation and by their writings, would further the good work. A great number of our art writers are women. Why should there not be more, and why should they not write on architecture as well as painting and sculpture? To educate the public in architecture is to raise the financial, physical and moral, as well as the artistic standard of our country. The field is wide and not crowded. In it there is a chance for any one who would gain a livelihood, win reputation, or, better yet, benefit his country by the elevation of his fellow men.

—The Council Committee on Highways opened proposals on last Monday, and announced the following: Charles Flood, for resetting and repairing fences on old Market street bridge, for $86; William Heath, for constructing wooden steps on Gay street, above Wood, for $270; James A. Davis, for constructing wooden steps on Shur's lane, for $185; F. E. Dickinson, for grading Percy street, from Reed to Scott, at 24 cents per cubic yard; B. Harkens, for grading Pennsylvania avenue and Thompson street, from Thirty-second to Thirty-third street, at 28 cents per cubic yard; John Shuttleworth, for grading Ontario street, from Twenty-first to Twenty-second, at 17 cents per cubic yard; and for grading Warnock street, from Susquehanna to Diamond, at 27 cents per cubic yard; B. F. Greenfield, for grading East Levering avenue, from Ridge avenue to Selig street, at 20 cents per cubic yard; A. Kilpatrick, for grading Latona street, from Twenty-sixth to Twenty-seventh, at 14½ cents per cubic yard; Jacob Trump, for grading Oakford, from Twenty-sixth to Twenty-seventh, at 14 cents per cubic yard.

Beams furnished from Stock and Cut to Length.

SEND FOR CHART OF SHAPES.

Car and Locomotive Axles, Hammered or Rolled, Iron or Steel.

GUARANTEE ROOFING PLATES.

From the "Ironmonger" of December 5th.

MESSRS. MERCHANT & CO., of Philadelphia, may justly claim to have revolutionized the roofing-plate trade in this country. When, a year ago, they became the representatives forthe United States of Gilbertson's Old Method and Camaret plates, they were enabled, with the aid of the manufacturers, to give a positive and definite guarantee of the quality of goods bearing their brand. This could only be done by taking the entire product of the works, the proprietors being under contract to maintain the standard of the production. This, they have not only done, but the quality has been improved.

The guarantee thus given by Merchant & Co., was the first of the kind ever issued, as to quality of material, coating and assorting. In fact, the understanding between them and the makers, placed the Philadelphia house in a position to do what had heretofore been impossible with most importers, who buy of London or Liverpool agents, and who are, therefore, not in direct commuication with the manufacturers. Messrs. Merchant & Co., therefore, claim to stand alone among importers as the only direct representatives of works in Wales, whose owners are under contract to keep up the standard of a guarantee and to sell their brand to no other parties, either in England or the United States. Of course this policy of guaranteeing goods has been followed by others, but as they purchase of commission agents in London, the consumer naturally feels a doubt, as to whether the guarantees of such dealers can always be relied on as effective.

The course adopted by Merchant & Co., has resultd in largely increased sales, and many architects and builders have found it to their advantage to use the guaranteed plates. In some cases, however, contractors have, to enhance their profits, substituted inferior brands for those specified. Finally, at the request of numerous architects and rillable roofers, who have suffered through competition with these unreliable parties, Merchant & Co. have succeeded in making arrangements with the manufacturers to stamp each sheet, not only with the name of the brand, but with its thickness or guage. The effect of this, the firm feel satisfied will bring about a better class of roofing work than has heretofore been attainable, and result in great benefit to all owners of property as well as to responsible roofers, architects, and others engaged in the building trade.

PHILADELPHIA, MONDAY, MARCH 29, 1886.

We sincerely deprecate the tendency of the daily press to sensational agitation of the labor question. That the question is of sufficient importance to merit a full and truthful report of the doings of the Knights of Labor we admit, but it is beneath the dignity of legitimate journalism to take advantage of the opportunity it presents for the wholesale unloading of newspaper pyrotechnics. The situation is bad enough as it is, inasmuch as it may somewhat disturb values, and temporarily impair extensive operations contemplated by timid operators. That there can be any lasting or disastrous influences arising from the present wild and unhealthy growth of labor organizations we do not believe, simply because it does not seem to us to be the result of serious thought and mature deliberation, and, like sudden revivals of all kinds, whether of a spiritual or secular nature, the effervescence is soon lost. After the first impulses are wasted, and men have exhausted themselves in boisterous declamation, an age of reason follows; for it is a very serious matter for a mechanic or workingman, whose family ties and love are quite as strong as those of the finest gentlemen, and whose tenderest sympathies are for those dependent upon him, to realize that he has by his own voice rendered himself incompetent to aid them.

The misery and suffering which the wars of the world have caused will never approximate the barbarous cruelty which strikes have entailed upon the innocent and helpless. It is the empty larders which bring men to their senses, and creates a desire—outside of the few demagogues and charlatans, who thrive best when others suffer most—for conciliation and a settlement of the question.

That there are many abuses which workingmen are even now made to suffer no one can deny, but unreasonable demands, either on the part of labor or capital, can be and must be corrected without extreme measures. Arbitration has already done much to adjust serious differences, and it is both childish and nonsensical for either party, where actual or imaginary wrong exists, to refuse such a natural and civilized adjudication of difficulties, for our Courts, whether of equity or law, are but arbitrators after all.

Hence, the conclusion that serious difficulties need not be anticipated is, we think, based upon a full appreciation of the situation, and further believe that the very magnitude of the present labor troubles will, more than any other influence, expedite a permanent and satisfactory solution.

A leading furniture manufacturer of this city, in expressing his views to a representative of the Real Estate Record, spoke in this vein: "I employ 50 men, two hours a day less means the loss of 100 hours per day, or, say 600 hours per week, not regarding the short Saturday. My men average twenty-five cents per hour; if they insist on ten hours pay for eight hours work, as they threaten to do, I am obliged to lose 25 cents of 600 hours, or $150 per week, which will amount in the course of a year to upwards of $8,000; this wipes out a very large slice of profits, but this is not the worst feature; supposing that my capacity is fully employed, that it takes ten hours per day to turn out all the work I want done; if I can run my capacity only eight hours, I am obliged to do one of two things, either lose a part of my trade or extend my shop capacity and put in more machinery, this may not be convenient, may not be possible, it may be necessary to run up another story, and create additional trouble in the handling of material. The working men do not seem to think where or how this thing will work out; they seem to imagine that the only thing necessary to be done is to reduce the hours and keep up the pay, and let the manufacturers look out for pay day."

Our manufacturer speaks the sentiment of a great many; a large concern in a city near by, after working six months to secure a certain contract, only last week, was obliged to give it up, notwithstanding, it amounted to $225,000. A score of cases of this character have occured and have been mentioned to the representative of this paper within the week. All this is hurtful. Business men cannot be compelled to place orders; laborers can certainly refuse to work, but they cannot compel those who have work to give out, to give it out against their will.

But this is not the worst feature; there is an immense amount of business that is being held back at this time, just on account of the uncertainty among investors and manufacturers as to which way things will go. Strikes cannot take place without doing harm to both sides. Just at this time an enormous amount of business is obstructed; if these agitations keep up two or three weeks, and wages continue to advance, if trade organizations continue to threaten, these enterprises will remain just where they are, in the brains of their projectors.

In the interest of both capital and labor, it is to be hoped that no extreme measure will be taken; that conservative views will govern both sides. We have had only a few months of genuine activity, during which time enterprise has been sprouting and budding, and will soon bloom. It would be a pity that the healthful indications should be destroyed.

Some one writes to say that our suggestion as to apartment house construction in the older section of the city may look very well on paper, but that the plan would not work. That our people are not friendly to the apartment house system, that they want their own homes, and that they will have them. This is merely an opinion; our correspondent may be right. It does seem however, that there are a good many people who would prefer to walk home three to ten squares than to ride home thirty or forty squares. It is susceptible of calculation that an apartment house would be a good paying property on a very low rent basis. Houses of this character would be patronized by the younger people who have a holy horror of suburban residences, who desire to be near theatres, churches, rinks, promenades, and the "sights." Philadelphia would do no harm in having a few apartment houses upon a broad and generous scale.

The people of New York are doing their best to obtain relief from the extortion of their gas companies by appealing to their legislature. Blessed are the New Yorkers that they have a legislature that they may appeal to with moderate expectations of success.

Labor agitation in the building trade still continues; the cabinet makers, painters, stone masons, carpenters and bricklayers have been meeting and resolving with reference to wages and hours of labor. Employers have been making no organized opposition.

The Philadelphia Real Estate Exchange is not dead, but sleepeth; it would take something more than a feather on its nose to waken it. Projectors think there is plenty of time ahead, and no doubt there is, but what is worth doing, ought to be done promptly.

REAL ESTATE.

Real Estate Matters.

Real Estate transactions for this past week have been in the main made up of small transactions of no particular significance; a few operations that may be called extensive are on hand, but are not likely to go through at a very early day. A great many holders of real estate insist upon the foolish policy of asking fancy prices, imagining that buyers will rush with open pocket books and pay them their prices. A masterly policy is being pursued by a few buyers who want certain properties. They are buying a lot and plot here and there through outside parties, and laying their plans in such a way that they can secure ultimately what they want at moderate prices. Holders of real estate are making the mistake in putting prices on property that the facts and circumstances do not warrant. Cheap real estate means activity in building; dear lands means interrupted enterprise; a great many inquiries have been made during the past week from some real estate operators, representing property holders in West Philadelphia and in the 29th ward. Opportunity ought to be taken at this time to let a good deal of land that has been held for years go into possession of builders. Holders of real estate have certainly a right to get all their property is worth, but on the other hand it is bad policy to discourage enterprise by high prices.

A representative of this journal asked one of the leading real estate dealers of this city as to the prospects of real estate transactions in view of the labor trouble, and the disposition of holders to ask high prices. His reply was, there are plenty of people anxious to sell, to meet all requirements, and the high prices will be left high and dry.

"What about rents this year?" asked a RECORD man of the renter of 200 or 300 houses; "up, down or steady?" "All three," he answered; "for certain houses and in certain localities rents are moving up a little; in certain places it is not quite so easy to get last year's rents, but in most cases, rents are stationary." He went on to say, "the rapid increase in the number of houses does not seem to have any effect upon rents, one way or the other; there are plenty of buyers and plenty of renters, and the newest houses seem to be most sought for; everybody wants to get into a new house if they can, and naturally the preference is shown to those who want to buy rather than rent. Renters run around too much."

More Monopoly.

On the 24th instant a charter was granted to a number of stockholders of the Standard Oil Company, who represent the United Natural Gas Company, giving it privilege to mine for natural gas in Venango, Forest, Butler, Armstrong, Clarion, Warren, Elk and McKean counties, and supply gas to towns and cities in those counties.

Charters Granted.

The following charters were granted at Harrisburg last week: St. Charles' Building and Loan Association, of Philadelphia, with $1,000,000 capital. The Citizens' Electric Light and Power Company, of New Castle; with $17,500 capital. Phillipsburg Gas Company, of Beaver county; capital stock, $60,000. The Ten Mile Oil and Gas Company, of Washington, Pa.; capital, $10,000. Bell Vernon Light and Heat Company, of Bell Vernon, Fayette county; capital, $10,000. Reading Academy of Music Company; capital stock, $100,000. The Consumers' Gaslight Company, of Pittsburg; capital, $1,000.

Supreme Court Cases.

The Supreme Court, on Thursday, the 25th instant, heard the case of H. C. Bickery, a street contractor, against the city, to recover on a contract for cleaning streets; also the case of Bowlby *vs.* Thunder, on an action of ejectment to recover possession of five houses at the north-east corner of Tenth and Lombard streets. Decision was reserved in both cases.

Philadelphia Architects

The Philadelphia architects are an extremely modest body of men; the papers never give any accounts of their banquets or their monthly meetings, or of the doing of their association; never record any meetings or elections, but seem to completely ignore them. The architects of nearly all other cities are seen and heard of men; they have their meetings and their banquets. Why cannot our modest architects make themselves known? they are as skilled, as enterprising, as successful as architects anywhere in the United States.

Late Ordinances.

Last Thursday Common Council passed the following ordinances: For paving Penn avenue from Thirty-second to Thirty-third street; Morton street from Main to Upsal street; Gay street from Wood to Main street, and Percy street and Madison avenue; for grading Carpenter street from Green street to 150 feet west of Sherman street; Sherman street from Carpenter to Frank street, and Sedgewick street from McCallum to Green street; for macadamizing Conshohocken avenue from Belmont avenue to City Line road; Coulter street from Germantown avenue to Hancock street; Morris street from Chelten avenue to Rittenhouse street, and Lehman street from Morris street to Wissahickon avenue; for opening Fifty-first street from Westminster avenue to Wyalusing street; Twenty-eighth street from Thompson to Master street, and Fifty-second street from Girard avenue to Warren street.

The Select Branch concurred in Common Council bills for the macadamizing of Conshohocken avenue from Belmont avenue to City Line road; for the paving of Percy street and Mansion avenue, and Gay street from Wood to Main, in the Twenty-first ward, and for the macadamizing of Coulter street from Germantown avenue to Hancock street.

Mr. Allen B. Rorke denies that he has had any trouble with the mechanics or workmen engaged on Hood, Bonbright & Co.'s new building, at Eleventh and Market streets, neither does he anticipate any.

The Hydro-Carbon Gas Fuel Company.

Messrs. James McManes, Wm. H. Kemble, Clay Kemble, James C. Slater, John H. Cratty, and Joseph Stadtfold have applied for a charter for the above named company, under the Act of Assembly of April 29th, 1874, which confers exclusive rights upon a corporation until, for five years it shall have divided among its stockholders dividends equal to 8 per cent. on the capital stock. A protest was made through Thomas Leaming, Esq., counsel for the committee of ten which was appointed at a recent meeting of citizens who are opposed to the sale of the gas works, against the granting of the charter.

The protest declares that the Attorney-General, in 1878, decided that the powers under the act had been exhausted for Philadelphia as regards gas companies, and contends that the existence of such a charter as is asked for is calculated at the present time to prevent the consideration of the sale of the Gas Works on its merits. "It would also," says the protest, "in the event of a sale, have a tendency, by the raising of legal contingencies, to check competition and depreciate the price to be realized." For these reasons it is asked that no letters patent be issued until citizens have had a chance to be heard in opposition. The protest is signed by all the members of the committee except Henry C. Lea. The application for the charter was made on the 20th inst.

Important Decisions.

Judge Arnold has refused a new trial in the suit of Mary Kroll vs. Alonzo L. Jones, in which a jury has rendered a verdict in favor of the plaintiff, giving to her possession of premises which she had leased to the defendant.

She had leased a house to the defendant "from December 1, 1878, at the rent of $600 per annum, payable monthly." By another clause in the lease it was agreed that if the defendant should continue in the premises "after the termination of the above contract, then this contract is to continue in full force for another year, and so on, from year to year, until legal notice shall be given for a removal." By a subsequent clause it was agreed that if the defendant should continue on the premises "after the termination of the above contract, then he shall have the privilege of staying another five years at the above fixed rate per annnm."

The plaintiff gave the tenant notice to quit on December 1, 1884, and he refused to comply, whereupon she brought an action of ejectment, and the jury decided in her favor. The argument made by defendant's counsel on the point that the lease had not expired, was that a tenancy "for one year and so on from year to year" is a tenancy for two years at least, and cannot be determined at the end of the first year. As to this Judge Arnold says that such rulings have been made in England, but he quotes other English decisions to show that a lease for a year, and so from year to year, is a lease binding but for one year; and he says that this is the rule in the State of Pennsylvania. He thinks the jury decided rightly, and says that the "defendant was tenant of the premises for one year with the option of continuing from year to year for another five years, and having enjoyed all that his option gave him the plaintiff is entitled to the possession of the premises."

The City Solicitor Files a Bill in Equity Against the Traction Company.

City Solicitor Warwick has complied with the resolution of Councils directing him to institute proceedings for the purpose of testing the right of the West Philadelphia Passenger Railway Company to collect 6-cent fares on cars operated by cable motor, by filing a bill in equity in Common Pleas Court, No. 4, against that corporation and the Philadelphia Traction Company. After reciting the acts and ordinances regulating the West Philadelphia Passenger Railway Company, including the ordinance of May 31, 1883, which authorized the Market Street Road to use a cable motor, on condition that it reduced its fare to 5 cents, the bill makes the following prayers for relief:

First. That the railway company be enjoined from moving or permitting any of its cars to be moved by other than animal power without a reduction in fare to five cents.

Second. That it be enjoined from collecting fares at a higher rate than five cents for a single ride.

Third. That the Traction Company be restrained from demanding and collecting fares and exercising the rights and franchises of a passenger railway company.

Fourth. That it be restrained from drawing or moving the cars of the railway company until the fares are reduced.

The case will come up for argument before Judges Thayer, Arnold and Willson at an early day.

The above suit recites that, by its charter, the West Philadelphia Passenger Railway Company had the right to use horse-power only. On May 8th, 1876, the Legislature authorized the railway companies to use motors other than horses, but provided that the fare must be reduced to five cents. On May 31, 1883, an ordinance was passed authorizing the West Philadelphia Passenger Railway Company to dispense with animal power and substitute a cable motor, but a condition attached required the reduction of fares to five cents. On August 22d, 1883, the Traction Company was chartered under the act of June 13, 1883, which provides for the incorporation of companies to construct and operate motors and cables.

Gossip of the Week.

Stonemasons and stonecutters want $3.00 per day.

An 82 acre farm on Long Island road sold for $15,500.

$7,500 dwelling and lot, 18 ft. by 100 ft., No. 1904 Girard Ave.

The Tacony Real Estate Association has been chartered with a capital of $80,000.

$10,780 house and lot, 17½ ft. by 110 ft., cor. Eighteenth and Berks Sts.

Fidelity Trust shares sold at $329.

Leslie the absconding builder who disappeared thirteen years ago short $232,000 is at Rio.

The property 727 Chestnut St., cor. Eighth, sold for $103,000 to Thomas Green.

Robert Beatty will erect two five story factories, each 46 ft. by 160 ft., on Coral and Amber Sts.

The pavers and Rammers have voted their wages at $4.00 for pavers and $3 00 for rammers, an advance of 50 cents over last years' wages.

The Pennsylvania Lumber Company are erecting a mill 50 ft. by 60 ft., and a lumber shed, 109 ft. by 156 ft., on Tioga Street near the Trenton Railroad.

Henry Grant will erect a two-story factory, 52 ft. by 150 ft., and a boiler house, 30 ft. by 50 ft. Third and Somerset Sts.

Booth & Barker of Lower Merion, Montgomery County, have started to rebuild their mill which was burned down.

John Blood & Co., have taken a lot of ground at Franklin and Somerset streets, and will erect a fine mill property upon it.

Thos. Henry, Jr. & Co., who were burned out in the fire at Coral and Taylor streets, have broken ground for the erection of a new mill on Trenton avenue and Tioga street. It will be five stories high, 50 ft. by 200 ft., and will have a Green engine of 150 horse power.

Thomas Henry and Son are erecting a five story cotton hoisery yarn mill, 50 ft. by 170 ft., on Tioga St. There will also be a boiler and engine house, 36 ft. by 37½ ft. In the former will be placed two 80-horse power engines, and in the latter one 150-horse power boiler. The building will be supplied with separate fire-proof stairways and elevator shaft.

M. E. C. Watson secured the contract for the laying out of the fountain green drive in Fairmount Park for $13,017.25. The contract for broken stone was given to B. M. Shumley, at $2.25 per cubic yard. The cost of a proposed road from Lansdown drive to the northern entrance of Memorial Hall will cost $15,000.

—Mr. Samuel H. Davis, died at his home, 1529 North Seventeenth street, on Saturday morning, at the age of 78 years. Mr. Davis was one of the oldest lumber merchants in business in the city.

—The Jackson (Mich.) *Patriot* says that the Manistee Knights of Labor have petitioned Congress, asking that lumber and salt be placed on the free list. The petition sets forth that the pine forests of Michigan are owned by a few rich men, and that within a few years the home supply of lumber will give out, and the Knights contend that lumber ought to come in free, as the people of Michigan will soon have to depend on Canada for the most of their lumber.

BUILDERS' ITEMS.

Among the Architects.

MR. WILSON EYRE, JR., 506 Walnut St., is making some extensive alterations in the dwelling of J. M. Price, Esq., 2019 Walnut Street.

Abbreviations.

Add.—Addition.	Exrx.—Executrix.
Alt.—Alteration.	K. & B.—Kitchen & Bath.
Assn.—Association.	M.L.D.—Mechanics' Lien Docket.
B. & L.—Building & Loan.	Nat. Bk.—National Bank.
Bk.—Bank.	Sav. Bk.—Savings Bank.
B.B.—Back Building.	t. t.—Terre Tenant.
Dwg.—Dwelling.	S.F.—Scire Facias to revive Judgment.
Est.—Estate.	
E.J.—Ejectment Suit.	
E.S.—Equity Suit.	
Exr.—Executor.	

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

Items of News.

—Work upon the new Court House at Woodbury, New Jersey, has been resumed.

—The personal estate of Edward Leidy, tobacco manufacturer, is appraised at $21,313.49.

—Mr. James Irvine, another California millionaire has died, leaving $8,000,000 to an only son.

—There is a prospect that work will be resumed on the Hudson river tunnel, between Jersey City and New York.

—The subscription books for the new gas company, of Woodbury, New Jersey, closed on Saturday. The shares are $25.

—The door and sash-makers of the city held a meeting on Saturday evening at 814 Girard Avenue and organized an association.

—The electrical department has been authorized to lay underground conduits under the pavement on North Broad street, above Columbia avenue.

—City Solicitor Warwick has been instructed by Councils to collect $39,750 from the State, the amount over-paid by the city, on account of the State hospital at Norristown.

—There are six frame houses on a court running from 406 South Sixth street to Minster street, that are in such a dangerous condition as to necessitate the building inspector's attention.

—Messrs. Bruschke & Riker, of Chicago, have taken the strike at their factory into the courts. The firm asks $25,000 damages from the Socialistic Publishing company and individuals named.

—On June 1 the gauge of the Southern railroads will be changed to correspond with the Northern or standard gauge. It is said that nearly 13,000 miles of track will be changed inside of twelve hours.

—Forty-five acres of land have been purchased near Pittsburg upon which will be erected a large Bessemer steel plant. A number of gentlemen lately connected with the Penn Gas Fuel Company are interested in it.

—At the annual election of the Pennsylvania Railroad Co., last Tuesday, 176,000 shares in England were voted by proxy, and 240,000 held in this country were voted. There was no opposition to the regular ticket.

—Under the new coal combination the Pennsylvania Railroad Company is to get 10 per cent. of the production, against 8 per cent. last year. Each company is to pay 50 cents per ton on all the coal it produces over its quota.

—The Thompson Houston Light Co. is to be granted the privilege of stringing electric wires over the market houses on Spring Garden street, between Franklin and Twelfth streets, provided the wires be taken down when wanted.

—A stock company for the erection of a commodious temperance hotel in Bridgeton has been formed, with Francis B. Minch, President, Walter H. Bacon, Secretary, and Ed. M. Fithian, Treasurer. The stock has all been subscribed.

—An effort is being made to hold a meeting in April in the city of Chicago of the leading business men and manufacturers of the United States for the purpose of organizing defensive measures against the Knights of Labor and other labor organizations.

—The Survey Committee of Common Council opened proposals on last Tuesday for building 22 branch sewers in various sections of the city, and for a storm water conduit on the north side of the Reading Railroad, at Falls Village. The bids were referred.

—An attempt was made last week by Mr. Lawson in the select branch to reduce certain appropriations of the Gas Trust surplus, so that there would be enough money for the construction of a bridge across the Schuylkill river at Walnut street. The thing failed.

—Suits upon overdue and unpaid coupons were on Wednesday last brought against the Reading Railroad Company by C. & H. Borie, Charles L. Borie and the executors of Adolph E. Borie. Counsel declined to state to what issue of bonds the coupons were attached.

—A largely attended meeting of bricklayers and brick yard hands was held on Wednesday evening to form a brickmakers' protective association. Brickmakers are getting from $2.00 to $2.50 per day, in some other sections of the city they are getting $3.00 per day.

—Horn, Brannon & Forsythe, chandelier and bronze-work manufacturers at No. 1218 S. Eighth street, notified their hands on Tuesday last that they would allow no Knights of Labor in their shop. As a consequence, nearly all of their men, numbering about 130 joined an assembly the following night.

—The will of Matthew Crowley, of Abington township, Montgomery county, contains bequests of $100 each to St. Charles' Seminary, at Overbrook; St. John's Orphan Asylum, of West Philadelphia; the Little Sisters of the Poor, of Germantown, and St. Joseph's Orphan Asylum, of Philadelphia.

—The Germantown Hotel Company intend to erect a first-class hotel in all respects. It will be under the management of George K. Mullin, late of the St. Cloud Hotel, of this city. It is intended to make this hotel suitable for the giving of receptions. The lot upon which it will be erected is 377x375 feet.

—The new Northwestern National Bank has elected the following Directors: Jacob Schandein, John Joseph Alter, H. C. Mosebach, Theodore C. Engle, J. Catherwood Robinson, James B. Doyle, Harry P. Crowell, James E. Dingee, William Charlton, Andrew C. Patterson, James Buckingham, George W. Roydhouse and Clark J. Wood.

—A company has been organized at Chattanooga, Tenn., with a paid up capital of $30,000, to engage extensively in fruit canning. The buildings have been leased, the machinery purchased and operations will begin on June 1. An experienced Indiana fruit canner has $10,000 in the company. Its capacity will be 15,000 cans per day, and it will consume 900 bushels of fruit daily when running to its full capacity.

—The Fire Commissioners held a meeting on last Tuesday at which several interesting questions were asked as to the purpose of the Commissioners in certain matters of details. Mr. McCully wanted to know why the committee on supplies and repairs did not purchase the new engines authorized by councils; why a new engine was placed at Seventeenth and Chestnut, where it is not wanted, when an old rattle trap engine was left at Third and Walnut.

—The Philadelphia Fire Companies are having a lively time. Mr. McCully at the meeting held on the 23d inst. denounced the superintendent of the repair shops as incompetent. Commissioner Harvey attacked Commissioner Furlong, chairman of the committee on real estate and leases, because of his report in favor of accepting the offer of W. H. VanKirk to build an engine house on Twenty-eighth street above Girard ave. for a rental of $1,400 or the selling price of $14,000, as the proposition of Mr. VanKirk's was $500 in excess of that asked by the J. & P. Baltz Brewing Company for a building they proposed to erect on Thirty-first street. After an angry discussion the Furlong report was adopted.

—A Bridgeport, Conn., manufacturing firm are erecting a building for working women employed in their factory. The building will be about seventy feet square and three stories high. The first story will be devoted to a restaurant, where good meals will be furnished at cost. The second story will contain a large reading room and library, conversation room, music room, bath room and lavatory. The third story will contain a large hall, seating 600, a small hall, seating 150, and class rooms, where evening classes in singing, penmanship, drawing, bookkeeping, fancy needle work, &c., will be taught.

—Chicago has a real estate board, which was organized two years ago, and is now one of the most successful trade organizations in that city, the fees are $100 for each Agent member. The following are the board's schedule of charges:—

For Negotiating and making Leases where Rents are not Collected by Agent.

Stores and business property, lease not exceeding three years, charge on amount first year's rental.....2½ per cent.
When term exceeds three years, and for each additional year.....1 "
Residence property, on total rent for term of lease.....2½ "
Ground leases, term not exceeding fifty years, on total rent for first ten years.....2½ "
(If appraised each five years, charge to be computed for the ten years on basis first five years' rental).
Ground leases exceeding fifty years, on appraised value of property at date of making lease.2½ "

For making Sales of Real Estate.

On a Sale for $3,000 or less .....5 per cent.
On a Sale for $10,000:
The first $3,000.....5 "
Excess over $3,000.....2½ "
On Sale exceeding $3,000.....2½ "

The board now numbers among its members the leading real estate agents and owners, and is becoming a power for good in the correct government of the great real estate interests of Chicago.

—A lumber drier has been patented by Mr. Orman A. Duke, of Clanton, Ala. It is so constructed that all the hot air and gases of the furnace are utilized directly in the drying of the lumber, while the flues are so arranged that there is no danger of the lumber being fired by sparks escaping from the furnace.

WM. H. HOSKINS,

913 ARCH STREET, PHILADELPHIA.

BLANK BOOKS.

Blank Books have always been sold by the quire. Twenty-four sheets make a quire; but the Blank Book Makers have been selling from 12 to 20 sheets for a quire. The Public have been deceived. We shall inaugurate a new system, and sell our Blank Books by the hundred pages. Before doing this we offer our stock at a **REDUCTION OF 10 PER CENT.**

A PERTINENT QUESTION.

Why will you continue to buy Writing Papers by the quire, when you can save so much money by buying by the pound? Come see and be convinced; you can get almost double the quantity for the same money.

A First-class Plated Paper, 25 Cents per Pound.
A Linen Paper, 25 Cents per Pound.

IF YOU WANT

Any article in STATIONERY it will pay you to call and inspect our stock. We can sell at prices that will surprise you. Have the largest, best assortment and cheapest Papers ever offered for sale by anyone. This we will prove if you call.

All Grades of Writing Papers by the Pound.

PLAYING CARDS

From 6 Cents per Pack up.

PROGRESSIVE EUCHRE, in sets or separate parts.
POKER SETS, POKER CHIPS,
EUCHRE and WHIST COUNTERS,
CARD BOXES.

MY extensive facilities and small expenses enable me to compete with any establishment in the United States.

Wood Turning in all its branches. House trimmings, new and original designs, a great specialty.

All orders delivered free on board at Jersey City.

Estimates for Philadelphia and vicinity cheerfully given.

Address,

JOHN NESBITT,
Yonkers, N. Y.

Charter Perpetual. **Capital, $500,000.**

THE PHILADELPHIA
REAL ESTATE RECORD,
AND
BUILDERS' GUIDE.
PUBLISHED EVERY MONDAY, AT 727 WALNUT STREET.

TERMS:
One Year, in advance, - - - - $5.00
All communications should be addressed,
REAL ESTATE PUB. CO.

PHILADELPHIA, MONDAY, APRIL 5, 1886.

It would hardly be the fair thing for an individual, or a community for that matter, to assume the right to dictate to a man owning a lot of ground as to either the character of the structure he should erect or the purposes he should put it to when erected, so long as he conformed to legal restrictions; yet it seems to us cruelly unjust that the power should be vested in a single individual to deteriorate or depreciate in value hundreds of thousands of dollars' worth of property, the owners of which having built and beautified with the cherished hope that the neighborhood would, for their lifetime at least, remain free from obnoxious and vitiating influences.

It is no small thing to a man, no matter how wealthy, who has purchased a home for his family in keeping with his means, the selection of which having been controlled by his refined tastes and gentlemanly instincts, to see a building going up on the lot adjoining his residence which is to be used for a livery stable or a beer shop. The financial loss may be large, yet not sufficiently great to seriously impair his fortune. This, perchance, he would suffer without murmur or complaint, but there are other considerations which weigh more heavily upon him even than pecuniary loss, and which largely affect the real estate interests everywhere—the sense of utter helplessness against future disappointments of a similar or dissimilar kind, or perhaps an entire change of sentiment is apt to influence or even deter him as well as others from further investments in costly houses.

There should exist among property owners a recognized and well-established code of ethics, which should at least prompt lot owners to take into consideration the influences their operations may have upon the rights and property of their neighbors. Of course, in these days of practical utility and reckless indifference, we cannot expect too much, and yet much might be done to avoid such bitterness and opposition as the erection of the livery stable on South Broad street has engendered.

One of our daily journals, in speaking of the City Law Department, says:

"The city has a Law Department, with a chief and eight assistants, yet the Building Inspectors, who handle all their own cash receipts with no accountability to the City Controller, employ a solicitor at $1,500 a year. Besides, nearly every board and commission in this city has private counsel at snug salaries. These services should be performed by the Law Department."

The point is not only well made, but it seems a travesty upon municipal reform that these abuses should be permitted when economic measures are so much needed. A million people crying for a decent and sufficient water supply, streets needing repairs on almost every square, besides other and greatly needed expenditures, money required for city uses to that extent that it is even proposed to sell the city's gas plant, and yet our city fathers ignore the thousands that are drained from the treasury for super-services which properly belong to the Law Department.

The special delivery system in this city does not seem to be an absolute necessity, and in several other cities there seems to be a lack of appreciation of its advantages. There is legislation now pending in Congress authorizing the mailing of packages, and if passed will help to make the system a paying one. Last October 22,000 letters were handled in this city, while in January the number fell to 15,000, and in March to 10,000.

We have endeavored to ascertain what progress is being made in the north-western section of the city in regard to the talked-of elevated railroad. No organized steps have been taken; what is everybody's business, is nobody's business. No doubt if a vote was taken of the proposition to permit the construction on an elevated railroad, it would be authorized. The cable system has put back the elevated road scheme for some years, unless an organization could be made, which would combine the political element and the financial. There is plenty of money to be had for such an enterprise, and an elevated road could be built at not much more than one-half the price of the road built a few years ago.

No more bonus houses are being built. Years ago, when labor and material were high, and when builders had some different notions in regard to construction, work was more carelessly done, but of late years greater attention is given to good work, and bad work is discountenanced.

E. F Fassett, architect, writes to the *Inland Architect* to say that "of necessity we must look to the humbler classes for our coming builders and mechanics." If the present trades union will not assist in the work of education of apprentices and the contractors refuse to take the care and responsibility of teaching an apprentice he must of necessity resort to other and perhaps better means.

This is another cropping out of a strong protest against the action of our trades unions in reference to apprentices; there are two sides to this question. Architects and builders are not slow to express the opinion that in comparing work of this age with former ages that the modern mechanic is far inferior. Our 19th century mechanic has very little knowledge of drawing; he leaves it to the architect to lay out the work. Our apprentice system has been completely broken up. The letting of work to the lowest bidders is another cause of inferiority. Mr. Fassett announces the action of trades unions in preventing the employment of the desired number of apprentices as outrageous and communistic. This is putting it rather strong. The existence of trades unions is due to the necessity for establishing some better means to secure fair wages than can be secured by unrestrained competition. Trades unions will grow in power just as machinery grows in power. The one accompanies the other. It is as sensible to growl at machinery as at the trade unionists; we will get rid of one as soon as the other. The trade unionists asserts that wages are fixed on the basis of the poorest workmen rather than the best; this is a subject out of which no good can come from discussion.

Fortunately, for the community, the street car companies and their employés, the threatened strike has been harmoniously adjusted on a basis of 12 hours per day, and $2.00, a rate satisfactory to companies and employés. Thus has been wiped out, a great wrong to drivers and conductors. This class of men have for years submitted to a degree of oppression, to which the slavery of the southern slaves in the anti-bellum times was nothing but happiness. The men have been conservative, and have acted with courage, and deserve the victory they have won. The companies deserve credit for recognizing the rights of manhood, and conforming to the strong public sentiment.

The increase of wages still goes on throughout the city, and in all parts of the country. This equalization of wages to the basis of two years ago, will shortly be completed, and everything will go on harmoniously.

Trade Prospects.

If the hunter after trade prospects is after bear he will find plenty in the woods. If he is after catamount, he will also find them. There is no difficulty in finding both favorable and unfavorable trade conditions anywhere we look. Real estate is high and operations is moving, as the transfer list shows, with considerable activity. Business men report a fair volume of business, and the list of commercial failures are decreasing in number as well as in volume and liabilities. On the other hand, an honest investigation will develop the fact, that there is a great deal with which to find fault in trade and in manufacturing. The evil may be a temporary one and it may not be. The best commercial minds do not see through the subject clearly. Manufacturers entered upon the year with excellent prospects, and with every confidence, and received for two months a large amount of business, on which they are now engaged. Then came the strikes and agitations of one kind or another, the uprising of labor and the building up of the threatening power. This has been followed by the granting of the desired advances; the establishment of arbitration in many cases, but also in the creation of a feeling of uncertainty and distrust at the growth of this enormous power. The employers do not know where it will end or what consequences may be involved. The agitation has even reached Congress, where a tub has been coopered up to be thrown to the labor whale in the shape of a foolish piece of legislation, which will not arbitrate. There are evidences everywhere of the determination upon the part of employers to combine for their own protection. A national convention will be held in Chicago next month to lay the foundation for the federation. A meeting was held in this city on last Monday, mostly of textile manufacturers; to look after their own local interests. Combinations have been formed in Cohose and in some of the manufacturing towns of Massachusetts and Rhode Island for the accomplishment of the same general results. Manufacturers recognize the fact that something must be done to put themselves in shape to protect their own interests as against the consolidated influences of organized labor. The labor associations themselves will welcome this movement. They have always desired and preferred to meet their employers in an organized capacity than in individual capacity. Employers, in most cases, refuse to confer with any but their own employés, while the movement of labor organizations is to offer recognition of their own organized conference through their leaders. An organization of employers will obviate this difficulty. No doubt this movement will assume larger than present dimensions. As to what it will ultimately accomplish it is impossible to say. A large amount of business is being held back on account of the doubts generated by these agitations. A great deal of building would be now in hand but for strikes. A great many transactions of one kind or another are delayed simply because men, who have money to invest prefer to wait until they feel there is no risk to be run. No doubt the ultimate outcome of these agitations will be the restoration of harmony, the establishment of confidence and development of business, upon a broader and safer foundation.

—The Building Inspectors are doing some thorough work in examining insecure buildings and condemning them. Some time ago. they condemned three small dwellings on Olive street, and last week while they were being repaired, they began to crumble, and the foundation wall fell in. A boiler shop was also condemned, recently, on Cherry street, above Sixth. There is still room for further investigation.

REAL ESTATE.

Real Estate Matters.

Real estate agents report an improving demand for building and manufacturing sites, in several sections of the city principally in the upper end of the town, towards Kensington. Quite a number of negotiations are in hand now which will be shortly consummated it is thought, for property on which establishments will be erected for manufacturing purposes. The expanding demand of the past six months for all kinds of textile products, has encouraged textile manufacturers to lay plans for an enlargement of capacity in nearly all textile branches. A good many mill sites have been looked at and negotiations have about terminated for eight or ten of them. In consequence of this inquiry, desirable sites have advanced in price 25 to 50 per cent., and in some cases even higher prices are asked. John Bromley & Sons, out on Front and Lehigh avenue, will build an establishment which will employ several hundred men. The west side of Front street, below Norris, has been selected for the site of the Ninth National Bank. The banking room will be 40 ft. by 70 ft. Two or three carpet manufacturers contemplate an enlargement and are looking around in a quiet way for cheap properties. A number of smaller manufacturing establishments will buy adjoining lots in order to make moderate extension.

Among the Real Estate Men.

J. W. Louder, 207 South Fifth street:—There is considerable demand for large properties; has made several large sales in the Twenty-Seventh Ward. Has recently sold to a builder a lot situated at Forty-fourth and Spruce, sufficient for twenty good sized houses; will commence building on the same soon.

J. R. McElroy, 205 South Sixth street, states that there is a brisk business doing along the line of the P. R. R., between Philadelphia and Paoli; prices are being kept up and will advance. Business has not fully opened yet on account of the weather. There is a great demand for suburban houses at good rents.

C. A. Truitt, 418 Walnut street:—Made a settlement on Wednesday for a house on Madison Square, Twenty-third and Christian streets, for $2,250. Have just sold 16 acres at Eddington Station, New York Division of P. R. R., for $5,000; there is an eight-roomed house, barn, and out buildings on the property. Is about trading 250 acres at Newfield Station for property in Camden; also, 452 acres in St. Mary's County, Md., for property in Pleasantville, N. J.

J. L. Miller, 705 Walnut street:—Real estate is doing well; have made some good sales this spring; prices have an upward tendency and thinks there will be far more building operations this year than last. Mr. Miller has just completed a dwelling for himself at Media, Pa. Mr. Geo. D. Pearson, of 427 Walnut street was the architect. It is built first story of stone, brick above, with Akron tile gables; it is finished with hard woods and has every modern improvement.

L. T. Brooke, 731 Walnut street:—There is considerable activity in suburban properties; with the opening of spring and good weather there will be a great deal of building done. Has lately sold a fine property of 125 acres with house, barn and all necessary out buildings at Radnor, Pa., to Rodman B. Ellison, who proposes making extensive improvements. Have also sold considerable property in Reading, and real estate in that city is very active. Will have a number of transfers by the 1st of May.

A New Factory.

The Weston & Wells Braided Wire Manufacturing Company, whose office is at 1017 Chestnut street, and not Frank Siddall and Joseph Wells, as was erroneously stated in the *Evening News*, have purchased the properties, 1115 and 1117 Cherry street, for a factory.

An Important Rumor.

It is rumored that ex-Senator Conkling has been retained by the Sub-committee of the Committee of One Hundred, to push the Gas Trust equity suit; it is said that as soon as the ex-senator gets through with the New York Surface Railway suits he is to be brought here to take charge of the Gas Trust suit.

2,451,200 Acres Restored.

The Atlantic & Pacific Railroad Company, according to the decision of the Secretary of the Interior, are compelled to surrender to the public domain, 2,451,200 acres of land, situated along the line of the road from San-Brenaventura, on the Pacific ocean, in California, to San Francisco, a distance of 384 miles. The land has been heavily mortgaged by the railroad company and it is probable that the mortgagers will lose every dollar.

New Mortgage Trust Company.

A charter has been granted to the Mortgage Trust Company, with a capital of $500,000; the names mentioned, as identified with the new company are: Joseph E. Gillingham, president, D. B. Cummins, George B. Roberts, Francis C. Yarnall, David Scull, A. Lewis Smith, Joshua Lippincott, Charles Hartshorne, Philip C. Garrett, Joel J. Baily, Benjamin H. Shoemaker, I. V. Williamson, Francis R. Cope, Isaac H. Clothier, J. C. Strawbridge, Wistar Morris, T. Wistar Brown, Stewart Wood and C. B. Wilkinson.

Fire Escapes Ordered

Ninety-two property owners in the Eleventh Ward were reported as not having their properties provided with fire escapes according to law. The list includes tenement houses, saloons, malt houses, factories, etc. In the Twentieth Ward there are only twenty cases of neglect reported to the Board of Fire Escapes. Last December 165 cases of neglect were placed in the hands of the City Solicitor and the escapes were erected. The above 112 cases will be promptly notified.

James Bonbright's Will.

Mr. Bonbright, who was one of the firm of Hood, Bonbright & Co., and who died recently, left an estate valued at $400,000. In his will he leaves it all to his wife and five children.

The will was executed two years ago, the widow and a son, William P. Bonbright, being the executors. One of the clauses in the will is this:

"I bequeath $5,000 to my wife and Wm. P., which they may distribute among such charities as they may deem expedient."

An Habitual Drunkard's Estate Not Liable for Confessed Judgment.

A levy has been set aside in Court of Common Pleas, by Judge Allison, that had been made by a creditor upon the estate of a man who was declared an habitual drunkard. The petition asking for an inquisition concerning the condition of the debtor was filed in November last. In December he confessed judgment in favor of the creditor, and afterwards, in January, the inquisition resulted in declaring the debtor an habitual

drunkard. The judgment had been entered up before the inquisition was filed. Judge Allison set aside the levy, saying that the creditor must come in and ask the leave of the Court before he can pursue his claim, the debtor being dead in law.

Dirt Carters' Strike.

The contractors for cellar-digging are feeling the effects of the labor question. Porter & Wilts' carters left work on Thursday evening last, and refused to resume for less than seventy cents per load. James Doak, who has the contract for cleaning out the cellars of the buildings burned at the Arch street fire was compelled to raise his price to seventy cents per load. J. Wiggins, doing the digging at Mustin's building, on Cherry street, above Ffteenth street, has also agreed to the increased price.

The New Orthopœdic Hospital.

The new building for the Orthopœdic Hospital, at the northwest corner of Seventeenth and Summer streets, is to cost $60,000. It is to be built of pressed brick, with Hummelstown brown stone trimmings. It will be four stories high, with a basement, and is to have a frontage of 106 feet on Seventeenth street, and 72 feet on Summer street. The interior will be finished throughout in chestnut, with double ash floors in the rooms and corridors, except the first floor corridors, which are to be laid with marble.

For the Public Buildings.

Last Wednesday the Executive Committee of the Public Building Commission passed the usual bills for material and labor, on the building. The Phœnix Iron Company, of Trenton, was awarded the contract for the construction of the iron railing around the inner Court yard. The price is $81,157.50.

Mr. Howard Murphy estimates that the cost for the necessary fixtures in the building, including tanks for water in the four corner pavilions, will cost $16,305. The plan proposed for the doing of the work was accepted. It was decided to ask for money to supply hot water appliances for the electrical department.

The committee on heating and ventilating, decided to complete the boiler house and construct four boilers, needed for electric lighting and elevator.

Chemical Fire Engines.

The following companies have presented their respective claims for supplying chemical engines, to the fire commission, who have been authorized to make purchases: the Holloway Company, of Baltimore; the Chemical Fire Extinguishing Company, of Buffalo, and the Fire Extinguishing Company, of New York. Two engines will be purchased; one will be stationed at Chestnut Hill and the other on Sixth street, below Market; the first will have a capacity of 50 gallons, and the second of 80 gallons. These engines are to be tried, and if found satisfactory, other engines will be purchased, and a system more widely adopted. The experiment, so far as they have gone, shows that fires can be very rapidly extinguished, but whether they will work in a general conflagration remains to be seen. It is admitted that they are excellent at the start, but doubts are felt as to their efficiency when the fire gains headway.

Building Association Matters.

At the last quarterly meeting of the Association League, at 923 Spring Garden street, the discontinuance of issuance of the stock certificates as practiced by certain associations was discussed.

There was a difference of opinion as to whether they were required by the law, and the paper presented by Mr. Gilkeson, embodying his views on the subject, was referred to the Legislative Committee, which is composed of A. B. Burk, J. Levering Jones, M. J. Brown, John I. Rogers and H. W. Gimber.

A resolution proposing to reduce the yearly dues of societies belonging to the League from $5 to $2 was discussed, and the committee decided to report that any reduction would at present be inadvisable. It was believed to be against the Act of Assembly. The payment of 6 per cent. to those who withdrew from the Association was also discussed, but in neither case was final action taken.

Councils' Highway Committee.

Councils' Highway Committee, on Wednesday last, awarded the contract for rebuilding the bridge over the George's Run at Fifty-second street and Lancaster avenue with heavy masonry, to J. H. Hathaway, at $5.50 per cubic yard.

A large number of bids were received for grading, curbing and repairing such sidewalks as the department may order to be put in proper condition during the year and for crossing-stones. For 24-inch granite crossing-stones, T. Maxwell's Sons and D. & P. McNichol were the lowest bidders, at 72 cents per lineal foot each, and for 20 and 16-inch stones and 16-inch tramway-stones, D. Mahoney presented the lowest bids, 50, 51 and 53 cents per foot respectively. W. H. Vanhoesen was the lowest bidder for flagging, at 64½ cents for 24-inch stones, 51½ cents for 20-inch, 43½ cents for 16-inch, and 45½ cents for 16-inch tramway-stones. The bids were all ordered scheduled, as were also a number for grading and paving streets.

The Annual Report of the Bell Telephone Company.

According to the annual report of the directors of the Bell Telephone Company, the gross earnings of the company for 1885 were $2,765,884.93, and the net earnings, $1,793,196.48. The dividends paid amounted to $1,562,236, and the company's surplus on January 1, was $1,204,120.01.

There was an increase in the number of subscribers to licensed exchanges of 2,969, and of 4,466 in the number of telephones in use. The various exchanges controlled by the company have 100,630 miles of wire on poles, 10,049 miles on buildings, and 3,428 miles underground. The wires underground are thus distributed: Washington, 992 miles; Chicago, 760; New York, 627; Pittsburg, 614; Boston, 289; Brooklyn, 134; Baltimore, 11; and Milwaukee, 1. There are 931 extra territorial lines, with 42,461 miles of wire. The instruments now in the hands of licenses, under rental, number 330,040.

During the year a pole line of seventy wires capacity, now carrying twenty-four copper wires, has been built between New York and Philadelphia. Sufficient facilities are not yet secured for reaching customers in Philadelphia, but it is expected that this will soon be accomplished. The Metropolitan Company, of New York, pays for and owns over one-half of this line, and divides receipts and expenses with the Bell Company. It cost, with twenty-five wires, $215,000.

The report closes with an argument in favor of a complete telephone monopoly.

Orphans' Court.

SATURDAY, April 3.—Estate of H. H. Littell and estate of Henry Homiller; exceptions to adjudications dismissed and adjudications confirmed. The exceptions to the adjudication of the estate of Priscilla Smethhurst were in part sustained and the adjudication amended. Estate of C. Schreiber; sur appeal from Register; petition dismissed. Estate of C. J. Williamson; exceptions to adjudication dismissed; adjudication confirmed. Estate of Hugh Boyd; petition for executor to enter security; security ordered. Estate of A. K. Mylin, petition for rehearing; account ordered to be filed. Estates of E. Pabst and S. Clark; citations granted to make partition of real estate. Petition to set aside sale of the estate of I. Lyster was granted. Inquests in partition were granted in the estates of B. T. Curtis, C. F. Buecker and C. Buecker. The Fidelity Trust Company was appointed trustee of the estate of E. P. Wilson. The petitions for discharge of J. S. Watts, guardian of the estate of G. D. Coleman, late minor, and that of C. S. Nelson et al, administrators of the estate of H. S. Ogle, deceased, were granted. Sales of real estate were confirmed in the estates of E. W. Freeman, H. Freeman, E. J, Crossen and M. McGinly, deceased. In the estate of A. Broffy an order to file account was made against T. Collins et al., executors. Petitions to sell real estate to pay debts were granted in the estates of M. Lanz, W. Hay, and M. Graham. A petition to pay purchase-money to executor was granted in the estate of J. C. Hohne. Widows' exemptions were granted in the estates of A. Cuddy, S. W. Lasor, A. Dawson and J. Miller. An order on executors to pay award was granted in the estate of O. Evans, H. Wolbold was appointed guardian of the Baisch minors, K. A. Ferry of the Ferry minors, the Fidelity Trust Company of the Shockley minors, A. J. Wilkinson of W. C. Smith, J. P. Shermin of M. S. Johnson, and R. V. Barber of W. McLardy.

Gossip of the Week.

Two thousand houses will be erected this year, in the south-western section of the city.

The property on the north-east corner of Seventeenth street and Girard avenue, sold for $10,000.

The property on the north side of Spring Garden street and Twenty-fifth, 64x180 feet, sold for $15,000.

The dwelling on the south-east corner of Fourth street and Indiana avenue, sold for $18,000; 250x102½ ft.

A new school building is to be erected in Germantown, 54x100 feet, two stories high, eight class rooms; cost $18,000 or $20,000

The Harlen & Hollingsworth Company have the contracts for the repairing of all the West Jersey Railroad Company's ferry boats.

Mr. George Burnham, of the Baldwin Locomotive Works, is having plans made for a new house, at Thirty-fourth street and Powelton avenue, West Philadelphia.

Proposals were considered last week by Chief Engineer Smedley for the building of a storm-water conduit at Falls Village. The lowest bidder was Henry J. Becker, $46,906.50. The American Surety Company was accepted on the bonds. Contracts were also awarded for the building of 20 branch sewers to nine contractors, at prices ranging from $1.87 to $3.73 per foot. The successful bidders for the construction of branch sewers were W. A. Hendel, D. & P. McNichol, H. C. Eyre, W. H. H. Achuff, W. B. M. Conklin, Thomas McEntee, John Noonan, M. C. Hong and Thos. McCann.

—The prevention of decay in wood is said to be effectively accomplished by exhausting the air from the pores and filling them with a gutta-percha solution, a substance which preserves the wood alike from moisture, water and the action of the sun. The solution is made by mixing two-thirds of gutta-percha to one-third of paraffine, this mixture being then heated to liquefy the gutta-percha, when it is readily introduced into the pores of the wood, the effect of the gutta-percha being, when it becomes cool, to harden the pores.

Items of News.

—Ground has been broken for the stocking factory at Phœnixville.

—The Key West fire has thrown 4,000 persons out of Employment.

—The personal estate of the late Dr. John Holmes is appraised at $45,057.50.

—Labor difficulties are quietly disappearing in the textile mills in this city.

—The reduction of the public debt during March is estimated at $14,250,000.

—12½ cents per ton has been offered the gas trust for the carbonized coal of the gas works.

—Sixty buildings were destroyed at Key West on last Tuesday, involving a loss of $1,500,000.

—The fare on the Pennsylvania Railroad, from Philadelphia to Pittsburg, has been reduced to $10.50

—The present estate of Marion M. Steel is appraised at $20,171.70, and that of George Newhall, at $16,118.77.

—Major Philip R. Freas, of the Germantown *Telegraph*, died April 1st. He was born February 22d, 1809.

—The brickmakers intend striking as soon as they are thoroughly organized, unless their demands are acceeded to.

—It is to be hoped that in the revision of coal charges, now being fixed, that Philadelphia will be favored by lower rates.

—Mr. Cullom's bill appropriating $500,000 for the erection of a monument to Abraham Lincoln, has passed in the U. S. Senate.

—The receipts of lumber from the northwest and south continue quite large, last Wednesday's receipts were 3,000,000 feet.

—Attention was called at the last meeting of the 22d ward school board to the unfit condition of the Franklinville school building.

—Several changes were made on last Thursday, in the highway department. We congratulate the ins and sympathize with the outs.

—On last Wednesday the American Surety Company filed a bond in the sum of $47,500, in favor of Michael O'Rourke, upon a city contract.

—The report of the ordinance commission recently submitted to Congress, leans in favor of the Delaware river as a site for ship building.

—Some forty Cornell students have been visiting some of our larger manufacturing establishments, and have been hospitably entertained.

—Over 600 carters have been organized to secure better wages, and this item of expense will likely be increased to builders and others employing them.

—The nail works at Cresent, recently destroyed by fire, are to be rebuilt on a scale about double the size and capacity of the previous establishment.

—The collection of city taxes for the first three months of the present year was $1,808,159.50, an increase of $118,278.89 over the collection for the same time in 1885.

—Water tax clerks, of Camden, were kept very busy for the few days previous to April 1, receiving taxes from delinquents, whose supply would have been cut off on April 1, unless settlement was made.

—The Pennsylvania Railroad Company have staked off the proposed siding destined to be run to the projected stove works of the Knights of Labor of Spring City.

—Hugh Maxwell & Co., last Wednesday entered judgment against Robert Patterson, of No. 108 Walnut street, upon a judgment note for $6,000, dated March 31, and payable Thursday.

—Our industrial art school sent over two hundred specimens of its pupils' work, to be displayed at the Children's Industrial Exhibition which opened in New York last Tuesday evening.

—The first serious conflict between the strikers and the authorities took place at Fort Worth, Texas, on Saturday last. Three Deputy Sheriffs were shot, and several of the strikers wounded.

—The City Councils of Committee on Gas approved bills for public lighting, in favor of the Pennsylvania Globe Gas Light Co., for $6,892.25, and in favor of the Northern Liberties Gas Company, for $944.79.

—The Harlan & Hollingsworth Ship building Company have contracted to overhaul all the ferry-boats belonging to the West Jersey Railroad Company. The Beverly has been taken off to undergo repairs first.

—It is probable that Henry Margerison & Sons, of Germantown, Philadelphia, will remove their Turkish Towel and table-cover factory to Millville, a site upon which a large factory building will be erected having been secured.

—The West Chester Public School Board have negotiated for a loan of $35,000 from the Philadelphia Safe Deposit and Trust Company at 4 per cent, with which to build a new school building on the $7,800 lot recently purchased by them.

—A syndicate organized in Los Angelos, California, have purchased from Chaffee Bros. the Ontario Colony; the transfer includes 7,500 acres of land, including the Ontario Hotel and the big Water System; the price paid was $275,000.

—John S. Kennedy, of New York, trustee under the adjustment mortgage of the Jersey Central Railroad Company, has offered to take the securities of the Reading Company pledged for the floating debt, amounting to $1,500,000, in consideration thereof.

—A tract of land on Five-Mile Beach, Cape May county, which was purchased a year ago by the Baker Brothers, of Vineland, is to be placed upon the market, a company having been formed for that purpose. The new resort has been named Wildwood Beach.

—At the close of business on March 31, there was in the General Fund of the State Treasury $1,903,986.71, of which the following sums were in Philadelphia banks: People's, $180,000; Girard National, $50,000; Farmer's and Mechanics' National, $630,999.59.

—Chairman Miller, of the House Committee on Banking and Currency, has been instructed to report favorably his bill providing for the issue of $25,000,000 in silver certificates of the denomination of $1, and $50,000,000 in certificates of the $2 denomination.

—The New York Cable Railway Company according to a decision made in the Court of Common Pleas, continuing the injunction against the Board of Aldermen, restraining them from granting a franchise to the company over the Mayor's veto, has no legal existence.

—During March the building permits issued numbered 511, and the operations 1528, an increase of 172 and 403 respectively, on those of March, 1885. The permits called for 880 two-story dwellings and 325 two-story dwellings, a total of 1205, against 733 in March, 1885.

—The Liverpool Journal of Commerce, of March 20, predicts that American steel rails will soon be sold in English markets in competition with those of English make.

—The Secretary of the Volunteer Firemen's Association has received a letter from the manager of the New Orleans Exposition, stating that the relics sent by them to the exhibition will be returned next week. It is expected that there will be a demonstration of some kind in honor of their return.

—The Board of Trustees of the West Chester State Normal School have decided to put in a plant for the electric light for the use of the school, the system being that known as the Westinghouse Church Current. For a number of years the school has been lighted with coal oil, because of the high price of gas.

—The new chapel to be built in South Bethlehem, in this State, by Mrs. Mary Packer Cummings, in honor of her father, the late Asa Packer, will cost $200,000. The stone tower will be 170 feet high. Work on the building is to be pushed as rapidly as possible, so as to have it ready for occupancy by May, 1877.

—The usual instructions as to conducting the assessments of real estate and personal property were given last Wednesday by the Board of Revision of Taxes to the forty-two assessors in that department. The utmost care was urged in transcribing the names of property holders with the description of each property and its valuation.

—A meeting of up-town brick yard employés was held at Freiling's Hall, Fourth street and Lehigh avenue, on Wednesday evening, at which a committee was appointed to confer with machine brick makers and other brick yard employés in reference to an advance in wages, and also with reference to a proposed organization under the Knights of Labor.

—Judge Hanna, of the Orphans' Court, last Wednesday, filed an adjudication of the account of the Philadelphia Trust Company, administrator of the estate of William L. Schaeffer, who died August 16, 1884. Under the decedent's will the entire estate, amounting to over half a million dollars, goes to Elizabeth Schaeffer, the testator's sister, who survives him.

—The Knights of the Golden Eagle propose to erect a new hall, which will cost some $50,000; it is proposed that is shall have four lodge rooms, reading rooms and a general meeting room; no location has been thought of, and a Committee of Ways and Means was appointed, consisting of Sydney Maurice, J. R. Dever, H.W. Smith, T. D. Jones, George W. Fisher, Joseph B. Howell and D. H. Presket.

—Judge Allison has rendered a decision sustaining the report of Referee Crowe, who decided in a suit brought by S. A. Spofford against the city to recover for coal delivered at the Almshouse three years ago on Major Phipps' order, that as the plaintiff had no contract with the city, and there was at the time no appropriation for coal unexpended, he was not entitled to recover.

—Hon. Thomas R. Elcock, on Wednesday last, filed a report as referee, giving judgment in favor of the defendant in a suit brought by the assignee of the Shackamaxon Bank against H. J. Montague, the maker of an accommodation note endorsed and discounted at the bank by his employer, Edward Kiker. The note was for $1,000, and the latter had a deposit of over $1,500 in the bank, which he set off against it.

—An ordinance passed Councils last week authorizing the addition of a truck company at Eighth street and Girard avenue, and a chemical engine at 16 South Sixth street. Common Councils concurred in a resolution of Select Councils authorizing the Chief of the Electrical Department to lay under-

ground wires on Broad street, from Columbia avenue northward. The last meeting of the season took place on Wednesday.

—Mr. Twining, foreman of the grand jury, has called attention to the unsatisfactory manner in which the Traction Company cleans its conduits. The grand jury visited several places to see how the cleaning was done, and regard it as detrimental to the public health. The Board of Health has this and some other matters under consideration, among them, the complaint against the oil rendering establishment, at Tioga and Cedar streets, which upon discussion was dismissed. Request was made of the Chief Engineer and Surveyor to not grant permits to other than registered plumbers to connect buildings with public sewers or drain pipes. The Chief inspector was directed to notify all persons who failed to abate nuisances in 1885, when ordered by the Board, that the Health Officer will proceed with the work if the same are not abated within five days.

—Chief Engineer Smedley was sued by Gustave Lindenthal, a civil engineer, for services rendered some two years ago. About that time he offered to prepare a plan for the strengthening of the new Market street bridge, and suggested that cylindrical iron struts be applied to strengthening the main abutment. Mr. Lindenthal declares that the plan which was subsequently adopted was essentially his own. The contract for the doing of the work was awarded at $53,000. The question in dispute is whether the plan adopted was original, and, if so, was it necessary for the plaintiff in this case to contract to retain his preparatory interest in it. The City Engineer denies the originality of the plan, or that the plans adopted were as much as suggested by the proposition of the plaintiff in the case. It will be a question for experts.

—Extensive improvements have been made to the Cherry Street Baptist Church (colored), Cherry street, below Eleventh, and it was reopened and rededicated last Sunday. All the woodwork inside the four walls has been renewed, being of pine, finished in the natural color, including new pews and galleries. The walls are frescoed and a new carpet covers the floor, and stained glass has been placed in the windows. An addition has been built to the second story, behind the pulpit platform, allowing the construction of a stationary pool for baptismal purposes. In the addition there are dressing-rooms for the candidates and a pastor's study. The recess in which the pool is situated is very prettily finished in hard wood panels. The entrance, which was formerly from Wheat street, has been closed, and a new entrance to both auditorium and lecture room built on the Cherry street front. The floor of the lecture room was lowered, and the position of the platform changed from the east to the north end of the room. The entire cost of the improvements will be about $8,000.

City Councils.

Councils are hurrying through with their spring work. Last Tuesday, at a special session, the following ordinances were passed: To construct sewers on Mascher, Cumberland, Thirty-seventh, Meredith, Perot, Third, Tenth, Diamond, Eleventh, Fifth, Cuthbert, Mill, Oxford, Twentieth, Wallace, Eighth, Seventeenth, Fifteenth, Brandywine, Judson, Green, Dauphin, Broad, Montgomery, Forty-ninth, Griscom, Lombard, Huntingdon, Hope, Clearfield, Ninth, Cross, Galloway, Carpenter and Johnson streets, of an aggregate length of 19,156 feet, and whose cost will be borne by an assessment of $40,915 upon the property along the streets benefitted, and by a payment of $15,000 by the city; to strike from the city plan Seltzer, Silver and Sterner streets, and to revise the lines and grades of Somerset and Leamy streets, so that they may cross the Reading Railroad by a bridge in the Twenty-fifth ward; to revise the grades on Columbia avenue, between Twenty-eighth and Twenty-ninth streets, in the Twenty-ninth ward; to revise the lines of Tioga street, between Gaul street and Trenton avenue, by increasing its width to eighty feet; to revise the lines and grade of Cresson street, in front of St. John the Baptist's Catholic Church, in Manayunk; to revise the north line of Filbert street, between Thirteenth and Fifteenth, so as to make it four feet north of the present line: to revise the grades on Thompson street and Pennsylvania avenue, from Thirty-second to Thirty-third street, and on Thirty-third street, from Pennsylvania avenue to Master street; to place Reed street upon the city plan on the northwest side of Moyamensing Prison; to strike from the city plan French and Edgely streets from Eighteenth to Nineteenth, and instead place on the plan Gratz street from Diamond street to Susquehanna avenue; to revise the grade of Forty-seventh street from Woodland avenue to Gray's Ferry road, in the Twenty-seventh ward; to place Rusconb street on the city plan from Twentieth street to the Philadelphia and Germantown Railroad; to revise the grade of Jefferson street from Linden street to Manayunk avenue, in the Twenty-first ward; to locate a truck company in the neighborhood of Eighth and Girard avenue, and a chemical engine in the engine-house No. 16 South Sixth street; to construct sewers on Lawrence, Moore, Pratt and Fifth streets and Lehigh, Kensington and Passyunk avenues; to permit the Pennsylvania Lumber Company to erect a frame shed for the storage of lumber at Trenton avenue and Tioga street. At the same session, the ordinance for the abolition of projecting and swinging signs was indefinitely postponed. The Trustees of the Gas Works were requested to light the Gray's Ferry Bridge, and to place Siemens regenerative lamps in Norris Square, and the Select Council ordinance for lighting North Broad street with electric lamps was concurred in.

Select Councils, at last Thursday's meeting, concurred in a batch of Common Council bills and closed up a large amount of business preparatory to the re-organization of the new Councils on Monday. Messrs. Firth & Foster Bros. were granted permission to erect an iron bridge over Emerald street. Charles Walters was authorized to lay one or two iron pipes under Mervine street. An ordinance was finally passed relating to the extension of cellar doors and steps into the footways of streets, making it a nuisance to maintain any cellar door or steps beyond four feet six inches of the footway of any fifty-foot street, provided that in streets one hundred feet wide steps may extend more than four feet six inches if the pavement from curb to step is not less than eighteen feet.

To authorize the opening of Tioga street, from Germantown avenue to Kenderton street, and the grading of Clearfield street, from Broad to Thirteenth street; Third, Indiana, Westmoreland and Seventeenth street, and Ashland avenue, from Penn street to Shur's lane.

The construction of a large amount of sewer work was also authorized in various sections of the city. The revision of grades on several streets and avenues was also determined upon.

In the Common Council there was a sharp debate upon the low fare question, but the Traction Company, as usual, gained its point. There is a strong minority in Council in favor of 5 cent fares, but they are unable to convince the majority of the justness of their position. Councilman Holeman, on last Thursday moved to strike out the repealing clause, in the measure authorizing the Union Passenger Railway Company to lay single tracks upon certain streets and avenues of the city. He asked Councilmen not to commit themselves in favor of 6 cent fares, in defiance of the will of the people. He instances the fact that the Lombard and South Street Line was obliged to reduce its fares to 5 cents, and that other companies should be treated in the same way. Mr. Vanderslice argued in the opposite direction and endeavored to show that if the bill was passed as proposed, it would increase the value of taxable properties in the sections of the city benefitted by the road. Mr. Bardsley took the side of the Traction Company and wanted to know where the citizens were who were opposed to the ordinance. The inquiries seem to infer that the one hundred and eighty thousand voters of Philadelphia should stand around Independence Hall every meeting of Councils to say what they want. They have endeavored to elect Councilmen in their interests, but the Councilmen play into the hands of the Traction Company, and then give as an excuse that there are no citizens to demand 5 cent fares. While every one knows that 6 cent fares are an extortion, there are not enough in Councils to make even a respectable fight for the legal fare. One Councilman opposed a reduction because such action, he said, would prevent the extension of the Union Line tracks where they were desired. This is a refreshing statement certainly, the citizens will be willing to see the experiment tried. Another Councilman was extremely anxious for the passage of the bill as the Traction people wanted it, so that the people of his section would not be deprived of street car facilities. If the question was not such a serious one, it would provoke a smile, at the thin covering which Councilmen put on their real motives. They are simply servants of the Traction Company, and dare not stand up and represent the one million people of Philadelphia. Mr. William Smith made some remarks which are deserving of reproduction, and which every right-minded citizen will thoroughly endorse. He said:

"This question affects not only one section of the city, but all sections. The railway people say they ask for only three miles more of street, yet it makes no difference in principle if the distance is small. The plain truth is they ask to occupy the streets without agreeing to pay one cent for the privilege. We must put a stop to this usurpation, and I say now is the day and now is the hour to do it. For every rail these corporations lay we should demand that they pay something in money into the treasury. If the use of the streets is not paid for in that way let them pay the people for the privileges they get by reducing the fares to five cents, as Councils have ordered. We are told that the Union Line really doesn't care much to make these extensions, and that they are only made as a concession to the people. That is ridiculous."

Mr. Vanderslice endeavored to justify the slavery of the city to the Traction Company by saying that what we are trying to do now should have been undertaken years ago, and that the reduction of fares should not be insisted upon, because of the request to build three additional miles of track, and made to extend over fifty-two miles of track. Mr. Bardsley endeavored to reply to the common sense and sledge hammer argument of Mr. Smith, by saying that "A number of speakers have made a very serious mistake in their arguments. They have forgotten that we have no right to withhold the franchises of the streets from corporations. The highways belong exclusively to the Commonwealth. There now come into the treasury as revenues from the horse-car lines about $100,000 yearly. There is a tax on the cars and on every dollar of dividend declared above 6 per cent. This talk about stultifying ourselves by repealing the ordinance passed five years ago is nonsense."

The people of Philadelphia, it seems, have nothing to hope from their Councils.

BUILDERS' ITEMS.

Among the Builders.

GEORGE A. WAGNER, 1517 Reed street, is putting up four two-story dwelling and a store which will sell from $2,600 to $2,800.

FRIELAND & SIMPSON, 1936 Reed street, are putting up sixty-one two and three-story dwellings on Hicks, Mole and Tasker streets. These will sell from $2,000 up.

JOHN MACONAGHY, 1710 Christian street, is building four stores and fifty-four dwellings. These will all be two-story, finished in modern style, and will all contain six rooms. They will be sold at prices ranging from $1,800 to $3,500.

J. H. GOLDBECK, 4217 Lancaster avenue, have just completed nine houses at Forty-second and Brown streets, each having seven rooms and bath; these are selling from $2,750 to $3,400. They have several large operations on hand, but are holding back till the labor question is settled.

ROBT. MONTGOMERY, 1836 Wharton street, is erecting fifty-three houses of two-story each, containing six rooms and bath. Twenty-eight of these are on Bancroft street, south of Tasker, and twenty-five on Sixteenth street, also south of Tasker. These will be thoroughly finished houses and will sell at reasonable prices.

F. H. VOGDES, 3959 Lancaster avenue, has just finished six houses on Haverford street, between Fortieth and Forty-first streets, for Wm. H. Kern. These houses are all finished with hard wood and have every modern improvement; the corner houses sell for $3,800, and the centre houses for $3,500. The rent of these houses is $30.00 per month.

WM. R. MATCHETT, 1515 S. Broad street, is building one hundred and twenty-three houses on Norris street from Ninteenth to Twentieth streets, and from Twentieth street to Park ave., and on Page street from Nineteenth to Twentieth streets, and on Fontaine street from Nineteenth to Twentieth streets. All of these houses are built with every convenience and are rented at prices to suit the mechanic. The houses on Norris street are nine roomed, and sell for $4,200; those on Park avenue have eleven rooms and sell for $7,500; those on Page street are seven roomed houses and sell for $2,800; those on Fontaine street are worth about $3,000; the Twentieth street houses are worth $4,700 dollars. Also, is about to build two hundred and twenty-five two and three-story dwellings, containing five, nine, and eleven rooms, in the square between Tasker and Morris, Fifteenth and Sixteenth, and Mole and Hicks streets. These houses will sell from $1,400 to $5,000.

NICHOLSON, ERICKSON & MICHAELSEN, builders and operators in real estate, 3949 Lancaster avenue, have just finished on the south side of Brown street, between Thirty-ninth and Fortieth streets, twenty-two three-story brick dwellings of nine and twelve rooms, which sell at prices ranging from $4,300 to $5,200. Also, fifteen three-story dwellings on the south side of Parrish, between Forty-first and Forty-second streets. These dwellings have nine rooms and are selling at $3,600. They have also recently finished four three-story dwellings on the west side of Preston below Parrish street, each of which have nine rooms and sell for $4,500. All of these houses are A. No. 1, and have been fitted up with all modern improvements. They have commenced on Forty-nine two-story houses, seven rooms, on the square bounded by Thirty-eighth street, Fairmount ave., Aspen and DeKalb streets. These houses range in price from $1,800 to to $3,100. They are also building five three-story brick dwellings on the west side of Preston street below Parrish street; each house has nine rooms and are finished in first-class style, and sell for $4,750. They are also building nineteen two-story seven roomed houses on Holly, Forty-second and Reno streets, for prices ranging from $2,000 to $2,800; and seven two-story cottages with seven rooms on the north side of Franklin street between Fifty-first and Fifty-second streets, which will sell for $2,000; and five on the west side of Fiftieth street, north of Kershaw ave., at $2,000. All the above cottages have front yards and porches and everything appertaining to a first-class modern dwelling. They are also about to build five two story dwellings on Warren and Centre streets, west of Thirty-sixth street, for prices ranging from $2,000 to $2,500. They have also purchased a large lot on Lancaster avenue, between Fortieth and Forty-first streets, and contemplate the erection of sixteen stores and dwellings. They report sales far better than usual at this time of year and think there will be a largely increased activity this season in the building trade.

Building Permits.

One two-story kitchen, 12 ft. by 10 ft., Otter st., above Germantown ave., to James Quigley, 1514 North Front st.

Second-story addition, 12 ft. by 12 ft., 1541 South Twelfth st., to Kister & Owen, 129 South Seventh st.

Eighteen two-story houses and one three-story house, 14 ft. by 50 ft., Poplar st., above Twenty-ninth, to J. L. Shoemaker, 3109 Powelton ave.

One two-story back wall, 9 ft. front, North st., above Second, to Frank Hewitt, 146 Broad st.

One two-story house, 15 ft. by 30 ft., Edgemont st., above Lehigh ave., to Frank P. Conroy, 2332 East Huntingdon st.

One two-story house, 14 ft. by 29 ft., 1819 Garret st., to Bernard Call & Bro., 509 South Seventeenth st.

One three-story house, 13 ft. by 45 ft., Penn, above Green st., to E. McDermond, 114 West Penn st.

Three new fronts, 18 ft., 1227 Long Lane, to Charles G. Vansant, 1238 South Sixteenth st.

Alteration and stone front, 10 ft. front, Mulberry ave., above Sixty-first st., to Jacob Zell, Fernwood.

One brick kitchen, 16 ft. by 16 ft., South, above Sixty-first st., to same party.

Two three-story dwellings and two two-story adjoining buildings, 18 ft. by 57 ft., Unity, above Orchard st., to William W. Worrell, Frankford.

Five three-story dwellings, 18 ft. by 50 ft., to F. C. Paxson, 1707 Cayuga st.

One three-story store and dwelling, 43 ft. by 20 ft., Weldy, above Hanover st., to John S. Baldt & Son, 2014 Clementine st.

A one-story shop, 16 by 22 ft., Knox, below Seymour st., to B. P. Evans, same place.

A two-story addition, 36 ft. by 43 ft., 827 Cherry st., to E. S. Nock, 2813 Girard ave.

New front, 16 ft. by 45 ft., 3716 Lancaster ave., to John Sullivan, Fifty-second and Woodland ave.

Interior alterations, 5 ft. by 10 ft., 2019 Walnut st., to Tanisue & Cooper, 4 South Broad st.

One three-story brick building, 150 ft., by 12 ft., Mulberry, above Fifth st., to same party.

Alteration to building 1705 Chestnut st., to John M. Leamy, 523 South Forty-second st.

One two-story brick dwelling, 19 ft. by 34 ft., Fifty-first and Florence ave., to Andrew J. Mosley & Sons, Fifty-first st. and Baltimore ave.

Twelve two-story houses, 12 ft. by 26 ft., Leithgow st., above Indiana ave., to C. A. Snyder, 1710 Master st.

One three-story brick house, 18 ft by 58 ft., Fifth, below Lehigh ave., to C. E. Myers, 2436 North Sixth st.

One new front, 1930 Rittenhouse st., to Morrison and Johnson, 2521 Stewart st.

Six three-story houses, Second, above Diamond st., to A. T. Richards, 1512 Otis st.

Three three-story houses, 18 ft. by 45 ft., Mechlin st. and Germantown ave., to George W. Baxter, Germantown.

One one-story store, 18 ft. by 35 ft., 4607 Main st., to John D. Caldwell, Germantown.

One two-story back building, 16 ft. by 30 ft., 4075 Main st., to same party.

Twenty-seven three-story houses, 16 ft. by 42 ft., Gratz ave., above Berks st., to John L. Kates, 1607 Arch st.

To rebuild mill, 48 ft. by 80 ft., Allen and Stackman sts., to James Hood, 212 New st.

Nine three-story houses, 16 ft. by 50 ft., Norris, above Franklin st., to A. Zane, 1915 North Eighth st.

To rebuild factory, 49 ft. by 55 ft., Wood, above Third st., to James Hood, 212 New st.

Six two-story houses, 14 ft. by 40 ft., Sergeant, above Jasper st., to John M. Buchanan & Brother, 1618 Vienna st.

Front alteration, 12 ft. Otis and Gaul sts., to same party.

Eighteen two-story houses, 14 ft. by 28 ft., Latona, above Twenty-second st., to William Shelley, 1530 Wharton st.

One two-story stable, 46 ft. by 150 ft., Broad, above Ellsworth st., to Y. T. Harris, 1241 Shackamaxon st.

One two-story back building, 12 ft. by 26 ft., 4146 Lancaster ave., to Wm. T. Stevens & Bro., 2323 Wallace st.

One-story back building, 16 ft. by 13 ft., 2671 Frankford ave., to Charles Booth, 2052 Taylor st.

A five story brick mill, 49 ft. by 250 ft., Northwest corner of Coral and Taylor sts., to the Arrott Steam Power Company, 115 South Fourth st.

A five-story mill, 35 ft. by 72 ft., Adams, above Coral st., to same party.

A five-story mill, 47 ft. by 180 ft., Southwest corner of Adams and Coral sts., to same party.

One three-story house, 16 ft. by 28 ft., Fitzwater, above Nineteenth st., to Thomas Livingston, 721 South Twentieth st.

Front alteration, 905 Vine st., to John M. Anderson, 1321 South Eighteenth st.

Alteration to dwelling, 25 ft. by 25 ft., Ezekiel and Warner sts., to Ezekiel S. Jones, 145 Shurs lane.

One two-story brick dwelling, 16 ft. by 47 ft., Front, above Denmark st., to J. B. McGonigal, 210 Morris st.

Front alteration, 1260 Hutchinson st., to Evan T. Kreider, 964 North Tenth st.

Front alterations 11 ft. front, Olive, above Thirteenth st., to J. B. Matlack, 6 North Seventh st.

One two-story back building, 13 ft. by 12 ft., 2048 Ellsworth st., to Emma Martin, same place.

One-story brick kitchen, 13 ft. by 22 ft., 1725 Francis st., to J. A. Buckman, same place.

Front alteration, 16 ft. front, 1704 South Sixth st., to Herman Weilly, 516 Owen st.

One three-story factory, 26 ft., by 126 ft., No. 9 building of Blabon's Oilcloth Works, to George F. Payne & Co., 1211 Sansom st.

Eleven two-story brick houses, 14 ft. by 28 ft., Mercer, above Ashmead st., to William Garvin, Germantown.

Ten two-story brick houses, 14 ft. by 40 ft., Emerald and Ann sts., to J. W. Maltz, 1545 Hutchinson st.

Six three-story houses, 18 ft. by 54 ft., Mantua ave. and Thirty-second st., to Howard Watkins, 3305 Baring st.

Twenty three-story brick houses, 17 ft. by 52 ft., East and West side of Thirty-second st., between Wallace and Mt. Vernon sts., to same party.

One two-story back building, 12 ft. by 14 ft., 1220 South Fifth st., to Dahl & Kidd, 132 Bainbridge st.

Addition to Industrial Hall, Broad, above Vine street, to R. J. Dobbins, 308 N. Broad st.

Two two-story stables, 26 ft. by 90 ft., Emerald st., above Hart Lane, to Bernard Heron, 1015 Otis st.

One two-story stable, 15 ft. by 17 ft., 1815 S. Ninth st., to Charles Newkirk, 1827 Passyunk ave.

Third-story addition, 24 ft. by 38 ft., 2147 Germantown ave., to D. C. Schuyler, 2263 Fairhill st.

Twelve two-story houses, 14 ft. by 30 ft., Mountain, above Twentieth st., to Alexander Gustorie, 1514 S. Twentieth st.

One two-story stable, 19 ft. by 17 ft., Eighteenth and Montrose sts., to Geo. Lafferty, 918 S. Eighteenth st.

Ten three-story houses, 16 ft. by 52 ft., Brown, above Twenty-fourth st., to James H. Lyons, 17 N. Ninth st.

Eighteen three-story houses, 15 ft. by 48 ft., Twenty-fifth, above Brown st., to same party.

Two three-story houses, 16 ft. by 41 ft., Mt. Pleasant st. and Cresheim Road, to Robert Christy, same place.

Five two-story houses, 12 ft. by 30 ft., Bemers, above Twenty-fifth st., to L. Paul, 2305 N. Thirtieth st.

Three two-story houses, 15 ft. by 40 ft., Twenty-sixth, above Dauphin st., to same party.

One two-story back building, 12 ft. by 11 ft., 189 West Dauphin st., to Henry Gill, 2330 Hancock st.

Two three-story back buildings, 2230 Amber st., to William Bartholomew, 143 West Norris st.

One two-story back building, 14 ft. by 14 ft., 2146 N. Front st., to same party.

One three-story store and dwelling, 25 ft. by 28 ft., Forty-third and Ludlow sts., to John J. McDuffee, 4303 Walnut st.

Seven three-story houses, 23 ft. by 24 ft., Forty-third, above Market st., to same party.

One three-story store and dwelling, 28 ft. by 28 ft., corner of Forty-third and Market sts., to same party.

One three-story house, 22 ft. by 50 ft., Queen st. and Township Line, to Joseph Parker, 2639 Germantown ave.

One three story house, 20 ft. by 60 ft., Otis, below Front st., to Stewart Bros, 2154 North Fifth st.

One two-story dwelling, 12 ft. by 28 ft., Philip, above Diamond st., to same party.

Six two-story houses, 16 ft. by 42 ft., Eleventh, below Mifflin st., to Wm. McRae Bryant, 915 Spruce st.

Four two-story houses, 15 ft. by 40 ft., Seventh, above Mercy st., to George Fender, 619 S. Second st.

A one-story back building, 16 ft. by 16 ft., Bringhurst, above Main st., to M. Dwartman, 116 Bringhurst st.

One three-story addition to building, 14 ft. by 30 ft., Fifth and York sts., to J. Pennepacker, 2505 N. Fourth st.

Two two-story houses, 16 ft. by 42 ft., Denmark, above Front st., to John McCreane, 1547 S. Front st.

One two-story house, 14 ft. by 30 ft., Helen, below Somerset st., to Alexander Ligget, 2472 Memphis st.

Four three-story dwelling, 15 ft. by 50 ft., Broad st., above Susquehanna ave., to Wm. H. Kemble.

Four three-story houses, 19 ft. by 65 ft., Jefferson, above Seventeenth st., to Widener & Elkins, 423 Walnut st.

Twelve three-story dwellings, 16 ft. by 56 ft., Bouvier, above Jefferson st., to same parties.

Thirteen three-story houses, 18 ft. by 72 ft., Seventeenth, above Jefferson st., to same party.

Three two-story houses, 16 ft. by 44 ft., Haines, above Chew st., to John O. Broadbent, 314 Haines st.

One three-story house, 17 ft. by 50 ft., Twenty-third, above Norris street, to Thos. Dey, 2307 Master st.

Seven two-story houses, 12 ft. by 26 ft., Leithgow, above York st., to A. M. Hoffman, 1520 N. Eighth st.

One two-story back building, 12 ft. by 12 ft., Taylor, above Coral st., to same party.

One one-story factory, 45 ft. by 109 ft., Second and Somerset sts., to same party.

—Among the business improvements for 1886, is one already commenced for Messrs. Thomas J. Newton & Co., importers and manufacturers of hosiery, knit goods, etc., 511, 513, and 515 Arch st. The premises occupied by this firm have a frontage on Arch st. of nearly 50 ft., and extend through to Cherry st. a depth of 288 ft. The portion fronting on Cherry st. is now being demolished to make room for the proposed improvement. The new building will occupy the whole width of the lot, having a front on Cherry st. of nearly 50 ft., and extending to a depth of 100 ft. It will be five stories in height, the front being entirely of iron. The upper floors will be lighted on three sides, the ceilings will be high, and the building substantial in every respect. It will be supplied with steam heating, power, elevator, etc., and will be first-class in all its appointments, thoroughly adapted for manufacturing or other business. The building is being erected under the supervision of Mr. David S. Gindell, architect. It is proposed to complete it in June.

JUDGMENTS.

PHILADELPHIA.

Entered March 26, 1886.

Abbreviations.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B. B.—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E. J.—Ejectment Suit.
E. S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M L. D.—Mechanics' Lien Docket.
Nat. Bk.—National Bank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S. F.—Scire Facias to revive Judgment.
Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

Boycotting is Criminal.

The *habeas corpus* case of Thomas Baldwin, who was arrested by a United States Marshal for having assisted in the expulsion of the Chinese, at Nicolaus, California was decided in the United States Circuit Court held at San Francisco, on the 1st inst. Judge Sawyer said the charge was apparently founded on Section 5519 of the Revised Statutes of the United States, which imposes a heavy penalty on persons engaging in a conspiracy to deprive any person, or class of persons, of the equal protection of the laws, and added that if that section is valid, what is popularly known as "boycotting" is criminal, and the writ should be dismissed and the petitioner remanded. Judge Sabin dissented and the prisoner was released on his own recognizance. An appeal will be taken to the United States Supreme Court.

—In the State of New York with 7,311 miles of railroad, carrying 1,834,580,425 passengers one mile in 1885, not one passenger was killed by causes beyond his own control. That is, a man can ride a distance of twenty times the distance from the earth to the sun and not be killed if he is careful.

"Genteel" Employment.

The Iowa Bureau of Labor Statistics, established less than two years ago, in its recently published report epitomizes answers received from questions asked of employers, as follows:

Easy to get: Common laborers, traveling salesmen, clerks, bookkeepers, men without trades, inexperienced mechanics, harness-makers, girls for machine-work, varnishers, stone-cutters, salesmen, inexperienced mill-workers, carpenters, teamsters, Swedes, polishers, men for easy jobs, "gentlemen," agents on salaries, men who say they can do most anything. Hard to find: Steady men, skilled workmen, good piece workers (coopers), glaziers, good machinists, sober men, experts (horse collars), skilled cabinet-makers and upholsterers, carvers and letterers (marble-workers), men to properly run machinery, file cutters, non-drinking tinners, men who are willing to be told, Americans. This condition of things prevails in the other States of the Union, and proceeds from the aversion of parents and children to trades. There is no better opportunity for an intelligent, industrious young man, to-day, than in some trade. The disposition to get some "genteel" employment has blighted the hopes of many a youth, who would have done exceedingly well had he been taught a trade. There never were such demands and such prospects for skilled workmen as there now are. The effect of high school and college education is to teach young men that they are too nice for this; the consequence is that they drag out a mediocre, an unknown, an unsatisfactory, a disappointed existence, in place of occupying a situation in which they can dictate the rate of their wages, perform honored and highly useful service, and indulge in enjoyments of living that they now view from afar. Let us have less "gentility," and more intelligent and productive labor.—*The Manufacturer.*

Freezing Stone.

The value of stone depends on its resisting power to disintegration under the action of cold. An invention has been perfected to artificially test the durability of different stones. The apparatus consists of a square sheet iron box, in which the specimens of stone are placed; this box being plunged into a receptacle containing the freezing mixture. This mixture was simply ice and salt, in the proportion of 3 to 1, which produced a temperature of + 3° Fahr. It was found that about two hours was the time required for bringing the temperature of the specimens to that of the outside mixture. The whole apparatus, when prepared for work, was wrapped up in hair felt and sawdust, and left for the allotted time. The pieces of stone were roughly hammer-dressed into 3-inch cubes, placed in distilled water, and perfectly saturated by exhausting the air by means of a pump. After freezing for three hours, the specimens were taken out, and allowed to stand for an equal time in water, until they had completely regained the outside temperature. After remaining a short time in water, some particles would be found loosened from the less durable stones. These pieces were gently rubbed off with a soft brush, and the samples again frozen; the processes of thawing and freezing being repeated until the stone assumed the appearance of ordinary weathered stone. After the last thawing and washing, the stones were finally dried and weighed, to ascertain the loss by disintegration. In this way a comparative durability scale for the stones of any locality may be expeditiously compiled.

—A State bounty of 10 cents is paid in Connecticut for the planting and cultivation of trees sixty feet apart on the public highways.

Shade Trees.

Shade trees are regarded by Dr. Stephen Smith as veritable life savers in the heats of summer in built up portions of large cities, and he thinks the authorities should provide them freely in the streets. He fortifies his positions by citations based upon analyses of mortality reports. As to the efficacy of the remedy proposed, Dr. Smith said an acre of grass gave the air 6,400 quarts of moisture in 24 hours, but trees were even better coolers. The old Washington elm, at Cambridge, although not very large, exposes to the air a surface in leaves equal to five acres of vegetation. Trees keep an even temperature of about 55 degrees, while the temperature of an exposed pavement on Fifth avenue, N. Y., on a hot day had been found as high as 130 degrees. When the test was made a thermometer in the shade of a tree near by recorded only 70 degrees.

Knights of Labor Vengeance.

One of the most remarkable exhibitions of the authority and the power of the labor organizations was shown in Washington last week. Last fall Mr. Warder, a manufacturer of agricultural implements at Springfield, O., came to Washington to live. He has made a large fortune in his business, and intends in the future to make Washington his home. He occupied this winter, ex-Senator Windom's house, the same house which was occupied by the Blaine family last year. During the winter he bought him a large lot in the vicinity of Sixteenth, on K street. He intended to build a house which would cost at least $100,000. His plans were all made and the work was begun several days ago.

Now the work is stopped and he cannot get a single workman to lay a brick upon his house. It appears that when he was a manufacturer in Springfield he became engaged in a conflict with the Knights of Labor. He was boycotted and the boycott has never been raised. Last week the Knights of Labor at Washington received word from Springfield, O., concerning Mr. Warder, and upon receipt of that information issued orders to all the workmen in the District directing them not to work for him. The result is that he cannot employ a single bricklayer. As he is a very determined and a wealthy man he will certainly succeed in building his house, but it will be in the face of the greatest difficulty. Mr. Warder is a man engaged in business and has come to Washington for the purpose of investing his property. He thinks well of real estate in Washington and would probably build a number of houses. He pays the wages demanded by the labor organizations and has sought in no way to employ non-union men. His work here would employ a large number of men during the season. Yet because of the quarrel had by him with the labor organizations in the past all members of labor organizations are forbidden to work for him at any price.—Correspondent *New York World.*

—Dust and smoke in factories may now be dealt with by electricity. It was recently asserted at the meeting of the British Association in Montreal, in a paper by Professor Lodge, that a dusty atmosphere would be speedily cleared by the passage of electric sparks. A prominent lead smelter of Wales, reading a report of this meeting, determined to apply the scheme to purifying the atmosphere of his works, where the fumes of volatilized lead were continually escaping from the flues and poisoning the atmosphere. An experimental shaft was made of barrels, with windows cut in them, and the electric spark was transmitted. The experiment is claimed to have been a complete success.

GUARANTEE

Trust & Safe Deposit Co.

CAPITAL, - - $1,000,000.

316, 318 and 320 Chestnut Street,

Rents Safes in its Burglar Proof Vaults at $9 per year and upwards.

Also receives for safe keeping valuables of every description, and Deed Boxes at $5 per year.

Executes trusts of every kind, allows interest on deposits of money. Also, acts as Registrar and Transfer Agent of Corporation Stocks.

SEND FOR CHART OF SHAPES.

Car and Locomotive Axles, Hammered or Rolled, Iron or Steel.

THE BLATCHLEY

Is carefully made by men who know how to construct a

PUMP

When desired they are lined with specially heavy Porcelain or Copper, or with Drive Well Cylinders, at small additional cost.

When ready to buy, *insist* on seeing and examining them. Use your own judgment, and don't be persuaded to act contrary to your own interests.

They are sold by some good house near you.

Special terms to builders buying in quantities.

CHARLES G. BLATCHLEY

MANUFACTURER,

308 MARKET ST., Philad'a.

GUARANTEED ROOFING PLATES.

From the "Ironmonger" of December 5th.

MESSRS. MERCHANT & CO., of Philadelphia, may justly claim to have revolutionized the roofing-plate trade in this country. When, a year ago, they became the representatives forthe United States of Gilbertson's Old Method and Camaret plates, they were enabled, with the aid of the manufacturers, to give a positive and definite guarantee of the quality of goods bearing their brand. This could only be done by taking the entire product of the works, the proprietors being under contract to maintain the standard of the production. This, they have not only done, but the quality has been improved.

The guarantee thus given by Merchant & Co., was the first of the kind ever issued, as to quality of material, coating and assorting. In fact, the understanding between them and the makers, placed the Philadelphia house in a position to do what had heretofore been impossible with most importers, who buy of London or Liverpool agents, and who are, therefore, not in direct commuication with the manufacturers. Messrs. Merchant & Co., therefore, claim to stand alone among importers as the only direct representatives of works in Wales, whose owners are under contract to keep up the standard of a guarantee and to sell their brand to no other parties, either in England or the United States. Of course this policy of guaranteeing goods has been followed by others, but as they purchase of commission agents in London, the consumer naturally feels a doubt, as to whether the guarantees of such dealers can always be relied on as effective.

The course adopted by Merchant & Co., has resultd in largely increased sales, and many architects and builders have found it to their advantage to use the guaranteed plates. In some cases, however, contractors have, to enhance their profits, substituted inferior brands for those specified. Finally, at the request of numerous architects and rillable roofers, who have suffered through competition with these unreliable parties, Merchant & Co. have succeeded in making arrangements with the manufacturers to stamp each sheet, not only with the name of the brand, but with its thickness or guage. The effect of this, the firm feel satisfied will bring about a better class of roofing work than has heretofore been attainable, and result in great benefit to all owners of property as well as to responsible roofers, architects, and others engaged in the bulding trade.

525 Arch Street, Philadelphia. **Merchant & Co.,** 90 Beekman St., New York. 135 Lake St., Chicago, Ill.

WM. H. HOSKINS,

913 ARCH STREET, PHILADELPHIA.

BLANK BOOKS.

Blank Books have always been sold by the quire. Twenty-four sheets make a quire; but the Blank Book Makers have been selling from 12 to 20 sheets for a quire. The Public have been deceived. We shall inaugurate a new system, and sell our Blank Books by the hundred pages. Before doing this we offer our stock at a **REDUCTION OF 10 PER CENT.**

A PERTINENT QUESTION.

Why will you continue to buy Writing Papers by the quire, when you can save so much money by buying by the pound? Come see and be convinced; you can get almost double the quantity for the same money.

A First-class Plated Paper, 25 Cents per Pound.
A Linen Paper, 25 Cents per Pound.

IF YOU WANT

Any article in STATIONERY it will pay you to call and inspect our stock. We can sell at prices that will surprise you. Have the largest, best assortment and cheapest Papers ever offered for sale by anyone. This we will prove if you call.

All Grades of Writing Papers by the Pound.

PLAYING CARDS

From 6 Cents per Pack up.

PROGRESSIVE EUCHRE, in sets or separate parts.
POKER SETS, POKER CHIPS,
EUCHRE and WHIST COUNTERS,
CARD BOXES.

MY extensive facilities and small expenses enable me to compete with any establishment in the United States.

Wood Turning in all its branches. House trimmings, new and original designs, a great specialty.

All orders delivered free on board at Jersey City.

Estimates for Philadelphia and vicinity cheerfully given.

Address,

JOHN NESBITT,
Yonkers, N. Y.

Charter Perpetual. **Capital, $500,000.**

THE REAL ESTATE TRUST CO., 321 Chestnut St.

Gives attention to all matters incident to the subject of Real Estate. Collects Rents, and guarantees the same, on special terms. Issues Policies of Title Insurance, affording absolute security to purchasers of Real Estate and Mortgages. Executes Trusts of every description, and becomes surety for the faithful performance of any Trust or office.

PHILADELPHIA, MONDAY, APRIL 12, 1886.

OUR public officials openly recognize the necessity of a system of municipal improvements, which will extend to highways, water, gas, park and other improvements. The only way by which the money can be had is through a special Act of the Legislature, allowing the city to vote for a measure to borrow money. Money, it is said, can be borrowed at 3 per cent., and possibly at something less. The city is already deeply loaded with debt, much of which was unwisely incurred, or incurred in a legitimate manner but with an extravagant management. This, however, is ancient history. The people of to-day are paying for the mistakes of the past; this is bad enough. It will be worse if they are obliged to pay for these mistakes not only in money but in being held down to poverty methods by reason of inability to borrow. A bold stroke ought to be made; a wise and comprehensive policy ought to be adopted. The fact that we are tens of millions in debt ought to weigh very little at such a time as this. Improvements ought to be made; they are imperatively demanded. We need a sewerage system vastly greater than that which we have. We need improved highways. Our six hundred miles of streets are in a little better than shameful condition; we need more bridges across the Schuylkill; we need electric lights; we need improved methods of lighting, and better gas-making facilities; we need improved water-works and better water supplies. The list of requirements could be greatly extended. Are we to stand still because of our Constitutional inability to impose heavier taxation? Popular public opinion will not permit of an increase of taxation. Here we are, a vast manufacturing centre, with great capabilities, with competitors all around us, and yet we are hamstrung, unable to move because of debt—unable to make our city what it ought to be—unable to have decent streets and proper water supply, or proper transportation facilities, or any of the many urgent requirements which underlie our city's prosperity.

It would be better for the people of Philadelphia to rise up and be equal to the demand of the time; it would be better to load ourselves down with a few million dollars of indebtedness, in order that necessary improvements should be made. Railroad corporations gallop into indebtedness and live and prosper; they buy up competing lines and absorb them; they forestall their competitors by building lines in territory which do not pay; they extend their control, regardless of the fact that their indebtedness far exceeds their ability to pay. Business houses pursue a similar course, though not to such lengths. Prudent business men keep their capacity beyond demand. In our municipal management we do not do these things or follow those rules or live up to those standards which we pursue in business or which are followed by the great corporations. We tie our hands and our feet, and blindfold our eyes, and sit down in the corner, and imagine we are enterprising. It is time for a new departure. If Philadelphia needs a dollar she needs ten millions to put herself in proper condition and in proper shape. Such a suggestion is of course calculated to provoke a smile from the serene faces beneath the broad brims of some of our citizens. Their standard is to move along quietly and slowly, taking care of the present day and letting to-morrow take care of itself. This is a bad policy; nearly every other city is forging ahead of us. What good reason is there for stopping still where we are when we can borrow money at a low rate of interest? The advantages that would accrue to us and to our manufacturing interest would more than offset any reasonable outlay. This is the secret of the case. The expenditure of a few million of dollars will advance our interests, and place us in a position to more easily hold our own against competitors. Individuals may say this is very nice, or they may say this is a fine-spun theory, but it is not at all necessary. An individual manufacturer may say taxes are high enough; my business does not depend upon a Walnut street bridge, or upon a better sewerage system, or upon a $15,000,000 water supply system, or upon improved streets, or upon electric lights, or upon any of the fine things of which you are talking; I have built up my business to what it is, and I am prepared to hold it there. Let your people who want these fine things pay for them, but don't tax the whole community for things that will do me no good.

This supposed expression of opinion is the real opinion of a great many; in this respect Philadelphians are provincial. New Yorkers do not talk that way; they were the advocates of a Brookyln bridge, when not expecting individually to use it. They advocated elevated railroads without any particular idea of special benefit. They advocated extensive local improvements simply because they added to the dignity and importance of New York city. The same spirit is observed in Western cities; here that spirit is lacking.

A man, or a cable of men, is wanted who will take provincialism by the throat, who will tear the bandage off the eyes of our purblind people, who will show Philadelphia what it wants, who will advocate measures that are calculated to lift us out of the ruts, and plant our city and its industries on a broader and stronger foundation. Our Centennial was only one step in the right direction. True, we have but one line of railroad, and this corporation has our industries by the throat. Relief will come from this monopoly in course of time, but we cannot afford to wait. There is much to be done, which our Councils can do; and it is to be hoped that the Councils which took its seat last week will develop the kind of men and the kind of energy that will lead us out of our provincialism, if that is the right name for it.

THE authorities of Key West have applied to Philadelphia for aid to help them through a period of want, caused by the partial destruction of their city, by fire. A meeting was held on Friday, at the Mayor's office, to take steps to render assistance. Philadelphia has a reputation throughout the south, and throughout the country at large, of being the first to thrust its big fist in its big pockets and throw out money to those in distress.

IN 1881 there were in Germany 1,000 graduates of the Polytechnic school, who could not find situations, and one manager of a large engineering establishment is said to have put up in the window of his office a card inscribed, "no polytechnic man need apply;" the reason of this was, that the graduates of these schools went out into the world full of theory, spherical trigonometry, and ologies of various kinds, but they knew nothing that anyone wanted. Those who are engaged in establishing industrial and in technical schools in this country do not propose to make the same mistake. Our public schools are good as far as they go, and our technical schools have made a very good start, with our practical American mind and our sharp eye to dollars and cents, it is probable that we will build up a system of technical education which the educators of other countries will find it their interest to copy.

REAL ESTATE.

Real Estate Matters.

There is a tendency to higher values in real estate in several other cities besides Philadelphia. The improvement is spoken of is Boston, New York, Chicago, St. Louis, besides several smaller cities throughout the interior. At the same time, in some places, holders of real estate are asking fancy prices. *The Record and Guide* of New York calls attention to this fact and says: Brokers are beginning to be found who are inclined to view the real estate situation with a cautious eye. They say that holders of property of certain classes are too high in their figures. This is especially so with private house property, they say, most of which would yield scarcely six per cent. to the purchasers at the figures asked. But there are other brokers who want to know if a steady six per cent. real estate investment, especially in locations where property is improving or not likely to depreciate in value, is not a good return, after all?

The New York Real Estate Exchange seems to be doing remarkably well. An exchange says: The manager says that there is not an office to let in the whole structure, every one having been taken. Not only that, but the rents obtained are ten to fifteen per cent. higher this year than last, and in some instances even more. This shows that brokers, lawyers and others must find it both profitable and convenient to centre around the Exchange. The extra rental obtained is equal to nearly one per cent. extra on the capital stock. The receipts from "knockdowns," also, are much larger. All this increases the value of the property, and Exchange seats ought to sell well in consequence.

Our Big Cousin.

During the first quarter of 1884 some 2,957 real estate transactions were closed in New York city amounted to $49,000,000. During the first three months of this year the transfers foot up 3,365 in number and in value $69,000,000. Mortgages also show a considerable increase. For the first quarter of last year 2,350 parcels of property were mortgaged for $23,156,639; this year 2,794 parcels were mortgaged for $32,820,669. Plans were filed for the first three months of this year for 1,073 buildings to cost $17,006,438 as against 681 buildings during the first quarter of last year, costing $9,523,700. The New York architects and builders are confident that this year's work will far exceed last year's in spite of higher priced labor.

Public Buildings and Grounds.

On April 5, the Congressional Committee on Public Buildings and Grounds, through Mr. Mahone, its chairman, submitted a report showing that since March 4, 1789, there have been 329 public buildings erected at a cost, including sites, furniture and enlargements, of $94,460,014. The amount proposed to be expended on account of public buildings during the present session is $4,515,000. Outside the city of Washington the Government now pays $953,000 annually for rental of buildings used for public purposes. This sum, at the Government rate of interest, would justify a further expenditure for public buildings of $32,000,000, less the amount which may be appropriated during this session of Congress. The committee thinks that the aggregate proposed expenditure are neither extraordinary nor excessive. The committee favors the erection of public buildings with surplus revenue until the public service shall be performed in structures owned by the Government and suited to its purposes.

Charters Granted.

Charters were issued at the State Department as follows: Clearfield Creek Coal Company, of Clearfield County, capital, $250,000; Senator Wallace holds 2,460 of the 2,500 shares of stock. Edison Type-writer Company, of Philadelphia, capital, $4,000. Windsor Glass Company, of Pittsburg, capital, $75,000. Lenwood Building and Loan Association, of Delaware county, capital, $1,000,000. Bushhill Building and Loan Association, of Philadelphia, capital, $600,000. Courtright Metal Roofing Company, of Philadelphia, capital, $700,000. Mount Pleasant Building and Loan Association, of Philadelphia, capital, $1,000,000. The Jones & Benner Company, of Philadelphia, for the erection of buildings, bridges, etc.; capital, $50,000. The Thomas Tunis Manufacturing Company, of Philadelphia, organized to erect buildings and manufacture building materials; capital, $50,000.

The Lost Will.

Register of Wills Kinsey gave a second hearing in the McGlathery missing will case, on Wednesday last. Mrs. Emma T. Steel, 1212 Poplar street, Isaac McGlathery's daughter, who was the objector to the application of her two sisters for letters of administration, on the ground that there was a will in existence, was placed on the stand. She testified that she had searched for the missing will among her father's papers where, on the Sunday before her father died, he had told her the will was. She did not find any will in that search nor in several other searches, in which she was assisted by other members of the family. She knew that there was a will, because she was with him at Judge Stinson's office when her father had his will drawn up.

This testimony on the part of the objector was finished with that of Mrs. Steel, and the case will probally be argued on next Wednesday.

Judge Thayer's Order.

On Wednesday morning Judge Thayer made the following order in the Charles A. Sundstrom election case, as surveyor and regulator of the Eighth Survey district: "And now, April 7, it is ordered that the examiners appointed to take testimony in the above matter sit at least four days of four hours each in every week, and that in case the party offering testimony shall fail to occupy his time for two successive days, the examiners shall close the testimony on that side of the case in three days thereafter. And it is further ordered that the examiners shall have the power of masters for the purpose of determining how much time shall be occupied in the examination and cross-examination of witnesses. And it is further ordered that each party shall have leave to apply to the Court for an order to close the testimony in such time as the Court may deem proper."

The Court has appointed Henry C. Loughlin additional examiner in the case.

George H. Sellers vs. The Phœnix Iron Company.

On Friday last the Supreme Court was occupied with the case of the Commonwealth, at the relation of George H. Sellers vs. The Phœnix Iron Company. This is a proceeding in the Court below by Sellers, a minority shareholder in the latter company, to compel the defendant to permit him to inspect certain books, papers and accounts of the company for the purpose of filing a bill in equity for an account. Court of Common Pleas, No. 2, of this county, originally denied the mandamus, but on appeal this decision was reversed by the Supreme Court in 1884. The lower Court, agreeably to the decision of the Supreme Court, issued a mandamus to compel the Phœnix Iron Company to produce its papers for the inspection of letters. The company claimed that the true interpretation of the decision of the Supreme Court was that a mandamus should issue only when probable cause for such inspection was shown; that as they denied the facts alleged in the petition for a mandamus the grounds for an inspection must first be proved before a mandamus can issue. The lower Court thought differently and issued a mandamus. The iron company then took the writ of error.

River and Harbor Improvements.

The harbor and river appropriations embraced in the bill for improvements are as follows: Delaware and Schuylkill rivers and Delaware bay, Marcus Hook channel, $15,000; Delaware Breakwater, $75,000; Ice Harbor at New Castle, $5,000; Harbor at Wilmington, $20,000; Schuylkill river, $25,000; Delaware river, from Trenton to its mouth, $240,000.

The following are for improving New Jersey rivers: Maurice river, $5,000; Passaic, $35,000; Raritan, $35,000; Shrewsbury, $10,000; South, $5,000.

The following are the items for Maryland: Baltimore harbor, $100,000; Boston bay, $6,500; Chaptank river, $10,000; Corsica creek, $10,000; Susquehanna, to be expended above the Philadelphia, Wilmington and Baltimore Railroad bridge, $6,000; Chincoleague bay, Va., to Delaware bay, at or near Lewes, to be used from Chincoteague bay to Indian river bay, $25,000

A paragraph in the bill authorizes the Secretary of War to cede to the City of Chester the upper and lower piers which extend into the Delaware river at that point, and which were formerly used as an ice harbor, if, in his opinion, the piers are dangerous to navigation and of no use to the Goverment.

Mayor Smith's Veto.

Mayor Smith's veto of the ordinance appropriating $70,000 from the Gas Trust surplus for improved pavements on streets occupied by passenger railways, based upon Solicitor Warwick's opinion, gives Councils something to do to settle a disputed question. Mr. Warwick goes into the State legislation on this subject and the Court decisions under it, as well as considering the ordinances passed under the State laws. He quotes Judge Elcock in reference to the Thirteenth and Fifteenth street lines, as follows:

"'That the said company shall be compelled to keep in constant repair that portion of the street which they use and occupy,' did not except the company from the obligation of paving and repairing the entire street to its full width."

The Solicitor says:

"The result of all the decisions upon the subject is that railway companies are bound to pave, repave and repair the entire streets occupied by them unless they are exempted by some provision in their charter.

"In my judgment, the kind of pavement which the railway companies are bound to maintain is not left to the discretion of the companies. The fact that railway companies have paved and repaired with cobble-stones will not relieve them from the obligation of paving with a different kind of pavement when Councils so direct.

"I therefore can only say that if the appropriation is for the paving of streets occupied by passenger railways, such an appropriation is, in my judgment, illegal unless the appropriation is for the paving and repairing of such streets or portions thereof as the railway companies, by their charter, are not compelled to pave or repair."

This is sound law, as well as sound common sense and justice. But it is one thing to know that it is the railway company's

place to keep their streets in repair, and quite another to compel them to make repairs. Their refusal to repair streets under a proper administration of law would work a forfeiture of charter without unnecessary delay. But there are no laws for such corporations. They can do or not do as they please They can repair or not repair streets, and almost defy the Courts. Now what is to be done? Shall Councils get on its hands and knees and beg these mighty street car companies to do what the law declares they shall do? Will they repair the streets? Not unless they see fit to. They are prepared to stand up and defy the authorities. Are there not a few determined men in Councils to take such corporations by the nape of the neck and shake some of their insolence out of them? The public wait for such a man.

The White House Roof.

Bids were opened on Monday last, in the office of the Commissioner of Public Buildings and Grounds, for repairing the roof of the White House.

The only bids received were those of Merchant & Co., and N. & G. Taylor Co., both of Philadelphia.

The former offered "Gilbertson's Old Method" Martin-Siemens steel extra coated roofing plates at $6.70 per box for IC 14x20 size—guaranteeing 120 pounds as net weight per box.

The latter offered first quality "old style" Martin-Siemens steel dipped roofing plates at $6 per box, of 112 pounds, and "Westminster" roofing plates at $5.75 per box.

As the Government advertised for, and based its decision "upon weight, ductility, uniformity of plates, and thickness and quality of coating, as well as upon price," the "Gilbertson's old method" roofing plates have been accepted and ordered for the roof of the Executive Mansion.

Mr. I. L. Miller's New House.

Mr. I. L. Miller, the real estate agent of Philadelphia, has just completed one of the handsomest residences in Media, Pa. The architect was George D. Pearson, of 427 Walnut street. The first story is of stone, brick above, with gables of Akron tile. In the cellar is one of Spear's anti-clinker grates, put in at a cost of about $350. The foundations are of broken stone; the floors are all cemented, and the ceilings lathed and plastered. On the floor above, are the parlor, library dining-room, pantry and two kitchens, finished in butternut, chestnut, oak and white pine. There is a Peerless brick open fireplace in the hall, reaching to the ceiling. One of the features of the parlor is the handsome tiled fireplace, with nickel and copper trimmings. The tiles represent historical scenes and, with the hard wood surroundings, is a decided work of art. In the library the fireplace is of peerless brick, surmounted with hard wood trimmings and beveled plate glass. The book cases are finished with butternut and oak. There is also a very handsome carved oak desk. The floor is of oak; and the chandeliers throughout the building are exceedingly handsome. The gas fixtures are of Buck, Son & Co.'s manufacture. The hall is beautifully finished in hard woods, and has a lavatory in the rear. The windows in the three halls are of elegant stained glass, the work of Goodwin, Twelfth and Market streets, and add greatly to the beauty of the halls. The laboratory is elegantly fitted with blue marble, nickel-plated faucets, hot and cold water and all modern inprovements. The dining-room is an octagonal room, and, like the others is finished in hard woods. There is a bay window and another window running from the floor to the ceiling; the size of glass used in this window is 4x5½ feet. The china closets in the room are all fitted with beveled French plate glass. The chambers have high ceilings, plenty of light, and, like the lower part of the house, are finished in hard woods. The house is certainly a credit to both architects and builders. Mr. Miller contemplates moving in on Wednesday next.

Gossip of the Week.

Large factory will shortly go up for Stead & Miller, Fourth and Cambria streets.

A farm of 38½ acres, Frankford street and Pennsylvania R. R., Whitehall, sold for $30,000.

Large warehouse, on Cherry, between Eighth and Ninth streets, for George S. Harris.

Five houses to be built on Eighteenth and South streets, P. J. Essick & Son, are the builders.

Bergner & Engel, will shortly build thirty-six houses, at Sixteenth and York streets, of two and three stories.

John F. Betz & Son, Brewers, will shortly build a large concert hall and beer saloon, on Ninth street, below Race.

Thirty two and three-story dwelling houses will be erected in the neighborhood of Twenty-eighth and Brown streets.

Marks Bros'., Eighth and Arch streets, will add an additional story to their building, and take in considerable property in the rear.

Mr. J. L. Galloway has contracted to build two nine-room frame cottages at Ridley Park for Mr. B. R. Hillman of Wanamaker's Grand Depot.

Fine dwelling being built for Samuel Horner, Jr., on Broad street, below Master. The builder is J. McCartney. It will cost about $150,000 when completed.

Three or four builders spoke this week about the improving demand for houses costing from $7,000 to $12,000 Several pieces of land have been purchased from which it is intended to erect houses costing, or which at least will sell for prices within these limits. There is no reason why a limited number of $10,000 houses would not pay. Houses costing, from $2,000 to $4,000 are selling quite readily.

Quite a number of important real estate transactions are pending; about the only difficulty in the way is the prices asked. These prices would not have been considered too high but for strikes and agitations. A month or two ago real estate buyers were willing to pay good prices for such property as they wanted, but of late they have been discovering reasons for proceeding cautiously. With all the drawbacks, some of our larger real estate operators say that this season's business pan out well.

Quite an increase in the number of mortgages given in Philadelphia is reported Manufacturers and others are extending their capacity and are mortgaging in a safe and moderate way to secure money to finish desired improvements. The rates of interest are reasonable, and the loans generally are for two or three years. The sheriff is not kept quite as busy as five or six years ago; borrowers are able to return loans and keep clear of snags. Comparatively few judgment notes are being given. Most of the improvements made are on capital earned.

Some builders are looking at some very fine properties on North Broad street beyond Lehigh avenue, and as far as Germantown Junction, with a view of erecting fine residences on them. The drift of population is in that way; North Broad street will soon become a popular section of the city; it has many desirable features for residences; land is held quite firmly there, but considering the value of the houses which will be erected on it, the cost is not unreasonable. No doubt a few blocks of semi-detached houses would attract buyers and renters.

Material Market.

Elsewhere we give a detailed statement concerning brick-making operations and prices for brick. Our brick manufacturers are able to fill all demands, and are asking only reasonable prices. There is evidently a growing demand for better made brick, and some of our makers contemplate still further increasing their facilities. The brick-making industry of Philadelphia has grown to quite large proportions during the past five years; its limit has by no means been reached.

The stock of lath have considerably increased and factories are busy in increasing the supply. Prices range from $2.00 to $2.50 according to quality and point of delivery.

LIME.—The kilns supplying this market are busily engaged on orders. Prices are low but firm at their bottom limits.

LUMBER.—Heavy supplies of all kinds of lumber for building purposes have been arriving during the past week. Most of the dealers have been quite busy in delivering on orders received. Quotations have neither advanced nor declined at retail yards. Wholesale prices have in some cases fluctuated a little where large orders were to be secured. Large supplies of white pine are arriving from Lake ports and from Michigan. Freight rates from Chicago are 19½ cents. Very little eastern spruce is coming in and this lumber has a very poor reputation here. Hemlock is known and preferred. The large dealers in hemlock have been selling a great deal, and dealers from Williamsport have been in the city during the past week anxious to carry off as much of the trade of the city as possible. Hemlock rules from $11 to $12; white pine from $15 to $20; yellow pine from $13 to $22 according to grade. There has been quite an active demand for hard woods and stocks are by no means abundant. The demand this year will be heavy, as there is an increasing consumption of hard woods for interior finish. Walnut is in quite active demand for furniture manufacturing and for house finishing, prices running from $40 to $100. Oak is selling at $40; quarter oak $50; maple $30; cherry $70.

BUILDERS' HARDWARE.—The larger establishments controlling the trade in builders' hardware speak this week of quite an improvement in the demand for builders' hardware of all kinds and quite a number of orders have gone to the factories to provide for the heavy demand setting in. Carpenters' tools and builders tools' of all kinds are being called for, and a very fair demand is likely to be kept up. Nails are strengthening in retail lots, but where buyers are disposed to place orders for summer delivery, they are being favored with concessions which, in but few cases they care to accept. The Western strike of the nail makers is now in its tenth month and to all appearances will continue throughout the season. A meeting, however, is to be held at Wheeling of the nail manufacturers of the West, this week, at which terms may possibly be arrived at. Should the western factories resume, it will have the effect of crowding prices down in the east, and it is for this reason that builders are not inclined to put in large orders.

PAINTS AND OILS.—The manufacturers of paints are meeting with quite an active demand for material and painters anticipate a very good year; card prices have not changed; linseed oil and spirits of turpentine are fairly active.

—The estate of Charles H. Rodgers, the late President of the Tradesmen's National Bank, was audited before Judge Hanna, of the Orphans' Court. The decedent's personal property alone amounted to nearly $1,500,000. The account of the executors of the estate of William Bumm, deceased, was referred to Edward Barry Esq., as auditor.

BUILDERS' ITEMS.

What Builders Think.

Builders are by no means united in their opinions as to the effect of the increased value of labor upon building operations. Some of our well-informed builders express the belief that the effect will be detrimental; others think that matters will be so adjusted that no harm will be done. There is no difficulty in finding instances where building operations have been delayed and are now being delayed, by reason of high wages and the general uncertainty surrounding the labor question. Builders believe that supply and demand is the only thing which can regulate wages and that any advance made without regard to this factor cannot be held. Arbitration they think, in and of itself, is very good, but no arbitration can accomplish anything which proposes to disturb the value of labor, which does not recognize the law of supply and demand. If that law says labor is worth $3 per day, and one sided arbitration should declare that it was worth $3.50 per day, they are unwilling to submit and are not to be expected to submit. The willingness to abide by arbitration is based upon the supposition that the value of labor is to be fixed by the law of supply and demand. Then if so, many ask, why resort through arbitration? This question is an interesting one and will work itself out to the best interests of all concerned. A great many builders do not believe that it is possible for trades' unions to continue indefinitely upon their present dates. They believe that they are upon a false foundation and that they must shift from it before they will be able to hold their own. At the present time they have every advantage, but some of these advantages they think will in a short time slip from them. Some architects and investors are unwilling to enter upon enterprises of magnitude because they have no confidence in the stability of labor compacts.

Among the Builders and Architects.

DR. BRUN is building a handsome dwelling at Bryn Mawr.

J. C. MOORE is building 30 houses on Cope and Amber streets.

MR. COOKE is about to erect a handsome dwelling at Lansdown for his own use.

H. C. ALTEMUS will put up 7 two-story dwellings on Ringgold below Berks street.

M. W. WILLIARD will build 2 stone dwellings at Oak lane, "twins," of three stories.

W. H. FREE will shortly put up a handsome residence at Lansdown for Mr. Shrigley.

MR. SHARP will shortly erect 30 houses, of three stories, Seventeenth and Jefferson streets.

MR. ROTH will build 6 two-story dwellings on Bailey street below Columbia avenue, 16x45 each.

MR. ROBERTS will also put up 6 brick houses on Broad street, above Susquehnna avenue; they will have brown stone trimmings.

O. C. MOORE is erecting 10 fine brown stone dwellings, with marble trimmings, southeast corner Broad and Norris streets (three stories).

H. R. SHOCH, of Columbia avenue, is building 70 houses on Ringgold and Berks streets (two stories), and will have four corner stores, each having three stories.

J. DOBBINS will shortly erect a row of $15,000 and $20,000 dwellings on Broad street above Montgomery avenue; also, a row of $6,000 houses on Montgomery avenue.

A. P. WELSH, Walnut street, is putting up a store and dwelling, for J. L. Borsch, on Ninth below Chestnut street, of four stories.

Also, a store for Jos. Diering, Chester, Pa.

THE GIRARD TRUST, it is stated, will next year tear down the other half of the block on Market, Girard and Twelfth streets, and erect a similar block to the one being built for Hood, Bonbright & Co.

MR. WEIGHTMAN, of the firm of Powers & Weightman, will erect 18 two-story dwellings, Thirty-ninth and Walnut streets; 6 on the former and 12 on the latter.

Also, building 6 three-story dwellings on Girard above Fifteenth street (of brick).

J. PYLE, 1741 North Twentieth street, has taken up a lot, Nineteenth street, above Montgomery avenue, from Nineteenth to Uber street, and will cut a small street through, on which he will build 13 two-story dwellings on each side; the street will be of a patent pavement.

WILLIS G. HALE, 901 Chestnut street, is erecing a chapel, gateway and lodge for the O. F. Cemetery, Twenty-third and Diamond streets. The lodge is of brick, and two stories; gable roof, with stone trimmings; ponet front and side. The chapel is of Gothic architecture.

Also, putting in stone front, at 1220 Chestnut street, for store, which will be principally of plate glass and Moorish trimming, for Lewis S. Cox & Co.

Also, building large dwelling at Hagerstown, Md., for S. M. Bloom, Esq., of two stories, brick and stone.

Also, 29 houses, Seventeenth and Jefferson streets, and Bouvier street; some detached; of brick, red mortar, peerless moulded brick, and terra cotta panels, with brown stone trimmings and recess doorways. The bath-rooms will be located between houses, over side yard. They will have French roofs, broken up by gable and dormer windows, and will be built by Widner & Elkins.

Camden, N. J., Notes.

MR. WILSON ERNEST is erecting 40 two-story dwellings, between Chestnut and Sycamore streets.

MR. JOHN DOBBINS, of Camden, has presented the Fillmore Street M. E. Church, of that city, with two lots, at Broadway and Van Hook streets, for the erection of a new stone church edifice. A provision is made that the building be dedicated free of debt.

ROBERTS & COHEN, 105 Market street, are putting up 58 two- and three-story dwellings (Front and Penn streets); cost, about $3,000 each.

Also, 34 houses, two and three stories, on Sixth and Pearl streets, at the cost of $3,000 each.

Also, 23 houses, three stories; cost, $6,000 each.

Also, 6 houses, Second and Linden streets; cost, $2,000 each.

Also, 96 houses, Second and Chestnut streets; cost, $1,500 each.

Among the Brickmakers.

William McKay, Long Lane and Moore streets, manufactures pressed, stretcher, paving, hard and salmon brick; they have a capacity of 23,000 per day, and they expect to run full force and make over 4,000,000 bricks this season. They quote pressed brick from $23 to $26; stretcher, $11 to $15; paving, $14 to $15; hard, $9; salmon, $6.50 to $7.

The Peerless Brick Company, 1003 Walnut street, report their largest demand of late years in 1885, but they think that the coming year the demand will be still larger. Their ornamental brick is endorsed by all the Philadelphia architects; their ordinary brick such as pressed sell from $23 to $28; stretcher, $12 to $13; hard, $8.50 to $9; salmon, $6 to $6.50.

D. H. Kent & Co., Fifty-eighth and Haverford street, in 1884 ran 3,000,000 brick, and in 1885 the same. They run six gangs on hand-made brick and calculate to extend their operations. They expect to turn out four million the turning season. They quote pressed brick from $22 to $25; stretcher, from $11 to $13; paving, from $13 to $16; hard, $9; salmon, $6.50.

Robert N. Crawford, Sixtieth and Race, sts., have averaged about 2,000,000 bricks each year since 1880. They are about to double their capacity. They are putting in a Chambers Bros. & Co's. brick-making machine. This machine is the one that was on exhibition at the State Fair. They run one pressed-brick gang and two paving-brick gangs, and have the reputation of making a first-class brick.

Young & Milnamow, Long Lane and Mifflin streets, have averaged 9,000,000 bricks each season since 1880. They have a capacity for 11,000,000 and anticipate making that number during the present season. They consider the building prospects were never better, brighter than at the present time. Thir prices are for pressed brick $23; stretcher, $11 to $15; paving, $12 to $15; hard, $8 so $9; salmon, $5.50 to $6.

J. W. Leigh, Fifty-fourth and Market streets, at their present location, have run entirely out of clay, and are looking for a new field for next season. Their average production since 1880 has been 3,000,000 each season, but when they find a yard they want they calculate to double their former production. They have sufficient brick on hand to keep them busy selling this season. They consider prospects were never more favorable for brickmakers than at the present time. Their quotations at the present time, are pressed brick, $22; stretcher, $10 to $14; paving, $14; hard, $8 to $9; and salmon, $6.

The Equitable Brick Works at Fifty-sixth and Walnut streets, were established in 1884, and in that year made 5,000,000 bricks. In 1885 they made a little over 9,000,000. For the present year they intend to make 18,000 hand-made stretcher a day, 7,000 hand-made pressed brick, and 45,000 hard and salmon brick. They will also make with Chambers Bros. & Co's. brick-making machine, 10,000 machine stretchers daily. They make to order all kinds of angle bricks. They have sufficient contracts ahead to cover all they can produce this season, and that means running to their fullest capacity.

H. C. Carroll & Son, Fifty-eighth and Sixtieth streets and Haverford road, have very extensive brick yards on both sides of Haverford road. The yard on the North side is devoted exclusively to hand-made brick, and on the south side to all machine-made brick. They consider hand-made brick the best. They are running nine gangs on hand-made brick, each gang turning out 3,000,000 a season. They are also running one Chambers Bros. & Co's., machine, which turns out 6,000,000 a season. They made last year one million more brick than they did in 1880. They expect to run their full capacity this season.

A Dotterer, Long Lane and Norris streets, has averaged 13,000,000 bricks yearly since 1880. Last year they sold 13,500,000. They have a capacity of 14,000,000 each season, and they expect to run their full capacity this season. There is no exact uniformity either in hand or machine-made brick, as the clay differs in the baking and glazing. They run thirteen gangs on hand-made bricks, making 5,000,000 per season, and one Chambers Bros. & Co's. machine, making 8,750,000 per season. They claim to make brick equal in every respect to any made in Philadelphia and at as reasonable price as any. The price of pressed brick is $23; stretcher, $11 to $14; hard, $8 to $8.50; $6 to $6.50.

J. & L. E. Garden & Co., Long Lane and Wharton street, have averaged 10,000,000 bricks yearly since 1880. Their actual sales last year doubled themselves since that time. Their present capacity is 14,000,000, and last year they had to buy several million bricks to meet their demand. The quotation for their pressed brick is $22 to $25; stretcher, $11 to $15; hard, $9; salmon, $6. All of their brick are hand made and they consider them more uniform and durable than a machine brick. All the wagons used by this firm have springs, and some of them are double teams to carry 2,000 bricks and the single teams carry 1,000, and they can deliver their brick without breaking. They have a very fine stock of horses and do all their own handling, their wagons being known all over the city and suburbs and are all painted yellow. They claim by these wagons to deliver 1,000 bricks entire and whole for each 1,000 order. This is something that no other brickmaker can claim.

Building Permits.

Four two-story brick houses, 15 ft. by 44 ft., Mulberry, below Margaretta st., to John C. Haines, 4902 Penn st.

Eight two-story brick houses, 13 ft. by 44 ft., Jefferson and Gillingham sts. to same party.

Two two-story houses, 16 ft. by 48 ft., Mitchell st., above Roxborough ave., to Howard B. Yocum, 410 Lyceum ave.

Two three-story houses, 15 ft. by 47 ft., Harvey st. and Germantown ave., to George A. Sorber, Germantown.

One two-story dwelling, 30 ft. by 40 ft., Boyer st. and Gowen ave., to Isaac K. Pierson, Mt. Airy.

One two story dwelling, 35 ft. by 40 ft., Gowen and Stanton aves., to same party.

One two-story dwelling, 16 ft. by 15 ft., Boyer st. and Mt. Airy ave., to same party.

One two-story back building, 10 ft. by 10 ft., 1120 South Eighth st., to John McClellan, 251 South Twenty-first st.

One three-story dwelling, 19 ft. by 46 ft., Terrence and Adams st., to William Eddleman, 480 Green lane.

Two two-story houses, 10 ft. by 32 ft., Queen and Lawrence sts., to George Wood, 4722 Germantown ave.

Six two-story houses, 16 ft. by 43 ft., Twenty-first and Oakford sts., to Henry R. Coulomb, 731 South Tenth st.

Eight two-story houses, 16 ft. by 43 ft., Twenty-second and Manton sts., to same party.

Three two-story houses, 16 ft. by 40 ft., Dickinson and Twentieth st., to M. Kennedy, 626 South Nineteenth st.

Six two-story houses, 16 ft. by 40 ft., Road st., opposite Suffolk Park, to McGowen & Kershaw, Seventy-first and Paschal ave.

One two-story brick house, 10 ft. by 42 ft., Chatham and Somerset sts., to Judge & Snyder, 2814 Edgemont st.

One three-story building, 14 ft. by 59 ft., 746 South Second st., to W. B. McCleary, 1345 Christian st.

One two-story stable, 14 ft. by 14 ft., Twelfth and Lehigh ave., to Bernard Gunn, 2709 North Sixth st.

Eight two-story dwellings and four three-story stores, 14 ft. by 50 ft., Huntingdon, above Ninth st., to M. L. Heist, 712 West Cumberland st.

One two-story stable, 15 ft. by 26 ft., Hutchinson, above Huntingdon st., to same party.

Four three-story houses, 14 ft. by 44 ft., Twenty-seventh, above Jefferson street, to Charles McCaul, 20 North Eleventh st.

Six three-story houses, 14 ft. by 44 ft., Oxford, above Twenty-seventh st., to same party.

One addition, 9 ft. by 40 ft., Meehan, above Eleventh st., to Jacob George, 1528 South Juniper st.

One two-story house, 32 ft. by 36 ft., High st., above Bellfield ave., to B. Meacham, 329 High st.

One three-story house, 16 ft. by 30 ft., Lawrence, above Master st., to Samuel Price, 1222 Otis st.

One three-story house, 17 ft. by 52 ft., Fifteenth, above Dauphin st., to L. K. Slifer, Tenth and York sts.

Three three-story dwellings, 12 ft. by 10 ft., Germantown ave., above Berks st., to James Ritchief, 1935 Germantown ave.

Eight two-story houses, 14 ft. by 41 ft., Franklin, above Lehigh ave., to Horace G. Hersh, 2158 Franklin st.

Six two-story houses, 13 ft. by 50 ft., Bailey, above Oxford street, to Edwin A. Roth, 1638 North Twenty-sixth st.

Griffith & Kiley, No. 3341 Market st., alterations to No. 46 North Front st., 16.6 ft.

J. S. Kelly, No. 512 Lehigh ave., twelve two-story houses on Amber, Cambria and William sts., 17 ft. by 34 ft. and 14 ft. by 25 ft.

J. Stricky, No. 1832 Reed st., nine three-story stores and dwellings, on Kensington ave., near Wensley st., 16 ft. by 44 ft.

C. W. Keander, Sumac st., Wissahickon, three-story carriage house, on Green Lane, near Wabash ave.

A. J. Carty, No. 525 N. Twenty-third st., four two-story houses on Pennock and Twenty-eighth sts., near Poplar, 14 ft. by 54 ft.

J. R. Garber, No. 1211 Spring Garden st., two three-story houses, No. 430 Franklin st., 16 ft. by 64 ft.

L. Casso, No. 738 Carpenter st., three-story house, No. 838 Whitney st., 15 ft. by 34 ft.

H. Hazlett, No. 1935 Columbia ave., alteration to No. 1903 Columbia ave., 18 ft.

Fidelity ImprovementCompany, two-story wall, No. 103 Hudson st., 7 ft.

One two-story back building, 12 ft. by 12 ft., Satori and Federal sts., to John S. Thomas, 225 Levant st.

One three-story store and dwelling, 15 ft. by 60 ft., 2131 Ridge ave., to P. Thompson, 2037 Filbert st.

One three-story back building, 10 ft. by 16 ft., 1605 Parrish st., to E. H. Trenchard, same place.

One three-story house, 15 ft. by 34 ft., 738 Whitney st., to Lewers Lasso, 738 Carpenter st.

Front alteration, 18 ft. front, 1903 Columbia ave., to Hugh Haslett, 1935 Columbia ave.

One brick stable, 20 ft. by 25 ft. Baltimore ave., above Forty-first st., to James A. L. Wilson, 500 South Forty-first st.

Two three-story stores and dwellings, 17 ft. by 13 ft., Germantown ave and Berks st., to William Tecklenburg, 1614 Cadwalader st.

Two two story houses, 12 ft. by 28 ft., Niomy ave. and Spring st., to William A. Brumer, Adams and Duval sts.

Third-story addition, 18 ft. by 37 ft. School Lane and Township Line, to same party.

One three-story house, 29 ft. by 60 ft., High and Hancock sts., to same party.

Addition and alteration, 30 ft. by 34 ft. Walnut lane and Hancock st., to same party.

One three-story dwelling-house, 16 ft. by 43 ft., Queen, above Green st., to John D. Caldwell, Wister st.

One three-story dye-house, 36 ft. by 94 ft., Ninth and South sts., to P. H. Somerset, 1513 North Twelfth st.

Two three-story houses, 15 ft. by 40 ft., Hancock and Centre sts., to John S. Trower, Germantown

Two three-story houses, 16 ft. by 64 ft., 430 and 432 Franklin st., to Jacob R. Garber, 1211 and 1213 Spring Garden st.

Eight two-story houses, 14 ft. by 54 ft., Twenty-eighth and Poplar sts, to Andrew J. Carty, 525 North Twenty-third st.

One three-story building, 18 ft. by 83 ft., Green lane and Wabash ave., to C.W. Keander, Sumac st., Wissahickon.

Nine three-story stores and dwellings, 16 ft. by 45 ft., Kensington ave., above Cornwall st., to Joseph Stickey, 1832 Reed st.

Twelve two-story houses, 14 ft. by 25 ft., Amber and Cambria sts., to John S. Kelly, 512 Lehigh ave.

One-story addition to building, 11 ft. by 24 ft. 132 East Chelten ave., to John G. Schuyler, Germantown.

One four-story back building, 16 ft. by 40 ft. 43 North Second st., to L. Douglass, 1632 Bailey st.

One two-story house, 12 ft. by 22 ft., Dorritt, above Eighteenth st., to James Mole, 1805 Juniata st.

Two two-story brick buildings, 13 ft. by 28 ft., Dorritt, above Eighteenth st., to same party.

One alteration, 20 ft. by 32 ft., 329 North Fourth st., to A. Benner, 3164 Richmond st.

One-story stable, 21 ft. by 60 ft., Chestnut ave. and Main st., to G. S. Roth, East Union ave.

One two-story house, 14 ft. by 24 ft., 1324 Wheat st., to D. H. Koster, 1329 S. Second st.

One three-story brick house, 13 ft by 16 ft., Stewart, above Christian st., to P. J. Reely, 741 Erie st.

One three-story house, 16 ft. by 60 ft., Elm ave., above Forty-first st., to C. E. Wood, 1131 North Forty-first st.

One bath-room, 7 ft. by 8 ft., 1708 North Twenty-second st., to L. A. Richard & Co., 1703 Beechwood st.

New front, 17 ft. front, 108 Pollard st., to C. G. McMullin, 1233 Neelon st.

Three three-story houses, 18 ft. by 60 ft., Christian, above Broad st., to Alexander Armstrong, 1428 Christian st.

One third-story addition, 15 ft. by 22 ft., 3174 Richmond st., to Joseph A. Brown, 3191 Fisher st.

Front alteration, 630 Market st., to C. M. Lane, 619 Commerce st.

Alterations and additions, 18 ft. by 31 ft., 1834 North Twenty-second st., to James L. Branson, 1722 Oxford st.

One two-story store and house, 17 ft. by 41 ft., 2700 Warnock st., to Henry G. Schultz, 3633 Germantown ave.

One three-story store and dwelling, 17 ft. by 54 ft., 2303 North Eighth street, to same party.

Two two-story dwellings, 16 ft. by 38 ft., Paoli und Ridge aves., to Norris Ashworth, same place.

One three-story house, 19 ft. by 61 ft., Coulter, above Knox st., to Thomas W. Draper, 328 North Fifth st.

Two two-story houses, 15 ft. by 30 ft., K st. and Erie ave., to Henry E. Brown, 212 N. Broad st.

One two-story brick house, 16 ft. by 43 ft., Harrison and Franklin sts., to J. S. Sayer, 5031 Tacony st.

Four two-story houses, 17 ft. by 30 ft., Thirty-second and Wharton streets, to Timothy D. Murphy, 1804 Kater st.

One two-story back building, 14 ft. by 15 ft., 6213 Girard avenue, to Shelby & Garton, same place.

One two story house, 17 ft. by 44 ft., Reese st. above Lehigh ave., to Jos. Parker, 2639 Germantown ave.

One two-story back building, 13 ft. by 16 ft., Palmer and Wildey streets, to Jacob S. Cramp, same place.

One two-story stable, 32 ft. by 16 ft., Thirty-second and Arch sts., to J. C. Hancock, same place.

One three-story house, 19 ft. by 65 ft., Thirty-first and Spring Garden sts., to James V. McGarvey, 1931 Vine st.

One two-story back building, 9 ft. by 8 ft., 430 Morris st., to W. R. Hallowell, 205 Williamson st.

Eighteen two-story houses, 16 ft. by 40 ft., Seventeenth and Tasker sts., to Andrew Miller, 1530 Passyunk ave.

One two-story back building, 14 ft. by 15 ft., 1128 Mifflin st., to Michael Wheelan, 1120 Mifflin st.

Two two-story houses, 18 ft. by 42 ft. Second st. and Lehigh ave., to Samuel Baxter, Venango st. and Trenton ave.

One two-story mill, 50 ft. by 30 ft., Ireland and and Hanover sts., to Andrew Hetzell & Son, 205 Richmond st.

Items of News.

—The new City Hall has cost thus far $11,047,201.11.

—The Cape May City Council has decided not to sell the Water Works.

—The bricklayers of Reading took off the boycott on the Reading Electric Light Company, which employs non-union hands on its new building, because the boycott was instituted too late to be effective.

—The Bordeaux Glass Factory Company France, claim to have lost £120,000 by the recent riots, during which the factory was nearly destroyed, and they have asked the government to make good the loss.

—The Pennsylvania Railroad insurance plan for the benefit of employés seems to have been a success, for February 15 to March 31, over $10,000 have been paid out for death benefits, and $1,737.37 for sick benefits.

Obituary.

Ex-Minister to England the Hon. JOHN WELSH died at his residence, corner of Eleventh and Spruce streets, this city, on Saturday morning, after but a few weeks' illness from pneumonia.

Mr. Welsh's life was one of activity and usefulness. He truly represented the best type of American manhood. Whether as the recipient of political preferment or at the head of vast business enterprises, he was always the same level-headed, honest and upright man and citizen. He had been a member of Councils, a Sinking Fund Commissioner for twenty years, retiring in 1877; for several years President of the Board of Trade, and since 1862 a member of the Board of Commissioners of Fairmount Park; a Director of the Manufacturers and Mechanics' Bank and the Philadelphia Bank; President for a short time after its organization of the North Pennsylvania Railroad Company, and a Trustee of the University of Pennsylvania.

In 1864 he was Chairman of the Executive Committee of the great Sanitary Fair which was then opened in Philadelphia. He was President of the Centennial Board of Finances, and worked hard for the success of the Exhibition and the final settlement of its affairs. On October 30th, 1877, Mr. Welsh was appointed by President Hayes as Minister to the Court of St. James; he took the oath of office on November 14th, and filled the position with dignity, honor and credit to himself and country until 1879, when he retired on account of severe domestic affliction. He was tendered a welcome and reception by his fellow-citizens, in Independence Hall, upon his return home.

In March, 1878, the University of Pennsylvania conferred upon Mr. Welsh the honorary degree of Doctor of Laws, and in 1880 he was similarly honored by the Lee University of Virginia.

SAMUEL STEVENSON, who has been suffering from paralysis for some time, died at his residence, 1306 North Twelfth street, on Saturday morning. He was over 80 years of age.

Mr. Stevenson was at one time Commissioner of the District of the Northern Liberties, and afterwards became the representative of the district in the House and the Senate of the State. For three years he represented the Eleventh Ward in Common Council. Mr. Stevenson was one of the largest owners of real estate in the city. He leaves three sons and two daughters.

GEORGE L. ASHMEAD, a retired member of the Philadelphia bar, and an old resident of Germantown, also died on Saturday morning. He was nearly 70 years of age, and had not practiced law for a long time.

—The Board of Highway Supervisors have granted the application of Wilson Welsh to construct a railway siding connecting his mill at No. 3042 Ludlow street with the tracks of the Philadelphia and West Chester Railroad, on Thirty-first street. The City Electrical Department was allowed to lay a trough on the east side of Broad street between Columbia and Lehigh avenues for telegraph wires.

City Councils.

Councils enter upon their existence with an unusually large supply of ordinances and resolutions which were referred to the appropriate committees. Select Councils appointed a special joint committee of ten to examine a new process of manufacturing illuminating gas.

President Gates of the Select Council, says the intercepting sewer will be but a temporary expedient to preserve the purity of the water furnished by the Schuykill river, and that the time is not far distant when that source of supply will be pronounced unfit and inadequate. He advises a thorough examination by the board of experts of plans, to be submitted for the establishment of proper water facilities, which he thinks cannot be secured for less than $15,000,000. He thinks it will be necessary for the city to receive legislative authority to vote upon a proposition to increase the municipal debt for that purpose. He is against the sale of the city's franchises, and holds that contracts with private corporations to supply water are of questionable propriety. He recognizes that the growing demands of the city can be best taken care of by the city itself. He does not think this project of establishing proper water facilities can be accomplished under five years.

President Lawrence of the Common Council, in his speech before that body last week, showed that he had the right grip on questions of public interest. He talked about the deficient water supply, unimproved highways, about gas, education, almshouses and prisons, bridges over the Schuylkill, schools for the training of boys and intercepting sewers. On the subject of highways he said, "It is a serious question whether the present mode of making contracts is the best way to have the work done. In my address to this Chamber one year ago I said: 'I am of opinion that it would be better if we could make our contracts for cleaning the streets in a different manner. If they were made for a period of years, say not less than five, the contractors could afford to procure the best machinery for the purpose, and have the necessary number of horses and carts to remove the dirt. Enough money is appropriated to do the work in a thorough manner, but much complaint is made as to the way in which it is done. It might be well to consider the advisability of the city purchasing the machinery, and to either make contracts to have the work done and allow the use of the plant, or to employ men under the direction of the Highway Department to do it.' I have seen no reason to change these views."

President Lawrence, of Common Councils, calls attention to the fact that the city is in need of increased protection; he favors compensation to policemen and firemen injured in the performance of duty and to their families in the event of death. In regard to the building of a new almshouse, he said: "I regret to say the burnt portion of the Almshouse has not yet been rebuilt. As the money is appropriated, the work will soon be done. Propositions were received for ground to erect a new almshouse upon, but as they were not satisfactory to the committee having the matter in charge no action has been taken. We have about $125,000 available for that purpose, and, as the building is greatly needed, I would suggest that steps be taken as soon as possible to secure the ground and proceed with the erection of the building."

—According to the Boston *Journal of Commerce*, a paint for sheet-iron is made of varnish, one-half gallon; boiled linseed oil, one-half gallon; add red led sufficient to bring to the consistency of common paint. Apply with a brush. Applicable to any kind of iron work exposed to the weather.

In the Courts.

The Clay Commercial Telephone Company has asked in the United States Circuit Court, to have annulled the restraining order issued against it at the suit of the Bell Telephone Company. The Court stated that as the whole case had been heard some time ago and it was about to render a decision adverse to the defendants, it was no use to entertain the present request; thus the Bell Telephone comes out once more in the lead.

On last Monday the Supreme Court decided in the *sci fa.* on a mechanic's claim, whereby defendant pleaded payment without notice. Held, that the plea of payment with notice lets in any equitable defense, but without notice it has only its common law effect, and will not permit the introduction of evidence tending to show that the work was unnecessarily delayed to the injury of defendant.

Another case was decided by the Supreme Court to the effect, that when a judgment entered on a warrant of attorney or by default is opened without terms the plaintiff must prove his case precisely as though no judgment had been entered and defendant can make any defense that he might originally have made; that in such case the statute of limitations is not an unconscionable civil defense.

The Orphans' Court lawyers and judges transact a large amount of business. There are now in that Court 243 estates on the list for audit during the month besides the usual number of cases to be disposed of on the argument and motion lists.

Judge Hare filed an opinion in Court of Common Pleas, No. 2, Wednesday, in which he sustained the City Solicitor in the suit of the city against the Western Union and other telegraph companies. By ordinance, these companies are obliged to pay a license fee of $5 for each telegraph pole, and the city sued to recover these fees. A referee decided that the amount charged was excessive. Judge Hare does not think so. It is not so plainly in excess as to justify the Court in reversing the decision of Councils. He therefore sustains the city, and sends the case back to the referee for reconsideration on this point.

—In the island of Trinidad there is a large lake of pure asphalt. A square yard of this pitch lake is said to be as good as a square mile, for no matter how much asphalt is taken out during the day, the hole is full again the next morning.

—A gum tree, prostrate upon the ground, 400 feet in length, with a hollow in its trunk large enough for four persons abreast to enter on horseback, has been discovered in Australia.

—Philadelphia's immediate necessities for additional facilities for the storage of water will be met probably by the early completion of the Cambria street basin and the East Park reservoir.

Communication.

Won't some of our subscribers send the writer of this letter the list he desires.—Ed.

PHILA., 5th April, 1886.

PHILA. REAL ESTATE CO., 707 Walnut Street.

Gentlemen:

I want to purchase a house in good locality, also first-class order, from nine to eleven rooms, not more than 25 minutes from Eighth and Market, north or west. Price not to exceed $4,000. Please send list of what you have.

Yours very truly,

WILLIAM H. SWAYNE,
2014 Mervine Street. Per H.

GUARANTEE

Trust & Safe Deposit Co.

CAPITAL, - - $1,000,000.

316, 318 and 320 Chestnut Street,

Rents Safes in its Burglar Proof Vaults at $9 per year and upwards.

Also receives for safe keeping valuables of every description, and Deed Boxes at $5 per year.

Executes trusts of every kind, allows interest on deposits of money. Also, acts as Registrar and Transfer Agent of Corporation Stocks.

THOMAS COCHRAN, President,
EDWARD C. KNIGHT, Vice Pres.

OTIS BROTHERS & CO.

MANUFACTURERS OF

PASSENGER and FREIGHT

ELEVATORS,

HYDRAULIC and STEAM.

No. 6 S. MERRICK ST., Philad'a,

OPPOSITE NEW CITY HALL.

Otis Brothers & Co. manufacture the "Standard" Hydraulic Passenger and Freight Elevators; also, all forms of steam, passenger and freight elevators, hoisting machinery for mines, breweries, etc. The record of the Otis Elevator proves them to be unequalled in the world for safety, speed durability and economy.

ESTABLISHED 1852. ANNUAL PRODUCT 20,000 TONS.

PENCOYD IRON WORKS,

A. & P. ROBERTS & CO.,

OFFICE, 261 SOUTH FOURTH STREET,

PHILADELPHIA.

Beams, Channels, Angles, Tees & Merchant Bars.

SPECIAL ATTENTION TO STRUCTURAL IRON and STEEL.

Plans and Estimates for Roof Trusses and Riveted Girders.

Beams furnished from Stock and Cut to Length.

SEND FOR CHART OF SHAPES.

Car and Locomotive Axles, Hammered or Rolled, Iron or Steel.

THE BLATCHLEY

Is carefully made by men who know how to construct a

PUMP

When desired they are lined with specially heavy Porcelain or Copper, or with Drive Well Cylinders, at small additional cost.

When ready to buy, *insist* on seeing and examining them. Use your own judgment, and don't be persuaded to act contrary to your own interests.

They are sold by some good house near you.

Special terms to builders buying in quantities.

CHARLES G. BLATCHLEY,

MANUFACTURER,

308 MARKET ST., Philad'a.

GUARANTEED.

"GILBERTSON'S OLD METHOD."

EXTRA HEAVILY-COATED ROOFING PLATES.

WE guarantee "GILBERTSON'S OLD METHOD" Roofing Plates to contain 36 to 40 pounds of metal coating to a box of IC 20x28, and 18 to 20 pounds to IC 14x20.

To be a better and heavier coated plate than "MF" or "Old Style," and if not found so, all boxes to be held subject to our order.

The manufacturers of the "GILBERTSON'S OLD METHOD" Guaranteed Roofing Plates are now stamping each sheet with the name of the brand and also the thickness, IC or IX.

To Architects and others specifying our "GILBERTSON'S OLD METHOD" or "Camoret" brands of Guaranteed Roofing Plates, we would suggest that the specification be made to read as follows:

"Every sheet to be stamped—not only with the name of the brand, but also with the thickness, IC or IX."

913 ARCH STREET, PHILADELPHIA.

BLANK BOOKS.

Blank Books have always been sold by the quire. Twenty-four sheets make a quire; but the Blank Book Makers have been selling from 12 to 20 sheets for a quire. The Public have been deceived. We shall inaugurate a new system, and sell our Blank Books by the hundred pages. Before doing this we offer our stock at a **REDUCTION OF 10 PER CENT.**

A PERTINENT QUESTION.

Why will you continue to buy Writing Papers by the quire, when you can save so much money by buying by the pound? Come see and be convinced; you can get almost double the quantity for the same money.

A First-class Plated Paper, 25 Cents per Pound.
A Linen Paper, 25 Cents per Pound.

IF YOU WANT

Any article in STATIONERY it will pay you to call and inspect our stock. We can sell at prices that will surprise you. Have the largest, best assortment and cheapest Papers ever offered for sale by anyone. This we will prove if you call.

All Grades of Writing Papers by the Pound.

PLAYING CARDS

From 6 Cents per Pack up.

PROGRESSIVE EUCHRE, in sets or separate parts.
POKER SETS, POKER CHIPS,
EUCHRE and WHIST COUNTERS,
CARD BOXES.

MY extensive facilities and small expenses enable me to compete with any establishment in the United States.

Wood Turning in all its branches. House trimmings, new and riginal designs, a great specialty.

All orders delivered free on board at Jersey City.

Estimates for Philadelphia and vicinity cheerfully given.

Address,

JOHN NESBITT,
Yonkers, N. Y.

Charter Perpetual. **Capital, $500,000.**

THE REAL ESTATE TRUST CO., 321 Chestnut St.

Gives attention to all matters incident to the subject of Real Estate. Collects Rents, and guarantees the same, on special terms. Issues Policies of Title Insurance, affording absolute security to purchasers of Real Estate and Mortgages. Executes Trusts of every description, and becomes surety for the faithful performance of any Trust or office.

PHILADELPHIA, MONDAY, APRIL 19, 1886.

It is very evident that the new Councils Highway Committee have an opinion of their own as to the responsibility of the street railway companies to the city in the matter of repairing the streets occupied by them. It is high time that the question as to whether the railway companies are to exercise a sort of a go-as-you-please prerogative over the streets should be settled. Chief Commissioner McDonald, at the meeting of the Committee on Monday last, favored making a test case by ordering some company to replace cobble-stone with granite block where there is bad paving, and, upon its refusal, having the Highway Department do the work, and then compel the company to pay for it. This is the easiest way to settle the question for all time. If it is to become a question for the Courts, the sooner it is carried there and settled the better it will be for the city. Cobble-stone pavements should become a thing of the past as rapidly as possible. Vulcanite pavement such as we have around the new City Hall would be a grand substitute for cobble-stone on many of our streets where the travel is not too heavy. That we greatly need something better than cobble-stone is conceded even by the railway companies. We believe that all corporations receiving franchises from the city should be held up strictly to the full meaning of the law, and the new Councils Highway Committee will receive the thanks of our citizens if it will only maintain sufficient backbone to enforce the law.

There is no doubt but that the possibilities of an extension of the railway strike in the South-west to the States east of the Mississippi, are having more or less ill effects on trade. A great deal of merchandise awaits shipment in this and other eastern cities. The whole business community is made to suffer because Mr. Gould is unwilling to restore harmony through the mediumship of the Knights of Labor. His management has, no doubt, been oppressive and unjust to his employés and his refusal to adjust the wrongs perpetrated, whatever they may be, will only go to aggravate and lay up trouble to break out at some future day. Employers generally have yielded to the reasonable demands of labor; have recognized their organization and have conferred with its leaders, have listened to grievances and have removed all just causes of complaint. The employers of the country have done this as a matter of justness and fairness. Why should not Mr. Gould do the same? Has he any more rights than others? Public opinion, while not countenancing strikes, has been all along with the strikers. The business of the country is being hindered and hurt by this strike. What the business men want is a restoration of confidence, a full resumption of business activity, an end put to all strikes and striking. The public are convinced that a little wisdom and a little conciliation on the part of Mr. Gould will bring about this result.

During the past year or two no less than a half dozen large manufacturing establishments have left the city and located elsewhere for economic reasons. Thos. L. Leedom & Co. have started at Bristol. Two or three shoe manufacturing concerns and two or three iron firms have gone elsewhere. There is some talk that more firms will follow in their footsteps. One of their reasons for so doing is the interference of labor organizations. Another is that in a city like this wage workers move about from one mill to another in a vain effort to find more easy or more satisfactory work. As a whole, we are gaining. Capital is being attracted to Philadelphia, for its many advantages. Within a few days several important purchases have been made of plots of ground upon which to erect manufacturing establishments. It would have been well had the buyers bought twelve months ago. They have paid according to the prices then held for some of these properties at least one-fourth more. Manufacturers who imagine they have all the land and all the capacity they want would do well to make a note of this fact. There are plenty of opportunities to buy land now at fair prices. If they wait until next year, they may be obliged to pay more. On the other hand, it may be said that a reaction may set in, and that land in and out of the city may be cheaper. This is a narrow and unsafe view. The safer way is to look five or ten years ahead. Philadelphia is bound to expand as a manufacturing centre. It has advantages which competitors cannot take away. Land, and plenty of it, has advanced ten times in price within ten years. This is no exaggeration. That is to say, it has advanced ten times to the ultimate buyer. It is not straining the point too much to say that there is plenty of land in and around the city that in five or ten years will sell for five or ten times as much as it would bring to-day. Any real estate broker knows this to be a fact. There are instances within the knowledge of every broker in this city where land and lots and properties have advanced enormously. What has been done may be and will be done again.

Isn't it high time that the brick sidewalk, that venerable heirloom of defunct fogyism, was doomed to become a thing of the past. Brick, as a pavement for pedestrians to walk upon, is the merest apology for a pavement and should be prohibited for evermore by Councilmanic edict. New York, more than thirty years ago, prohibited the renewal of brick sidewalks. Property owners "kicked," and "kicked" hard against the law at first, but the change was such a good one, and the decided superiority of the blue flag stone as a pavement over bricks was so apparent and the lasting qualities of stone were so much greater than brick, that opposition rapidly disappeared. If bricks could be made to possess equal hardness throughout, they would be very much better for such purposes, but as they are now made they soon become worn and a single brick will cause more falls and serious injuries in one hour than all the flagstones or patent pavements in a whole season. The hard granite slabs which are the attractive features of Chestnut Street on a slippery day should not be allowed either. Exposure to the atmosphere makes granite as hard as iron and it soon becomes even more slippery than ice itself, corrugation does very little if any good.

Builders, as a rule, already understand that the ways of country villages must be discarded, as they will no longer answer for growing, progressive Philadelphia. Consequently there is not much to complain of in the newly built up sections of the city, but why property owners in the old sections should be permitted to renew these mantraps which should have been abolished twenty years ago is more than the unlucky pedestrian can comprehend. The tittley-benders, always quite plenty in the spring of the year, are the most insufferable nuisances known to a long suffering public; they are more treacherous, if not as dangerous as quicksand, and if there be anything more calculated to raise the ire of a mild-mannered, well-meaning young man than to have a tittleybender squirt the filthy liquid ooze underlylng it, up his trouser's leg on a Sunday morning we don't know it.

REAL ESTATE.

Charters Granted.

Charters were issued at the State Department, on Thursday, as follows: Centennial Building Association, of Philadelphia; capital, $1,000,000. Tionesta Gas Company, of Forest county; capital, $50,000; to supply gas to Clarion, Forest, Warren and Venango counties. The Edison Electric Illuminating Company, of Altoona, with $40,000 capital.

Money Transferred by the Gas Trust.

The Gas Trustees transferred to the City Treasurer a check for $102,317.06 and $607,850 in bonds due the city by the Gas Trust.

On the 1st of March the Gas Trust made a transfer of $534,761.03, so that the total amount received by the city so far is $1,244,-928.09. There is still in the hands of the Trust $389,900 in city loans, par value, which will be purchased by the Sinking Fund Commissioners at their market price. The proceeds of the sale, which will be considerably over $400,000, will then be handed over to the City Treasurer, and the total amount, between $1,650,000 and $1,700,000, will be the sum available for the improvements mapped out by Councils. As appropriations of $2,-035,000 were made on the supposition that the surplus would be at least $2,000,000, a considerable scaling down will be necessary.

New Church for West Philadelphia.

The Reformed Episcopal Church bought on last Monday a lot of ground, 175 ft. by 220 ft., on the N. E. corner of Forty-third and Chestnut streets, for the sum of $60,000. There will be built during the Summer and Fall a cluster of buildings, which will not only adorn this section of West Philadelphia, but greatly increase the efficiency and influence of the Reformed Episcopal Church.

A church edifice, with chapel and Sunday-school rooms, will be erected on the Chestnut street front, while a spacious and well-appointed building, corresponding in architecture, will be erected on Forty-third street extending to Ludlow street. The latter will become the theological institution of the Reformed Episcopal Church.

About Fire Escapes.

The Board of Fire Escapes met and a letter was received from City Solicitor Warwick, which said:

"I enclose you a list of hotels which have not complied with the law requiring such buildings to be provided with ropes and pulleys, which Mr. Worrell, of counsel to the Law and Ordinance Committee, handed to me, with the request that I proceed against owners immediately. Will you not give them, say ten days' notice of what the law requires, and at the expiration of that time report to me all who are still acting in violation of the law?"

The following is a list of hotels accompanying the letter: Continental, Wissahickon Inn, Girard House, Lafayette, Colonnade, Washington, St. George, West End, Irving House, Central Avenue, Commercial; Arch Street House, Eagle, Merchants', St. Charles', St. Elmo, St. James', Smedley, Vendome, Bald Eagle, Bergin House, Bound Brook House, Dooner's Mansion.

The Iron Trade.

The iron manufacturers, of Philadelphia and of Pennsylvania, have profited considerably by the building activity of last year, and are doing better this year on account of the activity in the building trades. The more house building the more iron is wanted. The more railroad building the more iron is wanted. Our city mills and the mills near by have been running full time but have not been able to accumulate orders to that extent which would allow them to advance prices. Orders come in rather sluggishly. The pig iron production throughout the country is now 105,000 tons per week, or 30,000 tons per week more than a year ago. This is an indication of the progress we are making. All mills are busy, and inquiries are coming in for all kinds of material for every possible use to which iron or steel can be put. Hardware and tools are also in good demand, and the establishments engaged in supplying the Philadelphia trade are running full time.

City Councils.

The Mayor has vetoed the bill making appropriations from the surplus of gas loan, No. 9, but no action has been taken upon it.

The City Solicitor has been asked for an opinion as to whether it would be practicable under the law to compel the passenger railway companies that may use the proposed new bridge at the Schuylkill at Market street to reduce the fares to five cents. Also as to what proportion of the expense of maintenance and repairs of the bridge the company should be liable for. The companies will, no doubt, use the bridge and charge six cent fares and refuse to pay a cent for repairs, just as they refuse to pay a cent for their share of the pavement around City Hall. The insolence of this Traction Company is almost unendurable. They sneak franchises through the Legislature, they agree to charge five cent fares, but charge six, they accept their franchises under conditions, which obligate them to pave certain portions of paving, grading and repairing, and then fight the matter in and out of courts and up and down the departments and tussle and pull and worry in order to avoid their just obligation. If these people were dealt with as they deserve the city of Philadelphia would own the Traction Company's property within ninety days.

A resolution was presented in Common Councils to compel the passenger railway companies using Ninth street, between Chestnut and Market, to pave, or to pay for the paving of that street with Belgian blocks. Now let us see what the companies will do about it; and then when they refuse to pave or to pay let us see what the city will do about it. This is to be a test case. It will likely go like all test cases.

Mayor Smith has signed the ordinance permitting the Union Passenger Railway Company to extend its tracks in the north-western part of the city without reducing its fare to five cents. It is to be regretted that we have not in this city a small sized edition of Grant or of Bismarck to take hold of our city's interests and exact a little fair dealing. The people are looking on quietly and saying nothing, but feel a burning indignation that their interests should be so ignored and that a corporation should be quietly permitted to ride rough shod over them.

Chief Engineer Ogden submitted an estimate to the Councils Committee on Water Works that during 1885 there were pumped into the reservoir 25,165,020,072 gallons. The department expenditures for the same time were, exclusive of pipe laying, $410,295.34. He computes the cost of supplying the water at 1.63 per 1,000 gallons. If to this was added the interest on the plant, the cost would be increased 3.58 cents, making the total, including 6 per cent. interest on the estimated value of works and pipe, 5.21 cents per 1,000 gallons.

The question as to how the cost of paving should be divided between the city and the street car companies ought to be removed from the ground of doubt where it has remained so long. The new Councils Highway Committee has very properly taken hold of this question, but at its first meeting failed to come to any satisfactory conclusion. City Solicitor Warwick furnished the opinion, as before noted, to the effect that the street railway companies can be legally compelled to replace the cobble stones on the streets occupied by them with improved pavements. Councilman Meehan, of the Twenty second Ward, offered a resolution authorizing the Chief Commissioner of Highways "to notify any railway company or companies that may pass over a square or squares where granite blocks in place of cobble-stones would be especially necessary to forthwith repair accordingly." Sooner or later the Courts will be called upon to decide the nature of the relations existing between the city and the street car companies. Councilman Grim was in favor of introducing an ordinance defining the obligations on street car companies, but Chief Commissioner McDonald thought the better way to get at the matter would be to notify some company to put down granite blocks where there is bad paving, and if it refuses for the Highway Department to do the work and undertake to force the company to pay the bill. The chairman of the Council Committee and the City Solicitor have been talking the matter over and some plan will be agreed upon to test the matter.

The Board of Health was invited to attend the meeting of the Finance Committee on Friday evening in order to confer with them in reference to an appropriation for the payment of inspectors of plumbing and drainage.

Items of News.

—The personal estate of the late Elizabeth Swift is appraised at $25,887.37.

—Have you seen the comet? It can be found about 2 A. M. in the northeast.

—The Continental Building and Loan Association, capital $1,000,000, was chartered on the 15th inst.

—Tatlow Jackson, Esq., real estate agent, 520 Walnut street, visited Bradford's Exchange on Monday last.

—The Congressional Committee on Coinage has had under consideration bills for the redemption of the Trade Dollar.

—A new culvert is to be built in the Eighth Ward, Camden, in place of the one recently destroyed by the heavy rain.

—The early closing movement is taking quite a deep root among Philadelphia business houses. It is, no doubt, a good thing.

—It is gratifying to note that 2,300 men are now engaged at the Baldwin Locomotive Works, turning out 13 locomotives per week.

—The will of William Green has been admitted to probate. It contains a bequest of $1,000 to Trinity Lutheran Church, Germantown.

—S. A. G. writes to the *Daily Record* to call attention to the terrible condition of some of the streets in the neighborhood of Twenty-eighth and Columbia avenue.

—William A. French, of the firm of Sam'l W. French & Co., dealers in building materials, Callowhill street and York road, died on Sunday night at his residence near Camden.

—The May's Landing *Journal* says the 3d of May is the day set for the hearing and determining the constitutionality of the railroad tax cases by the Court of Errors and Appeals at Trenton, N. J.

—Councils' Committee on City Property, on Wednesday, voted to report favorably to Councils an ordinance for the erection of a permanent bath-house at Twenty-seventh and Master streets.

—The three thousand brickmakers of Philadelphia will form six local assemblies of the Knights of Labor, and will form a central conference committee of thirty, to represent the interests of all.

—The House Committee on Territories on Monday agreed to report favorably a bill to provide for the organization of the Indian Territory and the public land strip into the Territory of Oklahoma.

—The Mount Holly, New Jersey, Board of Trade is about to erect a building at a cost of $5,000 for the accommodation of a Philadelphia manufacturer who has promised to move his plant to Mount Holly.

—The Public Building Commission held a meeting on April 9th. The President, the Architect and the Superintendent were directed to make arrangements for selecting the site of the Hancock Monument.

—The number of telephones now in the United States is 325,574, while in Great Britain there are only 13,000, In other words there are over twenty-five telephones in the United States for every one in England.

—The Broadway Arcade bill (the underground rapid transit four-track scheme, and which may use electricity or other motive power that is not attended by smoke and cinders) has passed the New York Senate—29 to 2.

—Representative Charles O'Neill's bill before Congress to grant to the Kensington and Tacony Railroad Company the right of way through the grounds of the Arsenal, at Bridesburg, was ordered to be favorably reported.

—A number of contractors for digging cellars have decided to compel owners of carts which now hold seventeen cubic feet to raise the sides of the carts three inches, so that the capacity of the carts will be increased to twenty cubic feet.

—The Brickmakers' Protective Association have decided not to fix a scale of wages at present. As there are about 3,000 brickyard employés, it was decided that each section should be formed into a distinct Assembly of the Knights of Labor.

—There has been a reduction of 267 in the clerical force of the Treasury Department under the present administration, resulting in an annual saving of $232,600. The vacancies thus made are all in the classified service, and will not be filled.

—The executors of Lewis A. Audenreid have issued execution against George A. Audenreid upon a bond for $15,000, dated Oct. 1, 1872, upon which there is alleged to be due a balance of $4,754.70. The Cisco Land, Coal, Manufacturing and Live Stock Company was summoned as garnishee.

—The glass makers of Belgium have increased the price of window glass one crown ($1.20) per 300 feet. The advance is general, and is necessitated by the enormous extra outlays needed to restore or repair the glass works destroyed or injured in all parts of the country during the recent strike.

—The City Solicitor, having decided that the city could not supply the Zoological Gardens with water at a less figure than the actual cost, Chief Engineer Ogden submitted a statement showing that this is 8 46-100 cents per 1,000 gallons, of which 6 83-100 cents is interest on a $15,000,000 investment.

—The following were elected Directors of the new Produce National Bank, on Saturday: W. C. Houston, Jr., J. W. Supplee, William E. Burk, H. L. Withers, Edward Roberts, J. W. Brown, John J. MacDonald, T. J. Hellings, W. J. Latta, P. J. Walsh, E. Coon, F. W. Zoller and Charles W. Wilkinson.

—On Tuesday last the Health Board received communication from Councilman Bardsley requesting that the appointment of house-drainage inspectors under the new law be deferred until after the conference of the Board with the Finance Committee on Monday night. The communication was referred.

—The citizens of Gloucester City have started a movement to induce the settlement of new manufacturers there. A number of property owners will donate sites. It has been decided to advertise the advantages of the place in the New York and Philadelphia papers.

—The water mains on Richmond street, of which so many complaints come, were laid 30 years ago, and were only six inches in diameter. A 12-inch main is to be laid. A 16 or 18-inch one would be better. There is no economy in putting down small mains. Here the demand for water is steadily increasing.

—A committee of the Board of Managers of the Consolidated Petroleum and Stock Exchange, of New York, met and discussed a proposition for the erection of a new building. No decision was reached, but the majority of those present expressed themselves in favor of securing a suitable site and building as speedily as possible, at a cost not to exceed $3,000,000.

—The Guarantee Trust Company, as trustee for the bondholders of the ill-starred Philadelphia and Chester County Railroad Company, yesterday issued a writ of foreign attachment against Geo. B. Roberts as garnishee of Hiram D. Falkner, of New York. Mr. Falkner accepted drafts for about $15,000 drawn against him by the contractor for the construction of the railroad.

—A joint meeting of the Committees on Heating and Ventilating, Electricity and Elevators, of the Public Building Commission was held on Thursday, at which bids for four new boilers were opened. The lowest bidder was Robert Wetherill & Co., of Chester, at $3,700. The matter was referred to the Committee on Heating and Ventilating with power to award the contract.

—A decree was entered in the United States Circuit Court on Monday in the suit of the American Bell Telephone Company against the Clay Commercial Telephone Company. The latter corporation is enjoined from infringing upon the Bell Company's patent, and nominal damages are awarded in the sum of $1. It is understood an appeal will be taken to the Supreme Court.

—At a meeting of the stockholders of Swarthmore College, held at the Friends' meeting-house, Fifteenth and Race streets, Wednesday afternoon, it was decided to give the necessary three months' notice of the sale of the one-third interest of the college in the building adjoining Green's restaurant, on Chestnut street, which was given to the college by Mr. I. V. Williamson.

—The Baldwin Locomotive Works objects to paying $3,735 water tax. The bill last year was only $2,466. Perhaps water is like gas, the less one uses the higher the bill Chief Ogden has the matter under investigation, but his investigation, like all others of that character, will end where it began, and Mr. Parry, who represented the works, may be glad the bill was not $7,470. It would be well if there was some system in estimating the cost of water to our manufacturers.

—The Supreme Court decided the city's suit against Alcorn to recover an assessment upon the defendant's property to pay for a proportionate share of its paving of the middle of Broad street south of Federal. It was held by the Court that it was such a local improvement and original paving as could be made at the expense of the property owners immediately benefited, and that the city, therefore, was entitled to a judgment in its favor.

—The Supreme Court, on Monday, decided that the State theatrical tax of $500 must be paid annually. The cases were carried up from Common Pleas No. 3, on an appeal made by the theatrical managers of this city who claimed that the State license was a continuous one from year to year requiring but a single payment of $500. The Court also decided that the payment of a fine for a violation of the law is no legal bar to the right of the Treasurer to collect the license fees.

—The Supreme Court of the United States on April 12th, in case No. 143—the State of New Jersey, Robert Given and others, prosecutors, plaintiffs in error, vs. Henry Wright, Collector of Taxes in the township of Shamong, Burlington county, in error to the Supreme Court of the State of New Jersey—affirmed the judgment of the lower Court, holding that the lands within the limits of the Indian Reservation were not exempt from taxation. Justice Bradley delivered the opinion of the Court.

—The strike among carters working in the excavation at the northeast corner of Broad and Vine streets, for the foundation of the new Catholic High School, came to an end on Wednesday morning, and during the day about 60 carts, all bearing the brand of the Carters' Protective Union, were at work. A member of the union, who had charge of one of the carts, said that the men had been advised by officers of the body to resume work at 60 cents per load, as that figure seemed to have been fixed upon by representatives of the union.

—The Master Builders' Association held a meeting last Wednesday at Pittsburg. The President was instructed to appoint a committee of five to meet with a similar committee of journeymen carpenters, the latter having notified the association that the ruling wages are not considered sufficient nor uniform. It is probable that the question of hours will also be brought up. The position of contractors toward architects was discussed, and a general kick made against changes that are usually made in the architects' plans at the expense of the carpenters.

—The Fire Commissioners of New York transmitted to the Surperintendent of the Building Bureau a communication recommending that all edifices used for theatrical purposes should be provided with fire escapes leading from each gallery to the street, where the present means of exit is only by a flight of stairs. The Board, it is said, is disposed to act at once on the suggestion, but the theatre people say it will put them to an unnecessary expense, and allege that with few exceptions the New York theatres ars as fireproof now as human ingenuity and a liberal expenditure of money can make them.

—Within a few days two meetings of the Western Nailmakers have taken place, one at Wheeling and one at Pittsburgh. A settlement of the strike was not reached. Nails are likely to advance. Quotations today are $2.25 to $2.50. Builders have all along declined to place their orders for the summer. As matters now stand, nails will be higher in the summer than they are today. This, however, depends upon the continuance of the strike. It has lasted ten months. When it began the employers did not expect it to last ten days and smiled when they were told it would last ten weeks. The difference is to the acceptance of a 17 cent basis or a 21 cent basis. The strikers are well supported. If there is no resumption at an early day it would be well for those who need large supplies of nails to look into the matter.

Landlord and Tenant Case.

Judge Biddle allowed a non-suit last week in a landlord and tenant case. A Magistrate decided in favor of the plaintiff, awarding him a judgment of $100 for three months' rent of a house. The rent of the house was $400 per year, payable in monthly instalments of $33.34. Multiplying this by three gave $100.02, and, as this was two cents above $100, the limit of a Magistrate's jurisdiction, the Judge reversed the decision by entering a non-suit.

Report of Massachusetts Drainage Commission.

—The Massachusetts Drainage Commission, appointed some two years ago, has recently issued an official report, of 243 pages, which our Philadelphia sanitary authorities might read with much interest and profit. The details as to what has been done in Massachusetts would not possess sufficient interest here to justify a reproduction of the details, but we will quote just one paragraph for the benefit of those who are doing a good deal of talking on the subject of municipal drainage.

The general results of the Commission's investigations may be briefly summarized as follows :

1. Unless where access to tide-water can be given in an unobjectionable manner, the sewage must be purified before it enters any stream.

2. Purification by chemical means would not be complete, and would cost too much.

3. Broad irrigation, when properly controlled, secures a perfect effluent and an agricultural advantage, but it would take too much land and would involve the undertaking of farming operations by municipalities. If not always properly regulated, it might result in the discharge of crude sewage over the surface into the stream.

4. Intermittent filtration is not subject to these disadvantages, it may be supplemented by irrigation to any desired extent, and its result is perfectly satisfactory.

5. However, to make assurance doubly sure, to avoid an infraction of the statute requiring sewage to be kept out of streams used as sources of domestic supply, and to see that no unrecognized and unsuspected "virulent poison from a previous sewage pollution" shall enter the water-supply rivers, even intermittent filtration areas must, wherever possible, be moved over beyond the edges of the water-shed and made to drain into some stream not now under the ban of the statute.

6. As the protected water-shed is so large, as the towns are so thick and growing so fast, it is not wise to attempt the purification of their effluent near at hand. So far as possible their sewage should flow into trunk lines and be carried to remote points, as to the Saugus Plain.

7. As the sewage will have to be carried through a costly main sewer, pumped at its point of destination and filtered through earth, everything except sewage must be kept out of it. The luxury of treating other waters would be too expensive.

As our State Board of Health will hold a convention in this city on May 12th, the publication of these results may not be amiss.

—The committee on real estate and leases of the Fire Commision, has two proposals from W. H. Vankirk and Matthew Doyle relative to the construction and alteration of houses for engine purposes.

—A mortgage of $3,000,000 upon the Savannah, Dublin and Western Short-Line Railroad of Georgia has just been executed. A number of Philadelphia capitalists are interested in the enterprise, and A. B. Linderman, of this city, is the President of the company. It is expected that the line will be completed by October 1.

Gossip of the Week.

Forty-seven gas and ninety-two gasoline lamps are to be erected in the Twenty-third Ward.

Six suspicious fires occurred, on Saturday, at 2351 Lawrence street. The matter is being investigated.

It is rumored that John F. Betz, the brewer, has purchased the Club Theatre, on Vine street, below Eighth, for $38,000.

Mr. William B. Jones will erect twenty-four Queen Anne houses north and south of Harrison st. and between Penn and Leiper sts.

The six-arch bridge in Frankford needs fixing. A bridge is to be erected this summer over the Pennypack Creek, in Holmesburg.

The right of way will be granted to the Schuylkill River East Side Railway Company through the arsenal and naval asylum grounds.

Among the hard-worked railroad men who are about leaving for a European tour is Mr. Frank Thomson of the Pennsylvania Railroad Company.

The Haines street school building at Germantown has been leased by the Board of Education, and will be used as a school building for colored children.

Nearly $2,000 has been subscribed for the new medical college to be built on N. Broad street, under the auspices of the Women's Hospital Association.

The Shiffler Hose House, on Moyamensing avenue, below Dickinson street, will be converted into a station house. Mayor Smith and Inspector Fell looked at it on Thursday.

Lebanon, Pa., is to have a new silk mill; it is envious of the silk towns farther up the State. A New York silk firm have been to Lebanon, and are pleased with the inducements offered.

Jefferson Square, in the second ward, is to be improved by the building of a granite coping, running a path fifteen feet wide through the centre, in both directions. The present iron railing will be removed.

A new church on Seventeenth street below Race was opened on Sunday. It is Gothic in structure, built in brown stone, running up to a gable, with finyal towers. The interior is finished with light woods; the sixteen windows are of stained glass. The work was begun last Monday.

John F. Betz & Son have built one of the finest residences ever erected in Montgomery county; it is finished throughout in hard wood; it will have a tower 60 feet high, from which Norristown is visible. They are also building a large brown stone structure, to accommodate imported stock.

Hamilton Disston and a few friends have purchased a large tract of land, in the Twenty-third Ward, belonging to the Baldwin estate, on which to erect a new town on the Tacony model. Thirty acres will immediately be cut up in building lots, and a handsome park will be laid out.

The old Williamson House, near West town school, Chester county, has been torn down. It has enjoyed the reputation of having been General Washington's headquarters for a few days in times long gone by. Buddensik's great-grandfather did not build it, as it was necessary to use dynamite to blow the walls down.

Kister & Orem, builders, are about to erect a substantial five-story business structure on the lot at 20 N. Seventh street, 30 ft. front by 60 ft. deep. The building will be of brick, with granite and brown stone trimmings, and will be an ornament to that part of the street, and a hint to owners of other properties in that neghborhood to go and do likewise. The lot belongs to the University of Pennsylvania.

BUILDERS' ITEMS.

Among the Builders and Real Estate Agents.

ADAMS & BAKER, 707 Walnut street:—There is a much larger demand for out of town real estate than usual; people are looking for homes more than ever. Property in the central part of the city is very firmly held, while that on the outskirts is a little harder to get rid of. They represent the owner of a tract of land, about 19 acres, at Clifton, Pa. They propose to make improvements, and advance the value of the property, generally laying it out in building lots, etc. They have no vacancies on their rental list. There is a large and increasing demand for rents, especially for those centrally located. Prices are held so firmly that they consider there is no profit for the builder or contractor in buying city lots.

C. B. TRUITT, JR., 418 Walnut street:—Has a number of transfers and sales on hand, but not sufficiently matured to speak about. Things seem a little slow, but that is probably owing to the recent bad weather. Consider the prospects very good providing the weather holds fine.

J. A. DECKER, 3503 Lancaster avenue:—Is changing a church at Race and Albion streets into two dwellings and a large stable. Owing to the backwardness of the weather operations are not sufficiently matured to report.

F. H. MCCANN, 3511 Lancaster avenue:—Have more vacant houses on their rental list than at this time last year, owing to the fact that so many new houses have been erected in this section of the city, and people that have lived in a house for years, as soon as they can get a new house, they are crazy to get it, and in many cases are willing to pay more rent.

J. H. GOLDBECK, 4217 Lancaster avenue:—Out of their rental list, which runs into the hundreds, they have only seven houses and are having daily inquiry for these. Have lately sold six houses on Lancaster avenue, two on Forty-second street, and three on Markoe street.

ONE of the handsomest offices that your correspondent has been been into lately is the new office of Coleman & Co., at 703 Walnut street. The main office is covered with a very neat pattern of oilcloth, the furniture in neatness compares well with the floor, the walls are prettily papered, and the office generally has few equals. The private office is carpeted with handsome Brussels, the furniture is of fine make, the office is light and pleasant, and has every requisite for a first-class office. This firm make a specialty of exchanging sea-shore and country properties, and the placing of money on bonds, mortgages, etc. They are full of business, and consider prospects were never better, and look forward to considerable activity in country-seats and sea-shore properties. They have recently exchanged a furnished cottage at Cape May Point, valued at $5,000, for a furnished country-seat at Burlington, N. J. They have also exchanged the hotel Alaire, at Cape May, containing 40 rooms and valued at $13,000, for six brick houses in Camden, N. J. Also, 12 brick houses in Camden for a farm near Salem; a farm near Cape May for a house in Camden, first mortgage and cash; three houses in Philadelphia, subject to mortgages, for clear ground in Beverly, N. J.; four houses in Philadelphia for a furnished cottage and lot at Ocean Beach, N. J.; eighteen brick houses in Camden, subject to mortgage, for improved and unimproved properties, clear. Have rented two cottages opposite the Stockton Hotel, Cape May, and two at Atlantic City. They are daily receiving inquiries for cottages at Cape May, Atlantic City, and other watering-places.

WILLIAM HOWELL, the wall paper manufacturer, contemplates erecting fifty houses on Aspen street, between Thirty-eighth and Thirty-ninth streets. This was formerly the old quarry. The prospects for real estate are very good for the coming season. They have made considerable good sales lately, one being a house at 3924 Wallace street, a lot at Thirty-ninth below Baring street, another house at 4923 Girard avenue, and several others, and have more under negotiation.

William Howell has just completed the erection of sixteen houses on Girard avenue, west of Fifty-first street.

WILLIAM MATTICK, 3878 Lancaster avenue:—Real estate seems to be about stationary; it is neither going up or down, either in price or demand. Their rental list, consisting of about two hundred houses, has only one vacant. The demand for small houses is very large.

Mr. M. will shortly erect twelve houses on Market street, between Forty-eighth and Fort-ninth streets. These will be small brick houses, and will rent for about $14 per month. Prospects are good for the coming season.

C. F. HALL, 3944 Lancaster avenue:—Rents are very active; very few vacancies in old houses. Will erect several houses in West Philadelphia the present season.

J. M. PULLINGER, 3955 Lancaster avenue:—Out of several hundred houses on the rental list they have only two vacant. During the winter they had more empty houses than ever, but they have all been taken up, and the demand now far exceeds the supply. There is also considerable demand for fine properties at this office, more than they can fill. The sales of properties are fairly satisfactory, though they might be some better.

FRANK H. VOGDES, 3959 Lancaster avenue:—Has just built a one-story brick office for Mr. Little, on Fortieth street; it is to be occupied by J. Wesley Thomas, a member of the Legislature, as a real estate office.

DENT & KERN, 3959 Lancaster avenue:—Out of their large rental list they have only eleven vacant houses, and these are being taken up daily.

JAMES H. WINDRIM is building a house for H. La Barre Jayne, Esq., Forty-second street and Baltimore avenue.

CULVER & ROGERS:—Building stone school-house, 40x55, at Denver, Pa. They are also preparing plan for hotel to be erected within 35 minutes' ride from the city. It will command a 40 miles' view. The cost of the building, which will be three stories, is estimated at $60,000.

BENJAMIN LINFOOT is building an extensive dwelling for George L. Crawford, Esq., at Marion. It will be after the English style, with stable and coach-house attached, at the cost of $25,000.

ROBERT CAMMERER, 603 Walnut street, has just completed plans for a row of houses, of brick, in the Philadelphia style, of two stories, for Edward F. Lamb, Esq., President of the Wendling Cattle Land Company, Denver, Colorado, to cost $1,800 each.

CHARLES M. BURNS, JR., 717 Walnut street:—Building large dwelling, at Doylestown, for J. M. Shelenberger. Also, Church of Ascension, Broad below South street. Also, preparing drawings for church at Keesport, Pa.

HANCOCK & LEVICK, Fortieth and Lancaster avenue:—Contemplate erecting several houses this season in West Philadelphia; they expect considerable activity after the first of May. They will open an office at 717 Walnut street about the first of next month.

NICHOLSON & ERICKSON, 3949 Lancaster avenue and 623 Walnut street:—Sales for the week ending April 14th. Nos. 3904, 3906 and 3916 Brown street, at $4,300 each. Nos. 4124–4130 Parrish street, at $3,600 each. No. 507 North Forty-first street, at $3,500. No. 826 Preston street, at $4,500. There is a good inquiry for houses for investment. Idle houses one-third less than this time one year ago.

FRIEL & SIMPSON, 1300 South Nineteenth street:—Have a rental list on nearly two hundred houses, out of which number they have four vacant. They are pushing on towards completion their sixty-four houses on Moore, Hick and Tasker streets. They have altogether under construction 126 houses in this section of the city.

ROBERT S. GALBRAITH, 1942 Reed street:—Has just completed a house on Twentieth street valued at $3,000; also on Bateman street at $1,400, and has just started another on Bateman street. Has control of several rows of houses, but has not a vacant house on his rental list, houses are in great demand and stores more so. Sales are brisk. Sold the house 2028 Reed street for $2,100. Ground is very scarce north of Tasker street. Builders who have now extensive operations under way are looking for more later in the season, and many have already engaged ground, a number of operators have had to stop work on account of shortness of brick, the old brick having run out they are compelled to wait for new. Houses in this section of the city will bring higher prices than they did last year.

L. E. PFEIFFER & Co., 1251 Long Lane:—This section of the city from Broad street to the Schuylkill and from Federal street to the Neck is being thickly built up what was a barren waste will shortly become, as it were, a pretty city. The houses that are being put up are two-stories, beautifully fitted up with all modern improvements, containing five, six and eight rooms. The character of improvements are beautifully decorated ceilings, gold paper, and the papering done in the highest style of the art, handsome chandeliers, hot and cold water bath and, in fact, every requisite to make a first-class house. Any man with moderate means can own or occupy these houses. The builders have displayed wonderful wisdom in choosing this section for the erection of these houses, as their are so many manufactories, gas works, oil refineries, &c. They will be a class of prompt-paying tenants from the above fact, therefore making this class of houses an excellent paying investment for the capitalist, making an eight to fifteen per cent. investment. Quite a number of capitalists who have only been getting four per cent. for their money have been making investments here and are greatly pleased with the same. Real estate seems to have an upward tendency. The season has but just opened, but the indications are that it will be a very prosperous one and a great many houses will change hands. They are completely run down with parties desiring to rent and are unable to supply them, the reason being that the owners want to sell the houses with possession, but as soon as other houses are completed they will be able to meet the demand; at present they have no vacant houses on their list.

EDWARD V. LANSDALE, 210 South Fourth street:—Has lately made a sale at Chestnut Hill of a property for $13,000, also a sixty foot lot at $3.00 per foot. Have also sold several lots from the estate of James Gowen, at Germantown. Properties at Chestnut Hill are pretty much all rented. Boarding-house people have renewed their leases and expect to do a good business. Rents, generally, have advanced somewhat over last year, the demand for medium houses both permanent and for summer occupancy is much in excess of the supply.

—The Senate Committee on Commerce, on Tuesday, agreed to a favorable report on Representative James's bill to regulate commercial sales of goods and merchandise. The bill provides that residents of each State and Territory may, within the other States and Territories, and within the District of Columbia, solicit from dealers or merchants orders for goods and merchandise by sample, catalogue, card, price-list, description or other representation, without payment of any license or mercantile tax.

—Tuesday morning, at an early hour, the flue-shop of the Philadelphia Railroad Company at Altoona was discovered to be on fire. The structure, though only a temporary concern, and built of wood, contained many valuable tools and machinery, all of which were lost. The fire department promptly responded, but their efforts to save the building were futile, and their work was directed to saving the large machine shop adjoining, and in which they were successful. The loss to the railroad company cannot be ascertained at present, but it will reach $18,000 at least. Over 100 men will be thrown out of employment for the present. Cause of fire unknown.

Building Permits.

One two-story brick house, 15 ft. by 27 ft., Bateman, above Wharton st., to William Galbraith, 709 South Nineteenth st.

One two-story house, 15 ft. by 27 ft., Bateman, above Wharton st., to same party.

Abbreviations.

Add.—Addition.
Alt.—Alteration.
Assn.—Association.
B. & L.—Building & Loan.
Bk.—Bank.
B.B.—Back Building.
Dwg.—Dwelling.
Est.—Estate.
E.J.—Ejectment Suit.
E.S.—Equity Suit.
Exr.—Executor.
Exrx.—Executrix.
K. & B.—Kitchen & Bath.
M L.D.—Mechanics' Lien Docket.
Nat. Bk.—National Bank.
Sav. Bk.—Savings Bank.
t. t.—Terre Tenant.
S.F.—Scire Facias to revive Judgment.

Sum C.—Summons in Case—A form of action invented to meet all civil cases, the form of which is not specially provided for.

Where there are no figures to indicate the amount of the judgment, the damages have not been assessed.

The first name in each line is that of the judgment debtor.

An asterisk (*) denotes judgment confessed or bond and warrant conditioned.

The figures 1 2 3 and 4 immediately after the name of the plaintiff indicates the number of the Court. The letters D. M. J. and S. after the number of the Court indicate the Term as D., December Term, M., March Term, as J., June Term and S., September Term.

An examination as to the nature of judgments and suits will be made for subscribers without extra charge on application.

Real Estate at Auction.

Government Buildings.

The rent paid by the Washington Government amounts to $953,900 per annum, which would justify an expenditure for public building of some $32,000,000. The committee appointed to investigate into the propriety of the Government erecting its own buildings, cite many considerations of public policy which favor the erection of public buildings, as the surplus revenues may justify, until the public service shall be performed in buildings owned by the Government and suited to its purpose.

The sum authorized to be expended for public buildings by the Forty-sixth Congress was $4,186,000; by the Forty-seventh Congress, $6,115,600, and by the Forty-eighth Congress, $4,683,500. Since the 4th of March, 1789, there have been constructed 329 public buildings, at a cost of $94,460,014.

Millions of Property Involved.

A DEATH-BED CONFESSION.

In 1839, Valentine Brobst, who was the owner of some 10,000 acres of coal lands, upon which the mining towns of Ashland and Mount Carmel have since been built, died in the city of Reading, Pa.

After his death it was learned that certain deeds to valuable lands were missing, and they have never been recovered. His daughter, who died here recently, is said to have confessed on her death-bed that she, at the instance of interested parties, and for the sum of $3,000, stole the papers just before her father's death, and that the land all passed into the hands of the men who conspired with her. Brobst's grandchildren have now instituted lawsuits to recover possession of the property, which is valued at several million dollars.

—All the boss carpenters in Milwaukee who belong to the Builders' Association have been notified by their men that on and after May 1st they will be expected to pay ten hours' wages for eight hours' work, and that they are expected to reply to the demand on or before Saturday of this week. The contractor who has the building of the county jail is to be made an exception. He took his contract last year.

The Shackamaxon Bank.

A SHORTAGE OF $430,000—$87,000 MISSING.

The Court examiners appointed to investigate the affairs of the broken Shackamaxon Bank concluded the taking of testimony on Wednesday last and adjourned for two weeks. Mr. Taylor Faunce, the assignees' accountant, made the following statement as to the present condition of bank affairs:

LIABILITIES.

Amount due depositors	$595,000.00
Capital stock	120,000.00
Surplus fund	30,000.00
Due banks	31,000.00
Total	$776.000.00

ASSETS.

By cash received by the assignees from all sources since the failure or suspension of the bank	$146,744.32
Amount held by the Girard Bank as collateral for any indebtedness against the Shackamaxon Bank	9,228.82
Items still in the hands of the assignee, comprising bills receivable:	
Schedule B	$4,288.91
Schedule C	4,594.70
Schedule D	4,767.00
Omitted from inventory	200.00— $13,850.61
Schedule E—Overdue notes remaining unpaid	20,103.76
Schedule F—Drafts and checks deposited in Shackamaxon Bank and payments stopped from suspension	9,953.62
Schedule G—Real estate and fixtures	26,510.96
Schedule H—Overdrafts on individual ledger of Bumm & Schallenberger	3,564.08
Schedule I—Judgments, including balance due on William Bumm & Sons' notes	77,804.94
Schedule K—Conklin's account—Lien claims assigned by Joseph Conklin to the bank	6 165.72
Schedule L—Collaterals, bonds and mortgages given by William Schallenberger, dated July 30, 1880	30,000.00
Total	$346,921.83
Liabilities	$776,000.00
Assets	346,921.83
Deficiency	$430,078.17

This deficiency is partially accounted for by the overdrafts of William Bumm & Sons for $145,000; due by Joseph Conklin, $140,000; overdraft of William Schallenberger, Sons & Co., $35,000; losses in regular course of business during the existence of the bank, $22,000; making a total of $342,000.

There is unaccounted for about $87,000. The earliest date of the Conklin transaction as taken from the vouchers in the possession of the assignees is January, 1877, and continuing down to the failure of the bank.

The Bumm overdrafts originated in 1876, and on January 13, 1877, there were fraudulent discounted notes passed to their credit, making good the overdraft on that day.

Subsequently, at stated periods, the account was overdrawn and made good in the manner stated above until the year 1881, when the overdrafts were concealed by false footings.

At the date of suspension, the stockholders in the Bank as they were registered upon the books, stood as follows, each of whom will certainly have to stand suit individually, as they are liable for the debts of the corporation to an amount equal to double the value of stock held by them, which will be $200 per share.

Quarter Sessions in re—Opening of Fifteenth street, judgment affirmed. Common Pleas No 2—Lane's appeal, decree affirmed and appeal dismissed at appellant's cost. Common Pleas No 1—Shilling vs. Abernachy, judgment affirmed. Common Pleas No 2—Alcorn vs. City, judgment affirmed.

No. 201, Edward J. Cantrell et al., appellants, vs. Washington Wallick. Appeal from the Circuit Court of the United States for the Eastern District of Pennsylvania. Decree affirmed with costs and interest. Opinion by Mr. Justice Woods.

News from the Workers.

The three thousand brickmaker' of this city will enter the Knights of Labor next week. The journeymen house painters are organized throughout the city. The 1,000 united hod carriers begin working nine hours a day, on and after April 24th. Wages are $2.50 per day. The slate mantel workers', including cutters, setters, marbleizers, finishers and rubbers, have organized a union and will ask for higher pay. Branches of the Plasterers' National Union have been established in several towns and cities throughout the country. At the last meeting of the Building Trades' Councils, held on Thursday evening, at 1224 Locust street, there were representatives present from the following crafts: Unions composed of bricklayers, plumbers, carpenters, plasterers, house painters, stonecutters, masons, tin rooffers, slate mantel cutters, plasterers, laborers, hod carriers, free stone cutters and mill workers.

The Knights of Labor intend to erect a large hall which will accomodate fifteen or more assemblies at the same time, and which will provide a suitable lecture room, library and room for various offices which will be used by the order. Different sites have been looked at by the committee in charge, but no definite results reached. It is understood that the matter is to be pushed, and a hall that will do credit to the Knights will be erected.

THE BLATCHLEY

Is carefully made by men who know how to construct a

PUMP

When desired they are lined with specially heavy Porcelain or Copper, or with Drive Well Cylinders, at small additional cost.

When ready to buy, *insist* on seeing and examining them. Use your own judgment, and don't be persuaded to act contrary to your own interests.

They are sold by some good house near you.

Special terms to builders buying in quantities.

BLANK BOOKS.

Blank Books have always been sold by the quire. Twenty-four sheets make a quire; but the Blank Book Makers have been selling from 12 to 20 sheets for a quire. The Public have been deceived. We shall inaugurate a new system, and sell our Blank Books by the hundred pages. Before doing this we offer our stock at a **REDUCTION OF 10 PER CENT.**

A PERTINENT QUESTION.

Why will you continue to buy Writing Papers by the quire, when you can save so much money by buying by the pound? Come see and be convinced; you can get almost double the quantity for the same money.

A First-class Plated Paper, 25 Cents per Pound.
A Linen Paper, 25 Cents per Pound.

IF YOU WANT

Any article in STATIONERY it will pay you to call and inspect our stock. We can sell at prices that will surprise you. Have the largest, best assortment and cheapest Papers ever offered for sale by anyone. This we will prove if you call.

All Grades of Writing Papers by the Pound.

PLAYING CARDS

From 6 Cents per Pack up.

PROGRESSIVE EUCHRE, in sets or separate parts.
POKER SETS, POKER CHIPS,
EUCHRE and WHIST COUNTERS,
CARD BOXES.

THE PHILADELPHIA

Real Estate Record

AND

BUILDERS' GUIDE.

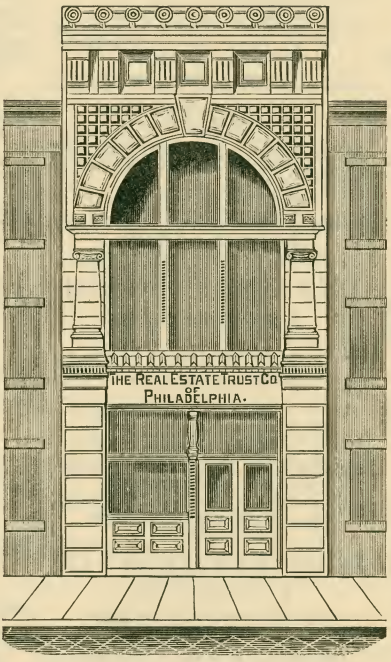
DEVOTED TO REAL ESTATE, BUILDING, ARCHITECTURAL AND INSURANCE INTERESTS.

[ENTERED AT THE PHILADELPHIA POST OFFICE AS SECOND-CLASS MATTER.]

VOL. I.—NO. 16. PHILADELPHIA, MONDAY, APRIL 26, 1886. PRICE 15 CENTS

New Building of the Real Estate Trust Co., of Philadelphia,

To be erected at 1340 Chestnut Street.



The Real Estate Trust Company of Philadelphia, chartered in August, 1885, possesses the franchises, also, of The Real Estate Exchange, Rental and Trust Company, and by virtue of the powers under these two charters, it transacts a general real estate business, including buying, leasing and selling property; gives special attention to the renting of properties and the collection of rents; to the payment of taxes and water rents; to the collection of ground rents and interest on mortgages; to the making of needful repairs on such properties, and in all respects to take the same charge and management of and to give the same attention to real estate as the owner could do; issues policies of title insurance to real estate and real estate securities; acts as trustee, guardian, executor, administrator, assignee, receiver, committee, etc.; receives and executes trusts of every description under appointment of courts, corporations and individuals, and becomes surety for the faithful performance of any trust or office; receives money on deposit, allowing interest thereon, and pays out the same on check, and receives for safe deposit securities and other articles of value, and rents safe deposit boxes in the burglar and fire-proof vaults.

This Company started its business at No. 321 Chestnut street, and by its careful, conservative methods has deserved the large measure of success which it has already secured. It can claim the credit of having negotiated sales of property at the highest price ever obtained for real estate in Philadelphia, and its management of the houses placed under its care has elicited the warmest commendations of those who have had the wisdom to avail themselves of its services in this respect. It has already outgrown its temporary quarters, and having purchased No. 1340 Chestnut street, intends at an early day to erect thereon a handsome granite structure, a sketch of which we present to our readers today.

The new building, which will be occupied by the Company in January, 1887, will be thoroughly fire-proof, and will contain a commodious burglar-proof vault, with accommodations for a safe deposit business, which is so much needed in the central part of our city. It will be protected by electric wire connections with the police stations and the Bell Telephone Exchange, as well as by private watchmen.

The residents of the central and western portions of our city and the business men of West Chestnut and Market streets will then be supplied by The Real Estate Trust Company with safe deposit vaults and trust company accommodations, which the eastern part of our city has hitherto monopolized.

This location will also be a very convenient and advantageous one as a real estate centre, and its proximity to the new City Hall and the public offices and departments will be valuable to the Company, as the second Title Insurance Company in the city, in its Title Insurance Department.

The Directors of the Company are all well-known business men, George Philler, Henry C. Gibson, Lemuel Coffin, Beauveau Borie, William M. Singerly, John Wanamaker, Edward T. Steel, Charles W. Henry, John F. Betz, Thomas Dolan, R. Dale Benson and Frank K. Hipple, and its officers are: President, Frank K. Hipple; Treasurer, William F. North; Secretary, William R. Philler, and Real Estate Officer, Thomas B. Prosser.

REAL ESTATE PUB. CO.

PHILADELPHIA, MONDAY, APRIL 26, 1886.

NOTWITHSTANDING the many learned opinions that have been expressed upon the cause of the white incrustations to be frequently found upon the fronts of brick buildings, the REAL ESTATE RECORD takes issue with them all, and asserts that they are incorrect. It has been frequently held that these incrustations are the exudations of certain salts or chemicals which existed in the clay before the brick was formed. Other opinions expressed the idea that it is caused by coal-burning, and that brick burnt with wood fires were entirely free from it. Theories as well as scientific reasoning frequently fall to the ground in the face of practical facts. This is forcibly demonstrated in a case which exists at the present writing.

On the west side of Franklin street, below Vine street and opposite Franklin Square, there is a row of three-story brick houses, all of which were certainly built before the method of burning brick with coal came into general use. Every one of these houses during the whole of last week were nearly covered on their fronts with a very thick coat of white incrustations. This row of houses terminates at the German Lutheran Church, which is built of brown stone that certainly was quarried many miles away from Philadelphia. The front and steeple of this church had even a heavier coat of the self same white incrustation that was so plentifully distributed over the fronts of the brick houses. Certainly no more convincing evidence can be needed to prove that these white incrustations are solely the result of atmospheric influences, and that the brick fronts of houses are merely depositories for the same.

THE difference of opinion expressed by builders and architects as to the outcome of the general rise in values is indicative of one thing, namely, there is less certainty of ill effects than if perfect unanimity of opinion prevailed. The conservative influence which has been exerted during the past thirty or sixty days will in the end prove advantageous, no matter what the cause may have been, whether brought about by apprehension of losses or of insufficient profits. This upward tendency in values will work good results in more directions than one. For instance the new houses built will command higher rents and this fact will reflect favorably upon all other, or a great many houses. Of course it is no easy matter to raise rents generally and is an impossibility excepting under a long period of prosperity. The stimulus given to building will make houses plenty enough, so that in the older sections of the city improving rents will not be general, but it may be said that houses erected within the past two or three years will probably share in this improvement, which will be enlarged with those constructed this year. Nearly all of the leading builders still express the opinion that they expressed two months ago and longer, that the demand for houses will be sufficient to allow the carrying out of all the enterprises projected early in the season. Just what per centage of building is waiting a settlement it would be no easy matter to say, but it can be said that it is a very small one. If building enterprise was managed by individual builders and men of small capital, we might expect a scare among builders, but building operations are controlled by a few men who see far and who are not easily alarmed, and who have confidence that the demand of the country will absorb all the house-room and shop-room which they will find it prudent to furnish.

THE house of the near future, says the *Boston Journal of Commerce*, will have no fireplace, steam pipes, chimneys or flues. Wood, coal oil and other forms of fuel are about to disappear altogether in places having factories. Gas has become so cheap that already it is supplanting fuels. A single jet fairly heats a small room in cold weather. A New York artist has produced a simple design for heating entirely by gas at a mere nominal expense. It is a well-known fact that gas throws off no smoke, soot or dirt. The artist filled a brazier with chunks of colored glass and placed several jets beneath. The glass soon became heated sufficiently to thoroughly warm a room 10x30 feet in size. This design does away with the necessity of chimneys, since there is no smoke; the ventilation may be had at the window. The heat may be raised or lowered by simply regulating the flow of gas. The colored glass gives all the appearance of fire; there are black pieces to represent coal, red chunks for flames, yellowish white glass for white heat, blue glass for blue flames, and hues for all the remaining colors of the spectrum.

BELOW we present the report, No. 103, of Inspector Wm. McDevitt. It contains information which every builder, property owner, and those having valuable properties under their charge, should know. The uniform opinion heretofore held, that asbestos is an absolute non-conductor of heat, Inspector McDevitt explodes with a few incontrovertible facts, which greatly outweigh all scientific theories. Mr. McDevitt is entirely too practical and too well trained by years of experience to hunt for causes and effects for even a probability of his being mistaken to become worthy of consideration.

The anti-inflammable properties of asbestos are, beyond question, fully established by its use, but its conducting properties make it entirely too dangerous to justify its further use. Philadelphia has enjoyed the expensive luxury of too many fires the origin of which will forever remain undetermined, unless, in cases where asbestos was used to protect wood work from the heat of steam- and smoke-pipes, they be attributed to it. Owners of properties should enforce an instant and rigid examination of those parts of their buildings where asbestos pipe coverings or asbestos plaster comes in contact with the wood work. In the case of the Market street store, referred to in the report, there were tangible evidences that the heat conducting properties of the asbestos used to protect the wood work had actually set the wood on fire. Of course there is a possibility that the asbestos in the Market street store was inferior, or even a mixture, containing but a small percentage of true asbestos. In justice to the asbestos manufacturers investigation should be instigated to determine this point; at all events, caution is better than cure. Pipe coverings should be looked after.

(No. 103.)

Fire Insurance Patrol
CAUTION.

ASBESTOS.—In circular No. 102 mention was made of a fire caused by the heating of asbestos sheeting to a degree sufficient to ignite the outside covering wrapped around an iron boiler stack. In the building S. W. cor. of Tenth and Market streets (C. Weber, furniture), the iron flue from the boiler is inserted in the wall, wired, and plastered over with asbestos. During an inspection yesterday objection was made to the danger from wood work in contact with the flue, which was found to be very hot, when upon removing the washboard it was found burning. A stairway recently placed against this flue, likewise exposed, is to be removed. The flue with its proposed protection has been in use only three weeks. It should be remembered that asbestos, although non-inflammable, is, under certain conditions, a conductor, and an absorbent of heat to a degree sufficient to ignite wood work in contact therewith.

WM. MCDEVITT, *Inspector.*

REAL ESTATE.

Real Estate Matters.

The real estate transactions of the past week have been, as usual, for small lots for the most part, but in two or three cases transfers were made of large plots for building purposes, which have been under way for several weeks. Two or three of the best posted real estate agents stated, that but for determination or stubbornness, as they put it, of some of the holders of real estate within the city limits, more property would change hands, but that the buyers are unwilling to meet the higher views, only in exceptional instances, where land is absolutely necessary. In the factory districts several small pieces of property have been bought, either to be built on this year or next, and along the lines of the Baltimore and Ohio Road, in the southwestern section of the city, several tracts have been bought up, to be held for the best future use that can be made of them. Elsewhere, throughout the suburbs, considerable property is being offered, but at prices which rather deter than attract buyers. The legitimate requirements for house building purposes are sufficiently large to prevent any reaction in prices, but the demand is not sufficient to justify the prices asked by those who desire to sell.

The real estate exchange project is not exactly dead, but it is in an extremely sound and healthy sleep. It is not necessary for the real estate operators to step around on tiptoes for fear of awaking it, nor to ask the brass band to go around the other square for fear of disturbing it. Its nap may probably last all summer.

Conscience Stricken.

$500 was sent to the City Treasury on Thursday by a conscience stricken tax payer who failed to sign his name. A Postal Card directed to Tax Receiver Hunter accompanied the amount; it read: "The inclosed $500 is for State taxes unpaid for some years, owing to a mistake in construction of law in regard to same." The money will go to the "conscience fund."

Obituary.

H. P. M. Birkinbine, formerly Chief Engineer of the Water Department, died on Wednesday evening, at his residence, No. 3535 Baring street, aged 76 years. He was for years a member of the firm of Birkinbine & Trotter, which erected the Water and Gas Works at Germantown and the Water Works in West Philadelphia. He was first elected Chief Engineer of the Water Deparment in 1857, and served in that capacity for seven years.

Changing the Name and Paving Long Lane.

A meeting of property-holders was held at the office of L. E. Pfeiffer, at 1251 Long lane. Jarden, Amos Dotterer, and several other property owners were present. Mr. Pfeiffer was appointed Secretary, and it was resolved at this meeting to petition Councils to pave Long lane, also to change the name. Long lane has always had an unsavory name, and it was suggested to change the name to Point Brecze avenue. This section of the city, from a bare waste, is being rapidly built up into a blooming city of itself.

Gas Trust.

On Thursday, the Committee on Works recommended the erection of a "Stack" and fixtures for the regenerative system of firing furnaces at the Ninth Ward works, at an estimated cost of $135,800. The Committee on Distribution received a report from Chief Engineer Parke in reference to the proposed increased supply of gas for Germantown and Chestnut Hill, and stated that it would be necessary to lay 42,651 feet of 12-inch pipe to accommodate that territory. This would cost $70,000. Mr. Rittenhouse said if the pipe were laid that the increased supply would pay for itself within two years. It was decided to postpone action on the report until the members of the Trust go over the proposed route.

The Pledged Securities.

In the United States Court, on Thursday last, Judge McKenna refused the application of Francis S. Gowen for the right to apply $1,100,000 of the Reading Consolidated Second Series (5's) Loan to assist in taking up the collateral pledged for the floating debt of the Jersey Central, which has been advertised to be sold on Tuesday.

The application further asked that securities of the Jersey Central Railroad Company which are sufficient for that purpose shall be sold to pay the floating debt of that company. It is the intention of the Jersey Central Managers to sell the collateral of the Reading Company pledged for the Jersey Central's floating debt, and apply the proceeds to the dividends of that company which the Reading has defaulted upon.

Charters Granted.

The Prospect Brewing Company, of Philadelphia, capital, $200,000; the stockholders are Karl Hulber, New York; Charles Walters, Charles Sulzner, Lewis Erb and John Ludwig, Philadelphia. Picton Manufacturing Company, of Philadelphia, capital, $30,000. Susquehanna Manufacturing Company, of Epsy, Columbia county, capital, $30,000. Columbus Building and Loan Association, of Pittsburg, capital, $500,000. Keystone Light and Power Company, to supply light, power and heat by electricity to Philadelphia and vicinity; capital, $80,000. M. Richards Muckle, Jr., is Treasurer. Benjamin Franklin Premium Building and Loan Association of Allegheny City; capital, $250,000. The Philadelphia Mortgage and Trust Company, capital, $500,000, Richard T. McCarter, Jr., is the Treasurer. The Zeister Printing Company, of Philadelphia, capital, $300,000. Isaac S. Sharp is Treasurer. Excelsior Building and Loan Association, of Altoona, capital, $100,000. The Jefferson Loan and Building Association, of the same place, capital, $1,000,000.

The Labor Question.

A great deal of turmoil and no small amount of vexation to investors, contractors, architects, builders and others interested in the labor question has been settled on a basis which passes as satisfactory. Carpenters will be paid $2.75 for nine hours per day, instead of $2.75 for ten hours as heretofore. Stonemasons, painters and the members of all other branches of the building crafts have come to satisfactory terms with their employers. The employers, it may be stated, are glad to make the concessions they have made. They would prefer to pay $2.75 rather than $2.50 or less. They would prefer to see their men work nine hours rather than ten. Their backwardness in acceding to these demands is due, first, to whether the demands made will be general, and, second, whether the advance asked is a legitimate one. Besides this, builders and all others know that increasing cost of labor is an actual tendency to check investment. The building interest of Philadelphia has had enough discouragement during the past four years and are naturally anxious to nurse the present healthful condition of things into greater activity for their future benefit. As it appears now the nine hour day will go into effect quietly on next Monday, May 3d, not only in Philadelphia but in all the larger and smaller cities throughout the United States.

An Alleged Fraud.

Benjamin S. Sharp, deceased, as administrator of Henry Sharp's estate, who died May 31, 1875, is charged by William Sharp, of Yorkshire, England, with having perpetrated a fraud by having falsely represented that Henry died without any next of kin excepting himself. The petitioner also claims that the administrator sold a property at the Southeast corner of Forty-eighth and Market streets to an employé for $3,000, which was actually worth $8,000, the latter having reconveyed it to the administrator; that by false and fictitious charges of debts and many material errors Henry's estate was robbed by the administrator. Also, that when Benjamin died in January last, he bequeathed to the petitioner $1,000. They were brothers, and now William, who claims that he did not know of the condition of affairs until Benjamin died, asks for a rehearing of the whole matter. Judge Hanna granted a citation on George W. Freas, the executor of Benjamin Sharp's estate, to show cause why a review should not be had returnable on the 8th of May.

Mr. F. Deakyne's New Office.

Right in the midst of the busiest part of Walnut street, adjacent to a score of his real estate brethren, Mr. Deakyne has permanently located. Some time ago he purchased the property 723 Walnut street with the view of utilizing it for business purposes, the rapid growth of his business necessitated his removal from 255 South Fifth street to more adequate quarters sooner than he expected, he consequently arranged to have the entire building thoroughly renovated and altered to meet the demand for offices in that now very popular part of the street. Although his shingle has been hanging out at his new quarters for some weeks his formal occupancy only commenced on Monday the 19th inst. The front or main office is a pleasant, airy, handsomely papered room, 15 feet by 20 feet, back of which is Mr. Deakyne's private office, the wall decorations of which are even more elaborate. A beautiful Axminister carpet extends the entire length of both offices.

The real estate fraternity need not be surprised if a cordial invitation to an old fashioned house warming is extended at a very early day.

Contractors and Architects.

The Pittsburg contractors have had a good deal of discussion with reference to their standing with architects. At a recent meeting the position of contractors toward architects was discussed at length. The trouble lies in the fact that when plans and specifications are drawn up by the architect a clause is inserted to the effect that should any addition to or alteration of the specifications be necessary to carry out the plans, the contractor will be expected to perform the additional work for the original contract price, and should any dispute arise between the builder and the owner of the property the architect shall decide the matter in dispute, and his decision shall be final. The power thus given to the architect occasionally results in loss to the contractor, but the expression of the meeting was to the effect that in making a contract the builder usually allows himself a margin for alterations, and, though loss sometimes results, it was very seldom. It was decided that at a future meeting a committee should be appointed to wait upon the architects of the two cities and endeavor to have specifications drawn up in a more complete manner for the future. The meeting disavowed any intention of boycotting architects, as recently published.

A constitution and set of by-laws for the new association was discussed seriatim and partially adopted, the lateness of the hour preventing the completion of the work.

Natural Gas in Ohio.

A conference held at Youngstown, Ohio, resulted in the Ohio and Pennsylvania Natural Gas and Fuel Company, both corporations organized there and each having secured a franchise from council to lay pipes through the streets, consolidating and forming a new company with a capital of $100,000. Of the stock the first named secured $45,000 and the other $55,000. The Ohio and Pennsylvania company has spent about $28,000 in drilling for gas through Butler county and the Columbia Gas Company purchases their interest in the territory where they have put down wells for $20,000. Further, the Columbia Gas Company is to lay a pipe line to the State line in the vicinity of Sharon, and the company here agrees to lay a pipe line from this city to connect with the Columbia at the State line. Under the agreement the Columbia is to furnish a full supply of natural gas and to receive 50 per cent. of the revenue the company there getting 60 per cent. The contract is regarded as a very favorable one to the parties there, and if pipe can be secured the line will be laid and a full supply of natural gas secured here by July 1.

Water Statistics.

The net available appropriations during the year, including a balance of $39,617.43 to the credit of special appropriations, amounted to $909,779.82. The total expenditures from this sum were $901,931.49, leaving a balance at the close of the year of $7,848.33, of which there were merged into the treasury as balances from items of regular annual appropriations $1,615.43, and a non-merging balance from special appropriation of $6,232.90, which was on hand January 1, 1886, and available for expenditure during the current year for the purposes to which it is applicable.

The collections during 1885 aggregated $1,826,164.04, to which amount should be credited $70,000, due to the reduction in the charge for horse-power from $3 to $2, which went into effect last year.

With reference to the distributing system, Colonel Ludlow believes that "the provision for storage is quite insufficient, and for subsidence almost entirely lacking. There are no appliances for filtering or clarifying the water. These are matters of too serious a nature to warrant their neglect."

To put the East Park reservoir in service will cost about $1,250,000 and require two or three years' time. When completed it will not only furnish an opportunity to get rid of a considerable proportion of the weightier sediment with which the Schuylkill river is frequently charged, but will be a valuable safeguard against failure of the pumps or bursting of mains.

During 1885 there were 137,967 feet of new pipe laid, and relays and repairs made amounting to 93,783 feet.

Colonel Ludlow on the Future Water Supply.

In speaking of the future water supply for the citizens of Philadelphia the report has the following:

"Philadelphia lies at the confluence of two water-sheds, from one or the other of which its water supply must be taken. The Schuylkill has heretofore discharged this service, but the accumulated evidence proves that it cannot, even for the present, any longer be relied upon unless, by either great engineering constructions or the rigid enforcement of legislative enactments, which in the end would prove even more costly—the conditions can be radically and permanently altered. There remains the water-shed of the Delaware, and here two alternatives are presented: one the Perkiomen-Lehigh project, an enlarged modification of the original proposition of Mr. Birkinbine; the other the Point Pleasant Water-Gap project, now for the first time shown by these surveys to be practicable and comparable in cost with the other.

"The former plan impounds the Perkiomen water at Green Lane, and draws the additional amount needed from the eastern slopes of the upper Lehigh between Aquanchicola Creek and White Haven. The latter proceeds directly to the Delaware river at Point Pleasant, impounds the Tohickon, with auxiliary pumping from the main stream, and ultimately extends the conduit to near the Water Gap for a full gravity supply.

"It is from the pure and unpolluted rainfall of these elevated and desert regions that the community will hereafter drink; but meanwhile, and until increase of population shall have too seriously impaired the character of gathering grounds nearer at hand, the great expenditures needful to draw the entire supply from those distant sources is shown by the surveys to be unnecessary for the present, and for a period in the future not definately determinable."

Of the two projects Colonel Ludlow says that, while "Philadelphia might well be satisfied with either, his judgment, after full consideration, is clear as to the advisability of selecting the Point Pleasant route."

Capital Organizing.

A UNION OF MONEY INTERESTS.

It is learned that from the day last summer when Mr. Gould was forced to bow the knee to the Knights and grant their demands for an adjustment of grievances on the Wabash system capitalists and large corporations, seeing the handwriting on the wall, have been preparing for a final struggle. Practically speaking, a great union of the moneyed interests has been in course of formation for many months. At first the surface railroad corporations of New York did not belong to the union and they were forced to grant the demands of their men in January. Since then it can be positively stated that the presidents of the roads have joined the big union, subscribed anywhere from $1,000,000 and upward and are now prepared to give battle to the Knights. To this union of capital more than anything else is due the defeat of the Third avenue strikers. To this big union is due the defeat of the strikers on the Southwestern system and the defiant attitude of Mr. Hoxie.

When Mr. Hoxie turned his back on the members of the general executive committee of the Knights of Labor he knew that all the roads leading into East St. Lous had subscribed $250,000 as a fund to defeat the strikers. He knew that all the other roads of the country had subscribed or were willing to subscribe hundreds of thousands to crush the Knights of Labor and the labor unions of the country. The last to come into the big union are the sugar refiners of Brooklyn. They also have subscribed to the big fund and are prepared to fight to the bitter end. They are even more defiant than Mr. Hoxie. They refuse absolutely to take the strikers back at anything like their former wages. They will shut down entirely they say. Knowing full well that the Knights have a fund from which to draw support, they also have a fund running up into the millions from which to draw sustenance.

THE KNIGHTS OF CAPITAL.

A certain president of one of the trunk lines said on Saturday that his company stood ready to subscribe $500,000 to the fund at the first indication of trouble from its employés. Whether Mr. Gould is the General Master Workman of the Knights of Capital cannot be learned, but such is the report. This big fund has enabled the corporations to scour the country for non-union men, and it can be stated positively that in the event of a general tie-up of the railroads in New York or any of the other large cities these men stand ready to take the places of the strikers.

The sudden and unexpected collapse of what threatened to be a serious strike at the Whittenton Mills, Taunton, was caused by the discovery that the mill belonged to a huge organization of textile industries of New England, which has been formed so quickly that it has escaped all notice. The organization extends over Rhode Island and Connecticut, and already includes forty-nine large woolen mills, with such cotton mills as the Lonsdale and Hope Mills. The society was organized for mutual protection. It does not recognize the authority or dictation of the Knights of Labor in any way, but is prepared to use arbitration in the settlement of strikes. The organization is growing in numbers, and it proposes to give each strike careful consideration and to assist only those manufacturers who are unfairly treated by their help.

A second society, embracing all cotton mills of any importance in Maine, New Hampshire and Massachusetts, was quietly completed and elected its officers in Boston on Wednesday. The Massachusetts League is the league of cotton mills to which woolen mills are to be admitted, while the Rhode Island society was formed by woolen mills and subsequently admitted cotton manufacturers. During the last month the cotton mills of the State have been quietly preparing for organizing for mutual insurance against labor disturbances. The cotton manufacturing industry is better adapted for the formation of such an organization than many others because it is composed of a number of large mills rather than a large number of small ones. The quiet organization which has taken place has been conducted with much expedition and its result will probably be witnessed at the next attempt of the mill hands to secure the discharge of workmen who are not members of the union. The entire woolen as well as the entire cotton interest of the three States will be included.

The society has taken the form of a mutual insurance company, organized on the basis of the respective pay rolls of its members. It is not a corporation and has no stock. The yearly pay rolls of the Massachusetts mills that have already joined amount to $15,000,000. Every leading cotton mill in the State has already joined. The aims of the society are not in any sense aggressive and its purpose is not to attack the Knights of Labor, but simply to protect its members against unjust persecution. The methods of self-defense which the society will employ have not yet been made public.—*The Times.*

—For several years attempts have been made to produce a fire-proof plastering for buildings. As heretofore used the wooden lathing has rendered the ordinary plastering objectionable. Metallic laths do not seem to answer such a desirable substitute as to fill all conditions. We have latterly noticed that a plaster is being made of asbestos, silicate of soda and potash, and without lime or hair, that answers very well. The chemical action of the ingredients forms a hard, stone-like substance, having great cohesive and adhesive qualities. So great is the latter quality that the plaster requires no key or hair to hold it firmly in place, even on the smoothest surface in use in building. Where it is put on iron surfaces, the plaster being an alkali, it has little tendency to produce rust. The adhesive quality of the plaster is such that it will stick so firmly to a plain surface as to require the use of a chisel to separate it from the metal. This plastering can be laid in the coldest weather. If this new material is all that its friends claim it to be, it is certainly something very valuable.

Gossip of the Week.

The dwelling and lot, 15x75, No. 241 S. Fifth street, sold for $16,500.

The dwelling and lot, 1923 N. Twelfth street, 21x100, sold for $13,600.

John Loughran is building nine houses at Ninth and Huntingdon streets.

A large lot, 118 feet front, at N. W. corner Twenty-fourth and Sansom streets, sold for $58,000.

The store N. E. cor. Third and Fairmount ave., sold for $10,800, subject to a ground rent of $47.67.

Ground was broken on Wednesday morning for the new Jewish Synagogue on Seventh street above Columbia ave.

About 100 new houses were erected during the past year at Chestnut Hill, near the line of the Pennsylvania R R.

Mantua Church has purchased a valuable piece of ground at Belmont and Westminster avenues for mission purposes.

A new parochial school is to be erected in connection with St. Bridget's Catholic Church, at the Falls of Schuylkill.

John White is building thirty-eight houses on the lot corner Nineteenth and Federal streets. He also intends building more in the same vicinity very soon.

A large number of building improvements are in progress or in contemplation in Germantown, mostly on the west side and along the line of the Pennsylvania R. R.

A new rectory is in process of erection for St. Stephen's Church, on Locust street, below Broad, and a house on Girard street, between Eleventh and Twelfth streets, has been secured for a parish building.

The Phœnix Iron Company, of Phœnixville, has commenced the erection of a girder shop for bridge-building purposes which will have a capacity of turning out about 40,000 tons of bridge iron per year.

The Girard Avenue School Committee of the Society of Friends asked permission to erect an addition for class rooms for that school, which was approved, subject to the action of Green Street Meeting.

The erection of three new Catholic churches in this city is contemplated. One will be, it is said, in the neighborhood of Twenty-ninth and Wharton streets; another between St. Michael's and St. Ann's Catholic Churches, and another in Haddington.

The Friends (Orthodox) Society intend to erect a building on its property at Sixteenth and Race streets, to accommodate the library and offices now adjoining the Meeting House on Arch street below Fourth street. The new building is to occupy the ground that was intended for burial purposes, but which was not used.

A special committee of the Franklin Institute recommended the erection of a new building; the report was adopted and the committee were instructed to present plans for the new structure at the next meeting. The committee consists of Messrs. William P. Tatham, William Sellers, J. Vaughn Merrick, Charles Bullock, Isaac Norris, John J. Weaver and President Charles H. Banes.

Mr. Harry Grant, who was in the Wm. Arrott Mill at Coral and Taylor streets, has broken ground for the erection of a new mill building at Third and Somerset streets, which will be two stories and basement in height, 50 by 150 feet, built that it may be raised to five stories at any time. The main room will be 120 feet long, the picker house at the end of the building, and divided from the main room by an 18-inch brick wall with fire-proof doors, with a stairway leading from the picker house, and brick enclosed, leading to an outside balcony, which will have an exit on Third street, making a means of escape in case of fire or panic, and will be used as entrance by tenants who will occupy the upper floors.

Items of News.

—The personal estate of Emily A. Purviance is appraised at $50,022.45.

—The Pennsylvania Railroad Company has on its pay rolls 42,030 persons.

—The personal estate of John M. Van Harlingen has been appraised at $29,661.

—The National Master Painters' Association meets in this city on the 20th of July.

—The net earnings of the New York and Western Railroad for 1885, were $1,121,829.19.

—The elevator in the Board of Trade building, Chicago, fell five stories, but none of the passengers were injured.

—The wages of the gripmen on the Traction Company's Market street cable road were advanced from $2 to $2.25 per day.

—Receiver Hufty is paying an additional 20 per cent. to the depositors of the defunct Gloucester, N. J., City Savings Bank.

—An inventory of the personal estate of the late John Van Harlinger, amounting to $29,661, was filed with the Register of Wills.

—The weight of evidence thus far in the Smart will case goes to show that the testator was of unsound mind and incompetent to make a will.

—Attorney-at-Law F. F. Brightly's suit against Mrs. Harriet S. Wilkinson for a $2,500 fee resulted in a verdict for the plaintiff for $2,000.

—The will of the late ex-Senator McCarthy has been admitted to probate at Syracuse. The family are the sole legatees to the estate, estimated at $275,000.

—The plate glass insurance companies of New York took in cash premiums last year amounting to $379,274 and paid losses amounting to $176,524.

—A permit was granted on Tuesday to the Wood Manufacturing Company, of Camden, N. J., to erect a worsted factory, 53x150, at Fifth and Erie streets.

—The Eureka Rubber Company, of New York, was awarded the contract for furnishing 400 feet of hose to Camden Fire Department. The price was $340.

—A recent inventory has placed the value of the persona estates of the late Peter Williamson and James McCalla at $128,655.92 and $27,727.75 respectively.

—The Board of Trade of Reading sent a committee to Washington last week to secure an increased appropriation for the public buildings at that place.

—The telephone companies, according to the Supreme Court, are common carriers and must furnish its instruments to the public without discrimination. Good law.

—The fifty-nine fire companies that operated in New Hampshire last year received $449,583 in premiums, and paid $360,999 for fire losses. The percentage of loss was therefore over 80 per cent.

—The exports from Germany to the United States during the first quarter of 1886 amounted to $2,625,000 more than the exports during the same period of 1885, in spite of Government discouragement.

—On the motion of Mr. Cameron the Senate has passed a bill granting the right of way through the Naval Arsenal grounds at Bridesburg, Philadelphia, to the Kensington and Tacony Railroad Company.

—The City National Bank, of Williamsport, closed it doors on the 20th inst. Heavy losses and a defalcation of $20,000 was the cause; stockholders personally responsible. Depositors will be paid in full.

—Judges McKennan and Butler on Thursday refused the motion of the Pullman Palace Car Company for an injunction to restrain the Central Transportation Company from prosecuting an action for rental.

—Thieves are having high carnival at Long Branch, the town being without money the streets are unlighted at night; five cottages have been robbed recently and the residents are considerably uneasy.

—Mr. Powderley, the Master Workman of the Knights of Labor, gave his testimony as to the South-western labor difficulties before a special committee of the House of Representatives on Tuesday, 20th inst.

—Manufacturers of builders' hardware have closed contracts for supplies for the summer for hardware, tools and builders' supplies generally, which secures a full spring's work to all near by interests.

—A nolle pros. has been entered in the indictment against Joseph S. Earl, of Jobstown, N. J., charged with fraudulently converting to his own use the sum of $3,600 intrusted to him as the guardian of his niece, Carrie Earl.

—The Treasury Department has received a certificate of deposit of $25,000 in the case of George Q. Cannon, the Mormon, who was held in that amount of bail, and which was forfeited by reason of his failure to appear for trial.

—A jury of view on Wednesday reported an award of $1,700 in favor of Daniel Conner, the tenant of a marble yard near Mount Moriah Cemetery, for the occupation of his premises by the Baltimore and Philadelphia Railroad.

—Garrett S. Cannon, the distinguished lawyer, died at Bordentown on Wednesday last. He was United States District Attorney for New Jersey under Presidents Pierce and Buchanan, and for many years Prosecutor for Burlington county.

—The United States Circuit Court has confirmed the forty-fourth report of Special Master Dallas, recommending the issue of 750 $1,000 car trust certificates to provide for the construction of new rolling stock for the Reading Railroad.

—The following officers have been elected for the Plumbers' League: President, George W. Kirk; Vice President, Jas. Kelly, Secretary, William Weild; Assistant Secretary, M. I. Clune; Treasurer, Benjamin F. Sisty; Doorkeeper, William Tait.

—Since the introduction of natural gas into Pittsburg it is asserted that the output of the mills and factories has been increased 20 per cent., a large number of new plants have been erected and nearly 10,000 additional men have been given employment.

—France and Germany, according to Berlin newspapers, are evincing considerable feeling towards each other. *The North German Gazette* warns France that her official relations with Germany will suffer if the anti-French feeling be further aroused.

—Messrs. Wiggin & Stevens, Boston, proprietors of the New England Sandpaper Factory, at Edgewater, anticipated a strike for more pay and against the dismissal of two Knights of Labor for drunkenness by discharging their forty employés and shutting down.

—A new company with a capital of a million dollars filed articles of incorporation in Camden, on Friday, under the title of "The Electro Pneumatic Transit Company." The object of the organization is to "manufacture, sell and use machinery for the collection and distribution, by pneumatic and electrical means, of small packages and messages."

—W. G. Mitchell, of Edgefield, S. C., found a genuine diamond in his lot, which competent judges pronounce to be worth at least $65,000. The Coroner of the county has been notified, and a gang of men are hard at work digging for the body of the plumber who lost it.

—A Citizens' Municipal Assocation has been organized. It is to take no part in the nominations or elections to public office. Many of the members of the old Committee of One Hundred belong to it. It certainly represents in its make-up our best and most influential citizens.

—The Connellsville Coke and Iron Company has recently purchased 500 acres of coal land at Leisenring, making its total acreage about 9,000 acres. The company intends building 500 more ovens at an early day, and increasing the number until its total number of ovens reaches 1,000.

—The New York Assembly on the 21st inst., passed, by 100 yeas to 16 nays, the bill repealing the Broadway (New York) Surface Railway franchise, besides supplementary bills providing for winding up the corporation dissolved by legislative enactment. The bill now goes to the Governor for his signature.

—Land Commissioner Sparks has made a formal demand upon the St. Joseph and Denver City Railroad Company to reconvey to the Government some 12,000 acres of land lying between Hastings and Kearney, in Nebraska, which is alleged to have been wrongfully patented to said company in 1874.

—Emma Heaton, Mary Supplee and Pauline Smith, the grandchildren of Mrs. Sallie W. Miller, who died in 1884, on Tuesday filed a petition in Court of Common Pleas No. 2 asking that a citation be issued agains Chas. Phillips, directing him to account to the petitioners for $10,000 of trust funds in his hands.

—The Sheriff's jury in the Weaver lunacy case found that Dr. Martin Weaver was a lunatic with lucid intervals; that the value of his estate was $41,216.67, and that the deed of trust offered in evidence was not executed during a lucid interval. Mr. Hampton L. Carson, the Commissioner, dissented from the verdict.

—During the recent riots in London over three hundred losses of plate glass were replaced by a single plate glass company. A similar outbreak is likely to occur in any one of our large cities. Moral: Insure your plate glass, and be protected from casualties incident to mobs as well as from those of incendiary character.

—A careful and detailed statement of the losses, in Montreal, by the floods suffered by the several business interests places the figure at $1,385,000. To this should be added at least $100,000 damage, confined to small stock. It will cost $20,000 to repair the streets, while the gas company and the electric light company are losers to the amount of $10,000 each.

—At the last quarterly statement of the Williamsport City National Bank the deposits of the bank were about $190,000. Over $40,000 was drawn out by depositors on Tuesday, 20th inst. The principal stockholders embrace such men as George W. Lentz, J. Sallade, G. Tinsman, J. R. T. Ryan, Moses Ulman and Alexander Beede.

—Another meeting of the Citizens' Association of Gloucester City, formed to encourage manufacturers, was held last Thursday evening, when communications were read from parties in Newark, Jersey City, Paterson and Easton. J. B. Gardain, of Camden, inquired as to the feasibility of establishing a factory for seal plush. A person from Philadelphia offered to subscribe to one-fourth the stock for a woolen mill if the balance could be raised by a company.

—The late John Welsh, in his will, left no bequests to benevolent or charitable institutions. He preferred to dispense his charities, and they were very liberal, while living, which was sensible, as no man who leaves large sums to charities can expect that his wishes will be honestly executed after his death by those in charge of his money.

—On Wednesday last C. J. L. Meyers, Son & Co., sash and door-blind manufacturers, employing several hundred men, acceded to a request of their employés that, commencing May 1, work be upon an eight-hour instead of a ten-hour basis, without a corresponding reduction in wages, and that all piece and over-time work be abolished. The firm also agreed to employ none but union men.

—President Gowen, of the Philadelphia and Reading Railroad Company, has notified the trustee of the general mortgage funds of that company that there are $25,000,000 in the sinking fund applicable to the redemption of this mortgage. This notice was given prior to April 15 and in accordance with the stipulations of the general mortgage. The redemption of the bonds does not have to be made until the 1st of June.

—A number of persons who use Oxford street to reach the Park are very much provoked at the bad condition of the streets. Twenty-eighth and Twenty-seventh streets, from Oxford street to Columbia avenue, are in a terrible condition. Twenty-eighth street is nearly impassable, there having been no attempt made to get rid of the mud-hole. There should surely be some one to have charge of these filthy streets.

—The cost of maintaining the Norfolk and Western Railroad Company for the year 1885, according to the annual report was $21,535 per mile. The gross earnings being $2,771,120.87; the net earning being $1,121,829.19; the net surplus on December 31st, 1885, was $73,006.87. The operations for 1885, as compared with 1884, show an increase in gross earnings of $59,667.60, an increase of $132,433.34 in expenses, and a consequent decrease in net earnings of $72,465.74.

The levee on the Mississippi river broke on Thursday ten miles south of Helena, Ala., on the Arkansas side. The crevasse is forty yards wide, and it will be impossible to close it. As in 1882, 1,000,000 acres of the most fertile cotton land in the Mississippi valley will be covered by water from one to six feet deep. Planting operations were suspended three weeks ago and cattle and farm stock were moved to the highlands. Unless the water recedes very fast the entire cotton crop in the overflowed district will be spoiled.

—The will of the late Francis W. Tracy, husband of Agnes Ethel, was on Tuesday filed for probate at Buffalo, N. Y., Mrs. Agnes Ethel Tracy, Warren Bryant and John Uwayland are named as executors The public bequests aggregate $100,000, as follows: Buffalo Orphan Asylum, $10,000; Church Charity Foundation, $10,000; Buffalo Historical Society, $10,000; Buffalo General Hospital, $20,000; Young Men's Association, $10,000; Buffalo Fine Arts Academy, $20,000; Home for the Friendless, $10,000; Buffalo Catholic Institute, $10,000.

—Judge Hanna, of the Orphans' Court, on Monday last, filed an adjudication of the account of the executors of the estate of Wm. D. Frishmuth, who died in October, 1885. Under the testator's will the estate, amounting to over $235,000, was left in trust for the benefit of his widow and children. Dr. J. Solis Cohen's bill of $70 for medical attendance was allowed, but a bill of $85 for services of his assistant, Dr. S. Solis Cohen, was rejected, the Court holding that the latter had not been employed by the testator or his family.

—In the United States Supreme Court, on Monday, 19th inst., the following decision was rendered in case No. 202, John Dobson et al., appellants, vs. John Dornan et al., etc., an appeal from the Circuit Court of the United States for the Eastern District of Pennsylvania: Final decree reversed, with costs, and cause remanded, with directions to disallow the award of damages and to award six cents damages, and to allow the defendants a recovery from their costs after interlocutory decree, and to the plaintiffs a recovery for their costs to and including interlocutory decrees. Opinion by Mr. Justice Blatchford.

—The Board of Health on Thursday discussed a resolution presented by Dr. Ford to the effect: That a committee of examiners, consisting of two members appointed by the Master Plumbers' Association and one by the Board of Health, be authorized to examine applicants for the positions of chief inspector and inspectors of house drainage and plumbing under the regulation of the Board governing the subject, and report to the Board the names of all those having passed a satisfactory examination. And, that the appointment of chief inspector and inspectors of house drainage and plumbing be made only from among those who have passed a satisfactory examination as certified by the Committee of Examiners. There was a warm discussion and the resolutions posponed for one week.

—An adjudication was on the 19th inst. filed by Judge Hanna in the Orphans' Court of the third account of the executors and trustees of the estate of William J. Caner, who died in April, 1873. The balance on hand, consisting of cash, securities and assets, amounting to $930,685.56, is derived from the testator's residuary estate, which by his will was left in trust for the benefit of his son, Harrison K. Caner, with certain limitations. The amount on hand was awarded to and directed to be retained by Jas. S. and Richard S Mason, William I. Blanchard, Andrew H. Miller and Theodore E. Wiedersheim, the present trustees, to be applied to the trusts and provisions of the will. The decedent was a member of the well-known firm of James S. Mason & Co., manufacturers of blacking.

—Judge Pardee on Saturday, 17th inst., in sentencing the strikers held at Dallas, Tex., by the United States authorities, declared that the Receivers of the Texas Pacific Railroad and property of the company in the custody of the Court are entitled to and must have the full protection of the Court. If any employé of the Receivers has a grievance he can bring it before the Court, and the Court would see justice done. "Labor organizations are," the Court says, "lawful and generally laudable, but they have no legal status or authority, and stand before men and the law on no better footing than social organizations, and it is preposterous that they should attempt to issue orders to free men. No man can stand in a Court of justice and shelter himself behind any such organization from the consequences of his own unlawful acts."

—Miss Priscilla B. McClure, of Harrisburg, Pa., is charged with having forged notes to the extent of $10,000. Three of the Harrisburg banks are the sufferers. The lady had the entree to the best society and was generally held in high esteem. The names used as endorsers were her mother, Margaret McClure, and brother, William McClure, of this city, and cousin, Shuman Furth, of Bellefonte, all of whom are the best of security. They deny the endorsements. The money was obtained in February last, at which time she left the city. The notes fell due a few days ago, when the forgery was discovered. Miss McClure is highly connected, herself and mother, the latter a widow, being in good circumstances. She was one of the leading young ladies in Pine street church, and was looked upon as modest and unassuming. It is believed there is a man interested in the case.

BUILDERS' ITEMS.

Among the Builders and Real Estate Agents.

MR. HURST is building a fine dwelling at Wayne and Decatur streets, Germantown.

G. F. PAYNE & Co., builders, are making extensive alterations, adding new bed-rooms and water closets to the Eye Hospital. Mr. James A. Munday has charge of the plumbing.

THE University at West Philadelphia is pulling down and rebuilding Nos. 29 and 31 North Seventh street, replacing it by a five story building (for rent). Kisler and Orein are the builders.

MR. ROBERTS is putting up at the corner of Seventeenth and Jefferson, four dwellings, four on Jefferson street and twelve on Bouvier street. Three stories, ornamental brick and brown stone. Mr. J. H. Lyon has the plumbing.

J. H. LYONS and CHAS. W. HENRY are erecting eighteen three-story houses on Twenty-fifth street, nine on Brown and Twenty-fifth streets, and thirty-six on Taylor street (two stories). They are of brick and brown stone with ornamental bricks and Dr. Filbert's sidewalk. The sanitary arrangements throughout these houses are of the best and their interiors are of hardwood finish. Mr. J. H. Lyons is the sanitary engineer for them

E. F. DURANG, 1200 Chestnut street, is putting up buildings for Little Sisters of the Poor, corner of Fullerton and Sheffield avenues, Chicago; cost, $40,000. Also, stabling for the same, 24x90; cost, $8,000. Also, improvements and additions to the new St. Joseph's Protectorate, Norristown; cost, $10,000. Also, Reading Academy of Music, Fifth street, Reading, Pa.; cost, $40,000; size, 80x130. Also, Fredericksburg Academy, Lebanon county, Pa., for the Schuylkill Seminary, main building 75x75, with wing 40x80, three stories high and mansard story, built of stone and brick; cost, $30,000. Also, a large new building to be added to the Eagle Hotel, Lebanon, Pa., the property of Josiah Funk, Esq., size 50x130, built of brick, four stories high and mansard roof; cost, $25,000. Also, store or business building on Locust street above Second, Columbia, Pa., for Messrs. Haldeman, size 35x162; cost, $11,000. Also, new building for the Keystone State Normal School, Kutztown, Pa., three stories, basement, dining hall, chapel and dormitories, size 56x130, built of brick; cost, $30,000. Also, frame Church of St. Monica, Atlantic and California avenues, Atlantic City, size 56x130; cost, $11,000. Also, two cottages on United States avenue, Atlantic City; cost, each, $4,000. Also, new Church of St. Joseph at Ashland, Pa., to be built of brick, 48x96; cost, $16,000. Also, new church, as Mission to St. Peter's Church, Reading, brick, 40x80; cost, $8,000. Also, building of stone, 60x80, three stories high, at Glen Riddle; cost, $15,000. Also, Beacon Presbyterian Church, built of stone, with dome, 60 feet diameter in centre by 90 feet high; size of building 90x120, with rear building 90x40, located upon Cumberland street near Cedar; cost, $60,000.

T. GORHAM, 3852 Lancaster avenue, is very busy in general jobbing and is about to erect three houses in the neighborhood of Thirty-fourth and Wallace streets.

J. M. PULLINGER, 3955 Lancaster ave., cannot supply the demand for small houses. People seem crazy to get new houses and are willing to pay more rent for the same.

DENT & KERN, 3959 Lancaster ave., have a large rental list, but have no vacant houses. They think that capitalists could do no better than invest their money in West Philadelphia as houses remain idle no time.

F. H. MCCANN, 3511 Lancaster Avenue:—Has sold three houses on Girard ave. west of Fifty-first street, one at $2,500, and two, furnished, at $2,700. The demand for four-roomed houses is very great. Sold the house 3806 Spring Garden street for $5,300. Prospects are decidedly bright.

Among the Plumbers.

SHAW & Co., of Germantown, are doing the plumbing of 17 houses for Mr. McKnab, on Walnut Lane.

CHAS. JAHN, of Germantown, is doing the plumbing of ten houses for Mr. Paxton, on Colter and Main streets.

W. J. ROBINSON, Germantown, has the plumbing of four houses for James Kinnier's Son's, builders, at Mill and Chew streets. Also, three for George Hurst on Penn and Wayne streets.

HAINES, JONES & CADBURY, Ridge ave., are supplying the plumbing material for 176 houses in Camden, for Ernest Wilson. They will in a few days put on the market a new sanitary closet, which we will fully describe in our next issue. It is called the "Chalfonte."

MESSRS. STAMBACH & LOVE, North Seventh street, have made all preparations for a good summer trade and are ready to supply anything in the plumbing line. Mr. Stambach has just completed his catalogue which contains 1,085 cuts and has 250 pages. One of the great advantages in this book is that the prices are not attached as in other catalogues, but separate price lists are sent out with them and will be duplicated when market prices change. Another feature, the catalogue may be shown around without giving away the wholesale prices.

JAMES A. MUNDAY, 213 South Ninth street, is doing some extensive alterations and additions in the sanitary department of the Eye Hospital on Race street. Also, putting in and rearranging sanitary plumbing in hotel at Asbury Park; also, doing plumbing for two large cottages at Atlantic City, with the most improved systems; also doing plumbing work for a row of houses on Thirteenth street below Diamond, for Mr. Price; also, 23 houses (3 stores) for Mr. Lomax, Eleventh and Somerset streets. Mr. Munday is estimating on several very extensive operations and is anticipating big business. His new spacious show room will be ready about the 1st of May.

Lumber Notes.

The fiscal year of a good many lumber houses ends April 1, and numerous sets of books are being closed up for the year. The average profit and loss account is not satisfactory to the man who has had his brains and his dollars back of the average lumber jobbing house during the past twelve months. None of them claim to have made any large profits and very few will acknowledge any loss.

It is probable that if free trade in lumber were established between the United States and Canada, the price of the better grades of lumber would be raised to the consumer in Nebraska, Dakota and Minnesota. The field of distribution would be widened by the opening of Manitoba, while the available supply would not be increased. Transportation, in such a bulky commodity as lumber, is sometimes a ruling factor, and obliterates almost all others.

A prominent yard dealer of this city is authority for the statement that the lumber trade of New York amounts to between $60,000,000 and $65,000,000 yearly, and exceeds in volume the cotton trade.

There are in this city at the present time 225 firms and individuals actively engaged in the lumber traffic, and the combined capital invested is not less than $30,000,000.

Reports from nearly all points this week are to the effect that a slight depression has fallen on the lumber trade since April 1, caused partly by the southwestern railroad strike, and the general discontent in the ranks of labor, and partly by the unseasonable weather that has prevailed over a large portion of the country. In the East actual and threatened labor difficulties have frightened capitalists like a nightmare.

Lumber dealers have been less affected by the past three years of depression than handlers of many other commodities, because capital which was withheld from many lines of investment was put into real estate improvements. But if the mutterings along the horizon harbinger a coming storm building interests will this year suffer along with others. With brick makers and layers, carpenters, stone cutters, and workmen in the planing mills demanding higher wages or a shorter day, the cost of building will be so increased that capital will be frightened away from that method of investment. Certainly the development during next month will determine the character of business for the remainder of the year.

The Building Trades Councils.

The Building Trades Councils met on Thursday evening at Philopatrian Hall and adopted a constitution and elected the following officers: President, James Dey; Vice President, John L. Duffy; Secretary, Chas. C. Burley; Treasurer, P. F. McGough; Trustees—Samuel Whitman, Thomas Barney, and Hugh J. Donnelly; Sergeant-at-Arms, Jas. Keenan.

Committees from the new Lathers' Union and the Assembly of Knights of Labor composed of wrought iron workers were present to learn the objects of the Council.

A clause was inserted in the constitution providing that the Council shall not order out any body of men except with the consent of a majority of the delegates.

Agreement among the Bricklayers.

At a meeting of the employing bricklayers, last Friday, in Marble Hall, on Seventh st. below Poplar, it was resolved that on and after today they would pay journeymen bricklayers 39 cents per hour and hod carriers 25 cents per hour. A committee of the journeymen bricklayers had previously waited on the employers, and informed them that they were willing to be paid by the hour at the rate of $3.50 per day. This action was rendered necessary because of the agreement that nine hours should constitute a working day—five hours in the morning and four in the afternoon. It would be difficult under the circumstances, the employers say, to fix upon in any other way fair compensation for the work of a fraction of a day.

The Brick Trade.

From the partial review which we have made of the brick interest of Philadelphia, it is evident that there will be no trouble over insufficient supplies. Just at present, however, several contractors are complaining of slow deliveries, but the brickmakers say this will be gotten over in a few days and that the fullest possible requirements of the city will be supplied with all kinds of brick from the very finest to common. Fortunately the selling prices are no higher than last year, and the margins are sufficient to lead makers to extend their capacity in several cases. In two cases capacity will be doubled this year; in four or five it will be increased one half, and in the case of nearly every manufacturer some additional capacity will be added. This looks well for the brickmaking interest of Philadelphia. Other sections are doing no better. In the brick fields of New Jersey and New York States a great deal of money has been invested within a year or two.

The Master Plumbers.

The fourth annual convention of the National Association of Master Plumbers of the United States, will be held June 22, 23 and 24, 1886, at Deer Park, on the B. & O. Road. In fixing upon Deer Park as the place of holding their convention, an ideal centre of assemblage has been reached. Viewing it from the standpoint of professional intercourse, no more advantageous point could have been selected. Fully as strong are its attractions for social intermingling. The Grand Hotel which has just been thoroughly renovated, looks bright and fresh and will be the source of much enjoyment.

The Master Plumbers' Association, of Philadelphia, appreciate highly the donation of drawings from Mr. Rudolph Hering and wish him every success in his Chicago undertaking, and feel that the city will be benefitted by his valuable services.

The Trade School Committee past a resolution suggesting that the pupils form a society amongst themselves—which they immediately fell in with—and sent invitations to all those who had attended the trade school, which was quickly responded to and a school formed. Great interest is taken in this enterprise and great results are looked to arise from it. They will continue to use the Master Plumbers' rooms and library.

Building Permits.

One third-story addition, 16 ft. by 32 ft., 923 S. Eighth st., to Peter Tunozzella, same place.

One two-story house, 16 ft. by 28 ft., Division above Jefferson st., to Ann Carlin, 4700 Washington st.

Nineteen two-story houses, 16 ft. by 40 ft., Forty-second and Brown sts., to Fred. L. Michaelsen, 3825 Fairmount ave.

Front alteration, 11 ft. by 14 ft., 306 North Twentieth st., to John Baxter, 728 N. Twentieth st.

Third-story addition, 16 ft. by 32 ft., 522 Christian st., to Joseph Tapotena, 522 Christian st.

Front alteration, Ridge and Girard avenues, to D. M. Mureriller, 2132 Wood st.

One-story back building, 7 ft. by 10 ft., 1003 Olive st., to Wm. Devitt, 1125 Brown st.

Seven two-story houses, 15 ft. by 40 ft., Wharton above Thirty-second st., to James Kerns, 519 South st.

One one-story stable, 12 ft. by 16 ft., 518 Redwood st., to George Lodge, Third and Federal sts.

One two-story store, 10 ft. by 22 ft., 911 Carpenter st., to Jas. Park, Ninth and Carpenter sts.

One two-story stable, 16 ft. by 80 ft., Watkins above Tenth st., to Patrick A. Moran, Tenth and Watkins sts.

Alteration and addition, 16 ft. by 24 ft., Race above Twenty-first street, to John A. Decker, 660 Union st.

Twenty-six two-story houses, Lehigh ave. above Jasper st., 14 ft. by 40 ft., to M. Matty, 1545 Hutchinson st.

A two-story frame house, 30 ft. by 50 ft., Darby Road, above Cobb's Creek, to L. G. Dutton, Seventieth st. and Paschal ave.

Three three-story stores and dwellings, 18 ft. by 42 ft., Fortieth above Market street, to Henry Donohue, 3965 Market st.

Four two-story houses, 14 ft. by 36 ft., Tioga above Mathers st., to J. L. Tomlinson, Sixteenth and Tioga sts.

One two-story house, Estaugh above Twenty-first st., 13 ft. by 25 ft., to same party.

Three two-story houses, 12 ft. by 30 ft., Lea st. above Allegheny ave., to Frank Dietrich, 2735 N. Front st.

Two two-story houses, 12 ft. by 30 ft., Front st. above Allegheny avenue, to same party.

Two three story houses, 28 ft. by 40 ft., Penn above Main st., to Geo. Hearst, School lane and Morris st.

A two-story stable, 28 ft. by 43 ft., School lane above Main st., to same party.

Two outhouses, 12 ft. by 24 ft., Cambria above Eleventh st., to S. B. McDowell, 2147 Woodstock st.

Three outhouses, 20 ft. by 36 ft., Cambria above Eleventh st., to same party.

One-story addition, 9 ft. by 15 ft., 137 East Orthodox st., to Alfred Gray, 4838 Mulberry street.

Two two-story houses, 17 ft. by 60 ft., Park and Montgomery aves., to Charles Martin, Cumberland above Memphis st.

One addition, 11 ft. by 14 ft., Sixth above Master st., to J. B. Bennett, 2921 Norwood avenue.

A two-story school building, 45 ft. by 102 ft., Third and Dauphin sts., to Alexander T. Richards, 1512 Otis st.

Three-story dwelling, 16 ft. by 16 ft., 2339 Virginia st., to J. Wilson & Sons, 1222 North Eleventh st.

One three story store and dwelling, 16 ft. by 55 ft., 1504 S. Twentieth st., to Wm. McHenry, 2034 Dickinson st.

New front, 16 ft., 2119 Fitzgerald st., to B. Harvey, same place.

Five three-story brick house, 16 ft. by 60 ft., Jefferson above Seventeenth st., to same party.

M. McHenry, 2054 Dickinson st., three-story store and dwelling, 1504 S. Twentieth st., 16 ft. by 55 ft.

Rea & Riley, 629 Filbert st., one-story addition, Sixth near Arch st., 11 ft. by 8 ft.

J. Wilson & Sons, 1222 N. Eleventh st., five-story house, 2339 Virginia st., 16 ft. by 16 ft.

A. T. Richards, 1512 Otis street, two-story school, Third and Dauphin streets, 45 ft. by 102 ft.

C. Steiner, Columbia ave. and Randolph st., bay window and outhouse.

E. Lewis & Co., 4700 Frankford ave., one-story frame building, Paul st. near Tacony, 9 ft. by 34 ft.

J. B. Baserett, 2921 Norwood ave., additions, Sixth st. near Master, 11 ft. by 14 ft.

C. Martin, Cumberland st. near Memphis, two two-story houses, Park ave. near Berks st., 17 ft. 6 in. by 60 ft. 8 in.

J. Conrad, 2553 N. Fifth street, two-story building, 11 ft. by 12 ft.

A. Gray, 4838 Mulberry street, Frankford, one-story addition, 1137 E. Orthodox st., 9 ft. by 15 ft.

C. A. Axemoth, 441 N. Fourth street, two-story kitchen and bath-room, 808 Nectarine st., 9 ft. by 8 ft. 3 in.

F. Heidler, 1227 N. Third st., alterations, 18 ft. by 43 ft.

S. B. McDowell, 2147 Woodstock st., one-story boiler-house, two-story dry-house and one-story dye-house, Cambria st. near Eleventh, 20 ft. by 36 ft., 20 ft. by 38 ft., and 38 ft. by 106 ft.; also, staircase, elevator, yarn-house and shed, Cambria st. near Eleventh, 12 ft. by 24 ft., 58 ft. by 68 ft., and 58 ft. by 56 ft.

S. A. Boyd, 3719 Baring street, one-story kitchen, 12 ft. by 14 ft.

G. Heurst, School lane near Morris street, two-story stable, School lane near Green st., 28 ft. by 43 ft.; also, two three-story houses, Penn st. near Knox, 28 ft. by 40 ft., and 31 ft. by 58 ft.

F. Dietrick, 2735 N. Front street, two two-story houses, Front st. near Allegheny ave., 12 ft. by 30 ft.; also three two-story houses, Lee street near Allegheny avenue, 12 ft. by 30 ft.

Four two-story brick dwellings, E. s. Fifty-seventh st., each 12 ft. by 28 ft. to A. P. Anderson, 57 Chelsea.

One two-story building, W. s. Ridge ave., between Seventeenth and Eighteenth sts., 14 ft. by 20 ft., to A. C. Patterson, 2019 Parrish st.

J. L. Tomlinson, Sixteenth st. near Tioga, two-story house, Estaugh st. near Twenty-second, 12 ft. by 25 ft.; also four two-story houses, Tioga street near Sixteenth, 14x36 ft.

Twenty-four three-story brick stores and dwellings, E. s. Germantown ave., between Somerset and Somerville sts., 16 ft. 6 in. by 55 ft., to Wanders Bros., 2641 Germantown avenue.

Two two-story brick dwellings, S. s. Wilmington st., between Kensington ave. and Jasper st., each 15 ft. by 40 ft. to S. H. Brown, 1815 E. York st.

Thirty-two two-story brick dwellings, thirteen E. s. Fourth st., seven S. s. Indiana st., thirteen W. s. Orianna st., each 14 ft. by 40 ft., to Thos. H. Flood, 2747 Frankford ave.

Hanging bath at 3019 Richmond st., 2 ft. by 9 ft., to Jas. V. McGawry & Son.

Four two-story brick houses, W. s. Lawrence st., between Butler and Pike, each 12 ft. by 32 ft., to Anton Weiss, 3829 N. Fifth st.

One two-story dwelling, N. s Orange st., between Palmer and Hanover, 14 ft. by 34 ft., to A. McClay, 1620 Salmon st.

One-story addition, 24 ft. by 87 ft., Arch st., between Fifth and Sixth sts., to Raw & Riley, 627 Filbert st.

One four-story factory, 35 ft. by 30 ft., Cherry below Broad st., to S. W. Hopkins, 1432 Vine st.

One three-story back building, 14 ft. by 34 ft., 717 N. Eleventh st., to same party.

Front alteration, Third st. and Fairmount ave., to John Cunniff, 450 N. Twelfth st.

Four three-story dwellings, 13 ft. by 28 ft., Swain and Fowler sts., to J. H. Jordan, 2431 Jefferson st.

Front and interior alterations, 18 ft., 1204 S. Seventh st., to Henry C. King, 1520 Godfrey ave.

A two-story store and house, 20 ft. by 32 ft., Main below Green st., to Amos H. Taylor, 4708 Paul st.

One two-story back building, 12 ft. by 22 ft., 911 S. Front st., to John G. Woygt, same place.

Front alteration, 13 ft. by 28 ft., 1902 Alter st., to Jas. F. Conway, 500 South st.

One two-story dwelling, 18 ft. by 28 ft., 2068 Moore st., to Frank Shelbig, 265 Diamond st.

One two-story stair-building shop, 25 ft. by 40 ft., West side of Marshall st., near Cambera st., to Daniel Adams, 1961 North Ninth st.

For alteration to house Northeast corner Master and Fifty-first streets, to Thomas H. Burrows, 5127 Kershaw ave.

Five stores and dwellings, one of them at the corner of Eighth street and Huntingdon ave., with frontage of 15 ft., one next door, 14 ft. 5 in., the other three adjoining, each 14 ft., to Amos D. Kennedy, 2100 North Sixth st.

One three-story store and dwelling, 22 ft. 9 in. by 61 ft., 619 Passyunk ave., to Michael Higgins.

Two three-story houses, 14 ft. 7 in. by 30 ft., Collar st., south of Girard ave., to Pauline Lehmann, 833 North Third st.

Alteration to front of 1912 Columbia ave., to A. L. Clarke, 1633 Gratz st.

Four three-story houses, 16 ft. by 38 ft., Twenty-fifth and Evergreen sts, to John Hatterstein, Chestnut Hill.

One three-story addition to No. 34 Rosette st., 16 ft. by 16 ft., to Samuel Junkirrth, 34 Rosette st., Germantown.

One three-story dwelling, 18 ft. by 18 ft., East side of Adam st., near Tulip st., to John S. Baldt & Son, 2014 Clementine st.

One three-story store and dwelling, 17 ft. by 32 ft., Northwest corner of Thompson and Hanover sts., to same.

Seven dwellings, each 16 ft. by 40 ft., Southeast side of High st., 480 ft. East of Morton st., Germantown, to D. P. Brunei, High st.

A new front to 824 Burnes st., to George Burton, contractor, 2218 Cedar st.

Loss of Wages.

The concluding portion of the report of Joseph Weeks, of the Census Bureau at Washington, states that under the title "Loss of Wages" are given returns from 226 strikes, which show the number of days of idleness in those strikes to have been 1,989,872. This would give an average of 8,805 days lost at each strike. Assuming this as an average, we should have the number of days of idleness, as for one man, in 762 strikes, 6,709,410. Assuming 300 as the average number of employés idle at each strike, it would follow that the number of days during which each of the 228,138 men was idle by reason of strikes and lockouts was 27.

The report concludes: "As to wages lost, it appears that 64,779 employés lost $3,711,097. This would be at the rate of $57 each. As the entire number of employés estimated was 228,138, the total loss of wages on this average would be $13,003,866; that is, for the time lost, the wages which would have been received had the works run constantly is the amount named. Of course, there would be a number of offsets to this. In case the strikes were successful, the additional wages would compensate for a portion of this loss. In other cases where unionism existed in the trades in which there were strikes, the men received strike pay or strike benefits; but these strike benefits were in most cases simply refunding money that had been previously paid.
